Silos In Western Canada

Up-to-date Silo and Barn in the West.

FOR many years Western Canada average throughout the winter has not been thought of as a silo months. The enormous areas of unoccupied land on which cattle reared at will, or the settler cut his year's supply of native hay, to a large extent met the fodder problems of the country. With closer settlement and more intensified agriculture, however, a change is coming about. Particularly on account of the rapid advance of the dairy industry the farmers are becoming more interested in the various means of caring for their herds, especially during the winter months. The silo has been found to solve one problem, and is making its appearance in many parts of the country.

From experiments that have been undertaken at the various experimental farms it would appear that the silo method of feeding dairy stock is one of the very best. Superintendent G. H. Hutton, of the Dominion Experimental Farm at Lacombe, Alberta, claims that winter silage is one of the best means of keeping the farm stock well fed during the winter and has solved the problem of securing succulent feed for the dairy cattle.

In his report Mr. Hutton says that the growing of roots has met with many objections, among them being the high cost of labor and the difficulty of storing. Where these difficulties can be overcome roots add very materially to the rations for the dairy cow and are a means whereby the milk production can be increased in the first few months after freshening and maintained at a higher daily

He believes that the solution lies in the silo since it can be erected at a comparatively low initial cost, considering the tons of material that can be stored, and considering also that silage can be made from peas and oats, or oats alone, a crop which can be universally and successfully grown and which will yield a green weight of from eight to twelve tons per acre. The crop intended for the silo is cut while the oats are in the milk stage and is at once run through the cutting box and cut as fine as possible, going into the silo absolutely green. It is important that the silage be thoroughly tramped. A silo 30 feet high and 12 feet in diameter will hold from 80 to 90 tons, according to the amount of moisture in the crop at the time it is cut. At the Lacombe Experimental Farm some bulky fodder, as hay or oat straw, is usually fed in conjunction with the silage as well as the usual grain ration. When so fed cows on full flow of milk will consume around 40 pounds per day.

Experiments which have been conducted at the farm during the past two years to determine the feeding value of this silage as compared with the same feed cured in the ordinary way in the shock of green feed, show results very decidedly in favor of ensiling the crop, showing also a saving in the cost of producing one pound of butter of as much as four cents per pound, and as much as made from corn.

ISSUED WEDNESDAYS

We are at all times pleased to receive local news. Send or bring in the facts, we'll do the rest. Through us, and goings of Haldimand and Norfolk people are always welcome items of news.

If you wish your address changed, give old as well as new address.

ADVERTISING RATES.
Yearly contract rates on application to publisher.

Reading Notices.—No reading notice advertising any entertainment or matter by which money is to be made by any person or cause will be inserted in the Record without charge, except when the job-work for the same is executed at the Record Job Department, when one small reader will be given gratis. The price for the insertion of business announcements is five cents per count line each insertion.

Notice to Advertisers.—Changes of copy for contract advertisements must be in the hands of the printers by Monday noon, at the latest, each week. While willing at all times to do

what is possible to accommodate patrons, we must, in justice to them and to ourselves, insist on a strict enforcement of this rule.

Judicial, Legal, Official and Government notices.—Eight cents per line (12 lines to inch) for the first insertion, and five cents per line for each subsequent insertion.

Small Ads. Condensed advertisements of such a nature as "Lost," "Found," "Situation Wanted," "To Rent," "For Sale," etc., not exceeding six lines 25c per insertion; 5 insertions \$1.00.

Advertisements ordered for insertion without written instructions will appear until written orders are received for their discontinuance.

Subscriptions.—One dollar per year strictly in advance; if not paid in advance a dollar and a half will be charged. United States papers 50c extra, strictly in advance.

A MEMORY OF EARL GREY

The famous pass in the Purcell Mountain Range. Earl Grey in-set.

An interesting point has never yet been decided as to the permanent name to be given to the pass which leads over the Purcell Range between Lake Windermere and Argenta on the Upper Kootenay Lake. The late Earl Grey, who had a hunting cabin half way up the pass on Toby Creek crossed the pass on one occasion, with the result that the geographers named it after him. The original discoverer of the pass, however, was a prospector named Wells, and Earl Grey, who was always a thorough sportsman, wrote saying that he thought it a hardship to deprive Wells of the right to the old name of Wells Pass. Today, however, the name of Earl Grey's Pass is still current, and remains in most of the maps. The British Columbia Government commenced to build a road over it, which, however, was badly damaged in the great washouts of 1915. This summer two venturesome tourists made the crossing though at considerable hardship, owing to the condition of the trail at Hammill Creek, on the western side.

The following account of the trip appeared in the "Kootenian," of Kaslo, B.C.:

"After a trip that they will not forget in a hurry, Dr. R. N. Carter of Rossland, and Henry Cody of this city arrived in town on Wednesday of last week, after a somewhat dangerous jaunt across Earl Grey's Pass, and through Hammill Creek canyon. They had left Wilmer, in East Kootenay, about ten days before and made their way up the Toby Creek wagon road to the summit, and put in about one day exploring the huge Toby Creek ice field. Mr. Cody was well acquainted with the country up there, having mineral claims on the East Kootenay side, upon which he has been doing assessment work for years. The ground was not new to him, but it was virgin territory to the doctor. The latter stated that he had never before seen such magnificent mountain scenery. 'Having travelled a good deal over the surface of

the globe, he is in a pretty good position to judge as to what constitutes the real thing in the line of mountain scenery.

"He found the Toby Creek glacier a particular inspiring and wonderful spectacle. They spent a day on top of this huge lake of ice, and only had a look over one corner of it. They started out in the early morning to premenade upon it, and walked for four hours steady, the going being rather good except for working around some of the crevasses, and in the four hours' stroll arrived at the conclusion that they had not gone half way across it. So they returned to the camp. Beyond the risk of falling off a precipice or looping the loop down the side of a mountain, there was not a great deal of danger to the trip until they worked their way down on this side of the pass and began to come down Hammill Creek. The trip from the pass down was made in a driving rain, with the bushes soured with water, so that they were soaking wet in a few minutes after leaving the timber line. The trail in places was so overgrown that it could scarcely be followed. A number of new slides had come down lately and piled the bottom of the valley with various debris, so that progress was at times necessarily slow. They managed to get through to the Argenta Mines compressor building and camped at that point,

Fulfills Every Claim

No furnace can do more than satisfy—but the "Sunshine" furnace absolutely and invariably does satisfy fully and completely when properly installed. Ask our local dealer to show you this good furnace, or write for free booklet.
