Loafing is now illegal. All persons domiciled in this country must now work or show cause why they are idle. The law applies to all between the ages of 16 and 60, and heavy penalties are imposed against offenders.

**Registration of Man Power in June**

Regulations for the natural registration of the man and woman power of Canada have been drafted by the board which has been dealing with the matter. The intention is to have the registration on one day, some time in June, and it will be conducted very much like an election. The general purpose is to find out what the men and women of the country are doing, and to locate the exact sources of labor supply.

**Another Industry**

Caledonia is to have another big industry, to be located on the Alabastine farm, just back of the Ontario Gypsum Co.'s plant. The new company, which was recently formed in Brantford, will manufacture a sort of wallboard and have already commenced on the ground work, getting ready for the erection of the buildings. The plant, we understand, will occupy about two acres, and they intend having the buildings erected this summer. When completed it will likely employ a large number of hands.—Grand River Sentinel.

**W. W. I. Elected Officers**

Vareney Women's Institute held their annual meeting at the home of Mrs. Thos. Brown on the 2nd inst. The Secretary's report showed that the past year had been one of success for Patriotic work. The gross receipts for the year amounted to five hundred and fifty-one dollars. One hundred and fifty-one pairs of socks and seventy-two towels were shipped for Red Cross work during the year. Fifty-two boxes were sent overseas to boys from the neighborhood. A balance in cash of thirteen dollars and twelve cents and fifty dollars worth of material is amount on hand.

The officers elected for coming year are:—President, Mrs. Richard Parkinson; Vice Pres., Mrs. R. A. Miller; Sec. Treas., Mrs. Doc. Parkinson; Direct., Mrs. John Jaques, Mrs. B. Lundy, Mrs. A. C. Saunders; Organist, Miss A. Miller; Auditors, Miss C. Bain, Miss A. Parkinson.

June meeting will be held at the home of Mrs. Wm. Gibbs. The Institute acknowledge with thanks a donation of five dollars from Pte. W. H. Girling.

**A. & W. J. BAILEY**  
Jarvis Ontario

**Sandusk**

The Women's Institute met at the home of Mrs. Herb Peacock on Thursday, May 2nd. After the usual routine of business was completed the following officers were elected for the ensuing year:

President—Mrs. Frank Pond.  
1st Vice Pres.—Mrs. Jas. Bush.  
2nd Vice Pres.—Mrs. J. W. Westery.  
Sec. Treas.—Mrs. J. C. Bush.  
Directors—Mrs. J. Peacock and Mrs. T. Westery.

Auditors—Misses N. Pond and F. Nichol.

At the conclusion of the meeting the hostess served a dainty lunch. The next meeting will be held at the home of Mrs. Wm. Fleming in June.

Miss Robinson, of Varenay, spent the week-end with Mrs. Bert Inouss.

Mrs. Wallingford spent Sunday with Mr. and Mrs. F. Sternaman.

Mr. and Mrs. Leslie Atkinson motored to Wellandport on Sunday.

Mr. and Mrs. Will Swent spent Sunday with Mr. and Mrs. Thos. Westery.

Miss G. Pardington returned home on Sunday after spending a few days with Mrs. J. McKenzie.

**Renton**

Spring seeding is nearly all finished around our burg and the grain is coming up nicely.

Mr. and Mrs. John Butler of Simcoe, Mr. and Mrs. D. Secord motored to Hamilton one day recently and spent the day with their friends.

Mr. and Mrs. Hugh Newell and children motored to Silver Hill on Sunday last with friends in Delhi.

Mr. Bert Sloat of Hartford spent Friday last with D. Secord.

J. W. Young spent the week end in Waterford with his mother, Mrs. Gilbert and brother Charles Young.

D. Secord made a business trip to Port Dover one day last week.

Miss Alison Rowntree of Nelles Corners spent the week-end with Miss Miss Eva Secord.

D. Secord received a letter from his son Pte. W. E. Secord, prisoner of war at Giesben, Germany, written March 18, 1918, saying that they have fine weather over there and the farmers are seeding.

**The Ontario Railway & Municipal Board**

IN THE MATTER of the Application of Council of the Village of Hagersville, under Section 17 of "THE MUNICIPAL ACT", for annexation to the said Village of part of Lots 15 and 16 in the Thirteenth Concession of the Township of Walpole, having a frontage on the southerly side of King Street of about five and seven-tenths links, and extending southerly or southwest easterly to and having a frontage on the northerly side of the Concession Road between Concessions 12 and 13, of four and seven-tenths links; and also of part of Lot 30 in the First Concession of the Township of Oneida, having a frontage on the northerly side of King Street of eight chains and thirty-five and seven-tenths links, with a uniform depth of two chains, the said land being more particularly described in the Notice of Application and Ontario Land Surveyor's Description on file in the Board's Office.

**APPOINTMENT FOR HEARING**

The Ontario Railway and Municipal Board hereby appoints Monday the Twentieth Day of May, A. D. 1918, at the hour of half-past two o'clock in the afternoon, at its Chambers, in the Legislative Buildings, in the City of Toronto, for the hearing herein.

Dated at Toronto this First Day of May, A. D. 1918.

(sgd.) H. C. Small,  
Secretary.

Holmes-Walter—That the aforesaid By-Law be read a third time, signed seal, numbered and entitled a By-Law as in the original motion. Carried.

Pond-Burwash—That we adjourn till the first Tuesday in June or at the call of the Reeve. Carried.

A. RODGERS,  
Clerk.

**Controlling Potato Disease From the Start**

(Experimental Farm Notes.)

Potatoes are plentiful this spring. Produce your seed from a field which produced a good heavy heavy crop the year previous. The smooth appearance of the seed alone is no guarantee of a heavy crop. Disinfect the potatoes before cutting the seed. Soak them for three hours in a barrel containing either of the following solutions—

Corrosive sublimate: 2 oz. in 25 gallons of water. (Note: fatal poison to man and beast.)

Formalin: 1 pint in 25 gallons of water.

In cutting for sets, throw our all potatoes showing rot or brown spots, or rings near the stem end and in the flesh.

Cut the seed immediately before planting. The longer you keep them out the smaller the yield. Be prepared to meet the ravages of the potatoe bug. Spray your potatoes. Spraying pays! Use poisoned Bordeaux mixture. The poison for the Bug, the Bordeaux for late Blight. This is the solution: 8 lbs. bluestone, 4 lbs. lime, 40 gal. water. Dissolve bluestone first in 15 gallons of water. Slake the lime in another vessel, strain it if lumpy. Pour both solutions together and make up to 40 gallons by adding water. Add arsenate of lead paste, 2 to 3 pounds per 40 gals. of solution; or use 8 oz. Paris Green and 1 1/2 lbs. of arsenate of lead (for 4) gals. solution. Stir well and fill pump through fine meshed sieve. Particles will clog nozzles and are most annoying. Spray thoroughly, and cover all the leaves well with spray. Don't drench. Commence as soon as the plants are a few inches high; and continue every two weeks throughout the season.

For a large field use a high pressure horse-power outfit. For smaller areas, there are many good hand sprayers on the market.

Get your spray chemicals right away and arrange for the purchase of a "sprayer"; sometimes it is a good practice for several farms to club together and buy a good power sprayer.

Watch the field and throw out any sickly looking or dying individual plants. Mark the one hundred best hills for future seed supply. From these select 80 which yield the largest number of uniform potatoes and plant these separately next year, and increase this practise until your strain yields the highest in the neighborhood.

**Spraying**

(Experimental Farm Notes.)

Unless many kinds of both useful and ornamental plants are protected from injurious insects and fungus diseases by spraying, the loss in fruit and vegetable crops may be very great, and, in the case of ornamental plants which would otherwise have attractive foliage and bloom, they may be rendered very unsightly.

The spraying of fruit trees should be begun just after the buds have broken in the spring and repeated at the times recommended in the spray calendars and pamphlets which are issued by both Federal and Provincial Governments and in which is given information in regard to the treatment of the different kinds of insects and diseases most likely to cause damage.

The apple scab causes, perhaps, more loss than any other plant disease in Canada, yet this can be controlled and clean fruit obtained, by thorough spraying with either Bordeaux mixture or Lime Sulphur. Other diseases and insects can be kept well under control also by the spray which has been found best for each.

Spraying is a rather expensive operation and it should be done in an intelligent manner otherwise it may be money wasted. For instance, if the spray to kill the codling moth, which affects the apple, is not applied within a very few days after the flowers fall, the sepals or lobes of the calyx will have closed over the opening or "calyx cup", in the end of the apple into which it is important to spray the poison. As it is in the "calyx cup" where most of the insects begin work, these are not likely to be poisoned if spraying is delayed and the apples will be wormy. A spray mixture or solution which will control one insect or disease may be of little or no use in controlling another. Arsenical poisons are the best for biting insects, while soap or tobacco sprays are best for those which suck their foods and which have to be killed by contact, and certain sprays intended to kill insects will not control fungus diseases.

Get the spray pamphlets and study them carefully before spraying, but spray and spray thoroughly!

From now on every passenger locomotive on the C. P. R. is to be named after the engineer who drives it. A circular band of gold, enclosing the shield, the beaver and the maple leaf, in colors of white, brown and green, with the company's name and the engineer's name in letters of gold on a blue background, is the artistic device ordered to be painted under the windows of every engine cab from the company to its engineers in recognition.
