### WANTS EVERYBODY TO KNOW DODD'S KIDNEY PILLS CURED HIM.

Louis Champagne, After a Long Period of Sickness and Weakness, Says He Found New Health in Dodd's Kidney Pills.

Millerand, Ont., May 1.—(Special.)—Strong and hearty again after a long period of weakness and ill-health, Louis Champagne, a well-known resident of this place, is spreading broadcast the good news that he found new health and strength in Dodd's Kidney Pills.

"For a long time," Mr. Champagne states in an interview, "I suffered from kidney disease and backache. My appetite was uncertain, and I got up in the morning with a bitter taste in my mouth. There were flashes of light before my eyes, and I had a dragging sensation across the loins. My limbs were heavy and I was always tired.

"Then I decided to try Dodd's Kidney Pills, and I am glad to be able to say that they have made me well. I recommend Dodd's Kidney Pills to all those who suffer from feebleness or bad kidneys.

If you have the symptoms mentioned by Mr. Champagne, you may be sure your kidneys need attention. Neglected kidneys are the cause of more than half the ills mankind is heir to. The way to treat sick or weak kidneys is to use Dodd's Kidney Pills.

### CURBING THE DRINKERS. The New Scheme That is Being Tried in Parts of Sweden.

The "Stockholm system" of allowing each citizen only a fixed quantity of spirituous drink, which has inaugurated just after the war started, has now been extended to thirty-one of the hundred districts in Sweden. The system which is now in operation was devised by Dr. Ivan Bratt. It allows every citizen in good standing to buy one liter and no more of spirituous liquor every five days.

To make this plan feasible each person is provided with a small book resembling a commutation railroad ticket, from which a coupon is torn every time the consumer buys his liter of whiskey, brandy, cognac, punch, schnaps, or whatever kind of alcoholic beverage he fancies. At the same time his book is stamped with the date of the purchase, so that it is clear to the dealer when he made his last purchase. Without showing his book no citizen of Stockholm has the remotest chance of obtaining a bottle of liquor anywhere in the city.

It is true that in some cases, however, exceptions are made. If one can persuade the authorities that on account of his social position and the demands of constant entertainment one liter every five days is totally inadequate and if the authorities are convinced that such a person can be trusted with more liquor without abusing the privilege conferred upon him he is then given a special license to purchase two, three or more liters, according to the circumstances. On the other hand, if the person is a drunkard, has a police record or has in any other way incurred the displeasure of the authorities he is allowed no liquor at all.

Minard's Liniment, Lumberman's Friend,  
THE WHOLE TRUTH,  
What the nation will desire above all things will be a relentless and unlimited probing of the whole business. We want to know the truth, and the whole truth; and if it be shown that the country has been plundered in her hour of supreme agony, no punishment will be too severe for the scoundrels who have enriched themselves by robbing the cartridge-belts of our boys to go into action.

Overalls and such heavy articles should be dipped in the tub of water, then laid on the washstand, thoroughly soaped and scrubbed with a scrubbing brush.

### A GOOD MEDICINE FOR THE SPRING

Do Not Use Harsh Purgatives—A Tonic Is All You Need.

Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in spring is a tonic that will make new blood and build up the system. Dr. Williams' Pink Pills is the only medicine that can do this speedily, safely and surely. Every dose of this medicine makes new blood, which clears the skin, strengthens the appetite and makes tired, depressed men, women and children bright, active and strong. L. R. Whitman, Harmony Mills, N. B., says: "As a tonic and strength builder I consider Dr. Williams' Pink Pills wonderful. My whole system was badly run down, and although I faithfully took a tonic given me by my doctor, I could note no improvement. Then I began Dr. Williams' Pink Pills and was soon restored to my old time health. I can most heartily endorse this medicine."

Send for all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

# ANTIQUES

### Its Strange Power is the Marvel of Thousands it Has Cured.

Every rheumatic should test this great remedy.

Rheumatism is the greatest test of "Nerviline" to meet. It cures pains, big and little, but to rheumatism especially it is a great blessing, just as it is to those who suffer from neuralgia, sciatica, lumbago, stiffness or enlarged joints.

Remember this: There is nothing harmful in Nerviline.

You can use it freely on your children for their aches and pains. It is dependable, reliable, safe. Nothing to equal good old Nerviline as a general, family remedy.

Get the large 50 cent family bottle; it is far more economical than the 25 cent trial size. Sold by dealers everywhere, or direct from The Catarrh-ozone Co., Kingston, Canada.

Somebody told Vanessa that if she would walk backwards down the stairs she would see he intended.

"Did it work?"

"Completely." She fell down the stairs and now she is engaged to the doctor they called in.

### COMPLETE SUCCESS.

Don't load your stomach with cough syrups. Send healing medication through the nostrils—sent it into the passages that are subject to colds and catarrh. Easy to do this with Catarrh-ozone, which cures a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrh-ozone—all through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains with Catarrh-ozone follow. You'll not have colds, nor will you suffer from sniffles, bronchitis, or throat trouble if Catarrh-ozone is used. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrh-ozone, large size, two months' treatment, costs you \$1.00; small size 50c; sample size 25c.

### ONE IMPORTANT FACT.

But for one fact, which is important, Sir Sam is quite justified in saying that Allison is as much entitled to make money out of the war orders as any purveyor of "sausages, boots, or breeches." The minister has, however, himself announced on the floor of Parliament that he chose Allison as his "guide and counselor" in the buying of war supplies, and has held him up to our eyes as a gentleman animated only by the sincerest patriotism without a trace of commercialism or personal selfishness.

### TEST "ALL WOOL" BY FIRE

To Detect Cotton Fibres Burn a Sample of the Cloth.

Until the proper labeling of textiles has been made compulsory there are certain simple tests by means of which one may determine whether an "all wool" fabric is really all wool or not. The old way of testing by feeling and looking is no longer reliable, for cotton can be made both to feel and look like wool. The only sure way is to take samples of the goods home with you and make tests of them there.

If a piece of cotton cloth is ignited it will be found to burn rather rapidly with a bright, steady flame. There is no disagreeable odor, and when the material is completely consumed there will be left only a small amount of light gray, fluffy ash. If a piece of pure wool is ignited it will be found to burn much more slowly and with a less steady flame, emitting a characteristic, mild hissing noise and a strong odor very similar to that of burned horn. There will be much more ash remaining than in the case of cotton, and it will be in the form of a crinkly, black, crisp ball.

In applying this test to a fabric the whole sample should not be burned at once, for if it is a so-called wool piece containing considerable cotton it will be very difficult to determine whether it is burning more like cotton or wool. Threads should be taken from the warp and weft, and burned separately. With a very little practice one will be able to detect the cotton threads by a characteristic manner of burning. Sometimes it is well to pick a thread apart with a pin and test the individual fibre with the flame to determine whether the thread is entirely wool or mixed with cotton.

### CARELESS DRIVING.

As motorcars multiply in numbers it is evident that increasingly careful driving is called for. The driver, who "hits her up" endangers not only his own safety, but the safety of other driving is called for. The driver, who fails to slacken speed when they come to cross streets. There are drivers who dash around corners or across a boulevard at a high speed. It cannot be too strongly emphasized that the really competent driver always has his car under control; that he always drives on the theory that every other driver may be careless or may lose his head. Caution marks the competent driver. Recklessness belongs only to the jay.—Kansas City Times.

### CONTINUOUS PERFORMANCE.

"They have their baby photographed frequently."

"Recently that they could paste the photographs together and have a film."

### JAVANESE WEDDINGS.

Marriages are celebrated when Principals reach age of ten.

If the history of Romeo and Juliet were to be translated into Malay, the Javanese would be overcome with wonder at the troubles which befell those ill-starred lovers. The method in vogue among European nations of compelling two young people to regulate their own affairs would excite the commiseration of a mother of Java, for she would regard it as the refinement of cruelty to throw her daughter or her son upon their own resources, with no kindly hand to arrange the details of the most important transaction of one's life.

The gentle, brown subjects of Queen Wilhelmina, who live in the great island over which she reigns from her tulip gardens 8,000 miles away, never have the disagreeable incidents of breach of promise or elopement. No fond heart is ever jolted by jilt, and the unpleasant effects of colds and influenza, as results of exposure to the night air while serenading some damsel, are not among the dangers of the coffee berry and the betel nut.

In the well organized social scheme of Java, marriages are made as soon as the little strangers open their blinking, slanting bits of black eyes upon the world. As soon as a baby is born, a suitable husband or wife is sought out among the families of the same social set, and the parents of the future wedded pair arrange all the details nicely and comfortably, and the young people, by this simple procedure, are spared the heart-breaking experience of the bride and groom when they arrive at the ages of 10 or 12, preparations are begun for the celebrations of the marriage ceremony.

Much planning of the wedding gown of the bride is avoided by the simple process of painting her face and the upper portion of her body with a light coat of yellow ochre. The rest of her figure is enveloped in two "sarongs," one coming under the arm pits and over the chest and the lower one wrapped around the hips and coming down to the feet. The "sarongs" are brilliantly covered with native dyes and the more expensive ear designs of much beauty and taste.

As the hour of the ceremony draws near, a richly beaded and embroidered crown is placed upon the bride's head. Hanging down each side from the crown are long strings of tuberoses, threaded on thin strips of bamboo, and held to below the waist. The eldest women in the village are selected for bridesmaids, and they deck the bride up in her finery and touch up the yellow ochre with paint brushes wherever the pigment shows signs of wear. The bride is rarely over ten years of age at this time.

### HOW TO KEEP MILK.

Housewives would do well to follow these instructions.

Always take the milk into the house as soon as possible, in warm weather put the dish where the sun cannot shine on it, as it is treated in place because it has been in the sunshine two or three hours.

Except in very cold weather milk cannot be kept properly without ice. Always put it in the refrigerator as soon as it is received, and unless the milk is in actual contact with the ice it will be colder in the bottom of the refrigerator than in the top, as the cold air settles rapidly to the bottom.

Do not take milk from the original bottle and fill it when needed. It should never be stored in a bowl or pitcher. The "Mother's Magazine" says: "Always clean the edge of the milk bottle and wash on the top of the cap before removing the cap. Keep the cap snapped in place except when actually pouring the milk from the bottle.

No matter how clean your home may be, milk will deteriorate if exposed to the air. One of the best ways of serving milk on the table, from a milk stand, is in a glass with original bottle. Always keep in mind the fact milk is easily contaminated from dust, odor and flies—as many as 100,000 germs or bacteria have been found on a single fly, and in thousands upon thousands of cases intestinal disorder in infants has resulted from flies contaminating the upon which babies were fed. In one experiment 44 flies were examined and were found to carry an average of 1,500,000 bacteria per fly, such as might readily cause intestinal disorders in infants.

Always keep the refrigerator clean and sweet. Inspect it and scald it out every week, wiping up at once any particles of food, liquid or solid that may be spilled in it. Do your share in keeping the empty bottles clean. Do not wash them with soap or cloth, but first rinse them with cold or slightly warm water, and then scald them. If you scald them before rinsing with cold or warm water, the rinsing water will make the milk stick to the glass.

Be fair to your neighbors, just as you would have them be fair to you. If any contagious disease breaks out in your family do not return any of the bottles to the milkman until you have consulted your doctor and he has advised you how to sterilize them.

### QUEERLY NAMED INNS.

The names of the inns and public houses in England are always a source of unceasing delight to the American tourist, fond of the picturesque. Some of the quaintest titles have recently been collected into a list that is both historically interesting and whimsically absurd. Among the thousand and one signs given in the collection can be found "William Rufus," "Kate the Queen," "Three Ravens," "Royal Oak," "White Hart," "Beetle and Wedge," "Cat and the Wheel" and "Cat and the Fiddle."

"Fish and Ring" refer first to the well-known family of the Dukes and secondly to the legend of Saint Polycarpus, only to be recognized in "The Shakespear," "The Robert Burns" and "The Child Harold." Sir Walter Scott once gave a motto for an inn close to the famous field of Flodden, "Drink, weary pilgrim, drink," which is remembered in the "Complete Angler," which sport in general is represented by plenty of "Piercing," "Bat and Ball" and an "Unpleasant." "The Great White Horse" brings before the eyes the rotund figure of little Mr. Pickwick, while the "Dun Cow" Heroes are immortalized in "Lord Wellington," "Napier," "Randolph," "Garibaldi," and heroes in the American admirer of Captain John Paul Jones in memory, the Indian maiden Pocahontas. Other suggestive signs bear the names of "Highland Gait," "The Ocean," "The Fish," "The Dials of Hercules." In fact, the oddity and the number of names given are simply astonishing and form a most interesting prep into the middle-class English character.
