The Proper Care of Milk :

Milk, to keep properly, should never get warmer than 50 degrees Fahrenheit until it is consumed. The lower the tem perature the better the milk will keep. Bacteria—such as those which cause wilk to sour—develop very slowly and cause little change in milk kept at such

w temperatures. A slight rise in temperature, even for a short time, permits these bacteria to saultiply rapidly and bring about rapid deterioration of the milk, which may ren-

der it unfit for ordinary use.

Don't leave your mik bottles on a hot posch or doorstep. A short expos2ure in the sun or a warm place hastens the spoiling even of cold bettled milk.

Heve the milkman put milk into the sefrigerator. If this is impossible provide warm weather a box with ice or a sale of water in a shady place for

At any rate have the bottles left in the coolest and shadlest place about your premises.

Don't leave milk in bottles or vessels in

Is necessary.

Never pour milk which has been exposed to the air back into a bottle containing other milk. Keep such milk cold and covered in another clean utensil.

Keep milk, bottles covered either with caps or by placing glasses over them.

Keep them covered in the refrigerator and in the kitchen or dining room.

Never pour milk into an unsterile bowl or sitcher, is ald all vessels into which scald all vessels into which is poured for keeping or serving. these utensils after scalding before

setting milk into them.

Before opening a bottle of milk wash and wipe the outside of the cap with water and a clean cloth. The little de-pression at the top of the bottle collects dust or water or milk, which may attract files. Ilft out the cap with a point-ed instrument, so that the outside of the cap, which may be contaminated, will not e pushed down into the milk.

Clean and scald the refrigerator where sells is stored regularly with hot sal soda solution. See that the drip pipe is kept solution. See that the crip pipe is sepen and clean.

Even in the cleanest refrigerator never keep milk in an open vessel. Milk ab-

seep milk in an open vessel. Milk abseeps odors easily.

If there are babies or little children
in the home clean, cold, covered milk is
absolutely essential.

Finally, clean empty bottles. Rinse
thoroughly with cold water every milk

SPARED HER HOME.

Belgian Woman's Charity Touched the Huns.

Albert Rhys Williams, relating his experiences while "In the Claws of the German Eagle," tells the story of the Beigian peasant woman who saved her little home from the Germans by kindness. "Below Argentau," says Mr. Williams, "there was a vine-covered cottage before which stood a peasant woman guarding her little domain. Her weapon was not a rifle, but seve eral buckets of water and a pleasant smile. I ventured to ask how she used the water. She had no time to explain, for at that very moment a column of soldiers came slowly plod-ding down the dusty road. She motioned me away as though she would free herself from whatever stigma my presence might incur. A worried look clouded her face, as though she were saying to herself: 'I know that is have been spared so far by all the brigands which have gone by, but perhaps here at last is the band that has been appointed to wipe us out.' This i water, then, was a peace-offering, a

COURT ETIQUETTE.

Much Needless Ceremony in Olden Times.

Royal personages as well as those numbers of noble families who have the privilege of attending on them would find the cares connected with their high position considerably increased if the extravagant formalities which attached to count life two or three centuries ago to count life two or three centuries ago were still in vogue.

Precedence ruled in all things at the Count of Louis IV, at Versallies. Even the king's morning toilette was made in the presence of the courtiers, who were continually arriving. As the king put on his outer garments, these were handed to him by the nobleman of the highest rank in attendance.

The story is told that, as the king was pulling on his waistcoat one morning, it was handed to him by a count; but beway she put a smile on her face, but She it was handed to him by a count; but be-fore the count had passed the garment to

fore the count had passed the garment to the king, a duke came in.

This made it necessary for the count to hand the waistcoat at once to the duke, as it would have been against etiquette for a person of lower rank to pass the garment. And as it must be handed with the bare hands, the king had to wait the duke removed his gloves.

When this operation was performed, and the duke was about to advance with the waistcoat, the door again opened and

the waistcoat, the door again opened and a royal prince of a younger branch of the family entered. This duke, of course, at once presented the walstcoat to a new comer, as he was a higher rank.

But the prince was iso gloved; and when he had performed that somewhat tedfous operation icf ungloving, there arrived on the scene another prince, who

happened to be of the elder pranch. So the unfortunate king had to tle oasis, drew rein and gave the oronce more, and as the room was cold, it is recorded that he took, a violent themselves down upon the grass while the officers' horse thrust his nose deep

At King Louis's dinner, when the cook brought in the meat for the royal plate, he was attended by armed solding are preceded by a herald, shouting "Gentlemen, the King's viands!" Whereupon the company all uncovered, and the senting adulted the royal chicken or the water up. More buckets were being continually brought out. Some of tineis saluted the roast chicken or the When the king was about to wink, chamberlain announced the fact at the top of his voice, and two functionaries, whose duty it was to taste the wine or water in order to prove that it had not even with many signs it proved a failure. They both laughed heartily to-

been poisoned, stepped forward, poured out a little, and drank it off. Then the thing drank.

The great mass of royal formalities and points of etiquette disappeared with the last century, but the rules of precedence are still very strictly observed in royal courts.—Exchange. acted in this region where the sky was

THANKFUL MOTHERS

Mrs. Willie Theriault, Pacquetville. N. B., says: "I am extremely thankful that I tried Baby's Own Tablets for istries elicited from the United States my baby. Through their use baby National Geographic Society the folthrived wonderfully, and I feel as if lowing defining territories in the two cannot recommend them too highly." Baby's Own Tablets break up colds and simple fevers; cure constipation, colic and indigestion, and make teething easy. In fact, they cure all the minor ills of little ones. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Erockville, Ont.

Preserve Eggs Now

The indications are that eggs will nate those Belgians who speak French be dear next winter, dearer than they were last winter, so those who want ezzs had better put some down now, while they are comparatively cheap. Do not use oats, bran, salt or such mediums; moreover, the patent preservatives usually advertised as being so simple and effective had better be adopted with caution. Better use something that has been tried and found satisfactory.

According to Dr. Frank T. Shutt, Dominion Chemist, lime water is one of the best preservatives, and we

quote the following from his Exhibition Circular No. 42. The method of preparation is simply to slake one pound good quick liming with a small quantity of water, and then stir the milk of fime so formed into five gallous of water. After the mixture has been kept well stirred for a few hours, it is allowed to settle. The supernatant liquid, which is now "saturated" limewater, is drawn off in your own home and without any- and poured over the eggs, previously one's assistance, you can apply the placed in a creek or water-tight bar-

As exposure to the air tends to precipitate the lime (as carbonate), and thus to weaken the solution, the vessel containing the eggs should be kept covered. The air may be excluded by a covering of sweet oil, or by sacking upon which a paste of lime is spread. If, after a time, there is any noticeable precipitation of the lime, the limewater should be drawn or siphoned off, and replaced with a further quantity newly prepared.

GENERAL PRECAUTIONS NECES-SARY TO TAKE. It is essential that attention be paid to the following points:

1. That perfectly fresh eggs only be

2. That the eggs should throughout the whole period of preservation be completely immersed.

Although not necessary to the preservation of the eggs in a sound con-

CUTICURA HEALS TICHY SCALP

That Burned and Pained Four Years. Hair Came Out. Loss of Sleep.

"My scalp was red and very itchy, and a fine rash developed which burned and pained incessantly. This seemed to destroy the hair roots, causing my hair to come out, which disfigured the top of my head. It also caused loss of sleep. 'The trouble lasted four years. Then I sent for a free sample of Cuticura Soap and Ointment which encouraged me so

I bought more, and I had one cake of Cuticura Soap and one box of Ointment and I was healed." (Signed) John Cunningham, Church St., Antigonish, N.S., April 4, 1917.

WALLOON AND FLEMING.

The report coming from Amsterdam to the effect that the German Governor-General of Belgium is to divide that country's Ministries, of Agriculture, Industry, Art and Science and Labor into Flemish and Wallocn min-

districts: "In point of population the Walloon district of Belgium is considerably smaller than the Flemish, the latest census showing some 3,000,000 Walloons and 4.000.000 Flemings, but in area the Walloons have a slight advantage. The advantage in population grows out of the fact that three of the four cities of the kingdom which boast of more than 100.000 inhabitants Brussels. Antwerp and Ghent-are in Flemish territory, while Liege imaginary boundary line running in a temperature of the body? Is the maxsouthwesterly direction from Aix-la- imum weight carried by the parcel

Chapelle (German, Aachen) to Lille, or a French dialect, while the Flemings are those who speak Dutch or a Dutch dialect. Designated as provinces, the Walloons are in the main confined to Hainaut, Namur, Liege, Luxenberg and a part of Brabant, comprising an area about five times as arge as the State of Rhode Island, while Flemish territory approximates

the area of the State of Connecticut. "In the veins of the Walloons runs a strain of Celtic blood, for they are the descendants of the Belgae of Julius Caesar's day. They exchanged their own language for that of the Latins.

"During the fierce religious conflicts of the sixteenth century the Walloons as a rule sided with the Spaniards and won the epithet of 'The Malcontents.' In fact, they furnished the Catholic monarch with many of his mercenaries during the days when the Duke of Alva, Don John of Austria and Grand Commander Requesens were endeavoring to put down revolt in the Low Countries.

"The Walloom are generally ac-credited with more vivacity and nervous energy than their Flemish countrymen, and in a country where industry and thrift are universal characteristics a comparison which awards the palm for these virtues to the Walloons is perhaps not odious. Among the lower classes, however, the Flemings are said to excel their brunette compatriots in personal neatness.

"Among the most distinguished Walloon men of letters in the middle ages was the famous chronicler Froissart.'

Walrus of Alaska. The Alaska walrus are enormous.

The average one is as big as an ox, and it often weighs more than a ton. A walrus was recently killed by some whalers near Point Barrow, whose head weighed eighty pounds, and skin, including flippers, 500 pounds. That animal had a girth of fourteen feet, and its weight was over 2,000 pounds. The skin was from half an inch to dition, a temperature of 40 degrees F. three inches in thickness, and the to 45 degrees F. will no doubt mater-blubber weighed 500 points.

THE BABY LIONS.

[Sung to the tune of "The Battle Hymn of the Republic."]
The Lion Cubs are coming from their homes across the sea.
For the Mother Lion calls them on a trip They're going to see the Kaiser, do think it's glad he'll be, When the Baby Lions come?

Chorus: Growling like the distant thunder, German hordes they'll rend asunder, Making them disgorge their plunder, When the Baby Lions come.

Canada responded with a roar across the world, Australia and New Zealand too their battle flags unfuried. India, South Africa, the Islands of the Sea, They all come marching on.

All the highways of ereation see them speeding to the fight, help the Mother Lion in her battle for the right;
The Kaiser and his vandals they will surely see the light,
When the Baby Lions come.

They've left their sun kissed deserts and their distant fields of ice. They're left their maple sugar, kangaroos and crops of rice, Quite expensive, but the Prussians will most likely pay the price, When the Baby Lions come.

They are looking very brawly, very strong, and very fit.

And their souls are filled with burning that the flames of Flanders lit;

Kaiser Bet will find he can't chew up the mouthful he has bit.

When the Baby Lions come. Yes, the Lion Family's coming, not a

member of it wanes, To the rescue of a dainty Belgian maid that's bound in chains, And if need be they will pour out every drop within their veins.
When the Baby Lions come. -Robert McKendry, in Chicago Tribune

How to Purify the **Blood**

"Fifteen to thirty drops of Extract of Roots, commonly called Mether Seigel's Carative Syrup, may be taken in water with meals and at bedtime, for the cure of indigestion, consti-pation and bad blood. Persistence in this treatment will effect a cure in nearly every case." Get the genuine at druggists. `~~~~~~~`

GET BACK TO NATURE.

Live the Simple Life and Win Health and Happiness.

The movement to return to nature and simple life is the solution offered to the high cost of living problem, but health high cost of living problem, but health experts and enthusiasts have found it to be the only way of right living or healthful living kwown to-day. They have adopted it as a safe road to health. They say that a return to nature means good digestion, sound sleep, a clear head, a sleed mind, contentment and joy to be placid mind, contentment and joy to be

But first, they say, it means getting close to nature—living out of doors as much as possible by working, playing and resting in the open air and, above and resting in the open air and, above all, by sleeping in the open air. "Out-door sleeping is the best life preserver known." It means also going to the garthe and erchard for your bill of fare—
tomatoes, lettuce, celery, spinach, turnips, beans, corn, peas, melons, berries,
apples, peaches, plums and all other
fruits and green stuffs untouched by

The real value of adopting the simple e, according to the health experts, lines the pleasure we find in living it. To it grudgingly or without knowing and sopreciating its benefits we botch it and fail, but to love health more than ap-petite and seek it is to have health, comfort, efficiency and a long life. "Start the simple life—begin it to-day," is the motte of this health movement. motte of this health movement.— North Carolina State Board of Health Bulletin.

Couldn't Stand Defeat.

Dr. Grenfelt tells an amusing story of the introduction of football in Labrador, when defeat was considered so unendurable a mortification that it had to be mutually agreed beforehand that neither side should win. "We saw," he says. "that unusual spectacle of the side that had been scored against solemnly allowed to walk across the field and kick a goal to save them the feeling of being beaten."

Old Time London Ruffians. At the beginning of the eighteenth

century a number of ruffianly young men of the higher classes called by Swift "a race of rakes that play the devil about the town every night"known as "Mohocks," infested London, sallying out drunk in the streets. carrying short clubs loaded with lead at both ends and perpetrating shameful cruelties upon peaceful passersby, wantonly wounding and disfiguring the men and subjecting all alike to atroctous insults. Lecky says that matrons inclosed in barrels were rolled down the steep and stony Snow hill. Watchmen were unmercifully beaten, and their noses were slit. Coacher and chairs were overturned on rubbish heaps, and country gentlemen visiting the theaters had to be accompanied by their armed retainers as if in time of war.-Pearson's Weekly.
