RED UNSIGHTLY PIMPLES ON FACE

Itching and Burning. Disfigured for a Time. Used Cuticura. Pimples Disappeared.

1756 Winnipeg St., Regina, Sask.—"I was troubled with itching pimples on my face for over three years. They were red and unsightly. They caused itching and burning and I used to scratch and irritate them. The breaking out disfigured me for a time.

"A short time ago I saw the advertisement of Cuticura Soap and Ointment and after I had tried a free sample I could see a remarkable improvement. I washed my face with the Soap and then applied the Ointment two or three times a day. After using more Cuticura Soap and two boxes of Cuticura Ointment all the pimples completely disappeared." (Signed) Nicholas Koch, June 13, 1914.

Sample Each Free by Mail

With 32-p. Skin Book on request. Address post-card "Cuticura, Dept. D, Boston, U. S. A." Sold throughout the world.

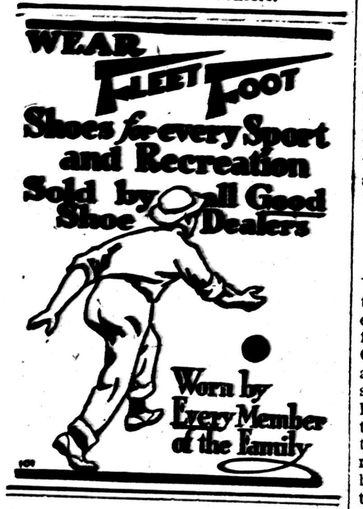
THE LADY AND THE COBRA.

With a Violin Recital the Effects of Which Were Magical.

An Englishwoman residing in India one evening found to her horror that a huge cobra had coiled itself about her veranda rails, near which she sat playing the violin. She was too near the snake to run with safety, so she continued playing while she gradually edged away. At first her only idea was to keep the creature thus engaged while she escaped, but when she had gained a safer distance and perhaps fascinated by the unwonted sight, a strange inspiration seized her. She played air after air of different character.

The effect was magical. That snake behaved like an ardent, hot blooded disciple of Paganini. Every vibration in the music, whether of volume or of tone, produced instantly a corresponding change in the attitude of the cobra. If she played a lively dance it swayed its body sideways in quick time and yet in graceful curves. Once she struck a number of false notes in rapid succession on purpose. The cobra winced and writhed in pain, as if suddenly struck with a whip.

Thus the creature behaved like a mad musician till the lady, getting tired of the sport, gradually moved herself farther and farther and then made a sudden bolt into her room and banged the door, leaving the cobra to wander disconsolately to its lair in the fields.—London Chronicle.



LAW OF GRAVITY VIOLATED.

Conditions Under Which Water Actually Flows Upward.

There are conditions under which water actually flows upward and rises above its source. If a glass tube be dipped into water the column inside will be above the level of the surrounding surface. Moreover, "if a tube of half the diameter be substituted the column doubles its height. The water creeps along the inside of the tube, owing to the adhesion, and forms a cup shaped depression at the top.

An explanation is not difficult. It can be proved mathematically that if the diameter of a circle be diminished one-half the circumference is also reduced to that extent, while the area is one-fourth of its former value. The circumference of the column of the water being reduced one-half, its contact with the glass, and hence the adhesive force, is also diminished to that extent, while the cross section, and hence the weight is decreased to a fourth of what it was before. Therefore the second column can be twice the height of the first without exceeding the lifting power.

Remarkable as the underlying principles of this phenomenon undoubtedly are, nature made use of them long before man made their discovery. Every tree and flower adds its testimony. The core of a tree or plant, instead of being a single open channel, consists of a spongelike substance containing many miniature tunnels through which the sap and moisture collected by the roots flow upward in small rivulets, rising higher and higher in sheer defiance of the great law of gravity.—St. Louis Republic.

Keep Minard's Liniment in the house

Electroplating Mirrors.

A new method of silvering mirrors consists of depositing the metal on the glass by means of a high potential electric current. A plate of metal is placed against the glass; this is laid flat on a table, and the air above it is exhausted to a high degree of vacuum. Then a small quantity of hydrogen gas is introduced, and the current is turned on through a negative pole attached to the metal plate. In thirty seconds the glass has been silvered.

The Housekeeper

Shiny serge—Sponge dress with hot vinegar and press in the usual manner. No odor of the vinegar will remain and all the shine caused by wear will disappear and the garment will look like new.

Rain spots on cloth need not be regarded hopelessly. Wipe off the way of the nap with a silk handkerchief or very soft brush. If this be done quickly no marks will remain.

Hot alum water will take soreness out of chilblains.

Use a blackboard eraser for polishing the kitchen stove. It will save the fingers and give the stove a very good polish.

To remove iron rust from white goods, moisten spot, cover with cream of tartar, put in a basin of water, simmer gently for an hour. Rinse and hang in the open air to dry.

To wash china silk waists, use lukewarm soap suds. Then rinse in two cool waters and roll a Turkish towel for two hours before ironing.

When roasting veal, pare some sweet and white potatoes, tuck them around it and let them cook in the juice.

To clean brass beds, use a mixture of olive oil and whiting, then polish with old silk duster.

Suffer No Longer From Constipation!

You can immediately relieve and permanently cure yourself with Dr. Hamilton's Pills. One thousand dollars will be paid for any case that isn't corrected within three days. Dr. Hamilton's Pills contain no injurious drugs; they are composed entirely of soothing, vegetable extracts that strengthen the stomach and bowels at once. It is absolutely impossible for Dr. Hamilton's Pills to fail curing biliousness, sour stomach, indigestion, headache or constipation. Even one box has brought vigor and renewed health to chronic sufferers, so you owe it to yourself to try Dr. Hamilton's Pills at once; 25c per box at all dealers.

Making Law.

Her audacious admirer was thunderstruck with the demand, but dared not demur, as by this time a group had collected and were listening to the conversation. So he took the hair, paid over the money and left the hall.

"How is the law made?" asked the instructor in United States history.

"Oh," replied the maiden cheerfully, "the Senate has to ratify it, and then the President has to—has to veto it; and then the House of Representatives has to——" She hesitated for a moment and knit her pretty forehead. "Oh, yes! I remember now," she said. "The House of Representatives has to adjourn until the next session!"—Youth's Companion.

Lost His Nerve.

Many years ago a blacksmith near York, England, successfully performed the delicate operation of removing a cataract from an eye on several of his fellow villagers, says the London Chronicle. The fact became known to a doctor in the neighborhood, who so admired the blacksmith's skill that he provided the means for his education as an oculist. To the blacksmith the removal of the cataract was no more than a mechanical feat, but when he became acquainted with the structure of the human eye and its amazing delicacy he was so overpowered by the rashness of what he had done in ignorance that he lost his nerve, and with the fear of knowledge he insisted on returning to the anvil.

THE BEAUTIFUL ADVENTURE.

(Pittsburg Gazette-Times)

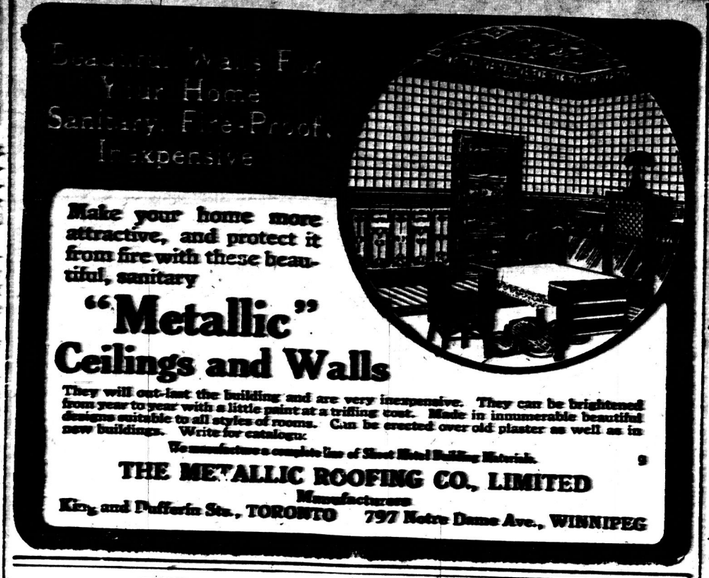
If it were possible in every instance for us to contemplate death as a beautiful adventure the problem of living might be much less serious and the necessity of dying more welcome. If we could all believe that there is nothing in death or afterward to fear, then such disasters as that which overtook the Lusitania would hold no greater horror than the mere separation from loved ones, the destruction of property and the loss to the community of so many hundred of units. But there is that in the joy of living and in the uncertainty of the future life—in that vast mystery behind that bourne from which no traveller returns—which renders it difficult for the the veil, in the infinite possibilities of average human being to accept death and all it may mean as a beautiful adventure.

The Human Eye.

The human eyeball rests in a cushion of fat, by which it is surrounded on every side. When the system becomes greatly emaciated through disease this fat is absorbed and the eye sinks deeper into the head, thus giving the sunken appearance so common in disease.

Then He Was Fired.

Father—I cannot give you my daughter, my dear sir. I am mighty particular in such things. Suitor—Oh, pshaw! Now, I am not in the least so.—Meggendorfer Blatter.



EGGS.

Some Observations on an Important and Popular Subject.

Eggs are handled as a side line by the average chicken. In the fall and early winter, when the price of eggs rises like the mercury in July, says Roseleaf, the hens take advantage of the bankruptcy law and cease production, evidently storing their product for future delivery. A home-grown "strictly fresh" egg in November is almost as great a curiosity as a sheep with golden fleece. In the spring, when the price seeks a lower level, hitting the bottom with a sound of falling clods in the graveyard of the poultryman's hopes, the hens immediately get busy and violate all union rules by working overtime.

In winter eggs are eaten for breakfast by the immensely wealthy and those in moderate circumstances who desire to take a short cut to the poorhouse. Eggs may be used equally well in the kitchen for making cakes and in the saloon for making eggnog. In poultry books a poultry yard is a gold mine. In real life it is a gold mine without the gold. Some poultry experts call the hen an "egg-producing machine." All that is necessary is to turn 333 varieties of feed, together with a little charcoal, grit and oyster shells, into the machine and the finished product is eggs.

Eggs are used by the country lass to write her address on so that it may be found by a strong young truck driver in the city when he eats the egg soft boiled nine months later. Before so much attention was paid to the storage houses by pure food experts the message was sometimes years in reaching its destination. By this time the maid had sighed in vain for the city Galahad and had married Jim Jones' son, who owned the eighty next to her father.

A farmer can get more eggs out of chickens than anyone else can. Some farmers with a hundred chickens can sell a hundred dozen eggs a week, "all laid by my own fowls and guaranteed fresh," from house to house. The price of eggs varies from 40 cents to 60 cents a dozen when bought from a farmer to $1 a single egg when raised by the city dweller in his back yard. Eggs may be eaten fresh and not so fresh, the egg itself often offering the strongest objection to being eaten.

PAT AND MOLLIE.

Dog and Girl Are Friends of the Babies.

Pat and Mollie understood each other. Pat is a dog and Mollie is an only child, and both Pat and Mollie are interested in the same things. They are interested in babies. It is a good thing for a dog to have a purpose in life. Many people wonder how animals get along without any purpose, but few people guess that most animals, especially dogs, have some very decided interest, and occupation that does them very well. It is also a good thing for a child to have brothers and sisters, and many people wonder how some children get along without such incumbrances. They would not get along at all if it were not for the neighbor babies.

Mollie wanted a brother or sister for Christmas, and was disappointed. She was disappointed again on her birthday. Then she heard of babies being left on doorsteps, and for two or three weeks she got up very early in the morning to look on her and the neighboring doorsteps. It is pretty certain that if a baby had been left on the steps of any house in the block, it would have been in the paper that it had been left on Mollie's step, because she would have appropriated such a baby without question. It was while she was out looking for a baby one morning that she met Pat, and they seemed to understand each other at once. It is probable that Pat said to her: "It's no use, I've been all over the neighborhood. There is not a baby in sight. I'll let you know when I find one."

Pat seems to have a genius for finding babies. He can see a gocart blocks away, and it is funny to see him hurry to it and look inside to see if there is a baby in it. If there is a baby, nothing can induce him to leave it, and if there is no baby, he usually waits until one appears. When a new baby moves into the neighborhood, it never takes Pat more than two days to discover it, and to indicate that he is ready to show his devotion to it. Sometimes mothers are inclined to regard him as a nuisance and a possible danger, and it is then that Mollie becomes useful. When she appears, the day after Pat has discovered the baby, the mother is always reconciled, and Mollie and the baby are immediately the best of friends. It does seem that Pat and Mollie understand each other, doesn't it?

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

EXCHANGE COIN.

Canadian Silver at Detroit to be Returned at Par.

Detroit residents and Windsor people are constantly exchanging visits. Since the first-named city, on the United States side of the Detroit river, is much the larger of the two, it gets the greater share of the trade that much Canadian silver has accumulated there. It is announced that the Canadian Government, through the receiver-general at Ottawa, has concluded an arrangement to provide for the return of the coins. They will be accepted from Detroit banks at par in packages of $100 and more, and then distributed to the various points in Canada where a silver change shortage exists. It is estimated that there is at least $150,000 in Canadian silver coin in Detroit. How much American silver coin there is in Windsor is not known, but the two communities have many things in common.

Ask for Minard's and take no other.

THE OPEN ROAD.

(Memphis Commercial-Appeal)

The American people are always willing to pay to see others exercise and neglect to exercise themselves.

In Germany, on Sunday, even in these war days, may be seen a procession of men, women, and children in hobnailed boots, rough outing suits, clasping in their hands stout waking sticks, making their way to railroad and trolley cars, that they may be transported quickly to the outskirts of the city, where their walking expedition begins. They carry lunch with them and remain from early morning until sundown.

This no doubt accounts for the sturdiness of the men at the front.

We are not essentially a lazy people. We imagine that we have no time for the open road. We have. It will do every one good. It will do every one good. It will give renewed energy and vitality. Try walking these spring days, and watch the benefit you will enjoy late on.

"UNSINKABLE" BOATS.

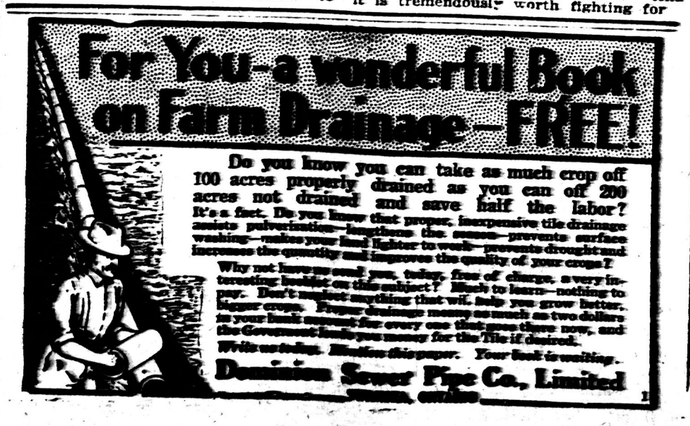
(Pittsburg Gazette-Times)

Alas, that unsinkable theory is now proved to have been just a myth, as happened with the Titanic! Seemingly the ship that won't sink has not yet been built, and anyway a mere landsman is not capable of arriving at judgment to the contrary when master craftsmen in marine construction still confess they have not achieved perfect safety. The power to destroy keeps in advance of the ability to withstand and to defend.

THE BLESSING OF HEALTH.

(Ottawa Evening Journal)

Undoubtedly of all things that help to either happiness or success whether in man or woman, in marriage or anything else, is good health. Sometimes sadly fate or circumstances defeat possibility of health; but often health can be achieved and kept by effort and self-control even when nature or conditions have not been generous. And it is tremendously worth fighting for



THE INCONSISTENT SEX.

Down the long street the women came,
In all ten thousand strong.
"Give us the vote," their banner read,
"We've asked you over-long."

The man in the street gave a glance of scorn.
He turned away his head.
"Go to your home and attend to your kids,
You shame your sex," he said.

The legislative hall they passed,
The leader came to see,
"Give us the vote" he read in scorn.
"Give you the vote? Not me!

"I'll cast no vote against the home,
For women I revere.
The pitiless glare of public life
Is not for her that's clear."

And then that night we went to a "show,"
And the man in the street went, too.
And they cheered and clapped the chorus girls
Who pranced for their review.

They clapped their scanty, flashy dress.
They clapped their ribald song
They clapped the mazy, crazy dance.
They clapped it loud and long.

"Good show," they cried, "and pretty girls,"
And out the house they thronged.
And never a man among them all
Asked where those girls belonged.

To try to explain it, I can't and won't.
The problem is too complex.
And yet—I wonder that men call us
The inconsistent sex.

—Octavie Roberts.

COLICKY CHILDREN

Colicky children can be promptly cured by Baby's Own Tablets, because these Tablets act directly on the stomach and bowels and cleanse them of all impurities. Concerning them Mrs. James C. Slater, Summerville, N. S., writes. "I have used Baby's Own Tablets and am glad to say I have found them an excellent medicine for colic and loss of sleep." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Odd Facts About Rivers.

The Connecticut, the principal stream of New England, is 450 miles in length.

The Irtish, in Siberia, is 2,200 miles in length, and drains 600,000 miles of territory.

During a single flood of the Yangtse-Kiang, in China, 600,000 persons were drowned.

The American River is 2,170 miles long, but at various points in its course is very narrow for its length.

The Potomac River is only 500 miles long, and in its lower course is rather an estuary than a stream.

The Mississippi, at the point where it throws out of Lake Itaska, is 10 feet wide and 18 inches deep.

The Columbia River of Canada is 1,400 miles in length; the stream of the same name in Oregon is 600.

The River Dee, in Scotland, has had more poems written in its honor than any other stream on the British Isle.

Australia has no rivers of any consequence. The interior of this vast continent is almost destitute of water.

King's Counsel.

King's counsel differ from all other English lawyers. King's counsel are appointed by patent from the Crown, on application from the lord chancellor, and can act as judges as assize when named in the commission. They have in many ways precedence over other lawyers and rank among themselves according to seniority. The robes of king's counsel are of silk instead of stuff like those of ordinary barristers. It is the established rule of the profession that no king's counsel shall conduct any case without the employment of a junior counsel.

Minard's Liniment Lumberman's Friend.

Fighting the Rat.

The greatest enemy of man is man and next to him perhaps the rat. He is incredibly cunning. He can live in any climate. He sails the sea in ships. He forages in the open fields or burrows through walls and intrudes into the home. Man himself is no hardier than the rat, and in the matching of wits against wits the rat has up to this time been the victor. He augments every famine in the world. If the depredations of rats could be prevented the cost of living certainly would be lowered. Active as he is in famine, the rat's most spectacular co-operation with death lies in his co-operation with pestilence. The study of method for the extermination of rats should be financed on some basis which will make it permanent. It is a fight which have not yet been adequately waged notwithstanding the fine abilities of the doctors who are fighting the rats in combating the bubonic plague. The business needs specialists.—Farm and Fireside.

Muensterberg Mastered.

Dad (from the hall)—Why, Marjorie, how dim the light is in here!

Freddy (the fiance, not a college graduate in vain)—Yes, sir. Professor Muensterberg has a theory that brilliant light benumbs the intellect. We are experimenting to find the degree of illumination by which the attention is kept vivid and the mental functions active.—London Standard.

"Why don't you cook with electricity?" "Don't want to add to our current expenses." — Baltimore American.

A woman may be intoxicated with delight over a new hat. At any rate, it goes to the head.

ISSUE NO. 21, 1915

HELP WANTED—FEMALE.

WANTED—GIRLS OF GOOD moral character to learn dressmaking; steady employment. Apply to Wellandvale Hosiery Co., Collingwood, Ont.

FOR SALE OR TO LET.

FOR SALE OR RENT—IN GRIMSBY and vicinity—choice residences, furnished or not; large gardens; variety of fruit trees. Apply to R. A. Alexander, Grimsby, Ont.

FARMS FOR SALE.

300 ACRES, STOCK AND GRAIN farm; good buildings; 40 acres timber. Sixteen miles from Hamilton, main road; twelve thousand; easy terms. Also 125 acres; sandy loam; bank barn; frame house; other buildings; 18 acres good wheat; spring crop in ground; two miles from station; nine thousand for quick sale; possession at once. Farms all sizes for sale. W. B. VanSickle, 288 Bank of Hamilton, Hamilton, Ont.

ROSE TO THE OCCASION.

Attorney Thomas C. Brinsmade doesn't object to a good story, even if it's on him. He tells this one:

"The other day an old colored man came sauntering up to me in my yard, where theer was a big plie of rubbish.

"'Morning, John,' I said.

"'Mornin', Marse Tom. Don't you want that rubbish hauled away?'

"'What'll you take?' I asked.

"'Dollah a load, an' I think it'll take fes' about tow loads.'

"'I'll give you 75 cents a load,' I told him.

"'You remember me ,do you, Marse Tom?'

"'Why, sure, John.'

"'Well, you remember when I was up for shootin' craps an' you pleaded me guilty in police court?'

"'Sure,' I said.

"'An' yo ucharged me $10, an' I never said a doggone word!'

"John hauled the rubbish at $1 a load, and he made three loads of it."—Cleveland News.

LIQUOR AND MORPHINE HABITS

Are diseases, not vices, and therefore curable. Patients are under my personal care and receive their treatment in ordinary hospitals as ordinary medical cases.

D. H. ARNOTT, M. D.
226 Queen's Ave., London, Ont.

RICHEST ISLAND ON EARTH.

"Java has a population of more than 40,000,000. It is a Dutch possession and the richest island on earth," says a man who has spent the most of his life there. "The governor-general has nine palaces in different parts of the island and a regiment of soldiers to escort him from one to another. Two-fifths of the sugar in the world is produced in Java. Labor costs little or nothing. The natives work for something like $2.50 a year. The products are sugar, cotton, rice, cagu nuts and citronella. Of the total population there are probably 30,000,000 Javanese, and the rest are Chinese and Portuguese. The white population numbers about 150,000, mostly Dutch, and there are few Americans. The immensity of the production of Java may be estimated from the fact that the internal revenue is nearly $200,000,000.

"Notwithstanding the big population, the richness of the soil and the great productivity Java is hardly a paying possession to the Dutch. It takes all that Java yields to pay all the expenses of fighting the natives of the other islands, like Flores, where the inhabitants are savages, mostly head hunters. Borneo is the largest island in the south sea, but its population is small compared with that of Java.

"Under the conditions of civilization it is surprising, perhaps, that the standard of morals among the natives is high, yet it is a fact. Violation of the marriage contract is almost unheard of."—Washington Post.

Minard's Liniment used by Physicians

POOR ROADS.

(Peterboro Examiner)

The loss that the useres of wheeled vehicles suffer from bad streets in the way of wear and tear of horse flesh and vehicles, is incalculable. The life of an automobile is greatly shortened by bad bumpy streets and high shouldered crossings. This shortened life of vehicles of all kinds, costs money; and it is safe to say it costs much more than the money that would be required to pay the taxes to meet the interest on the cost of good streets, no matter how great, within reason it should be.
