PLANE TALE FROM SKIES.

Sow Bird-men Stupefy Enemy by Augacity Under Fire.

During the first months of the war a Beigian ouplane, containing pilot and observer, experienced motor trouble while behind the German lines and was competled to come down. Pointing her nose toward home, the two officers lioped against hope that they might glide without power back to their own territory. But it was soon discovered to be useless, for the wind was dead aga.nst them.

Leaning over the edges of their cockpits, the Belgians saw the earth rising nearer and nearer, while the speed of their craft continued distressingly Everybody seemed firing at

The German trenches appeared, and they crossed them less than thirty feet shove the enthusiastic riflemen below, Their own trenches were 200 yards' distant. The machine struck midway in no man's land, and stopped. Ducking through the hail of bullets, both men succeeded in escaping to their trenches, thanks to their comrades' fire, without a scratch. Unhappily, though, they had had no time to set fire to their machine.

Two days later Capt, Jaumotte, the pilot of the stranded agroplane, learned that his machine was still there. For two nights the Belgian soldiers had so carefully guarded it that the enemy had been unable to reach or rescue it. Jaumette determined upon a rescue.

Securing an armored motor-car, Jaumotio took along his two mechanics and two gunners, and suddenly ap-

This is to certify that fourteen years ago I got the cords of my left wrist nearly severed and was for about nine months that I had no use of my hand, and tried other Liniments, also doctors, and was receiving no benefit. By persuasion from a friend I got MINARD'S LINEMENT and used one bottle, which completely cured me, and have been using MINARD'S LINIMENT in my family ever since and find it the same as when I first used it, and would never be without it.

ISAAC E. MANN. Metapedia, P. Q.

peared in front of the abandoned acroplane. While the gunners worked their machine guns, Jaumotte and the two mechanics, protected by the armored car, busied themselves with the dis-

The German soldiers, stupefied by this incredible audacity, could only watch it through their periscopes. Every time a head appeared, the motor. car gunners raked the trench with their machine guns. In fifteen minutes the work was com-

pleted. Climbing into his seat Capt. Jaumotte signalled the mechanic to turn over the propeller. The engine roared, and with one wave of his hand the audacious pilot swept away over his own cheering trenches, while the mechanics clambered back into the motor-car with their tools and returnad home to their aerodrome. For this feat Jaumotte received a

estation from the Belgian army.-Cen-

Worn-Out Tires.

The world discarded 183,000 tons of automobile tires during the year 1916. Adding to this the large number of bicycles tires thrown away every year by their owners, it appears that the world spends every year at least \$600.-600,000 for pneumatic tires alone. During the last Automobile Exposition in New York it was pointed out that nearly 5,000,000 automobiles are now in use in the United States. To supply these with tires nearly 80,000 tons of India rubber are needed every year. and the American automobile owners pay every year as much as \$200,000,-000 for their tire bill.

PINEST IN EXISTENCE

is what Mrs. C. A. Campbell, of Powassan, Out., says in describing Zam-Buk. She writes:

"I bilistered my heel hadly by wearing new shoes. Some dye from my stocking got into it and caused s poisoned sore. It was extremely painful and for a week I could not put a shee on. Then I heard of Zam-Buk and commenced using it. It was just wonderful the way it drew out the poison and inflammation, ended the pain and healed the sore. Zam-Buk is certainly the at balm in existence everyone should know of it."

Zam-Buk is also best for eczema. bells, pimples, ringworm, ulcers, old piles, burns, scalds and cuts. All dealers or Zam-Buk Co., Toroute: 50c. box, 3 for \$1.25.

An April Adoration.

Sang the sunrise on one amber morn-carth, be glad! An April day is tern. "Winter's done, and April's in the skies. Earth, look up with laughter in your eyes!"

Putting off her dumb dismay of snow, Earth bade all her unseen children grow. Then the sound of growing in the air Rose to God, a liturgy of prayer;

And the thronged succession of the days Uttered up to God a psaim or praise. Laughed the running sap in every vein, Laughed the running flurries of warm

Laughed the life in every wandering root, Laughed the tingling cells of buc and

God in all the concord of their mirth Heard the adornation song of Earth.—Charles G. D. Roberts.

HOW'S THIS?

We offer \$100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surface of the system. Sold by druggists for over forty years.

Price 75c. Testimonials free.

CHARMEUSE.

A Material Fluch to Be Reckoned With.

Charmeuse is a material very much to be reckoned with; it forms an admirable substitute for wool, having a cerain warmth of its own and an "unshowiness" (if the word may be coined) possessed by no other silien material, and according admirably with the mood f the moment. Moreover, charmeuse wears quite won-

derfully, and does not crush, so that it does really valuable service in black or dull tones.

And charmeuse it was which was reand charmeuse it was which was responsible for a clever gown, its sable tone relieved by duif gold embroidery and a little collar of creamy georgette, the renewal of which alone will keep the dress rooms of a stand-by for results wear all going as a stand-by for regular wear all through the coming months.

Charmeuse again was called into play a gown of almost dressing-gown-like it its simplicity, but in a mastic shade, with folds lined in slightly deeper hue repeated in the girdle, the front and collar being in the same pretty material, but of ivory tone. The mode of draping was unusual, quite like many we may expect to become familiar as the season pro-

Minard's Liniment Cures Diphtheria.

LATE NOTES OF FASHION. While day rigs are smart and plain and while day rigs are smart and plain and apparently simple, evening dress may be as lively as one likes. One silver cloth affair designed in Paris for an actress shows the oddest drapery. It is pulled up back and front under pearl-beaded and tasseled panels. The right side clings around the ankle, the length thruse in a train tinues in a train.

white velvet bridal gown shown a long train from the shoulders in the back; at the sides two panels (or sashes, as the are called) hang over the girdle and rest on the floor about 20 inches. However, at this time of year evening dress is not of the greatest importance, the evening gowns of late spring and summer being more of the simpler sort. Especially is that true in summer, where it is often so warm that any save lingerie effects are unbearable. Already the velvet evening dress of the winter has been replaced by the dress of the winter has been replaced by the dress of tulle or net or

Train oddities are many, indeed.

ones on deep yokes are very good, the large collars roll over and all but cover The collars are cut to follow the yoke line exactly. Other cases are for afternoon wear and are of satin or heavy silks, and have vests of contrasting materials at the

Some of these are up to evening wear, though there are yet others which are only possible for evening. One is of blue chilfon velvet, lined with delicate rose satin, flowered in orchid shades.
Chinese art forms the basis for many ideas in costumes, and a number of faneus Paris designers feature Oriental effects as to line and embroideries, for either Chinese or Japanese costumes would be nothing without embroidery.

PUTNAM'S FINE FOR CORNS THAT ACHE

Even a drop or two of Putnam's Extractor takes the sting out of sore corns. Mighty slick work Putnam's does on a crusty old corn. You see Putnam's shrivels the corn up quickly transforms it to a bunch of dead skin, loosens it from the toe so you can pick if off, roots and branches, with your fingers. Its painless—that's why you should take a quarter to the drug store to-day and get a bottle Putnam's Extractor.

TRENTINO FOLK.

They Regard Themselves Italians Though Living Under Austria.

The people who inhabit the Trentino, as the southern portion of the Austrian province of Tyrol is called, differ very much from their neighbors in the rest of the province. The Tyroleans proper speak German, for the most part, and are specially remarkable for their fervent loyalty to the house of Hapsburg. The people of the Trentino speak Italian. All their sympathies are with Italy and, ever since the final settlement which ever since the final settlement which followed Italy's wars/of liberation, a settlement which excluded the Trentino from the new kingdom of united Italy, unredeened and have waited and worked for reunion.

The dual race problem in Tyrol is, indeed, a very ancient one. By far the greater part of the country was innabited, when it first made its appearance in history, by the Ractians, held by some to have been a Celtic race. They were conquered by the Romans under Drusus and Therius in the Romans under Drusus and Tiberius, in the second century B. C. and Therius, in the second century B. C., and the land was later organized into the Roman province of Racia. Then, in the fifth century, after the fall of the Roman empire in the west, the northern thank of the country was overrun by the part of the country was overrun by the Ostrogoths, but the Teutonic Langogoths, but the Teutonic Langobardi, who pressed p from Venetia and the plains of Lom-ardy became Romanized themselves, and

the dual race question was firmly es-The next important epoch in the history of the Trentino was in the tenth century, when Emperor Conrad II. intrusted all temporal power in the district to the bishops of Trent, at the same time detaching the country from Italy; to which it had gractically always belonged. These bishops, in their turn, exercised their temporal power through lay vassals, and so, by devious ways, Tyrol passed, in the thirteenth century, to the house of Hapsburg, and has remained a possession of that house ever since. From that time onwards, till 1655, the governing of Tyrol was generally intrusted to a cadet of the Austrian house, who ruled first at Meran, and, from 1456, at Innsburck, as a nearly independent prince, but, since 1655 the province has been governed from Vienna. o the bishops of Trent, at the same tim erned from Vienna.

The centre of gravity of the Trentino is, of course, the capital the ancient

SMOKE-TUCKETTS ORINOCO

city of Trent, a city which lives as one writer has remarked "rather on its historical souvenirs than on its industries." However that may be, it has certainly a well-deserved reputation for beauty. It stands on the left bank of the Adige where that river, on its way to Verona, is joined by the Fersina, and, when approached from the north, its embattled towers and walls, "filling the whole breadth of the valley," and the isolated rocky citadel of Doss Trento rising some 300 feet above the city, all go to make up a memorial picture. Trent, moreover, is not, like so many cities well favored at a distance, a disappointment on closer acquaintance. It is, indeed, beautiful within and without, an Italian town, and that of a high order. It has many places substantial and that of a high order. It has many places, substantial houses, broad streets, and spacious squares, and everywhere one goes one sees Italian names, hears the Italian language, and in many other ways is made to realize that one is at the centre of Italia Irredents. The inhabitants, indeed, never let an opportunity go by of emphasizing their individuals. dissoluble connection with Italy. Thus a tradition that Dante had once visited

the poet whi wal station. As has been said. Trent subsists large-As has been said. Trent subsists large-ly on its history, and, in fact, at every turn are memorials of the past, includ-ing the great cathedral church or Doumo, built in four installments, between the Eleventh and Fifteenth centuries; and perhaps most notable of all just to the east of the city, the famous Castello del Buo Consiglio, for centuries the residence of the prince bishops who long ruled the Trentino.—"Christian Science Monitor."

the country was sufficient reason the country was sufficient reason for erecting the present beautiful statue of the poet which stands opposite the rail-

Understanding Hearts.

If you see a man smiling to himself in a crowd don't imagine that he is crazy, says a writer. Usually such are the sanest of individuals and possess an enviable appreciation of themselves. They do not need to be influenced by exterior conditions and circumstances in order to call forth that spirit of gladness which lies deep within the soul. It is far more profitable to try to imitate such persons than to mock at or to pity them.

CHILDHOOD CONSTIPATION

Constipation is one of the most common ailments of little ones and unless relieved may become chronic and baby's health for all time become impaired. Nothing can equal Baby's Own Tablets in regulating the bowels. They are a mild, safe laxative, easy to administer and never fail to be effective. Concerning them Mrs. Emile LaChapelle, Terrebonne, Que., writes: -"I have used Baby's Own Tablets for my baby who has badly constipated and they quickly relieved him. All gang recently ran lines for a mountmothers should keep a box of these inter has been Tablets in the house." The Tablets are sold by medicine dealers or by Capes are much in evidence, and pleated mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville.

"KEEP YOUR SHOES NEAT"

Saves Leather and Improves Appearances.

War conditions have called into use for army shoes and equipment milllions of pounds of leather that otherwise would be used for civilian shoes. The result of this enormous drain on the normal markets is reflected in the advanced price of shees. With butter, eggs, meats and product of all kinds all struggling to out-climb each other and striving for the crown of high price, every method of economy should be adopted in the home.

Shoes can be preserved and their life strengthened wonderfuly by proper care.

Shoe leather deteriorates from exposure to weather, and when mud and slush carpet our walks and crossings shoe leather is indeed undergoing strenuous service and deserves some

Every method that will preven the devouring action of the elements on leather will naturally lengthen the lives of shoes.

"Keep Your Shoes Neat"-so read the advertisement of The F. F. Dalley Corpations, Limited, and we feel sure this patriotic appeal should be gladly adopted by the public-"A word to the wise" as it were. We are assured "2 in 1" polishes are guaranteed not to injure the ifnest leather.

Helps a Weak Throat Strengthens the Voice **Cures Bronchitis**

By Breathing the Healing Balsams of Catarhozone You Are Cured Without Using Drugs.

You breathe through the Catarrhozone inhaler, soothing balsams, full of piney antiseptic essences that resemble the air of the pine woods in the Adirondacks. This piney vapor has a truly marvellous action on weak throats. It brings strength and health to the bronchitic, stops that hacking, irritating cough, prevents hourseness and difficult breathing. You can't find anything for weak-throated people on earth more beneficial than Catarrhozone. It means heaven on earth to the man that has had bronehitis .catarrh or throat irritation. You will realize this the first time you use Catarrhozone, which is a scientific preparation especially designed for diseases of the nose, throat and bronchial tubes. Get the large size; it lasts two months ,costs \$1.00; medium size, 50c; sample size, 25c. All storekeepers and druggists or the Catarrhozone Co., Kingston, Canada.

TAILOR MADE SWART, SIMPLE.

Paris tailor-mades are smart, and one in black with a faint white line forming a check and a lining of which shows in a very narrow piping round the skirt and round the coat. It is strictly tailor-made in cut, and has a handsome waistcoat of creamy sa-tin, with a high, folding collar-band. The skirt has a cross-ever fold in front and another at the back, this insuring enough

another at the back, this insuring enough fullness for easy walking, in spite of a very narrow appearance.

The coat was further trimmed with white bene buttons, set in rows closely together where the basques were slit at the back. Two materials are used to make

Two materials are used to make up most of the dresses, jersey and cloth, taffetas and Irish lace as a waistcoat, taffeta and jersey, linen and cloth, crepe de Chine and crepe Georgette.

Sand-colored tweeds and navy blue serges are used a good deal, and a certain water-proof material is used for coats. The little overcoat in a light cloth for morning wear is also a novelty of the house, and is likely to be very popular. Tussore is used, and there are many Tussore is used, and there are many dresses in taffeta, crepe de Chine, silk

Waistcoats are often made in peau dechamois printed in a colored design.

There seems to be no fixed whist line, if there's any.

Jet embroidery is featured on some smart navy serges.
Gay foulards line many smart capes and wraps of other softs.

Spanking Doesn't Cure! Don't think children can be cured of bed-wetting by spanking them. The trouble is constitutional, the child cannot be constituted by any send to adult trouble with urine to-day. My treatment is highly recommended to adults troubled with urine difficulties by day or night. Address.

Mrs. M. Summers. WINDSOR, Ontario.

TREES' WHISPER.

Needlelike Points of Still Leaves Scratching Upon Each Other.

Henry Heinelle of Santa Monica, who two years ago sent geologists on a hike to the wilds of Malibu by reporting the discovery of a nest of dunes of singing sands, has again caused nature students to sit up and is Proud of Her caused nature students to sit up and take notice, according to the Los Angele Times.

This time he reports the discovery of a clump of whispering trees. The find was made far up in Los Tunas canyon; where the county surveyor's ain road to connect the seashore via Quebec Lady Tells How Her Children this scenie canyon with the Topanga at its junction with Garrapata.

The mysterious trees are near the bottom of the canyon, not far from the Weber ranch. At this point the wagon road is hung on the side of the canyon, far above the trickling stream. Persons passing along the road at this point are invariably attracted by what sounds to them as somebody in the undergrowth were talking in a subdued voice.

Shouts failing to bring a response, supposed whispered conversation, left the trail and descended the precipi- cured. tous side of the mountain, expecting to discover some hunter who had fallen and injured himseif. But there was no evidence of life anywhere, although the air was filled with indistinguishable whisperings.

The sound always came from the same general direction, and the willo'-the wisp directed him to a clump of scrubby trees, much in appearance like the English holly—and then the mystery was solved. The needle-like points of thousands of these stiff leaves, swayed by the breeze blowing

up the canyon, scratching upon the surface of other leaves was reponsible for the chorus.

The noise made by one leaf was so slight that it could not be heard a foot away, but the thousands grating continuously together kept the sound vibrations in such constant motion that their sigh was heard above the ordinary rustling of the leaves of the chaparral.

Naval Cadet Slang.

"For certain slang expressions used by the Annapolis cadets," writes Julian Street in his new travel book, 'American Adventures, "I am indebted to a member of the corps. From this admiral-to-be I learn that a 'bird' or 'wazzo' is a man or boy; that 'steam' is marine engineering, and to be bilged for juice' is to fail in examination in electrical enginerieng; to get an 'unsat' or unsatisfactory mark, or even a 'zip' er 'swaho,' which is a zero. Cadets do not excert girls to dances. but 'drag' them; a girl is a 'drag,' and a 'heavy drag' or 'brick' is an unattractive girl who must be taken to a dance. A 'sleuth' or 'jimmy legs' is a night watchman, and to be 'ragged' is to be caught. Mess-hall waiters are sometimes called 'mokes,' while at other times the names of certain exarted dignituries of the navy department or of the academy are applied to

FLY TIME IS COMING.

In attacking the fly menace, main re-liance should of course, be the preven-tion of fly breeding. Nevertheless, it is important to deal with all phases of the problem and to starve, awat, stick, and poison the pests wherever they may be found.

be found.
In U. S. Hygenienic Laboratory Buile-tin No. 198, Professors Phelps and Ste-venson describe experimental studies with various kinds of fly-destroying agents, and give the following as their

"The use of muscicides or fly poises preparations has many distinct advanta-ges ever the methods of combating the fly musance within the household. A serious drawback to this method here heretofors been the extremely poisonous character of the substance available and

character of the substance available and the consequent danger, especially to children, attending their use.

"A somewhat comprehensive survey has been made of other chemical substances having a possible muscicidal properties with a view to substituting them for the arsenic preparations now commonly employed.

"This study has necessitated the development off an experimental technique for

opment of an experimental technique for the determination of relative muscicidal the determination of relative muscicidal efficiencies of various preparations. The procedures develop and permit the determination of a relative coefficient, onetermination of a relative coefficient, one-thousandth normal sodium arsenic, serving as a standard basis of comparison. "Of the substance frequently recomended, potassium dischromate and quassia syrup have been found to be of lit-value. Formaldehyde, on the other hand, when properly employed, has been found to be much more efficient than the standard arsenic solution. The studies have indicated the most efficient strength of the formaldehyde solution to be from 0.5 to 1 per cent., which is equivalent to 1.25 to 2.5 per cent. of the 40 per cent. solution sold as formalin.

"A muscicide of almost equal efficiency and of distinctly superior qualities in many ways. and of distinctly superior qualities in many ways has been found in the substance sodium salicylate, a 1 per cent.
aqueous solution of which is recommended. This can be approximated by disolving three teaspoonfuls of sodium sali-cylate in a pint of water."

Portrait of Wesley.

The portrait of John Wesley is now in the possession of an art collector in Philadelphia. The picture is one of the finest that came from the brush of the famous George Rommey. In this connection it is interesting to note that for the portrait, measuring 30 inches by 24 inches, and its frame, the artist charged but 40 nounds.

fine Little Girls

WHY MADAME PEPIN IS GRATE-FUL TO DODD'S KIDNEY PILLS

Were Gured of Childish Weakness and Made Strong and Well.

St. Honore, Chicoutimi Co., Que., May 6th.—(Special).—"I have two fine little girls, thanks to Dodd's Kidney Pills, and I can't tell how grateful 1

It was out of a full heart that Madame Pierre Pepin, a well-known resident of this place, uttered these words. "I have given Dodd's Kidney Pills to my two little girls," she add-Mr. Heinelle, after listening to the ed, "and now they sleep weil and do. not wet the bed. They are perfectly

> Whether or not kidney disease is hereditary, the fact remains that many children suffer from weak kidneys that are unable to do their full work of straining all the impurities out of the blood. The result is that many parents whip their children, when what they really need is a remedy for their kidneys. Dodd's Kidney Pills have been used in Canada for over twenty-five years as a kidney remedy. If you don't know of the great work they are doing, ask your neighbors.

Above Analysis.

Women wish to be loved without a why or a wherefore; not because they tney are themseives. All analysis seems to them to imply a less of consideration, a subordination of their personality to something which domfor a feeling we are not longer under the spell of it; we weigh, we appreciate, we are free, at least, in principle. Love just always remains a fascination, a witchery, if the empire of woman is to endure. Love must always seem to 'us unadvisable insoluble superior to all analysis, if it is to preserve that appearance of infinity, of something supernatural and miraculous which makes its chief beauty. Luminous Eyes.

Cats among animals and owls among birds, says W. H. Hudson in his book, "Idle Days in Patagonia," are the most highly favored of any creatures in the matter of luminous eyes. "The feline eyes, as of a puma or a wildcat, blazing with wrath, sometimes effect one like an electric shock. but for intense brilliance the wellow giobes of the owl are unparaffeled" are pretty or good, or well bred, or Mr. Hudson asserts that nature has graceful, or intelligent, but because done comparatively little for the human eye either in these terrifying eplenders or in beauty. He says that in Brazil he was greatly impressed with the magnificent appearance of inates and measures it. They will many of the negro women, but that have none of it, and their instinct is if they had only possessed the "goldjust. As soon as we can give a reason en irides" of certain intensely black tropical birds their "unique loveiiness" would have been complete.

Minard's Liniment Cures Distemper.

Boys Drowned, Cat Escaped.

The tables were turned in a tragic manner at Port Elizabeth, South Africa, recently, when two young boys who attempted to drown a cat-at the request of the animal's owner-were themselves drowned in a small bay about three miles from the city. The cat struggled when the lads tried to hold its head under the waves and before the boys realized their danger they were swept out to sea by the outgoing tide. The cat escaped from the water and returned to its . old
