Elijali and the Prophets of Bazi. Kings 18: 16-40.

Commentary.-I. Elijah meets Ahab Lard would put an end to the drought which had brought great distress to laraei. Ahan and his servant Obediah had started out in different directions in search of pasturage to save the flocks and heards from starvation. Elijah met Obadiah on the way and at nounced that he would meet Ahab. Obadiah knew that the king had sought for the prophet and feared that, if he told Ahab where he was, he would disappear and still further elude his search. Elijah assured Ohadish that he would meet Airab, and Obadiah told the king, who at once went to meet the prophet. Upon meeting him he accused Elijah of bringing the drought and the accompanying distresses upon Israel. The prophet boldly told the king that his sine and those of his father's house had brought the trouble on the nation. Elijan immediately became the master of the situation and told Ahab to summen the prophets of Baal and those of Asherah, the female deity corresponding to Basi, to Mount Carmet, and Ahab gathered the prophets there. The place of meeting was on the eastern part of Mount Carmel, from which point the Mediterranean See can be seen to the west, and the beautiful plain of Esdraelon to the east. Jezreei, Ahab's capital, was in plain sight, as also the scene of several of Israel's historic battles. H. A test proposed (vs. 21-24). Not

only had the prophets assembled at Mount Carmel, but also the people eame. Elljah called upon the people to cease halting, or limping and stagsering about between the worship of Jencyah and that of Baal. It was to be definitely determined which was the true Gcd. He was the only representative of thestrue religion, and the prophets of Baal were many, but he proposed the test of an answer by fire to show the people the truth. No one but an Elijah could put forth such a challenge, and he did it in the fear of the Lord and in faith in him. The people could only declare the test to truths does the lesson teach? be a fair one. The followers of Baal claimed much for the power of their deity. He was the sun-god, and consequently was in touch with the powerful agency, fire; hence he would be expected to respond to Elijah's challengs and send fire to consume the

HII. Baal proved powerless (vs. 25-29). Elijah called upon the prophets to choose their bullock for a sacrifice and prepare it, and then call upon their gods for an answer by fire. He thought best to caution them to put no fire under the sacrifice, for he doubtless knew the trickery to which the followers of false gods sometimes resorted. He gave them the first chance to show what their deity, Baal, the sun-god, could do. There was no lack of earnestness on the part of the worshippers of Beal. They called loudly, and exercised themselves violently in the hope that fire might fall to consume the sacrifice. There is a local of the sacrifice of the sacrification of the sacri tradition that a man was concealed heathen god of fire. The test which acres, 825,295 under the alter that he might kindle alone met Israel's need could alone Av. 17.1 the fire at the proper time, but he was smothered before he lighted it.

| Cod could need could alone that only | Hay and clover (not including alone that only | Falfa) -3,066,468 acres, 3,825,026 tons | Or 1.35 per acre as against 3.251 709 This is only a tradition and cannot be depended on. With all the frantic efforts of the Baal worshippers no fire feil. Elliah held them up to ridicula proof. He would end the decision of the said on sufficient proof. He would end the decision of the real convictions, based on sufficient The acreages in other crops for feil. Elijah held them up to ridicule proof. He would end the dishonor of which no estimates as to yield have feil. Elijah held them up to ridicule productive would call the distance of which no estimates as to yield have in the taunts which he hurled at them, God by the overthrow of idelatry, been made at this date are ars followed by the overthrow of idelatry. in the taunts which he hurled at them, over my me overturow or indicatry, been made at this date are are follows: Buckwheat, 193,497, against 177,evening sacrifice, or 3 o'clock, to get charged him with complicity in the gar neets, 22,390 and 10,864; carrous, sin of Jeroboam, which had plunged 2,439 and 2,448; turnips, 97,451 and the chosen nation into deepest degrawould be the outcome, but the priests | union. with a clear manning | There are 3,350,420 acres of cleared | sorrow. The root of the menacing | land devoted to pasture, 226,217 in had called upon their god with loud veices. They had inflicted pain upon they most carnestly desired. Their only hope, after his failure to answer, was that Elijah's efforts would be served was no more powerful than was

30. Come near-There was a calmness in the prophet's manner that was in trange contrast to the frenzy of the Seal-worshippers. The people were infited to witness all that was to be one. Repaired the altar-Not the tar of Baal but an altar of Jehovah t had been used long before this 31. Twelve stones—It is noticethat Elijah recognized Israel, not o kingdoms, but as composed of tribes. See Josh. 4.5 Israel shall name—israel means "prince of nd was the name given to Peniel (Gen. 32, 28). 32. In of the Lord-This expression tes all of Elijah's acts. It honor of Jehovah that the the priests were called tormel, A trench-To catch y was to be poured upon Iwo measures— The the "seah," containing ne half to three galthe depth of the eat as the height of sure. 33. Put the -Thus for the presimilar to those il. Fill four barsuch as were ter and containgailons each. The repair of the ajtar appeared incibe no occasion dental. It meant to Israel the refire hidden

altar. False re-

Divine power was to be displayed in a remarkable way. To explain the firms of the displayed of the explain the firms of the symmetric and pleased for the honthe drought, Tristram says, Close by the place of sacrifice, shaded by a noble old tree, is a large, natural cistern of sweet water, which the people say is never exhausted." The river (vs. 16-20). The time came when the tain and water might have been procured from there if the fountain or cistern was empty. It is reasonable to suppose that water had been carried to the place of sacrifice before Elijah was ready to use it.

of Came near-in caim and trustful boldness. Lord fied of Abraham, Isane, on of Isreal-Elijah'ı address to God aws made so complete that no one could doubt to whom he was appealing. Let it be known-The propliet wished tow things made clear; first, that there was a God in Israel, and second, that he was God's servant. 37. Hear me, () Lord-Elijan's confidence in God finds most pronounced expresion in the words of this brief prayer. The enswer was not delayed.

Turned their heart back again file great desire was that the people should turn from idealtry to Ged. 38. The fire of the Lord fell-There was no mistaking its direction nor its power. It came from above and burned downward, commencing with the sacrifice and ending with the water in the trench. 39. Fell on their faces-They were not only convinced that it was the work of God, but fell down before him in an act of worship. The Lord, he is the God-The test had declared the existence and power of Jehovan, and the victory of Elijan over the prophets of Baal were taken down to the river Kishon and slain. This was in accordance with God's law that idolators were to be cut to death. The vindication of Jehovan showed that Baal-worship was false worship, and that the followers of Baal were either acceived or themselves leceivers.

Questions.—To whom was Elijah sent? What was the feeling of the in leading cereal crops. Straw is of king toward Elijali? Who arranged for the assembly at Mount Carmel. What test was to be made? Who represented the true God, an I who represented the false gods? Describe the the yields given are more than ever Elijan's course after the failure of the priests of Baal. Describe the results of Elijah's prayer. What was remarkable about the prayer?

PRACTICAL SURVEY. Tepic.—The claims of deity.

I. Revealed the cause of calamity. II. Demanded the devotion of is-

III. Required the overthrew of idolatry.

I. Revealed the cause of calamity. Cur lesson takes up the controversy 579,473 acres, 18,096,754 nuchels and between Ahab and Elijah, as to the 31.2 in 1914. Ap. 27.9. cause of the trouble which nad come upon Israel. The alternative lay between Jehovah and Baal, and the object of a national gathering was to decide which was to be Israel's God. Elijah insisted upon the distinction acres, 2,315,532 bushels and 16.7 in Norifolk 2,000 Northumborland 1000 demonstration. The ordeal proposed acres, 2,609,585 bushels and 14.7 in

peril, the desolating misfortune, lay in the broken altar. II. Demanded the devotion of Israel. themselves. There was nothing more ness for Jehovah appealing to the that they could do. They had signally failed. It was deeply humiliating to hesitation between unreconcilable sergood yield. The tubers so far are genvices. Israel's inconsistency lay in an erally a fine sample, although already attempt to biend the claims of Jeho- some complaints are made of rot and them, an attempt to accomplish an equally unsuccessful. It would then ity and character of God. The reconimpossibility, an insult to the authorstruction of spiritual life in Israel must begin at the point of its incipient overthrow. The drought and

IV. The answer by fire (vs. 30-40). III. Required the overthrow of idolatry. Elijah proved to be the man of the hour. To be zealous, to be a reformer, to seek to restore truth and religion to their former rule, milk and the brisk demand for all its vival, extirpation or reform, made his concerned over the scarcity of young ing less than earnest consecration and strong courage on Elijah's part could harvest are about as usual, running at Mount Carmel. He gave precedence to his opponents at every point. He reduced his own resources to a the worker. minimum to show that truth was stronger than error. The people were all the more impressed by the final victory because of the marked inequality of the conflict. The priests of Baal exhibited passionate earnestness, furious, persistent prayer and an agony of entreaty. Full opportunity was given to show the worth of their idolatries and superstitions. When evening came they gave up the contest confiscate food products in behalf of people to the broken altar, a sad evidence of the wicked zeal of Jezebel and a significant sign of the times.

tracing of their steps of disobedience

Hisplayed in the trust to the clamor of Real's put after during it was aftered at the time of the or of God and for mercy upon the pentient. When Ellish's faith was expressed in words, there came at once the answer of the living God.
The demonstration was irresistible. The conflict with idolatry was settled The claims of the living God were sustained. Retribution upon Baal's pro-phets was swift according to the law of God. Their destruction was the removal of temptation from Israel.

WHITE HONEY CRUP REPORT The Crop Report Committee of the renently. Thre hundred members reported from all parts of Cutario, 532 lbs fat; Jersey, 15,211 lbs. milk, showing an average of 55 pounds per 754 lbs. fat; Ayrshire, 16,696 lbs. milk. cooliny. There is about an avorage crop, and the quality is excellent. The buying power of the public is below the average, however, and it is likely that prices will range slightly lower than those recommended by the committee last year. In fact, some honey has already changed hunds at prices

recommended below. Selling secould be brisk at these prices, as the market is clear of chi loney and the high price of sugar is sidering that it requires no preserv ing, but can be stored in a dry place, regardless of temperature, without even removing it from the tim. One case was reported where berries were allowed to waste and 60 pounds of honey purchased to save the expense of picking and cannig the berries.

The prices recoramended by the committee are as follows. No. 1, light extractor, wholesale, 10e to 11%e per lb. No. 1, light extracted, retail, 12% to 15e per lb.

No. I, comb, wholesale, \$2.00 to in this Province, according to an of- No. 2, comb, wholesale, \$1.50 to \$2

splendidly headed, and the loss diference in time and trouble of fillthrough sprouting and shelling was ing the small tine about equalizes the In selling to the wholesale merchant the lowest wholesale price should be asked; while the retail grocer should pay the highest wholesale price. The retail price to the consumor might vary according to the quantity he takes in any one purchase, and whether he supplies his own package. Signed by the committee:

55.1 A BULLETIN ON SWINE RAISING. The second edition of Bulletin No. 17 of the rederal live stock branch, entitled swins ruspandry in Canada, nas been issued, and may be had on application to the Publications Branch of the Department of Agriculture at fiscal year ending March 31, 1915, their "union educational campaign." amounted to 166,048,519 lbs. as against "The domination by the men in 27,561,140 lbs. the previous year. The whose hands the final contract of a bulletin covers the whole field of large part of American industry rests," swine raising, giving the results of the report says, 'Is not limited to stitutes one food unit, which is equal or 12 lbs. whey. It is shown that the diet is varied in a definite way for pigs of different ages.

MILKING RECORDS.

Nine years ago the live stock branch of the Federal Department of Agriculture, in co-operation with certain \$1,000,000, shall be compelled to take of dairy cattie, began to record the provide, it is proposed, for strict fedperformance of pure bred milking eral control of the work of the foundaupon a standard yield for cows of its respective breed to qualify for registration, while the live stock commissioner formulated regulations under which the tests were to be carried out. At the end of each year a report of the work has been issued, conqualified for registration during the

The highest records made Shorthorns, 15,525 lbs. milk, 549 lbs. Ontario Beekeepers' Association met, 453 lbs. fat; Guernsey, 11,445 lbs. milk, fat; Franch-Canadian, 10,767 lbs. milk, 520 lbs. fat; Holstein, 23,717 lbs. milk.

This report for the second time contains an appendix containing the records of cows which produced sufficient milk and fat to qualify for registration, but failed to calve within fifteen months after the commencement of the test, as required by the registrations. This report is of special interest to dairy farmers who are anxious to build up the milking qual-College house conters to turn to hancy sent to those who apply for them to the Publications Branch of the Department of Agriculture at Ottawa.

NOTES.

The number of female animals that may be bred to one male varies quite widely according to the age, vigor, feeding and general management of the animal, and also according to the length of the feeding season. According to experienced breeders, the following will be a safe guide: To the buil, 50 to 60 cows; to the stallion, 50 to 75 mares; to the ram, 50 to 60 ewes; to the boar, 15 to 20 sows.

To prevent worms in hogs the folof Agriculture of Ontario, based upon lb. and 5-lb. tins; the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lb. and 5-lb. tins the former being lime, eight pounds; sulphur, four lb. and 5-lb. tins the former being lb. the former being lb. the former being lb. the f lowing mixture is suggested. Keep pounds; pulverized copperas, pounds. The lime and sait are two mixed very thoroughly, then the ashes and charcoal are mixed. The copperas, should be dissolved in two quarts of hot water and sprinkled over the entire mass, mixing it thoroughly. The mixture may be stored in a barrel or boxes and used as needed. A generous supply should be before the pigs where they may eat it when they

Experiments have proven the average milk cow requires about an ounce of sait per day. Heavy milkers should have more. Keeping salt where the dairy cows can reach it at all times maintains their good health and encourages a heavy milk yield by promoting thorough digestion and assimilation and having a cooling effect on the whole system of the animals, at the same time making it easier to bring butter of a superior flavor and color at churning time.

Some people seem to think that a thin hog is a bacon hog. It is not; but the pig that is well grown on a nitrogenous ration, and that is nice and sleek, but not fat, is the market-topper nine times out of ten.

Pot-bellied, hay-fed colts tell the story of improper feeding, slow growth and poor form. A ton of clover or mixed clover hay was found at the Wisconsin Station

to be equal to three tons of corn staver for milk cows. The Department of Agriculture at Washington gives the following list of plants that are benefited by applications of lime: Spinach, lettuce, beet. celery, onion, cucumber, canteloupe, asparagus, cabbage, peamnt, rhubarb, pea, pumpkin, bean, tobacco, alfalfa, clover, barley, wheat, oats, timothy, goeseberry, current, orange, quince

and cherry. Indian corn is only slightly benefited. Plants which are said to be slightly injured by time are cotton, tomato, cowpea, Concord grape, peach, 44.3 apple and pear, and those really injured are radish, flax, blackberry, black respherry and cranberry.

## TO THE END

Country's Determination.

Paris Cable - An account of an fic function, and whose funds exceed Nicholas is relegraphed to the Matin by Jean Cruppi, former French Minister of Foreign Affairs.

"Peasants speak to me in affectionate terms and every day I receive from them several addresses saying, Hold firm, for me and all behind thee," the Emperor is quoted as saying.

The monarch's voice was firm and clear, M. Cruppi says, as he told of the resolution of all Russians to carry the war to an end until the victory necessary to "free Europe" is assured. The Emperor added: "France can count on my immovable will to strugsie on until complete victory in
