STORY OF BRAZIL.

Any Bloodshed.

Brazil's actual entrance into the stirring story of Skipper Thos. Crisp. war on the side of the Allies awakens a new and widespread interest in ous fight of the trawler Nelson with that great republic. September 7th a U-boat. His son and second hand, and November 15th are the two prin-Thomas William Crisp, receives the cipal national holidays of the coun-D.S.M. for his part in the encounter. try. The former is the Brazilian Independence Day, for on that day in rine on the horizon. The gun-layer 1822 the then vice regent of Brazil, held his fire until Crisp said: "It is the vast colonial possession of Portugal, who was Dom Pedro, son of King John VI. declared the independence The submarine sent shell after of Brazil from the mother country. The Portuguese military garrisons in Rio de Janeiro and other Brazilian cities were easily overcome, with little or no bloodshed, and were transtober 12 Dom Pedro I. was solemnly declared the constitutional emperor and perpetual defender of Brazil, and

For sixty-seven years Brazil remained the only independent country in the western world with a monfirst aid. It's all right, boy: do archial form of government. By the your best," said Crisp, who added end of that time, however, the ideas to the second hand: "Send a message of democracy and self government had gained such ascendancy that the people of Brazil decided to transform their monarchy into a republic, and for the second time there was a complete change in government through ing, and only five rounds of am- another bloodless revolution. The munition were left. Crisp, jun., went people of Brazil had no great quarrel to his father lying there on the deck, with their easy-going monarch, nor and heard him say, "Abandon ship, had they any desire to harm him or the members of his family. All rewas asked if they should lift him spected Dom Pedro II. and many loved him for his fine personal qualities, but it was the monarchial system of government in its entirety He was in too bad a condition to they wanted to get rid of, and so it became necessary for them to depose deck. The crew took to the small him. This they did on November 15, 1889. Marshal Manuel Deoloro Fonseca, one of the ablest and most popular generals of the Brazilian army, placed himself at the head of the re volution and on the date named published a proclamation in which he stated that the people, the army and the navy had decreed the deposition formed a smart and heroic piece of of the imperial dynasty and the extinction of the monarchial system. He assured the people that the Provisional Government guaranteed all inhabitants of Brazil security for life his last heroic deed. His son is 19, and property and respect for individual and political rights; that it recognized and respected all national engagements contracted during the monarchy, and that it would adhere to existing treaties with foreign countries, acknowledge the domestic Read the Live Ads and foreign debt, and assume all other legally constituted obligations other legally constituted obligations. This was a very simple and very plain document and was signed by Marshal Fonseca as chief of the Provisional Government and the members of the cabinet that had been selected. That was all there was to it. A very polite and courteous letter to Dom Pedro II. informed him that "the presence of the imperial family in this country, in face of the new situation created by the Irrevocable revolution on the 15th inst. would be absurd and impossible and provocative of troubles, which the safety of the public impresses upon us the necessity to avoid." A time was fixed for the embarkation of the royal family, and the former emperor was assured that "your comfort and health during the passage will be

looked after with the greatest of care, and the Government will continue to pay you the sum assured by law until this point has been settled by the approaching constituent as sembly." And so it was all settled in the nicest manner possible. Dom Pedro II., erstwhile emperor of Brazil, sailed for Portugal, and the Republic of Brazil started on its prosperous career. No frenzied mobs, no murdering of high officials; no butchering of innocent people; no burning of palaces. Order was maintained, and things went on safely and sanely. Truly a remarkable revolution! And that is all the more reason why Brazil should celebrate the 15th of November, the day when it became a republic without shedding blood. The mother country, Portugal, sent a special embassy, at whose head is Commander Leotte de Rego of the Portuguese navy, to participate in the general rejoicing and celebration, an evidence that all past family differences between the two countries have long since been buried

in oblivion. Musical Conductors

Really great musical conductors are few, and of these Hans Richter stood in the forefront. It is difficult to define just what differentiates a good conductor from a mere time beater, but a story that is told of Richter may help indirectly. In the prelude to "Tristan und Isolde" occurs a beautiful passage for the oboe, which rises, swells, and dies away to a pianissimo most effectively. To indicate the quality of the playing which he wanted from this instrument, Richter, beating the time with his right hand, placed his left hand over his heart, and the oboe player at once responded to a direction allinclusive in its simplicity and intelligibility.

Aeroplanes.

Aviation officials will strive to reduce the number of parts in an aeroplane, which exclusive of the engine and built-up sections of the frame include nearly 200 separate pieces. These are the things necessary to build a machine without its engine: Nails, 4,326; screws, 3,377; steel stampings, 921; forgings, 798; turnbuckles, 276; veneer, 37 square feet; varnish, 11 gallons; dope (for dressing wings), 59 gallons; aluminum, 55 pounds; rubber, 34 feet; linen, 201 square feet; spruce, 244 feet; pine, 58 feet; ash, 31 feet; hickory,

British Sallors' Homes, The records of the British and Forign S ilora' Society show that beween January 1 and November 1, 917, more than 16,841 survivors rem ships sunk by enemy action and been brought to the society's

domes and institutes.
