Many women with disfigured complexions never seem to think that they need an occasional cleansing inside as well as outside. Yet neglect of this internal bathing shows itself in spots, and sallow complexions—as well as in dreadful headaches and biliousness. It's because the liver becomes sluggish, and waste matter accumulates which Nature cannot remove without assistance. The best

CHUCK OF THE PEACH
(By Peter McArthur)

It is sometimes a mistake to consult the Encyclopaedia before writing an article. The misinformation in the world is much more numerous than the facts. Facts have a tendency to make one prosy and commonplace.

I am moved to make these observations because for some time past I had been meditating a little essay on the peach, and I remembered a story I had heard or read somewhere about the origin of this most delicious fruit. According to the best information and belief up to fifteen minutes ago the peach originated in Spain after the Moorish Invasion. The African conquerors brought with them bitter almonds with which to poison their arrows and planted the pits in the newly conquered country so that they might have an unending supply of this method of spreading Moorish Kultur. As they had no Hague Tribunal in those days there were no international agreements against using poisoned weapons—and it probably wouldn't have mattered much if there had been.

But to resume. According to the pretty tale I remembered, the bitter almond developed in the salubrious climate of Spain and lost its ancient character, ceased to be poisonous and became a peach. With this as a text I had proposed to show that the peach is the one really good thing that the world has ever derived from war, but alas, it needed a few more volts and I consulted the Encyclopaedia where I found no mention of my pretty Spanish tale. I found both Greek and Latin references to the peach and a learned discussion as to whether the fruit had been first developed to perfection in Persia or in China. The only reference to the bitter almond was a note to the effect that Darwin regarded the peach as a relation of the almond. It seems that in China they not only raise peaches of excellent quality but also of unusual shapes. They have a flat peach in which the ends of the pit are merely covered by the skin while the sides have a thick layer of fruit pulp. They also have another kind which is long and crooked and as nearly as I could learn from the dictionary all kinds of peaches are good eating. It is pleasing to know that even the Encyclopaedia gives Canada the credit for raising the best peaches of all, and now they are at their best.

THE PREACHER'S FRUIT
(By Peter McArthur)

Once upon a time—you see I know how to begin a story in the right way—a barefoot boy danced by the roadside and shouted gleefully. It was in Canada, back in the nineteenth century, in the pioneer days. The little boy was healthy and freckled and what he lacked in clothes he made up in the kind of body he wore inside of his clothes. And he was very, very happy. In fact he was so happy that a passing friend stopped to ask him the cause of it all.

"Hurrah!" shouted he of the freckles.

"Why so happy?" asked the friend.

"The preacher is coming to dinner!"

"I didn't think you were so fond of him."

"I ain't, but whenever the preacher comes to dinner we always have peach preserves."

It really is not much of a story and I am giving it on account of its archaio-logical interest and not because it is so very funny. It was back in the days when people merely knew that peaches are the best of fruits and had not discovered that Canada is the best place to raise the very best of them. The woman who was fortunate enough to get some from a sheltered orchard or from a lone tree that was so fortunately situated that it escaped the frost put up a few to have for such special occasions as the visit of the preacher. In those days the minister was a much more welcome visitor on the farm than the agent of get-rich-quick concerns and mining promoters and there is a moral to that if I only had time to work it out. Because peaches were saved for such extra special occasions a tradition has grown up about them in many parts of the country. Some housewives, otherwise very bright, and a credit to the Farmer's Institutes to which they belong, consider it an extravagance to preserve peaches unless they get them at sacrifice prices. Yet these same women will pay from ten to fifteen cents a quart for currants and berries that need far more sugar to do them up than the already sweet peaches. As peaches usually come in eleven-quart baskets you will find if you divide the price by eleven that peaches cost less per quart than any other fruit. But because they were once so great a luxury housewives are slow to realize that they should have more of them than of any kind of fruit, for they are both the cheapest and the best. There is no reason why every farmer's wife in the districts where peaches cannot be grown should not buy them as freely as they do other fruits and have them not only when the preacher comes to dinner but when the boys and girls come home from the city and at all other times when they want to have something luxurious on the table.

Also it should be remembered that for eating from the hand the peach is the best fruit of all, but you should use for this purpose only the peaches that you buy in the full light of day. Once upon a time, or perhaps I should say "Once upon another time," a newly arrived Irishman went out with a friend to steal peaches. It was dark and Pat had been told to grope along the branches for the fruit. Presently he whispered, "Moike!" His friend answered, "Phaw!" "Thas patches got legs?" "Naw." "Then begobs I've swallowed a straddle bug."

Selfish.

"I don't like Mrs. Wombat. Wants to talk about her pebble all the time."
"Is that so?"
"Yes. She never seems to care to hear about my canary."
