The Housekeeper

To remove vaseline stains, try turpentine. If that fails, sponge them with ether.

To remove paint from dress fabrics place a white blotter underneath the spot and rub with benzine.

Salt on the fingers when cleaning fowl or fish, will prevent slipping, and a little vinegar on the hands will prevent odor.

Crackers with grated cheese put in the oven and browned, are good served with a salad.

If eggs are placed in hot water a few minutes before breaking, the whites will separate from the yolks very easily. They should be cooled before starting to whip the whites.

To restore velvet spotted by rain or snow, steam the whole surface to make the shade even. Do not brush before steaming. The velvet will look darker at first, but it will become lighter in the open air.

To make a lotion for chapped hands, mix together one-half ounce of glycerine, two ounces of rose water and one-half dram of benzoin.

Wine stains which have dried on the tablecloth or napkin should be touched with a few drops of whiskey before the linen is sent to the laundry.

To remove paint from glass, dissolve some washing soda in very hot water and wash the windows with it, using soft flannel, or rub a dime briskly over the stain and then wash with turpentine.

To take tea and coffee stains of long standing out of a fabric apply a mixture composed of the yolk of an egg stirred in a cup of tepid water, to which a few drops of glycerine have been added. Rub the mixture well into the stain, then wash thoroughly with warm water.

To clean white leather belts rub powdered borax in, gently, with a piece of white flannel.

To remove lampblack stains wash with kerosene and wipe with a dry cloth; then wash in soap and water to remove the kerosene.

Castor oil applied to a wart two or three times a day for a week will cause it to disappear.

When putting the paper or oilcloth on pantry shelves, use thumb tacks instead of the ordinary tacks and you will make a better job of your work.

Avoid Harsh Pills!
Doctors Condemn Them

Most Pills unfortunately are harsh and drastic; they cause inflammation and great discomfort. Rather like nature is the way a pill should act, mildly, but effectively. Science has established nothing more satisfactory as a family pill than the old reliable pills of Dr. Hamilton, which for forty years have had a premier place in America. Dr. Hamilton's Pills are very mild and can be effectively used by the aged, by children, and indeed by men and women of all ages. No stomach or bowel medicine is more reliable. No remedy for indigestion, headache or billousness is so effective, so mild, so certain to quickly cure as a 25c. box of Dr. Hamilton's Pills.

MURDERERS IN COMFORT.

(Buffalo News.)

There are few things that tend more to exasperate citizens struggling hard to make a living, than to see an array of murderers supported for life in warmth and comfort, deprived, it is true, of their liberty though that may be regarded as precious to the honest and the industrious citizen, it counts for little with the hardened soul that takes the life of another while in the pursuit of crime, especially as it means only a fe wyears of restraint as a rule.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

TYPHOID SERUM'S WORK.

(Buffalo News.)

Not so many years ago typhoid fever was the great foe of the U. S. medical corps. It penned the saddest chapter of the Spanish American war. The years of peace that followed averaged from 500 to 1,000 cases of typhoid through the army numbered less than 85,000 men.

For the past three years typhoid has literally been wiped from the list of possible diseases. Last year, in the entire army, there was but one case of typhoid, that of a recruit who, beyond question, contracted typhoid before entering the service. Nothing remains to be learned of the serum except the length of time it establishes immunity.

In view of this remarkable record it is singular that any person should oppose its use or be indifferent to its benefits.

Catania, Spain, is a large producer and exporter of essential oils.

POTATOES AS FOOD.

At First Only the Seed of the Tubers Was Thought Fit to Eat.

When potatoes were first used for food it was the "seed" or "apple" that was used, and it was some time before the tuber was found to be the most delicious food. Up to the end of the seventeenth century the potato was out of the reach of people with modern incomes. It is recorded that in 1662 potatoes were sold at one shilling (25 cents) a pound in London markets, but the sale was small because so many people believed that the potato caused leprosy and fever. Others declared that they were endangering their souls if they ate the potato, since the tuber was not mentioned in the Bible.

The late Duke of Argyle in history of Scotland says that little or nothing was known of the potato in Scotland until long past the middle of the eighteenth century. The Duchess of Buccleuch, in her "Household Book" for the year 1701, speaks of the potato as "an esculent of great rarity."

Hugh Miller, in his "Schools and Schoolmasters," says that his maternal grandfather about the year 1740 used to bring home in his pocket some three or four potatoes as great rarities grown by the gentry, for he was a friend of the head gardener at Balnagown castle. Thomas Carlyle tells us that his father got possession of four potatoes and knew so little about them that he hid them away for a possible time of want and the potatoes were saved to be eaten Hallowe'en. There is no doubt that the Irish were the first people to recognize the value of the potato as a staple article of food.—Youth's Companion.

THE BEST MEDICINE FOR LITTLE ONES

Baby's Own Tablets are the best medicine in the world for little ones. They are absolutely safe and never fail to regulate the stomach and bowels, break up colds and simple fevers, expel worms and make teething easy. Concerning them Mrs. D. S. Bernhardt, Port Dalhousie, Ont., writes: "I have been using Baby's Own Tablets for my baby and would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wellington's Reticence.

Wellington's reticence once drew a protest from Lord Uxbridge, the brilliant cavalry leader, who lost a leg at Waterloo and became Marquis of Anglesey. On the eve of the great battle Uxbridge, although next to Wellington in command, knew nothing of his chief's plans for the morrow's battle. With trepidations he approached the Duke. If Wellington were killed Uxbridge would become commander-in-chief. What was the plan? The duke listened patiently, "Tell me, Uxbridge, who will attack the first to-morrow—I or Bonaparte?" "Undoubtedly Bonaparte." "Well, Bonaparte hasn't given me any idea of his projects, and as my plans depend upon his plans, how can you expect me to tell you mine?" Uxbridge bowed, and was about to retire, when the duke added in the friendliest way, "There's one thing certain, Uxbridge, whatever happens, you and I will do our duty."

USES OF THE LEMON.

A little lemon juice added to the pastry crust will make it much lighter.

To clean brass that is very discolored, rub well with lemon; then clean with metal polish. This applies especially to gas brackets that are burnt.

* * * *

An excellent health rule for bright eyes and a clear skin is to take the juice of a lemon in a glass of water, with a dash of salt added. This acts directly on the liver, which has more to do with good looks than most of us imagine.

Minard's Liniment Cures Dandruff.

SLUMS AND THEIR EVILS.

(Montreal Star.)

As the years go by students of municipal economy are devoting greater thought to the problem of improving housing conditions. It is very clearly realized now that a man's dwelling exerts a marked influence on his life and character; more especially is this true in the case of women and children.

Bad housing conditions affect health, lower vitality, and slowly undermine hopes and ambitions for better things. An unsanitary house is a standing invitation to disease. Scientists have demonstrated that a germ of pulmonary tuberculosis can live for years in an ill-ventilated, dark and noxious room. The bacillus of typhoid may not only be conveyed through the water or the milk, but it may also be carried by flies and vermin, from the filth from which it is deposited to the food of adjacent tenements. The tenement houses with their halls, stairs and closets, shared by many families, become a fruitful source of contagious diseases.

"Donkey Ears" For Swell Dresses

"Donkey-ears" are not worn exclusively by—er—er—by four-footed creatures. Fashion has pinned a pair on the chappy-boy of 1915.

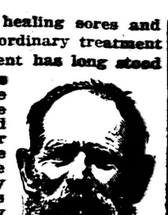
The chappy, owever, wears his "donkey-ears" on the lapels of his new single-breasted coat and they are no indication of his family connections. The "donkey-eared" coats are built upat the shoulders to give a military air to the wearer.

Copper ore has been discovered in the Westmanna islands, which lie south of Iceland.

Justice of Peace Praises Dr. Chase's Ointment

After Nine Years of Agony He Escaped an Operation by Using This Great Healing Agent.

As a means of healing sores and wounds that defy ordinary treatment Dr. Chase's Ointment has long stood supreme. It is known far and wide as a positive cure for eczema and piles. Whatever uncertainty there may be about the results obtained by the use of medicines taken internally there can be no question of the healing of the skin when Dr. Chase's Ointment is applied.



MR. HEATH.

You can actually see with your own eyes just what takes place. The sore parts are cleansed, and gradually the new skin is formed and the sore becomes smaller and smaller, until it finally disappears. It is often wonderful the results which are accomplished in a single night by the use of this great healing ointment.

Mr. N. A. Heath, J.P., Fitch Bay, Que., writes:—"Nine years ago I was taken with an abcess, and cannot begin to describe what I have suffered as a result. I was examined by two doctors, both of whom said I would have to undergo an operation to be cured. Thanks to Dr. Chase's Ointment, it has rendered an operation unnecessary, and has completely cured me. I cannot say enough in praise of this wonderful ointment which cured me after nine years of agony."

Dr. Chase's Ointment, 60c a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

"Hoist With His Own Petard."

The one sort of metaphor that ought not to get mixed in a history of the war is a military metaphor. However, when histories of the war begin to appear a fortnight after the war begins either the writer or the printer has to set down much in haste. That no doubt explains why we read in one of these headlong histories that Germany at a certain point of her diplomatic career "found herself hoisted on her own petard." The writer (or printer) must have thought that a petard was a sort of elevator. Shakespeare, who coined the immortal phrase, was amused by the idea of the military engineer, "hoist with his own petard"—that is, blown up with his own bomb. A petard was a sort of bomb used for such work as blowing in gates or doors.

Sore Corns Go!

Absolutely Painless

No cutting, no plasters or pads to press the sore spot. PUTNAM'S EXTRACTOR makes corns go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of PUTNAM'S CORN EXTRACTOR to-day.

"CRIMINALS IN THE MAKING."

(Chicago Tribune)

The capture and confession of the boy "auto bandits," whose sensational exploits the other day amazed the city, furnish another illustration—if one be needed—of the tragic truth that, in the words quoted in these columns not long since from a report by Prof. Gault of the Northwestern university, juvenile delinquents and street idlers and loafers are "criminals in the making." What a simple and familiar story, after all! Poolroom talk, vicious surroundings, a chance remark by a professional offender, ungratified instinct for sport and excitement, misdirected animal spirits, and a bunch of boys become a clique of bandits.

Function of Literature.

"A book," said Dr. Johnson, "should show one either how to enjoy life or to endure it." Was ever function of literature expressed more pungently or justly? Any man who enjoys or endures has a right to speak if he can. If he can't help others to enjoy or endure he has a right to speak, if he doubts as to his part in life, while if he cannot ecstatically enjoy he can at least good humoredly endure.—A. C. Benson in Century Magazine.

At Boston, five thousand unemployed men and women stormed the stage entrance of a theatre in answer to advertisements calling for 100 men and a few women to act as "supers." During the rush two of the men fainted from exhaustion. Coats were torn, hats were broken under foot and the police had to be called to stop the confusion when the stage door was opened. The hundred or more women had kept apart from the men and were not in the rush.

TOUCHES THE STATES.

(Buffalo News.)

When President Wilson says "Let us go our usual way; the war does not touch us," he confesses astigmatism.

The war is touching us.

There is scarce a way which we may turn that does not reflect a sinister reminder of what is going on beyond seas.

Perhaps it is because President Wilson does not mingle like the ordinary citizen with the people of every day. He would then see the countless abrasions war is making on our social body.

Scanning the bulletin board in front of the News building, almost any hour of almost any day, may be seen a man who wears the Victoria Cross, pinned on his breast years ago by his beloved Kitchener. The vision of three sons in the trenches gives the bulletin a strange fascination for him.

The front window of a Main street cafeteria is "Tipperary" for some sturdy chap at the far-off front. After the hurry of the noon hour an Irish girl looks out over the skyline and speeds her hopes off yonder—somewhere—with the same uncertainty he raises his rifle and sends a bullet over the treetops—somewhere.

Down in the Italian section the reservists gather nightly, to discuss the prospects of being called and pledge their king, patriots all of them.

In the clubs the manufacturers gather and compare "war orders" and speculate on the end of the conflict that has brought ruin or fortune to them.

Among the Germans the postman goes, leaving good tidings here and saddened hearts yonder. There is sorrow for a spell, an old photograph of the youngest brother is brought from the treasure chest, there is a dwelling with old memories and an offering to the Motherland, and things go on not quite as they were before.

Yes, Mr. Wilson, the war does come close to us. It touches every side of our many-sided lives, every day.

Minard's Liniment Co., Limited.

Gentlemen,—My daughter, 13 years old, was thrown from a sleigh and injured her elbow so badly it remained stiff and very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has not been troubled for two years.

Yours truly,

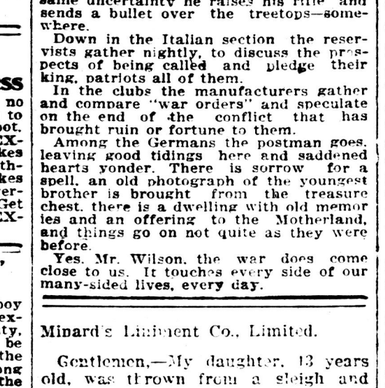
J. B. LIVESQUE,

St. Joseph, P. O., 18th Aug., 1900.

The Rosses of Cocos Island.

In 1910 the Cocos Islands contained nearly 1,000 inhabitants, representing a wide variety of races—Malays, Chinese, Negroes, Hindus, East Indians and Papuans. Each successive ruler of the islands has married a Malay wife, so Sydney Ross, the present King, is only one-quarter white. Like his predecessors, however, he is a staunch Presbyterian; and in spite of the fact that most of his subjects are Moslems, the Ross influence has been so great that polygamy is unknown among them.

Many a married man wouldn't mind being tongue tied if he could only have a free foot.



Beautiful Walls For Your Home Sanitary, Fire-Proof, Inexpensive

Make your home more attractive, and protect it from fire with these beautiful, sanitary

"Metallic" Ceilings and Walls

They will out-last the building and are very inexpensive. They can be brightened from year to year with a little paint at a trifling cost. Made in innumerable beautiful designs suitable to all styles of rooms. Can be erected over old plaster as well as in new buildings. Write for catalogue.

We manufacture a complete line of Sheet Metal Building Materials. 9

THE METALLIC ROOFING CO., LIMITED
Manufacturers
King and Dufferin Sts., TORONTO 797 Notre Dame Ave., WINNIPEG

Wills Soul to Creator.

Like the late J. Pierpont Morgan, when Calvin W. Hunnicutt, a wealthy Atlanta citizen, came to draw his will he recognized in the preamble the merit of the atonement of Christ. Mr. Hunicutt died recently at the age of 82 and his will was offered for probate recently. The preamble says:

"I, Calvin W. Hunnicutt, do make and puglish this, my last will and testament, hereby declaring my trust in the merit of the atoning blood of the Lord Jesus Christ for the salvation of my soul, which I commit to the God who gave it."

The Hunnicutt estate, valued at a million or more, will be shared equally by five heirs.

CHEESE SAUCE ON TOAST.

2 level tablespoons butter.
2 level tablespoons flour.
¼ level teaspoon salt.
Speck pepper.
1 cup milk.
1-2 cup grated cheese.

Melt butter, add flour, stir until perfectly smooth, stir in the milk, and cook stirring constantly until it boils, add salt, pepper and cheese, stir until cheese melts; serve on pieces of toast or wafers.

SPOHN'S DISTEMPER COMPOUND

INFLUENZA

Catarrhal Fever
Pinkeye, Shipping Fever, Epizootic

And all diseases of the horse affecting his throat, speedily cured; colts and horses in same stable kept from having them by using SPOHN'S DISTEMPER COMPOUND. 3 to 6 doses often cure. One bottle guaranteed to cure one case. Safe for brood mares, baby colts, stallions—all ages and conditions. Most skillful scientific compound. Any druggist.

SPOHN MEDICAL CO. Chemists, Goshen, Ind. U.S.A.

RADIUM AND LIGHTNING.

Radium has been discovered vastly to improve lightning rods in their protection of buildings during thunderstorms. Of course the enormous cost of radium prevents any practical use of the fact as yet. But there is a very fair possibility that the information gained inthis way will lead to a new form of lightning rod which will be more efficient or that further experiments will show that a tiny quantity of radium at a reasonable cost will improve the protection.

The purpose of lightni gurods, of course is to catch the electrical currents in the air during a storm and lead them safely into the ground instead of allowing the lightning to pick its own course down through a house or church steeple, and their use is based on th eprincipie that a metal rod will give the electricity a smoother path of less resistance than ordinary building material.

The whole trouble with lightning rods now is that, though they can be made to do the trick of the electrical discharge is near them, there is no way to lead electricity through the air to the rod. Radium will do this part of the work, a shas been demonstrated by scientific experiments. Two miligrams of radium on the end of a rod made the air considerable distance away a vastly better conductor.

Thus any electrical discharge within several yards of the rod had a path open for it along the radium rays to the rod then down the rod to the earth.—Saturday Evening Post.

Sunday School Teacher—Can you tell me who dwelt in the garden of Eden?

Little May—Yes, ma'am; the 6Adamses.

"What is an amateur Bobby?" pueried his small sister.

"An amateur," replied Bobby, "is anything that isn't nature."

"Mama," puried little Myra, "do you think grandpa has really gone to heaven?"

"Yes, dear," was the reply.

"Well, continued Myra, "I'll bet he sneaks outside once in awhile to smoke his pipe."

In the lesson mention had been made of the canthook that is used for rolling logs.

"Can you tell me what a canthook is, Tommy?" asked the eteacher.

"Sure," replied Tommy. "It's a cow that hasn'e any horns."—Detroit Free Press.

DO NOT BOTHER THE EDITOR.

Every craft has its crosses One of the sore afflictions of the newspaper business, says the Emporia Gazette, is found in the fact that people generally think it's not work to get out a paper. One of the hardest jobs every editor does, though generally the pleasantest, is to read his exchanges. But it is hard work and it must be done. For the editor who gets a day or two "back" in his exchanges never catches up. And the thing that makes him maddest, though he will look up and greet the stranger with a smile who does it, is for a man to come in saying, "Well, I saw you were sitting there doing nothing but reading, so I thought I'd just pass the time of day with you!"

Remember this, you who would have business with the editor: It's all right to come in when he's reading or writing, or editing copy, but don't get it into your head that when he's reading his exchanges you have come in the idle hour. How can an editor get any ideas if he doesn't read others' ideas? Do you think he sits down and thinks 'em out of his head? Well, he doesn't. He reads a score of papers every morning, and from one or two he gets a suggestion or two. Sometimes he finds an item that makes him mad; then he writes well. Sometimes a vagrant item, a pay local, a telegraphic head, an advertisement starts a rich train of suggestion. But the sure way to wreck the train and make your paper stupid and inane is to come bustling in when he's reading the exchanges. He is doing the best work of his day.

Minard's Liniment for sale everywhere.

CANADIAN SILVER COINS.

(Detroit Free Press)

The trouble with this Canadian silver is twofold. It is often worn and defaced so that it is difficult to pass along and becomes a genuine nuisance to its unlucky possessor. And even new coins from the Dominion are practically valueless if they are carried 50 miles or more away from the boundary, because people will not take them at all except in the territory near their place of origin.

There is nothing derogatory to Canada in the effort to keep its money out of circulation on this side of the international line. If each country would trade off with the other the alien money, bills and coins that its people are passing from hand to hand, the resulting total of currency would probably be unaffected on both sides and everybody would be better satisfied. We can each take our own and have enough for all purposes.

Alleged Scottish Kings.

Jests innumerable have been showered upon the hundred portraits of alleged Scottish kings, with a strong family likeness, especially about the nose, which adorn Holyrood—kings, as Scott says, "who, if they ever flourished at all, lived several hundred years before the invention of painting in oil colors." The late Mr. W. C. Hazlitt, recalls the London Chronicle, had a story of a visitor who gravely inquired of the old woman who showed him over the palace, "Did you do these?" She shook her head as gravely, and he added, "You might have done better."

Minard's Liniment Relieves Neuralgia

The Source.

"From where do cows get their milk?"
The little girl wished to learn.
"From where do you get your tears, my dear?"
Her mother asked in turn.
And then with widely opened eyes,
Lifting her childish brows,
"Oh, mother," she asked in quick surprise,
"Do they have to spank the cows?"
—Harvard Lampoon.

Uncorking a Bottle.

It often happens that in attempting to uncork a bottle the stopper is forced into the bottle instead, and it thus floats on the liquid. This would perhaps not be a drawback were it not that each time the bottle is to be emptied the cork come to the neck and causes an obstruction, preventing the flow of the liquid. This can be avoided very readily, and all that is needed is to bend a piece of stiff iron wire in a long U-shape, properly fitting it to the neck of the bottle so that the loop portion projects somewhat below the neck. Upon overturning the bottle, the wire loop prevents the cork from reaching the neck to obstruct it.

ISSUE NO. 12, 1915.

HELP WANTED—FEMALE.

WANTED—GIRLS OF GOOD EDUCATION and character to train for nurses. Reply to Welland Hospital, St. Catharines, Ont.

FOR SALE.

SEED CORN

Prize-winning Wisconsin No. 7; the best for the silo. George R. West & Sons, Northwood, R. R. No. 3.

KEEP BUSY!

(Brantford Expositor)

The present is a time for exercising optimism and a spirit of mutual helpfulness in order to keep as many men employed as possible. It is a far better that the helping hand over the present industrial stringency should come in this form than in that of charity, and that citizens generally should pursue, in a reasonable way, a policy of liberality rather than of retrenchment at this time.

Minard's Liniment Cures Burns, etc.

What Bobwhite Eats.

Fifteen per cent of the food of the bobwhite is composed of insects, including several of the most serious pests of agriculture. Half of its food consists of weed seeds, one-fourth of grain and about one-sixteenth of wild fruits. Taken in all the bobwhite is very useful to the farmer, and while it may not be necessary to remove it from the list of game birds every farmer should see that his own farm is not depleted by sportsmen.
