It's twenty the grand difficulty remained to be years ago. I inherited the debt solved; how to get a look at it without Stiffy's knowledge.

Here fortune unexpectedly favored him. When he was not adding up his columns, Stiffy was forever taking stock. By rights, he should have been the chief clerk of a great city emporlum. Before the others returned he began to count the articles on the

On the debit side: "To team, Sambo and Dinah, with wagon and harness, \$578.00." Under these were entered various advances to Sam. On the other side Joe read: "By order on Gilbert Beattie, \$578.00." Below were the different amounts paid by Graves for hauling.

Joe softly closed the book. So it was Musq'oosis, who employed Sam! and Musq'oosis was a kind of guardian of Bela! It did not require much effort of the imagination to see a connection here. Joe's triumph in his discovery was mixed with a bitter

When Stiffy, having found the missing case, came down stairs again, Joe apparently had not moved.

A while later Joe entered the company store, and addressed himself to Gilbert Beattle concerning a plow he said he was thinking of importing. Beattle, seeig a disposition in the other man to linger and talk, encouraged it. This was new business. In any case, up north no man declines the offer of a gossip. Strolling outside, they sat on a bench at the door in the grateful sunshine.

From where they were they could see Bela's shack below, with smoke rising from the cook tent and the old man's teepee alongside. Musq'oosis himself was squatting at the door, engaged upon some task with his nimble fingers. Consequently no management on Joe's part was required to bring the conversation around to him. Seeing the trader's eye fall there, he

Musq'oosis was making artificial flies against the opening of the trout season next month. With bits of feather, hair and thread he was turning out wonderfully lifelike specimens -not according to the conventional varieties, but as a result of his own half century's experience on neighboring streams. A row of the completed product was struck in a smooth stick, awaiting possible customers. "Out of sight!" said Joe, examining

True Modern Courtesy.

Should a lady get up and give a gentleman a seat in the car? That, doubtless, depends somewhat upon the gentleman. If he is young and handsome or quite old and feeble, yes. If he is able to stand up fairly well, then ladies should be governed in such cases by their individual judgments. There are undoubtedly some men who when given a seat, do not as much as say "Thank you." All this, however, being frankly admitted, it still remains true that every real lady will offer her seat to a gentleman if he looks deserving. It helps her as much as it does him. It is true modern courtesy.-Life.

If any disease needs curing early it is rheumatism but there is scarely any disease that physicians find more difficult to treat successfully. When a medicine does cure rheumatism weren't ready to start when I left therefore it is worthy of special notice. Medical authorities agree that the blood becomes thin with alarming rapidity as rheumatism develops. LEGISLATION FOR LAZINESS. (Utica Press.)

Among the bills already introduced at Albany is one by Hon. Louis M. Martin, member of Assembly from the Second Oneida District, which provides that all able-bodied males between the ages of 18 and 50 years, not regularly and continuously employed, may be drafted and set to work at such occupations as are essential for the welfare of the state and nation. This includes even those whose income is such as to make them self-supporting. The compensation is to be that paid for the same sort of work to other people already engaged in it. The details are worked out, the plain purpose being to see to it that there are no idlers in these war times and that every man is doing his bit, if not in uniform, then in some other useful, helpful way. There are more people than one might suppose at first glance who will be hit by this legislation if enacted. Despite the demand for workers at good wages there are a great many able-bodied fellows who are idle right here in the city of Utica, its suburbs and throughout Central New York. The purpose of Mr. Martin's mea-

sure is most excellent and there are a good many who would really be much profited and benefited by being brought under its compulsory influence. The practical difficulty with it is that suggested by the old saying that anyone can lead a horse to water. but that none can make him drink Suppose, for instance, that some of these lazy idlers were sent out to the farms, carrying their indolence with them, and their unwillingness to work. How much good would they do? Laziness is an inherent quality which it is feared can not be reached by statutory enactment. It would be one of the greatest blessings the world ever saw if it could be. In conjunction with a reinvigorated Turkey they hope to seize Egypt d the Sudan. They would hold the Suez Canal, and by means of naval bases on both sides of Africa they would command the sea routes to the East and to Australasia. And their main instrument would be hordes of black troops trained and equipped in tropical Africa, all of which is of course contingent on the impossibility of Germany winning the war.
