who would enlist. She would do her own share of this plowing, and what she could not do herself she would get done by enlisting other women in the work. In this way the land would be tilled and at the same time men would be secured to fill the ranks. It is this spirit that has made our Empire what it is. The next few months now before us will be months of the greatest importance. It is by the sacrifices of our men and our women that our cause is to be won. This country's salvation needs every man who can enlist, and the management of this battalion can be easily seen and will welcome any man ready to serve his country.
