Perhaps so; at any rate he will not miss the sum required to make the change fit for the acquisition of Miss Laura Derwent. She must be considered as his guest, and treated accordingly.

"You are an intimate friend of his," grins Lady Roskwell. "He will not care, whatever it may cost. No doubt the steward has orders to pay all the charges. At any rate, we must set about the work at once. Surely there must be some means of communicating with Lord Delamere," says Signa, gently.

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"What a magnificent piece!" he says, with a faint smile—"yes, you wanted to turn out the old place and restore it to its ancient grandeur; and now, lo and behold! you are at it in real earnest. Perhaps you wish that it were your own?"

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

The guarantee of a Dominion-wide industry backs EUREKA HARNESS OIL. It makes all black leather tacker, softer, wear longer. Dealers everywhere. THE IMPERIAL OIL COMPANY, Limited. Toronto, Canada.

"As poor as I am, for instance," says Hector Warren, with a smile. "I suppose he would be very unhappy."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"Hector," says Archie, suddenly, "you haven't read those letters I gave you. Why don't you?" "Oh, they'll wait!" he says, carelessly.

"I thought everyone read their letters directly they got them," says Archie. "I wonder what's in that long blue envelope with the red seal?" "My dear Archie," expostulates Signa, laughing, "you must learn to curb your curiosity."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

Many a child has been called awkward, has been punished in school for not keeping still or for dropping things, when the trouble was really St. Vitus dance. This disease may appear at any age, but is most common between the ages of six and fourteen years. It is caused by thin blood, which fails to carry sufficient nourishment to the nerves, and the child becomes restless and twitching of the muscles and jerking of the limbs and body follow.

The seven principal engineering societies of Germany have combined into a new association called the German Association of Technical Scientific Societies. The Chinese Government is about to open its first aviation school. There is quite a material decrease in the number of public vehicles plying the streets of London as compared with that of two years ago.

Flowers will turn toward an artificial light just as they do toward the sun. About four million tons of herrings are caught in Japan every year, and the greater part of the catch is used for fertilizing the soil fields. A scientific instrument named the "turbidimeter" has been invented for the purpose of measuring the turbidity of spinal fluids, with a view to aiding the diagnosis of mental diseases.

A new disinfectant, a by-product in the manufacture of turpentine, is said to be more than four times as powerful as carbolic acid for disinfecting purposes, yet non-toxic and without harmful effects on delicate membranes or with fabrics or metals. The earliest mention of coal in the territory which afterwards became the United States is recorded in the journal of Father Louis Hennepin, a French missionary, in 1673.

The best coffee comes from Java, and yet the coffee served by the Japanese is very poor. British Honduras is a natural greenhouse, where most anything will grow, but there is little or no agricultural industry, the natives importing nearly all their food. The weeping willow came originally from the banks of the river Euphrates. Bread as a daily food is eaten by about one-third of the earth's population. In many countries rice is the chief food.

An English colliery is drained by a pump which has been in constant operation for 100 years. The greatest artificial harbor in the world is planned for the city of Rotterdam. It will cover nearly 800 acres. A method of plating aluminum on iron has been announced by a French inventor. The orange is the toughest wood grown in the United States. A home without a chimney has been recently completed at Hood River, Ore. It is operated electrically. Eggs are incubated in China by burying them in warm rice, which is heated daily for the purpose of maintaining the desired temperature.

The diamond is pure carbon or charcoal, but the secret processes by which nature rearranges the atoms of the black, lustreless charcoal in the flashing diamond is a mystery that the chemists, stimulated by the certainty of great gains provided they were successful in finding the solution, have never been able to discover. Nor is it certainly known from what element nature takes the diamond-making material. It is supposed to be furnished by vegetable charcoal, which undergoes a peculiar process of decomposition and crystallization, but it has also been conjectured that the carbonic acid shut up from remote periods in the calcareous rocks, may have solidified in this peculiar form.

The American members of the Commission for Relief in Belgium have been asked by the Germans to remain at their posts, and the work in Belgium is therefore proceeding under exactly the same guarantees as hitherto. The fact that the Commission for Relief in Belgium continues to receive large sums from the Allied Governments is in itself enough to prove that they, who are most interested, have no reason to believe that Germans are directly benefiting. Furthermore, the commission have effected an arrangement with the British Government on one side and the German Government on the other by which an acceptable lane for Belgian relief ships between North American ports and Rotterdam has been fixed so as to ensure the continuity of supplies. The Commission for Relief in Belgium is facing to-day a monthly deficit of \$2,000,000. Hence it is more than ever in need of the full-hearted support of the public. Fortune is like glass; when she shines, she is broken.

HAIR GOODS FOR LADIES AND GENTLEMEN. Milled at lowest possible prices, consistent with high-grade work. Best Natural Wavy Cream. Each tin at \$2.00, \$3.00 and \$5.00 in all shades are leaders with us. Just send your name, or write for catalogue in our line. GENTLEMEN'S TOILETS at \$2.50 and \$3.50, with duty detection when ordered.

MINTZ'S HAIR GOODS EMPORIUM. 62 KING ST. E., HAMILTON, ONT. (Formerly Watson, J. Mintz).

If so, you will find it of interest to you to consult us. ROBERT JUNOR 62 KING ST. E., HAMILTON, ONT. THE HOUSE FOR GIFTS. Importers and Dealers in China, Glass, Fancy Goods and Antiques.

CHAPTER XX. If gold works wonders by itself, its power is increased tenfold when it is allied with the name of such an one as my Lord Delamere. Hector Warren uses that name like a magic wand, and waving it, as it were, before the eyes of the decorators and upholsterers, makes such an impression upon them that they work as if heaven and earth opened upon their exertions during the short three-weeks' visit to the Rectory, Lady Roskwell's. A few mornings after an army of men is at work on the Grange, and the sound of hammering, the whistling and singing of workmen, the splash and splash of whitewash brushes, and the rattle of paper go all day, and indeed all night, for the contractors, bound to time, arrange for day and night gangs. Armed with a letter from the steward, Hector Warren superintends the whole of the operations. It is no easy task, and would be still harder, but Hector finds a subtle delight in having Signa for an assistant. To her, when the decorating part of the proceedings arrives, he refers continually, and it is really she who chooses the colors for the walls, and who decides the ballroom shall be enameled white and gold and the library paneled.

"How strange it is," she says, as she makes her way through the topography turned place, "that my wish should so soon be gratified. Don't you remember?"

"I don't know," he says, "I suppose she will. At any rate, we are doing our best. Come into the drawing-room they have nearly finished it. You must tell me whether it pleases you."

FOR PINK EYE. DISTEMPER, CATARRHAL FEVER, AND ALL NOSE AND THROAT DISEASES. Cures the sick and acts as a preventative for others. Liquid given on the tongue. Safe for brood mares and all. Best kidney remedy. Buy by the bottle or dozen. Sold by all druggists. Booklet, "Distemper, Cause and Cure," free. SPOHN MEDICAL CO. Chemists and Bacteriologists. Goshen, Ind., U.S.A.

For immediate overseas service, join The Royal Naval Canadian Volunteer Reserve Overseas Division. The Navy must be kept supreme—more men are needed to man the fleets which are sweeping the seas of commerce-raiders and submarines. Canadians joining the R. N. C. V. R., Overseas Division, are sent at once to England for training. PAY \$1.10 a day and upwards—Free Kit—Separation allowance as in C. E. F. No experience necessary—Candidates must be sons of natural born British subjects—Ages 18 to 38. Experienced men from 18 to 45 may enlist for service in the Canadian Naval Patrols to guard Canadian Coasts. Pay from \$1.05 a day and separation allowance. For particulars apply to COMMODORE EMILIUS JARVIS, Naval Recruiting Officer, Ontario Area, 103 Bay Street, TORONTO, or to the Naval Recruiting Secretary, Ottawa.
