## CHURCH NOTES

**King Presbyterian**  
REV. A. W. JARE, R. A., MINISTER  
Rev. Peter Nichol, Supply  
12 a.m.—"Those to whom the Holy Spirit is given."  
8 p.m.—"The Ideal Congregation."  
S. S. and Adult Bible Class at 11 a.m.  
Mr. H. C. Hocken, M. P., of Toronto, Sunday, Aug. 25th, at 8 p.m.  
Choir practice Friday 8 p.m.  
You are cordially invited to these services.

**Wesley Methodist**  
REV. H. L. SMITH, Pastor.  
A representative of the Belgian Relief Fund will speak on the "The Armenians in England and Their Need" at both services, 12 o'clock noon and 8 o'clock in the evening.

W.M.S. meeting 2nd Tuesday of the month.  
Sunday School 11 a.m.  
Adult Bible Class at 11 a.m.  
Epworth League on Wednesday evening at 8 p.m.  
All are welcome.

**Garnet Methodist**  
Service at 2.30.  
Sunday School at 1.30 p.m.  
Epworth League and Prayer Meeting on Thursday evening at 8 p.m.

**St. Paul's Anglican**  
REV. J. HIRST ROSS, L. Th., Rector

SUNDAY—  
Sunday School—10 a.m.  
Morning Service—11 a.m.  
Evening Service—8 p.m.

FRIDAY—  
War Intercessions—8 p.m.  
Choir Practice.  
Women's Auxiliary meets every Tuesday at 2.20 in the School Room.  
A.Y.P.A. meets Tuesday evening at 8 p.m.

Holy Communion on First and Third Sundays of each month.  
All are welcome.

## Fall Wheat and Fall Rye

(Experimental Farm Note.)  
Three is yet time to prepare the land for fall sown crops such as wheat or rye. The following suggestions are based on crop and soil experiences at the Experimental Farms and Stations in the Eastern provinces.

**WHEAT.**—Sow on land either naturally or artificially drained, rich in suitable plant food, worked into a mellow, moderately deep seed bed and situated in districts where fall sown crops have proved successful.

**Soil and Rotation.**—Any good soil, preferably clays and loams, where judicious crop methods are observed may be tried for fall wheat. Clover sod, pea ground and summer-fallow provide most suitable conditions, but meadow or pasture land, thoroughly prepared, may be expected to give satisfactory returns.

**Soil Preparation.**—As promptly as possible after the removal of the previous crop, plough from 6 to 7 inches deep or as deep as the productive surface soil will allow, roll or pack and work thoroughly until the seed-bed is deep, mellow and level not later than the second week in September.

**Manure.**—Light dressings of short manure stimulate strong growth and act as protection during winter. "Knolls," inclines and rolling land are especially benefited. Ordinarily the manure should be supplied to some other crop in the rotation rather than directly for the wheat.

**Seed.**—Sow large, plump, sound seed of strong vitality and free from weed seeds. Use the fanning mill wisely. Treat the seed wheat for "Stinking Smut." This simple method is effective. Immerse the seed for twenty minutes in a solution made of one pint formalin to forty-two gallons water. If you are not clear regarding this point write the Botanical Division, Experimental Farm, Ottawa. Be sure of the vitality of the seed you sow. This home made test will tell you.

Count out a hundred kernels, the run of the grain, sow in some of your own soil in a shallow box placed in a sunny window and keep at a comfortable living room temperature. Keep soil damp but not wet, note the growth for two weeks. If only part of the seeds germinate or if plants grow very slowly, it will be necessary to sow proportionally more seed to the acre. The usual rate of seeding is from 14 to 34 bushels per acre.

**Varieties.**—Dawson Golden Chaff, American Wonder are high yielding varieties. Where these cannot be obtained secure hardiest fall variety available. For supply of seed note advertisements in farm journals or communicate with the Seed Branch, Department of Agriculture, Ottawa.

**RYE.**—Fall rye is hardier than fall wheat and for this reason can be sown profitably later in the season, on a greater variety of soils and under more severe climatic conditions.

Why rye does best, like wheat, on well drained loam or clay-loam soils, it will produce fair yields on lighter sands and loams. On very fertile soils rye is likely to lodge and will produce little grain. Under such circumstances, and if the district is suitable for the growing of fall wheat, it would be advisable to sow wheat rather than rye.

Discusses the method of seed-bed preparation for rye in similar to that outlined for wheat. The rate of seeding is usually from 14 to 24 bushels per acre. The common fall rye is the only variety available which can usually be secured from most seed merchants.

## Help Badly Needed in Western Canada

When travelling to Western Harvest fields—go by Canadian Northern Railway and give loyal support to the People's Line.

Purchase through tickets and ask for routing via Grand Trunk to Toronto, thence Canadian Northern.

Information of value to harvest hands is given in a leaflet entitled "Harvesters Work and Wages" to be had from any C. N. R. Agent.

## Important Notice to Harvesters

There is every probability that Harvester's Excursions to Western Canada after August 22nd will be cancelled, intending to go west should leave on the first excursion.

Dates of sale: From Toronto and east and north August 20th; from Toronto and west and south August 22nd.

Canadian Northern Ry. Special trains leave Toronto Union Station 10.00 p.m. August 20 and 22nd.

R. L. FAIRBAIRN, General Passenger Agent, Toronto, Ont.

The Canada Food Board has published a very attractive and useful little booklet on the canning, drying and storing of fruits and vegetables. It is being distributed at five cents per copy as one of a series of four similar booklets dealing in addition to canning with the subjects of bread making, cooking of vegetables and cooking of fish. The set of four may be obtained for twenty cents from the Provincial Committees of the Canada Food Board.

## DUMMY BATTLESHIPS.

Suicide Fleet of Imitation Dreadnoughts Fooled the Germans.

The sinking of two wooden "dreadnoughts" by Great Britain, some days ago, to form a breakwater, brings up more evidence of what disposition is being made of the dummy fleet of fourteen battleships with which Great Britain fooled Germany for some fifteen months during the earlier part of the war.

This titanic war jest, which was recently exposed by Lieut. Henry C. Foster, with the consent of the British Admiralty, completely deceived not only the Germans, but the British people themselves. No one in England was able to explain how the Germans could claim to have sunk the Agamemnon at the Dardanelles, when the Admiralty had admitted officially, the sinking of only the Goliath and "some supply ships."

Germany rejoiced over this supposed sinking of the Agamemnon, but they must have wondered why the turrets and "guns" of the sunken dreadnought floated, for days, in the Dardanelles.

Lieut. Foster states that the dummy battleships were converted from old third-class passenger ships of the Canadian Pacific Steamship Co. which were enrolled in the British navy.

In an Irish port, says Lieut. Foster, the dummy battleships were painted in exactly the same hue as the vessels of which they were counterfeits. Canvas was stretched over the decks and painted grey, and the upper decks and equipment finished in every detail to resemble the grand fleet ships so that any foreign aviator—or any British one, for that matter—flying overhead, would never suspect he was looking down upon any other than a member of the grand fleet.

Turrets and guns were all made of wood, with a careful exactitude in their outer color and finish. There was nothing real about the ships, so far as war purposes were concerned, except the brass trimmings, which were kept shining, as on a battleship, and some lifeboats, in which the crew were required to drill. The ships had neither speed nor defences. Not one carried a real gun.—Popular Science Monthly.

## Captured Many Germans.

How Sergt. William Grimbaldeston of the King's Own Scottish Borderers, though armed only with one bomb, captured thirty-six Germans with six machine guns and a trench mortar, and thereby won the Victoria Cross, is thus told in an official narrative:

"During the course of an attack, Sergt. Grimbaldeston noticed that the advance of the battalion on his left was being checked by heavy machine-gun fire from a large block-house. He at once collected four rifle-grenadiers, and instructed them to open as rapid a fire as possible on the block-house, thus assisting one of our trench mortar batteries, which was also concentrating on the same target.

"The ground between him and the block-house was open and entirely devoid of cover. In spite of this he made his way across it in a series of rushes, followed closely by his small band of riflemen.

"Under a hail of bullets from the enemy machine guns, and armed with only one hand grenade, he worked his way round to the entrance at the rear of the block-house. With this solitary weapon he suddenly appeared in the midst of the enemy, and persuaded each gun team in turn to lay down its arms.

"So it happened that thirty-six Germans, with their six machine guns and a trench mortar, surrendered to one British soldier and a bomb. By his bravery and initiative he was thus responsible for the capture of this stronghold with its defenders, and at the same time prevented what threatened to become a critical situation."

## Farmers' Picnic

—AT—  
**Cavuga**  
**Thursday, August 22**

Come, meet your friends, hear men address you that are interested in boosting the farmer to better things, listen to the comic songs, the good music and have a good time.

The outing will do you good but there's bound to be things of interest to every farmer. Will you come

**Thanks, we thought you would**

If you come by train, make up a party of 12 and get club rates.
