# THE MAKING OF TOMMY ATKINS

"We are trying to turn out men at arms and-I think we are succeeding.' That in a dozen words sums up the attitude of the British army authorities, as enunciated by General SIr Archibald Huntes, G. C. B., a veteran who spent 15 years of his life in Egypt and the Soudan under Kitchener and other lenders first in "making riflemen from mud," as Kinling hos it and then in using the as Kipling has it, and then in using the mudbegotten ones and a few—a very few -white soldiers to dam back and finally to overthrow the Mahdi's barbarian hordes, writes the London. Eng., cor-respondent of the New York Times. Later in Ladysmith, in the belly-pinching of 1899-1900, he was the life and soul of the defense, and now ever since the opening of the great European war he has been in command of the Alder-

shot training centre.

Now the Aldershot training centre an area, roughly speaking, some 20 miles square in the loveliest part of South-ern England, where Hampshire and Surrey join and in peace time it is a peace-ful place enough, with few soldiers to be seen save in and around Aldershot it-self, a pleasant town of red brick barracks and shady trees, a kind of Fort Leavenworth raised to the ninth power, which has been ever since just after the Crimmean war, and nursery and training ground of England's armies. Now, however, Aldershot, busy place though it is, is simply the headquarters and nucleus of a tract that is dotted and sown with compact thick may be the transfer that with eamps thick as the stars in the eky, and there for the last three years, while the navy, "Britain's sure shield." has stood between this country and invasion and given England a breathing space. General Hunter, quite out of the limelight and quite unknown to the man in the street, has labored day in and day out, week after week, month after month, and now year after year, to ant blade that will ultimately give the deathblow to the Teutonic barbarism and give back peace and freedom to

world.
This time he had better material to start with than the Egyptian fellaheen, and he has succeeded in turning out the most superb infantry ever seen on a modern battlefield, those new armics whose boast it is, and it is no mean one, that they have lived up to the imperishable traditions set by the "first seven divisions" of the original expeditionary

IMPORTANT OF BAYONET SPIRIT. With a skin browned by African suns and triple row of decorations on his tunic, the outward and visible sign of more than 40 year's devoted service, General Hunter looked himself a very perfect man at arms to-day, when he told party of American newspaper men what he and his subordinates were do-

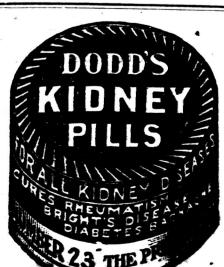

"We are trying," he said, "to make every man a master of his weapon. The artillery may pave the way, but for ultimate success we must still rely on the three Es—the bayonet, the bomb and the bullet. We pay special attention to the bullet. We pay special attention to bayonet fighting here, not only fer its own sake, but also because in inculcates what may be called the bayonet spiritthe desire to get to close quarters and come to grips with the enemy at all costs. If a man goes into a fight with the belief that in a hand-to-hand fight he can get the better of his antagonist, that is half the battle won already. In wars between civilized peoples when the men get to close quarters, it is not al-ways that this hand-to-hand fight ensues, in fact it is comparatively seldom that they actually cross bayonets.
It usually ends with one man putting
up his hands. We are trying to enaure that it won't be our men: that's all, we have established a moral super-iority over the Hun and we mean to

carrying out training we games of enermous use to us. Cricketers are our best bombers. Boxing gives the quickness of hand, brain and eye that is so essential in bayonet fighting, and sprinters and hurdlers are very useful people when it comes to a bayonet charge and the attacking infantry has to get over or through barbed wire that has only been partially cut and must jump across into trenches, and I think." concluded the general, "that think," concluded the general, "that just as the Canadians have done, your people will find baseball a great asset when it comes to learning bombing."

Aldershot as well as being sometimes.

Aldershot, as well as being a centre for training of large bodies of troops in bulk, is the chief station for the specialized and intensive training of promising officers of all branches of the service, who, having gone through a course in this, that or the other subject, then return to their units anywhere in the British Isles, themselves to accass instructors to men of their battalion, as instructors to men or them, as the company, squadron or battery, as the Soldiering now in Engcase may be. Soldiering now in England—and even in France during that period misnamed "rest" when troops come from the trenches only to fall into the hands of the schoolmaster—is the hands of the schoolmaster-is largely a matter of going to school.

THINGS SOLDIERS MUST LEARN. Leave is hard to come by and courses are many. There are courses in every

imaginable subject from gas drill, which teaches you the proper—and the quickest—way to put on your gas mask, the same being often a matter of life and death, a death that is a slow torment; to bayonet drill, which teaches you the most effective way to perforate the Hun. Here are a few, a very rew of them:

rew of them: First aid, barbed wire entanglements, First aid, barbed wire entanglements, bombing, trench mortars, range finding, sniping, scouting, night patroling, mining, physical and bayonet training, the use of the sniperscope, an artful combination of rifle and periscope that vexes the heart of old Brer Boche; machine gunning, including the use of Vickers, Maxim, and Lewis guns; signaling by Morse and semaphore, by flag, lamp and busser; the use of and defense against gas, and proficiency in a fascinating subject known as camouflage, invented, as the name shows, by the sprightly Gailic mind, which concerns itself chiefly with paint and canvas to sprightly Galic mind, which concerns itself chiefly with paint and canvas to the end that that which is deadly may look innocent, and that the innocent may look deadly. The complete camoufleur's motto is: "Things are not what they seem," and he goes about making dummy guns which ne puts into conspicuous places for Fritz to strafe, and making real guns and "strong points" look as it nocent as possible, to the better undoing and confounding of the Boche.

Caief among the courses come those on gas, bombing, and physical and bayonet training, and these were the "stunts"—this Americanism is current now through the entire British army—displayed to-day

the entire British army—displayed to-day for the benefit of the London corres-pondents of the various American papers. THE GAS COURSE. The gas course is naturally divided into two parts, (a), how to gas your enemy, which is the special function of the engineer, and (b) how to protect yourself from being gassed, which is one matter that vitally concerns every one, not only in the line, but for about 10,000 yards behind it, for the gas attacks can be delivered not only with the gas cloud expelled from cylinders, but with gas chells and lachrymatory. with gas snells and lachrymatory shells at any hour of the twenty-four.

A gas attack by a coud is a comparatively simple matter, but a sufficiently ticklish one to try anybody's nerve. It involves bringing up into the front line of trenches a supply of gas cylinders, which weigh about 129 pounds and take two men to carry them, or more if the mud is bad. Then these cylinders must be disposed ready for several process. mere if the mud is bad. Then these cylinders must be disposed ready for action and concealed, for one of them smitten by a hostile shell, would instantly transform your trench into a reeking death hole. For defense against gas, the British

soldier is better equipped than any other combatant in Europe. He carries (1) that is known as the box respirator, a that is known as the box respirator, a clever arrangement of goggles, mask tubes and valves, whereby the air is purified by passing through certain substances before T. Atkins breathes it in, precisely as the air is purified before it is deemed fit for the august lungs of the legislators by being passed through filter beds of cotton wool. beds of cotton wool. (2) In addition to this, he carries a "P. H. helmet," a vast cowl impregnated with phenol-hexafair imitation of a familiar of the Spanish inquisition, and (3) for protection against lachrymatory gas, or "weepers," as Thomas calls them, of the "tear-shells, a pair of close fitting regular [7]. pair of close-fitting goggles. The drill is connection with these safety appliances consists of putting them on at a perfect-

# **CURING SKIN TROUBLES**

So many people, both men and women, suffer from skin troubles, such as eczema, blotches, pimples and irritation that a word of advice is necessary. It is a great mistake for such sufferers and those with bad complexions to smear themselves with greasy ointments. Often they could not do anything worse, for the grease clogs the pores of the troubled skin and the sky, or rushed past valley and hill and field, singing and shouting with their condition worse.

When there are pimples or eruptions, or an irritating or itching rash. a soothing boracic solution may help to allay the irritation. but of course that does not cure the trouble. Skin complaints come from an impure condition of the blood and will persist until the blood is thoroughly purified. It is well known that Dr. Williams' Pink Pills have effected the best results in many forms of skin disorders and blemishes. This is due to the fact that these pills make new rich blood. and that this new blood attacks the impurities that give rise to skin troubles and disperses them ; so that Dr. Williams' Pink Pills cure skin disorders from within the system-the only sure way.

It should be added that Dr. Williams' Pink Pills have a beneficial effect upon the general health. They increase the appetitie and energy and cure diseases that arise from impure blood.

You can get these pills through any medicine dealer or by mail at 50 cents a box, or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville,

# FEEDING THE BOY.

Give Every Healthy Youngster Diet His System Craves.

The growing boy-the active, healthy, normal boy-is a better judge of his diet than mother or father or doctor. He needs every kind of food. plenty of it, and his system will naturally crave for just those fcods that are best for him.

Such, in substance, is the theme of an article in the National Food Magazine by Dr. H. E. Barnard.

There are two kinds of food-proteins, with which the body is built up, and the growing boy needs as much of these as the full-grown man, often more; corbohydrates, which are the fats and sugars and starches that supply heat and energy.

The boy's protein food need not all be meat. Dr. Barnard says "it is better that no small part of this nitrogenous food come from milk and eggs, cheese, beans and peas. If he has plenty of these rich and relatively cheap foods he will not crave meat so inordinately as some growing boys do," Dr. Barhard continues:

"The boy needs a large quantity of carbohydrates. That is why his demand for bread and butter is limited only by the supply at hand; and when he uses almost as much butter as bread, do not stint him. By the poundbutter is expensive, but it is pure, wholesome food, and he can use it readily. It will not make him ill; quite the contrary.

"And do not be afraid of sugar and sweet foods. Sugar is a true concentrated food. Give him candy for dessert. He craves it and his craving is natural, not abnormal.

"The boy's instincts will lead him to ose the all around diet he needs."

Many a woman who is brave enough to face a burglar may be shy when it comes to facing the cook in her own kitchen.

HOW JAPS COOK RICE.

The quantity of water varies according to the qualities of rice, but five parts of water to four of rice, or six parts to five, by volume, will be common proportion.

guests went to search for ner. They wandered through the grove, and they sought up and down the shore, but in vain! Leelinau was gone, and had left forever the upper world.

And no one had seen her go, except one poor fisher lad who was paddling his cance near the land. He had watched her wander through the grove, and dancing with a bright Fairy Chief whose green plumes nodded high above his gon proportion. Simply boil the water and then pour

the rice, previously washed, into this boiling water, at the same time increasing the flame. The pan cover must fit the pan edge as tightly as possible and also must be a heavy one, enough to withstand the high steam pressure in the pan, and if it is not heavy enough, put some weights on it. Keep the fire strong. In three or four minutes the steam pushes out of the pan; but let the fire be strong for three or four minutes more, and hen, as quickly as possible, withdraw the blazing fire (in case of wood fuel) or make the fire very mild (in case of gas) and let the pan stand on little under fire or very mild flame for 20 or 30 minutes. Then remove the pan from the furnace and let it stand fourteen minutes more. This is all the

Rice thus cooked is very delicious to taste and may be eaten by itself without any milk or sugar.

GREAT LAKES LEGEND.

Stories of Niagara Falls and of

Leelinau, the Fairy Girl.

In old, old times, on the highest peak of a great mountain, there dwelt a hunter and his five sparkling daughters. Their lodge was of bright betula bark, and on clear days they could see the distant occan flashing like a silver band.

tant occan flashing like a silver band.

"Come out! Come out!" cried the younger daughter, the little Er. "Come Si! Come Hu! Jome Mi! Come Cla! (The names stand in order for Erie, Superior, Huron, Michigan and St. Clair). Let us away to the sea, where the foaming breakers roar!" So they left their lodge, and leaped and sang with happy hearts. Their robes were of blue and chrysolite green, and floated on the breeze. Their moccasins were of frozen water drops, and their wings of

At last they came to a precipice of jagged rocks and moss. "Alus!" cried Er, "what a drearful leap! But we have come so far that we must go on, or our father will laugh at us! So come Su! Come Hu! Come Mi! Come Cla! and So over the steep they sprang,

floated down on their painted wings. They leared and they sang like happy-hearted birds. Then the little Er cried. hearted birds. Then the little Er cried, "Let us up and down the steep again!" And up and down the five maids skipped and laughed at the sport and foam and called it Niagara Falls.

¡And to-day, through the raintow mist, you may see their robes of blue and chrysolite green, and their painted wings and their twinkling feet, as the five play in the waterfall.

Once on the shore of Lake Superior there dwelt a lovely Indian girl. She was tiny and slender, with soft dark eyes and little feet. And whenever the moon rose faint and white while the sun was setting, she danced in a pine grove

was setting, she danced in a pine grove was setting, she danced in a pine grove by the shore. When she danced thus, her mother called, "Come back to the lodge, Leelinau, for the silver moon is rising. Soon the Little People, the Fairies, will come out to play among the trees, and they carry away dancing maldens." So Leelinau returned sor-fully to the lodge, for she longed to see the Fairies. the Fairles.

Summer after summer, on moonlit nights the Little People joined hands and danced among the pines, and their sweet voices were heard by Leelinau sitting in the lodge. And when the Indians were sleeping, the mischievous Eniries come crearing in and Leelinau Fairies came creeging in, and Leelinau, waking, heard their low laughter in the dark. They rustled about, and hid the fisherman's paddle, and plucked feathers from the headdress of hunter, and carried away nuts fruit. And in the morning Leelinau saw their tiny footprints in the sanddunes by the lake. And so it happened

after summer. When the cold, cold winter nights came, the mother sat by the fire and told tales of Fairyland; how deep under the ground all was warm, and the flow-ers bloomed, and the Fairy birds sang, and the Little People feasted and re-joiced. And Leelinau's heart filled with longing to be in Fairyland. And so it

longing to be in Fairyland. And so it happened winter after winter. Now, on a summer day, a brave came to woo Leelinau. Her mother dressed her for the marriage. She bound her garments on her, and let her out to the wedging feast. And the braves and squaws and the youths and maidens of the Chippewa, for miles around, came to the feast. But Leelinau sighed and went and begged that she might go wept, and begged that she might go alone to the pine grove before she be-came a bride. Her mother said, "Yes," o at evening time Leelinau decked her hair with flowers, and filled her arms with tassels of the pine trees. Then she hastened to the grove. The darkness fell and Leelinau did not return The moon arose and shed its white beams on the lake, but the maiden

green plumes nodded high above his head. And then together they had vanished from his sight. And Leelinau the Fairy Girl was never seen again on the of Lake Superior .- New York "Evening Post".

#### RESPECT PROMISES.

Therefore Do Not Make Any Unless You Can Keep Them. Keep your promises, so don't make

any you cannot fill. Don't make any in conflict with agreements.

Neglecting the exact terms of a definite promise is after a very serious thing. The keeping of promises in business

transactions is the "sheet anchor" in the establishing of credit among one's business associates. The world of business places great

value on promises. Not only in all business transactions but in everyday life, the keeping of promises should be looked after with

Whatever you do, keep your word. for the man who breaks his promises even in little things is sure to break them in the more important ones.

It is a good plan when making a promise as to appointments to jot down in a memorandum book the man's name, so that no mistakes can be made. It is a question of obligation that is

The man whose promise or word can be relied upon is the one whose influence is far-reaching in any community or in any business. Keep your promises, so don't make

not cancelled until it is paid."

any you can't fill.-New York Mail.

#### Monarch of Fabulous Wealth and Power Remains a Myth.

The general opinion about Prester "a fabulous medieval Christian monber of its variants. It is hard to be lieve that the detailed history of Prester John, who occupied such a promfor nearly three centuries, ruling over tion in fact. When it comes, however, to trying to determine just what the Shaw, and so on.—Christian Science facts were, the task is found to be one well-nigh impossible.

Whoever he really was, however, his history partakes of the nature of a series of tableaux. With wonderful stage management, the great character does not appear at the beginning. on the stage. He is talked about in the streets of mediaeval Rome; a mysterious person. "John, the patriarch of the Indians," moves rapidly across the stage, as it were, in the early years of the twelfth century, and leaves all Rome agog with stories of the wonders that had been performed at the shrine of St. Thomas in India. Then. after much further talk of the great Christian kingdom in the East, Prester John makes his appearanct. He is Armenia, a Christian, albeit a Nestorian, who had set out from his distant

transport to carry his army across the Tigris. Hardly had the excitement occasioned by his story, which is related in detail in the chronicle of Otto, bishop of Freisingen, subsided, when all of Christendom was thrilled with the news that the Emperor Manuel had received a long letter from the great monarch of the East. It was signed "Presbyter Joannes," and the writer who described himself as the greatest king under heaven, declared that seventy-two other kings, reigning over as many kingdoms, were his tributaries, and that, within his vast dominions, were to be found all the wonders that men had ever dreamed of, all fabulous beasts and all the fabulous races which had ever been made the subject of story. In his kingdom were to be seen the ruins of the Tower of Babel, the Fountain of Youth, the Sea of Sand and the Stream of Precious Stones. When the king went to war, thirteen great crosses of gold, were car-
