In times past a fashion lasted with sight modifications for years. Much the same fashion continued through the long reign of Louis XIV. and another through that of Louis XV., while the ladies of the middle ages never thought of the continues. As for the les of the middle ages never thought of varying their customes. As for the Greeks and the Romans, generation succeeded generation with little change in female dress, and yet all these ladies of the past were more artistically dressed than those of to-day. Many no doubt spent more than they could afford, but when they had a costly dress they kept it and did not throw it away to replace it with another.—London Truth.

#### Hawaiian Guitars.

The manufacture of ukuleles is one of the industries of Hawaii. Early in the leighties Portuguese immigrants from the Madeira islands arrived in Honolulu, many of them bringing what appeared to be a very small guitar. It was played by holding it close to the body, the fingers of the left hand grasping the neck and the fingers of the right hand sweepnig the entire set of strings. The rapidity of the motion with the right hand caused the Hawaijans to call the instrument "ukulele" or "dancing flee."

### Weak, Sickly Folks Regain Health Quickly By New Remedy!

A Blood-food Now Manufactured That Accomplishes Marvels.

Lots of people that were thin and miserable for years have recently been restored by this simple treatment. All you have to do is take two little chocolate coated tables with a sip of water at the close of each meal.

The tablets, which, by the way, are called "Ferrozone," are in reality a perfect food for the blood. They contain exactly those elements your blood lacks when it becomes thin, weak, and unhealthy.

This is just the time to use Ferrogives digestion splendid aid, supplies nourishment for all weak organs. At once you feel buoyant and strong. Nutritious blood courses through your veins, supplies strength, makes you tingle with animation and ambition. No more headaches.

None of that tired languor. You feel like doing things because Ferrozone completely renews and strengthens your whole system.

No medicine on earth gives such quick, lasting benefits as Ferrozone. It has raised thousands from downright weakness, brings robust health simply because it contains the fortifying elements that run-down sys tems require.

One week after using Ferrozone month you'll scarcely credit the push your vigor and spirits have received. Ferrozone is more than a tonic because its work lasts, its benefits remain and are not temporary. It restores health where other treatments fail, and should be used by every man, woman and child. Try it, 50c per box or six boxes for \$2.50. Sold by all dealers or by mail from the Catarrhozone Co., Kingston, Ontario.

### The Norwegian Costume.

It is at church in Norway that the national costume is best seen. In the north the women wear short dark gowns, with fringed handkerchiefs tled becomingly over their curly fair hair, black ones for the matrons and white ones for maidens. In the south the old Norwegian dress is often worn. It consists of a short dark petticoat, with a stripe of bright colors, a full embroidered, while on Sundays a quantity of silver pins and chains are add. ed. The headdress varies according to the occasion and the wearer's social condition. The girls were jaunty red caps, the married women a coif made of many folds of starched white linen, platted over a wooden frame, and a bride wears a high metal crown curiously chased and set with jewels.

### **ANTIQUES**

The motifs of design in cut-glass of to-day are in many cases readily traceable in their features to the now antique forms and decorations in vogue in Ireland when that country was at the zenith of its glass-making

Little is known of the early history of Irish glass, but there is sufficient to warrant the assumption that it was among the arts practised at a period when Ireland was world famous for its skilled craftsmen in such industries as wood-carving, metalindustries as wood-carving, metal-working, etc. An old Irish saying gave "The best hands in the world are the hand of a good carpenter, the hand of a good smith and the hand of a skilled

At the time when Irish glass was at its best, from the decorative point, facetted cuttings largely preponderated. The chief centre of the facetted zone; it excites splendid appetite, industry was Waterford, but Cork, Belfast, Dublin, Londonderry, Dundalk and Carrickfergus- in the order named-all contributed, some of the districts having decorating plants only. A peculiarity of the Dublin centre was the manufacture of the blueglass linings so frequently seen in the perforated silverware baskets, sugars and creams, and the table salt-holders of the Queen Anne and Georgian period styles. Cork also had its own specialty in its combination of engraving and gilding combined with the facetted cuttings. Engraving, by the copper wheel process, was mainly used upon glass for the dinner table. while the gilding was applied to articles for milady's dressing table, cologne battles, powder boxes, brush, you'll feel like new, you'll appreciate and pin trays. It is these combinawhat real robust health means. In a tions in treatment that the cut glass of to-day resembles the work of other days long past. The glass-cutter now is doing the work of the engraver of olden times, and by using stone instead of copper wheels, in completing the double-motive design, brings his

work into the glass-cutting class. A feature common to both periods is the chequering which covers the facet of the hobnail formed by the interlaced lines of the cutting.

A comparison of old Cork glass designs with the latest conception in Canadian glassware specialties just put upon the market, will demonstrate

Another antique in glass decoration is resuscitated in the Tudor style. It is columns on each page, and the book a long seell from the fifteenth to the contains the Old and New Testaments, h century, but the dictates of twentie fashion cannot be denied and thus we initial letters are illuminated. The have a live century old decoration | binding is of oak, four and one-half adapted to articles of present day use.

MODERN WIRE ROPE.

Mathematical Precision, Rules Every Process in Its Making.

Although wire rope has been used as a mechanical appliance for almost 5.000 years, it is commonly regarded as a modern invention. During the many years which have elapsed since the first records of its use wire rope has passed from a crude to a highly developed product, and the purposes for which it is employed have increased a thousandfold. In no other branch of the American steel industry is there so great a demand for material of proved internity, for it might be safely suggested that wire rope is born to be abused. It is subjected to tremendous tensic strains; it must withstand constant bendings, abrasion, corrosion and the peculiar internal stress produced by vibration.

Wire rope as it is made to-day is the product of the metallurgist and the mechanic. Every process, from the smelting of the ores, the cold drawing of the wire and the heat treatments it receives down to the stranding or laying up of the cable, is conducted with mathematical precision.

The chemist sees that only steel of the proper analysis is used; the electric pyrometer insures uniformity of heat; treatment in various testing machines clearly develops the worth of the product before it is allowed to leave the mill. Wire rope is used in the mine shafts more than a mile in depth, and may be found on aeroplanes which sail a mile or more above the ground. -Technical World.

Minard's Liniment Cures Garget in

Got a new one. Prospective juror said he was a retired expressman, a gentleman of leisure and a "headline reader." Still going through life by express, even though a gentleman of leisure, apparently.—New York Evening Telegram.

### The Vampire Bat.

The true vampire bat is a quite insignificant creature, not unlike our noctule bat in general appearance and size, but with a small "nose leaf" and no web between the hind legs. The really remarkable thing about it is its perfect adaptation for secret and painless bloodletting. Most bats have teeth very like those of the eauses no pain, but a great deal of bleeding. Indeed, not only does the winged bloodletter's attentions, but a hite may be inflicted unfelt on a person who is awake at the time.—London raphic.

### The Giant Bible.

manuscript work known as the giant Bible on account of its extraordinary dimensions. It measures 90 centimeters in length and is 50 centimetres in breadth—that is about 35 by 19 have been lost. centimeters in thickness. The Heat of Australia.

Australia is the hottest country on record. I have ridden for miles astride the equator, but I have never found heat to compare wth this. Out in the country in the dry times there appears to be little more than a sheet of brown paper between you and the lewer regions, and the people facetihens on cracked ice to keep them laying boiled eggs.—Sydney

### He is Just One More of the Many

WHO HAS FOUND NEW HEALTH IN DODD'S KICNEY PILLS.

Philip McLeod Tells How He Suffered From Kidney Trouble for Years and Found a Quick and Complete Cure in Dodd's Kidney Pills.

Tarbot, Victoria Co., C. B., June 5 -(Special)-Philip McLeod is just one more of the many residents in this neighborhood who have found new health in Lodd's Kidney Pills.

"I have used boad's Kidney Pilis with great success," Mr. ...cr.ccd states. "bor years I had zidney trouble and could get notting to help me. Hearing of what Dodd's Kidney Pills have done for others led me to use them. Fixe boxes aured no completely.

"I have recommended Dodd's Kidney Pills to many people. I cannot

speak too highly of them." The testimony of people who have been cured is better than all the theory in the world. Dodd's Kidney Pills are purely and simply a kidney remedy. If you have kidney trouble all you need to do is to ask others. They will tell you that Dodd's Kidney Pills will cure you.

They will also tell you that Dodd's Kidney Pills cure rheumatism, dropsy, heart disease, diabetes, gravel and Bright's Disease. That is because all these diseases are either kidney diseases or are caused by diseased kid-

Mrs. Talkalot-What I have just told you is a great secret. It was told to me in confidence. I must caution rou against repeating it. Miss Caustique-I shall endeavor to be just as cautious as you are.

If a female duke is a duchess.
Would a female spook be a spuchess?
And if a maie goose is a gander,
Then would a maie moose oe a mander?

if water you freeze is frozen, is the maiden you squeeze, then squezen? If a thing you break is broken, Would a think that you take be token?

If the plural of child is children, Would the plural of wild be wildren? If a number of cows are cattle, Would a number of bows be pattle?

If a man who makes plays is a playwright
Would a man who makes hay be a haywright?
If a person who fails is a failure,
Would a person who quails be a quail-

If the apple you bite is bitten, Would the battle you fight be fitten? And if a young cat is a kitten, Then would a young rat be a ritten?

If a person who spends is a spendthrift,
Would a person who lends be a leadthrift?
If drinking too much makes a drunkard, Would thinking too much make a thunk-ard?

But why pile on the confusion? Still, I'd like to ask in conclusion: I'a chap from New York's a New Yorkwould a fellow from Cork be a Corker?

-Walter G. Doty, in Life

### A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired carnivora, with long canines and small incisors, but in the true blood sucking vampire bat the incisors are very large and broad and exceedingly sharp edged, thus being able to inflict a shaving surface cut which causes no pain, but a great deal of or a loss of interest in fire, I havite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day, Address: Mrs. M. Summers, Box 5, Wind-

VANISHING GOLD.

What Has Become of All That · Metal That Has Been Mined?

What becomes of gold? Where is all of that yellow metal that has been mined?

It is one of the oldest metals in human use. There are gold beads dating back to the stone age. It is an object of almost universal desire. It is proof against almost all the influences which destroy other metals, and it has been mined in enormous quantities. Yet to-day more than two-thirds of the gold in use has been dug since 1849.

What becomes of the rest? Where is the gold that set Jason wandering into the Black Sea, that filled the treasuries of Croesus. that paid the terrific tribute which Persian kings assessed against the Punjab? What has happened to the yellow dust and 'electrum"—an alloy of gold and silver-which negro traders brought down the Nile to Egypt for 4,000 or better tune than others. There is in the royal library at 5,000 years? Ancient gold like that of Stockholm among other curiosities a modern times was used for money and or ornaments, but both have disap peared Where?

The most enduring of metals and yet the most evanescent, perpetually cyn benefit and who is far from being a sought and yet constantly escaping skilled pianist discovers that he plays inches. It requires three men to lift the hands of even the successful seekit. There are 309 pages, but seven er-that is gold What is the reason for its curious elusiveness?-Chicago

### A CURIOUS ANIMAL.

The Sea Cow Gave Rise to the Legend of the Sirens The dugong, or sea cow, is a pecu-

liar animal. It resembles the familiar seal, but it has no hair on the acdy and is more nearly related to porpoises and whales. This animal is found on the shores

of the Indian Ocean, about fifteen degrees on each side of the equator, from East Africa to Australia, and also in the Red Sea. It is a marine animal which never ascends the rivers, its (From Sydney Bulletin) food consisting chiefly of seaweed and I didn't take my boy to be a soldier, the algae found in the water. Years I want and the ago it was report du mave been found in large hards of sound hundred individuals and to the o been so fearless as to allow it ... be touched with the hand of man. In recent years, however, it is met with only in twos and threes, and has become very sky I didn't raise a soldier in my son. and wary. Its flesh has been regarded as a delicary, and it is stated that the Malay kings claim as royal property all those taken within their domain. Its habit of raising its round head cut of the water, and its great affection for its young, which it carries under the fore fin, are thought to have given rise to the legend of the mermaid, in allusion to which the name sirenia was given by this order of mammals. It was recorded that it was

Swords and Walking Sticks. The walking stick, as we know it at resent, gained its popularity in France during the eighteenth century, when it came to be carried by rich people who had no right to wear swords. The dandies twirled thin bamboo canes in their fingers, but the great financiers, who had considerable influence at that time, made the sticks fashionable, additions to their wardrobes and sometimes paid much as 10,000 crowns for one. This carrying of a walking stick was regarded as a democratic triumph

### KEEPING A PIANO IN TUNE

Use All the Keys Every Time the Instrument is Played.

The trained musician has little trouble in keeping his prano in excellent tune. But the amateur pianist who just plays little scratches of this and that soon lines that some of the keys are in much better tune than others.

The fault is not always that of the pions tuner, nor is it always due to the fact that the piano has been exposed to dampness or left in a strong draft of air. Usually it is because the anateur player doesn't use every key when he plays. The musician who plays merely for his better in some one key, and consequently be selects all his music from that key. The true musician pays all keys and has no preference for any particular one. The skilled murician runs his fingers lightly over the whole keyboard before starting any piece, thus bringing all the notes into action. But the clumsy

starting any piece, thus bringing all the notes into action. But the clumsy amateur usually starts without the slightest pretense of a prelude or calling forth the different tones of the plano. No pino can be expected to keep long in perfect tune unless every key is used about as much as every other key. The well modulated instrument is the one whose notes all see equal amount of service. notes all see equal amount of service.

The piano like the voice, must be even ly used to be perfect. Any one who talks in a high pitched voice and only calls forth the high tones of his throat cannot expect to talk in a low, well mod-ulated voice when he never uses the low, soft strains. A cheap piano well tak-en care of will sound better if played by a musician who uses all the keys than a higher priced one which is only allowed to produce the tones of the single key which he amateur player can read best
