TOO LATE FOR REGRETS.

The Washington Herald says,—"It is too late for regrets. All that remains for Germany is the opportunity to show cause why sentence should not be pronounced upon her."

The Manitoba Free Press says,—

THE SAVED CROP.

"Manitoba has had a month of perfect ripening weather, and the crop is saved. The end of the week will see the bulk of the wheat cut in the older parts of the province, and the balance is dead ripe. The problems of marketing and transportation have yet to be solved. It will not be quite as easy as in former years to turn the crop rapidly into gold, and there will be need for patience, cool-headedness and consideration all along the line. If the full money value of this crop reaches the producers, the west—despite the war—will take a big stride forward."

LOVE BRIEFS.

The Welsh miners appear to be doing all they can to bring about the nationalization of the mines on which the British navy depends for coal.

Canada burns every year thousands of tons of flax straw and imports millions of dollars' worth of goods made from flax fibre. The white man is a strange creature.

Greater than ever in its entries and its attractions, the National Exhibition faces the second year of war with the prospect of securing a record breaking attendance.

The pessimists will please remember that Britain holds the seas, and that sea power must eventually choke Germany, no matter how successful her armies may be.

British workmen begin to show 'fag' because of working long hours and working continuously for seven days a week in munition factories. The day of rest pays even from the utilitarian standpoint.

Many people ask for advice because they want to be able to blame somebody later on.

This is the 394th day that the British Empire has been at war with Germany.

OLD OR SPARE RAZORS Required

Some months ago the Cutlery Company was approached by the War Office to carry out the collection of spare or discarded Razors throughout this country, putting them in order when received and sending them forward for the use of the troops.

This course was necessary owing to the inability of the manufacturers to meet sufficiently and rapidly the requirements of the soldiers at the front.

Up to the present 70,000 have been received, but the need for razors is not yet entirely met.

In contributing to the collection your efforts will be greatly appreciated by the authorities.

Look them up quick! Leave them at E. T. Carter's Hardware or send by Post.
