

THE SUIT QUESTION

Full Costume or Separate Coat Next Winter?

News of new suits has begun to come in, though it appears in detached and straggling sections. The old discussion revives: Shall it be suits this winter or shall the separate coat have full sway? That is a weighty question, though the chances are that, as usuai, there will be an equal division of honors.

The proffered suits have many things about them that will appeal to women who have to think of the length of a suit's life. They are made with every attention given to quality of material and durableness of cut. and with a minimum amount of attention showered upon the extra trimmings. Materials and workmanship are costing more and more, but the silver lining to the cloud appears in the fact that manufacturers are taking all that into consideration and producing suits which contain good values and will last for a long time. Prices of materials by the yard have soared to unprecedented heights and labor has gone up apace, to say nothing of the silk which must be used for lining. So it behooves every one to buy wisely and to purchase a suit which has possibilities of everiasting wear.

There seems to be a decided move ment toward the adoption of the strictly tailored suit, which we have not seen in any great quantity for

Minard's Liniment Co., Limited. Dear Sirs—I can recommend MI-NARD'S LINIMENT for Rheumatism Sprains, as I have excellet results. Yours truly,

T. B. LAVERS St. John

some years past. The fit of these new tailored suit. which we have not seen in any great quantity for some years past. The fit of these new vailored things is not so snug as it was when they were popular before, but they have all of the studied finish conmon to those of a former day. Braid bindings are popular as are rows of stitching to accentuate a certain seam

From all accounts fur will be used sparingly through the coming season and there is good cause for it. Fur. along with everything else, has attained a high figure of cost. In proportion it has perhaps gone even higher than a lot of other things, and it will not be a common sight to see great and lavish pieces of it used for suit and coat trimmings. Here the manufacturers are taking a decided stand, and are trimming, the suits with but little strips and tightly fitting collars of the fur.

English as a World Language.

English is well adapted to use as a world language because of its rich vocabulary and its grammatical simpplicity. It is the literature of liberty and social equality. The fundamental hindrance to the spread of the English language as a world language is its irrational spelling. It is difficult because of the superfluity of letters and the confusion of representations. If these objections were removed and the proportional rate of increase of the nineteenth century continues English will be the language of the world." -De Witt Croissant at Chautauqua.

As You View the World. The world in which a man lives shapes itself chiefly by the way in which he looks at it, and so it proves different to different men. To one it is barren, duil and superficial; to another rich, interesting and full of meaning. On hearing of the interesting events which have happened in the course of a man's experience man'y people will wish that similar things tad happened in their lives, too, completely forgetting that they should be envious rather of the mental aptitude which lent these events the signifiance they possess when he describes. To a man of genius they were interesting adventures, but to the dull preceptions of an ordinary individual they would have been stale, everyday occurrences. — Schopenhauer.

Brooping, Tired, Weary, Try This Remedy

Don't give in to that depressed. played-out, don't-care sort of feeling. Better days are shead. Cheer up, do as the other fellow is doing, tone and strengthen your blood, and you'll feel like new again. You'll dance with new found energy once you use Dr. Hamilton's Pills. They will quickly fill your system with energy, bring back the old appetite, restore that long lost complexion, make you feel like a kid again. A wonderful medicine, chucked full of health bringing qualities. You need Dr. Hamilton's Pills. Get a 25c. box to-day at any

Hiding Places for Money.

The woman who, as just revealed in the law courts, hid their savings on her mother's grave in Forest Hill cemetery probably hit upon a unique cache. But there is no saying. The person who mistrusts savings banks generally looks around for the most unlikely spot in which to deposit wealth, and more than one may hit on the same idea.

Old cannon, for instance, seem to form favorable depositories. Quite a quanti-ty of jewelry was found some time ago ty of jewelry was found some time ago in a solitary gun which stands in the fort at Shoreham, and shout the same time a bag containing seventy sovereigns was discovered in an old cannon in Peei park. Bradford.

From one of the old Crimean cannon at Liverpool also some inquisitive youngsters once brought forth 2 soldier's discharge papers and notes to the value of fi00.—London Standard.

Germans Salute British.

During my first few days in Lucerne I had an experience that was hum. rous and seemingly anomalous until I got an explanation," said a Red Cross, worker, who returned recently to the United Staates. "The mountain republic is filled with interned soluters from both sides, and I went about a good deal with a British efficer in charge of many British prisoners.

Is he a German?" civil'any whispered to one another as we walked to our hotels The Britisher was literally bombarded with salutes from German soldiers, and at the outset it became embarrassing for him. But his embarrasement could not continue long, as the saintes were too frequent. Soon he was acknowledging them as mechanically as if he had been wark-

ing through the streets of London. "The matter was made plain to me when later I found out that it is the rule in Switzerland that soillers of ail armies salute officers of all armies. German discipline did the rest."

CATARRE GANNOT BE CURED

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts through the block on the mucous surfaces of the the blood on the mucous surfaces of the system. Hail's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonics known combined with some of the best blood. purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free. F. J. FIRST CONCRETE SHIP.

Trial of Full Powered Vessel of New Type of Good Omen.

The Namsenfjords recently ran her trial trip. She is the first re-enforced concrete full-powered vessel to be completed. She has a length of eightyfour feet by twenty feet by eleven feet six inches draught, on which she carries 200 tons of cargo, and with her eighty horsepower Bolinder engine develops a speed of about seven and onehalf knots. It was found on trial that vibration was practically non-existent, which speaks well for the method and material of construction. While on trial the vessel's sea-going qualities were thoroughly tested and she behaved excellently. A large hold is arranged for, and a maximum-sized hatch will facilitate the loading and discharging of bulky packages. The cargo will be dealt with by a powerful motor winch. The erew's quarters are forward, and the captain, mate and engineers will be berthed aft on deck. Re-enforced concrete vessels should prove valuable assets to those countries which have lost vessels during the war. If steel and wood were plentiful and could be released for commercial work, there is every probability that concrete construction for marine purposes would not have been studied to the extent that it has been This development will no doubt prove to be one of the benefits the allies will gain through the war. There is a limit to the output of steel and properly seasoned timber, but practically none to the production of cement, There are, of corse, drawbacks to every new industry, but, so far as can

be determined, advocates of the re-

enforced concrete vessels believe they

have only one, viz., heavier hulls than

if steel or timber were employed. But

against this, it is pointed out, there

are advantages, such as increased

cubic capacity, cost of upkeep practi-

cally nil, and reduced cost of renairs water. By stretching the arm and Industry and Science. hand down this chimney the eggs are placed on straw on the bottom of the can. In this way, too, they are turned

in the event of damage. For quite a considerable period tug owners have been anxious to employ tugs fitted with oil engines in preference to steam engines on account of the reduced cost of running, but so far old. They are then placed in brooders. there has been a slight drawback—the

a cargo vessel this reduced rate is naturally of considerable benefit to owners, but with a tug weight is essential. A re-enforced concrete tug, fitted with an oil engine would have a somewhat similiar displacement to a steel vessel fitted with steam machinery. As a consequence, provided the experimental vessels now under construction in this country prove a success, tug owners may be expected to consider the oil-engine contrete tug proposition

A Reasonable Hope.

A CHRISTIAN CAROL

You are old, Father William," the Krown Prince remarked,
"And your waist-line shows signs of a churcful of women at seventy But Is a very good score, I confess."

Four years back, Friedrich Wilhelm," the Kaiser replied.

Ye began shooting girls by the lot;
thus by sub-calibre pratice grew For this last striking tribute to Gott." are old, Father William," the

Krown Prince observed, "And your wind is not all it might Yet that little Slav tango you did at Was a joy and a pleasure to see." Four years back," said the monarch,

and smiled on the heir,
"I took up paper scraps as my line;
And the piece from Eelgium just made up a nice Little treaty for Mr. Lenine." are eld, Father William," the

Krown Prince declared. And yet you're some distance away from

"Now that," soled old William, "ols, pride of Verdun,
Is just what I fear from the man.
Though an expert at scrapping of pan-Quite up to the French kind of scrap."

NEW INCUBATOR.

Hot Well in Colorado Hatches Chicks.

It is reported that on a ranch in a valley of the Colorado desert there is being practised a new and strange nethod of hatching chickens.

Many artesian wells are in this valey to furnish water for irrigation. One hole was drilled for 750 feet into the earth and a flow of water came up with a temperature of 102 degrees. Since chicks will hatch when eggs are kept just about as warm as this for 21 days, the people who own this well decided to use its heat to hatch eggs.

The earth was dug away from the pipe so that the water as it flowed over formed a pool in which an incubator can be submerged. A round with a chimney projecting above the well as other parts of the body.

You pay the same war tax on a pound of cheap poor tea that you pay on Red Rose. In other words you pay 10 war

taxon a cheap tea which will make pethaps 150 cups to the

pound and you pay the same 10tax on a pount of Red Rose

which easily makes about 250
