

**Wonderful Miracles Worked
On Weak Stomachs
By Dr. Hamilton's PILLS**

There are despairing men and women by the thousands in this city, whose stomachs keep them in constant misery that can be quickly restored to vigorous health by Dr. Hamilton's Pills.

We know of no other medicine that possesses such power to kindle into new life the exhausted energies of chronic stomach sufferers.

There is an extraordinary power in Dr. Hamilton's Pills that reaches out the weak spots, that braces up the delicate stomach and complex workings of the stomach and bowels.

There are invigorating, stimulating tonic ingredients in Dr. Hamilton's Pills which are derived from powerful juices taken from rare herbs and roots, and these are scientifically combined with other medicinal products so as to assist in a harmonious and proper working of the entire system.

The ingredients of Dr. Hamilton's Pills, coming from the great storehouse of Mother Nature herself, can be relied upon to be harmless. Guaranteed results follow to all who use Dr. Hamilton's Pills for stomach weakness, Gas, Sourness, Headache, Bilefulness or Constipation.

Seekers of the better health can not do better than invest 25c in this health-bringing family medicine.

PACKING HINTS

How to Take Care of Household Goods Before Moving.

For those who do their own packing a large pile of old newspapers will be found to be an indispensable requisite. In two or three folds the papers should be twisted and tied about the legs of chairs, tables and similar pieces of furniture. They should be mounted and fastened on all wooden framework. They may be made to serve as complete covering for almost any article of furniture.

Pictures of a size should be made into separate bundles in this way: Two or three layers of paper should be placed between pictures, the entire surface of the picture and frame being covered. Only the frame, not the glass, of the top picture should be covered, so that evidence of the breakable nature of the package may stare warningly at the moving men.

Then three or four sheets of paper should be folded lengthwise into long straps about five or six inches wide to form a dependable buffer. One of these straps should be brought under the bottom of the pile of pictures centrewise of the width and another centrewise of the length, with the band long enough to stretch well over the frame of the top picture. Straps may be lengthened by lapping one over the other for a few inches. Heavy twine should be used to fasten the straps and make the bundle firm.

The glass of all mirrors should be left uncovered to temper the zeal of those handling them.

Strong wooden boxes of the soap box model are best for holding books. With sections of bookcases each unit may be moved separately without disturbing the contents, care being taken to place a heavy covering of paper on top and secure the whole with twine or rope.

Barrels are the usual receptacles for glassware, chinaware and not too fragile bric-a-brac. But the precautionary measure of providing a cushion at the bottom of the barrel must never be neglected, so that any settling in transportation shall not be disastrous to the contents. An old quilt is ideal for this purpose; lacking this, a sufficient padding of rags may be substituted.

The resistance offered by newspaper rather than rag wrappings for the separate pieces insures a comforting promise of safety. Attention to close packing with heavy items at the bottom and light ones on top will well repay such discrimination.

Carpets and rugs should be thoroughly cleaned and sprayed lightly with turpentine for moth protection before being encased in prepared tar paper or newspaper.

So far as possible all effects should be placed in boxes, barrels or other large receptacles.

Minard's Liniment Cures Dandruff

Revenge.

A busy housewife came into the sitting-room with a determined look in her eyes. "I really shall have to punish those children," she began.

"What have the little beggars been up to now?" asked father, looking up from his newspaper.

"Why, they've made a mess of my sewing-room," explained his wife. "Needles, reels of cotton, scissors—everything has been hidden away in the most unexpected places. It is really exasperating."

Her husband laid down his paper and smiled benignly.

"I did that," he said calmly. Then, in answer to a questioning look, he went on: "You tried up my desk so beautifully the other day that I thought I'd only fair to return the compliment. So I tidied up your sewing-room."

An Easier Task.

"Mamma, do you think it is true, as papa says, that teachers do not have to work as hard now as they did when he went to school?"

"I expect it is."

"What do you expect the reason is?"

"The teachers of to-day don't have to teach your father."—Buffalo News.

"I expect it is."

"What do you expect the reason is?"

"The teachers of to-day don't have to teach your father."—Buffalo News.

CROP ESTIMATE

Northern Hemisphere Production of Cereals, Etc.

The August number of the Bulletin of Agricultural and Commercial Statistics, published by the International Institute of Agriculture contains the latest information on production of cereals and other important agricultural products in the northern hemisphere.

Wheat.—New data received by the Institute after the publication of the July Bulletin deal with the crops in Spain (39,233,823 quintals, or 122 per cent of the 1914 crop), Great Britain and Ireland (20,823,591 quintals, or 122.5 per cent.), Russia in Europe (208,190,241 quintals or 133.4 per cent.), Canada (winter wheat 9,242,069 quintals of 163 per cent.), and Tunis (2 million quintals against 600,000 last year). The wheat crop figure for Italy has been modified since the last Bulletin and is now 47,300,000 quintals or 103.7 per cent. of last year's crop.

For the group of countries which have sent reports (Spain, Great Britain and Ireland, Italy, Russia in Europe, Switzerland, Canada (winter wheat), United States, India, Japan and Tunis) the 1915 crop is estimated at 702,042,090 quintals in 1914, or 117.9 per cent of the latter amount.

Rye.—The production in Spain is estimated at 7,281,002 quintals or 119.7 per cent. of that in 1914, in Russia in Europe at 241,062,586 quintals, or 119.7 per cent. and in the United States at 11,176,440 quintals or 102.9 per cent. The following countries, taken together, the 1915 crop is estimated at 261,307,473 quintals against 220,223,673 in 1914, or 118.7 per cent: Spain, Italy, Russia in Europe, Switzerland, United States.

Barley.—The production in Spain is estimated at 18,391,315 quintals (116.9 per cent. of the 1914 production), in Great Britain and Ireland at 11,723,150 (77.4 per cent.), in Russia in Europe at 107,102,819 quintals (130.9 per cent.), and in Tunis at 2,500,000 quintals, against 700,000 in 1914. For the following group of countries: Spain, Great Britain and Ireland, Italy, Russia in Europe, Switzerland, United States, Japan and Tunis, the 1915 crop is estimated at 210,523,254 quintals against 176,841,632 in 1914, or 119 per cent.

Oats.—The crop in Spain is estimated at 5,275,473 quintals (102.1 per cent.), in Great Britain and Ireland at 2,539,755 quintals (101 per cent.), in Russia in Europe at 139,202,787 quintals (132.7 per cent.), and in Tunis at 500,000 against 100,000 in 1914. For all the countries which have sent reports (Spain, Great Britain and Ireland, Italy, Russia in Europe, Switzerland, United States and Tunis), the 1915 crop is estimated at 383,823,315 quintals or 124.1 per cent.

Minard's Liniment Cures Burns, Etc.

Claws to His Writing.

Sometimes the worst of handwriting becomes intelligible when one grasps the author's—frequently made difficult, chiefly by his deliberate or unconscious inversion of the accepted rules of calligraphy. Henry Ward Beecher had a daughter who acted as a scribe, and she read him with ease simply by remembering three principles—those in her father's manuscript no dotted letter was meant for an "i," no crossed letter stood for "t," and that no capital letter ever began a sentence.

ODD DISCOVERIES.

Origin of Starch From Corn, Silver Plating, and Brilliant Dye.

How to make starch from corn (maize) was discovered accidentally by Thomas Kingsford, a mechanic. One day he threw a mess of cornmeal mush into a garbage pail. His wife emptied some lye into the same pail, and in the morning when he emptied the pail, he was astonished to find a small quantity of starch at the bottom.

Thomas Bolsover, a Sheffield mechanic, was mending the handle of a knife made of copper and silver. He saw these metals fuse together, and the idea of silver plating was born in his mind. He laid a thin plate of silver on a heavier one of copper and heated them till the edge of the silver began to melt. He took them from the fire, let them cool slightly, then rolled and hammered them to the desired thickness. This was the origin of "Sheffield plate," all of which was made in this way until electroplating was invented.

Cornelius Dubbel left a bottle of aqua regia (a mixture of nitric and muriatic acids) on a shelf. It fell over, the acid ran down over a window and dropped into a bottle containing an extract of cochineal. This turned to a vivid scarlet. Dubbel found that the acid had dissolved some of the tin of the window casing and the combination had produced the new color. A few experiments added the most brilliant color to the list of dyes.

The accident by which Roentgen discovered the X-rays is too recent to need repeating now.—New York World.

Cornmeal for the Feet.

Men as well as women are finding cornmeal very beneficial to aching and sore feet. Simply soak the feet in warm water into which a handful of meal has been thrown, and the meal when rubbed over the feet opens up the pores in such a manner as to stop the very disagreeable annoyance of painful feet. It is far superior to salt baths for the feet.—Philadelphia North American.

"I can't decide just what is the best way to punish my children," said the married man. "Well, spanking takes the pain," suggested the bachelor.

CANADA SUGAR REFINING CO., LIMITED, MONTREAL.

The Hollow in a Boiled Egg.

There is an air space in every egg, but we notice it particularly in a boiled one because the contents have been made solid by cooking and made the hollow space more apparent. This space is a provision of nature so that the chick which grows within the shell may have air to breathe from the time it comes to life until it becomes strong enough to break through the shell to the outside world.

To generate life in the egg it is necessary that it be subjected to a certain degree of heat for a period of twenty-one days. When this is not done the egg remains indefinitely in its raw state.

When it is boiled the pocket of air within the shell, which would have been used up by the chick if the egg had been set to hatch, begins to fight for its space and pushes the boiled contents of the egg back, leaving the hollow space.—Rocky Mountain News.

A NOBLE EXAMPLE

The excellent patriotic work of the File Indians at Balaros, Sask., continues, and the Canadian Pacific, through Mr. W. B. Baker, the Secretary of the Company, has received another encouraging report. It was in October last year that thirty-three of these colonists subscribed \$502.10 to the Patriotic Fund, each farmer giving a certain number of bushels of grain, which when sold amounted to the above sum. During the winter that followed, the now famous File Indian Brass Band gave concerts thereby raising another \$212.00, which went to the Belgian Relief Fund, and since March 1st the Red Cross Branch of this colony has raised \$600.00 and endowed a bed in Cliveden Hospital. The young Indian women have done a great deal of knitting and sewing. The branch has a membership of 36, while there are only one hundred and sixty souls—thirty-eight men, twenty-six women and ninety-six children—in the colony. The patriotism of those Indians does not stop there. Two young men went to the front with the second contingent and six more are going with the next. The File Indians lay claim to having the oldest Red Cross Society member in the British Empire in the person of Pointed Cap. This celebrated character says that he is the ripe old age of 107, and on November 12th next will attain his 108th year. He is now an "associate member" of the Red Cross, and proudly wears on his heart the little red cross, the emblem of the society. It is quite possible that in addition to the six latest recruits for the front, older members of the colony will go, as one man who is the father of nine children has expressed his intention of so doing, and his wife says "I will not stop him." Despite the fact that a hailstorm last month destroyed all the crops in the colony, the File Indians are not downhearted, and have made arrangements to continue their good work during the coming winter months to aid the boys across the sea, thus showing a patriotism worthy of a king.

People who are getting married should take each other for good, as well as for better or worse.

CURIOUS FERRYBOATS.

Crossing the River at Simla is a Comical Performance.

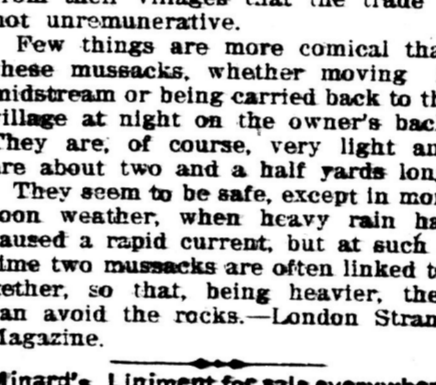

Perhaps the most curious ferryboat to be found in the world is at Simla. The river that flows to the northeast of Simla, the chief town of the Simla hill states, has few bridges, so, necessity being the mother of invention, a novel method has been adopted.

The skin of a buffalo is inflated with air and is placed, with the four feet upward, to float in the water. The owner then throws himself over it and the one or two passengers sit or lean on the top of him. By means of a small paddle in his right hand and the movement to and fro of his legs in the water the owner takes his passengers across.

The journey takes from three to five minutes, and the modest sum of a pice (one-half cent) is charged. It is only by repeated crossings in a day that a man can earn much, but so many natives use this means of going to and from their villages that the trade is not unremunerative.

Few things are more comical than these muskacks, whether moving in midstream or being carried back to the village at night on the owner's back. They are, of course, very light and are about two and a half yards long. They seem to be safe, except in monsoon weather, when heavy rain has caused a rapid current, but at such a time two muskacks are often linked together, so that, being heavier, they can avoid the rocks.—London Strand Magazine.

Minard's Liniment for sale everywhere

Bamboo Lighthouse.

A lighthouse constructed of bamboo which is in use in Japan, is said to have great power of resisting salt water and does not rot like ordinary wood.

Master—Bill, your garage is as hot as an oven!

Chauffeur—Well, sir, that's where I make my bread!

Signatures and Signs.

Walter Crane's signature—a crane impaled on a W—reminds us that other English artists have adopted queer "beasties" to form their signature. There was Richard Doyle, for instance, who among his friends and in his signature pretended only to be "Dicky," for you will find in the corner of many of his Punch drawings a "D" with a very perky-looking bird standing thereon. But Whistler's was the most famous, though somewhat incongruous. His sign manual often took the shape of a butterfly, though a wasp would have expressed him better, for he was not only an artist, but the author of "The Gentle Art of Making Enemies." And there are many who cherish envelopes from Prof. Blackie with the Greek scrawl meaning "Tell the truth in love."—London Spectator.

PRETTY BAD.

(Punch)

Commander—What's his character apart from this leave-breaking?

Petty Officer—Well, sir, this man goes ashore when he likes; he comes off when he likes; he uses "horrible language" when he's spoken to; in fact, from his general behavior, he might be an officer!

The Brooklyn man who bequeathed 98 cents to his daughter knew the feminine penchant for something marked down.—New York Mail.

DOUGLASS'S LAW OF LIGHT.

It is known that our solar system is traveling northward at a rate of twelve miles per second has been determined by means of one of the most remarkable laws in the entire history of science, Doppler's law of light.

Stand by a railway track and listen to a rapid train approaching. As it approaches the bell or whistle will increase the pitch of its sound and instantly lower the pitch of tone after it passes and recedes. When coming more waves enter the ear and less when it is departing.

Light consists of the action of waves on the retina of the eye. Our earth and sun, all bodies in the solar system, are moving to a point in the celestial vault not far from the star Vega, in the constellation Lyra, and, of course, receding from the opposite point of the sky. Waves entering the slit of the spectroscope from the northern stars are compressed—made more dense per second and are dispensed toward the violet end of the spectrum, less enter from the southern stars and are dispersed toward the red.

Now, excited mathematics, based on the laws of light, determine the extent of dispersion of waves toward the red or violet for each decrease or increase of motion of light emitting bodies, and the amount actually found by experiment confirmed the mathematical formulae—a proof that modern mind is expressing at a very exalted rate.—Edgar Lucien Larkin, in New York American.

No Late Visitors.

A success business man was showing a friend round his new house.

"It's a fine place," was the comment; "but what on earth made you settle down so far from the city?"

"The last train leaves our station here at half-past ten," replied the owner emphatically.

"I believe that; but what has it to do with you?"

"My dear fellow, just wait till you see my two pretty daughters."

KEEPS BABY'S SKIN HEALTHY

ECZEMA

Results from neglected chafing and skin irritation. As a preventive and cure there is no treatment to compare with Dr. Chase's Ointment. Use it after the bath.

VILANDIE FRERES.

Arabs and Girl Babies.

It is a sad day in an Arab home when a girl is born. The musicians who have come to the house with their drums, their shepherd's pipes and all their strange musical instruments burst into wild wailing if the door is seen to open slowly and a head shake silently and sadly and then withdraw behind the closed door. All the rare food which has been prepared in the hopes that the new arrival is a boy is put away and the wailing guests turned from the house. For why, they say, should one feast and have music when another superfluous woman has been brought into the world? Though her man nature is what it is, the little girl is not wholly unloved. She is given some pretty name, such as, translated, would be "star," or "dawn," or "pretty," or "pleasant." When a boy is born the rejoicing on the contrary, is hilarious in the extreme. Welcomes are chanted by stringed instruments, the praises of the family are sung, and a forecast of the great deeds to be done by the son are recited.—Exchange.

A Suffering Case.

"Those detectives have just arrested an osteopath as a felon."

"That must have been a painful duty."

"Why painful?"

"Didn't it give them a bone felon on their hands?"—Baltimore American.

It doesn't do a hungry man much good to swallow his pride.

ISSUE NO. 39, 1915

PARADE FOR SALE.

ONE UNBROKEN ACRES OF CHOICE land in Huron County, good building convenient to school, church and station. Price and particulars apply to Mrs. A. Yancamp, Belgrave, Ont. R. R. No. 1.

ENTERTAINER

PETE WHITNEY, singing comedian, includes comedy, dancing, etc. Special rates for all patriotic affairs. Address: 55 Bank of Hamilton Chambers, or Phone 622, Hamilton, Ont.

Parliamentary Frontiers.

On either side of the Commons chamber of Great Britain's Parliament house there is a distinct line along the floor, and any member who when speaking steps outside the line on his side is liable to be called to order. These lines are supposed to be scientific frontiers, and the neutral zone between is beyond the length of a sword thrust, and, although members no longer wear swords, except those who are selected to move and second addresses to the throne on certain occasions, the old precaution still lingers on.—Westminster Gazette.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headaches, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargement of the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 4, Windsor, Ont.

Odd and Ends.

The English language is spoken by more than 120,000,000.

The world's Sunday schools number 297,866, with 26,076,523 scholars, exclusive of the Catholic church.

Thirty-one colleges and universities in this country are courses in the various phases of journalism.

Thirty states at the beginning of the present year had on their statute books laws providing for the employment of State prisoners on road building.

According to a recent compilation there are 375,037 buildings of various kinds in New York City, the Borough of Manhattan having 84,849; the Bronx, 25,163; Brooklyn, 172,380; Queens, 62,525; and Richmond 20,120.

The first use of the treadmill was in China, where it did service in remote times in irrigating the land. It was introduced into English prisons in 1817 as a means of punishment.

In the Borough of Manhattan there are 813 office buildings, as against 146 in Brooklyn, 60 in the Bronx, 95 in Queens and 47 in Richmond.

A cricket ball thrown 127 years ago at Oxford, in 1873 established a record which has not yet been beaten.

GREAT SALE OF ORGANS AND PIANOS

Ye Olde Firme of Heintzman & Co., corner King and John streets, Hamilton, Ont., are offering 50 organs at a great reduction in price. Instruments bearing the names of such well-known makers as Bell, Doherty, Karn, Doherty, Queens, 62,525; and Richmond 20,120.

Good practice pianos from \$50 to \$100. Write for complete list of prices and terms.

Arabs and Girl Babies.

It is a sad day in an Arab home when a girl is born.
