

A Memory of Bruges

Not altogether. There are things that they forget. Was any German standing on the belfry of Bruges on the night of April 23rd? If so, he did not feel the bells ringing out the hours. The bells have gone to Eisen. He stood in an empty, silent tower. Then suddenly he heard, coming up the dark canal, where the Hansa ships put in to Bruges from half the ports of the world, a deeper note than the bells had ever rung. It would travel clear and strong up the street, the sound of the English guns, and the English sailors hammering at the dock gates of Bruges. And at that he would remember why, though he stood in Bruges and Flanders was his, yet the broken Hansa thread was still unended.

Steward—We're held up by a submarine, sir. Seaside Passenger—Good! I hope the darn pirate relieves this ship of her roll!

THE ONLY MEDICINE THE BABY NEEDS

Baby's Own Tablets is the only medicine mother needs for her little ones. They are a gentle, but thorough, laxative, which invariably relieves all stomach and bowel disorders, thus banishing all the minor ills of little ones. Concerning "Mrs. Mrs. Jos. Lettigue, St. Simon, Que., says: "Baby's Own Tablets are a marvelous medicine for little ones. They never fail to cure stomach and bowel troubles, and neither my sister-in-law nor myself would use any other medicine for our little ones." The Tablets are sold by medicine "junkies" or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Battlefield Phones. In no war in the past have the electric signaling systems covered so many square miles or such a great diversity of requirements. The commanding general wants to know how a certain division is progressing; an artillery captain wants to ascertain just where his shells are dropping; these and a million other facts must be transmitted every hour of the day along the hundreds of miles of battlefront, says the Electric Experimentor. And it is really marvellous how the army signal corps have perfected their frill-looking wires and instruments so that they will work under the most unfavorable conditions.

Romance, adventure, action—all of these come to the signal corps man in the pursuit of his duties more than ever before. To-day he may install a telephone switchboard in a cheerful little town near grand headquarters, situated a dozen miles back of the battlefront. To-morrow he may be stringing wires through a shell-swept forest. One case will serve to show the lottery-like chance these men take. An English military lineman had been busy for several weeks in a district near the Alsne battlefield. He had completed straightening out a perfect jungle of wires and circuits. His captain came along and was pleased to learn that all of the circuits had been tested out without losing a man. The same captain was ordered to hear the next day that his brave lineman, his work done, had been picked out of a pile top by a stray shell.—Exchange.

Monorail Autos. Two-wheeled automobiles and torpedoes with mechanical ears, to chase ships by sound waves, are brain products of Prof. Montraville M. Wood, who gave a demonstration of his inventions at the Union League Club recently. By radiative paints, he asserts, an expensive mural decoration may be manufactured which will furnish so much light a person may read by it. "Within 10 years," he said, "there will be plenty of non-skidding auto-mobiles running on two wheels built on the principle of the monorail and retaining their equilibrium by means of the gyroscope."

RELIEF AT LAST

I was to help you if you are suffering from bleeding, itching, blind or protruding Piles. I can tell you how, in your own home and at your own expense, you can apply the best of all treatments.

PILES TREATED AT HOME

I promise to send you a FREE trial of the new Absorption Treatment and references from your own locality if you will but write and ask. I assure you of immediate relief. Send no money, but tell others of this offer.

Road Bends at Tracks. A great percentage of the automobile accidents are caused by the driver finding himself rushing onto the tracks without already occupying the rails roaring toward the ill-fated vehicle. Such a meeting is almost always disastrous. The railroad authorities are most anxious to avoid these unfortunate incidents, and many schemes have been tried to prevent them. Patent papers have recently granted on one which has some unique features, and would probably avert the life of the automobile driver if it would probably make it impossible for these accidents to occur. The idea consists of placing a sharp curve in the road at point just before the tracks would be reached under ordinary circumstances, so the chauffeur is compelled to slow up and make two runs before getting on the track, and while performing this course it is that there will be ample opportunity for observing the approach of a train in either direction.

Genius is only entitled to respect when it promotes the peace and improves the happiness of mankind.—Head of Essex.

Fresh as a Flower, and just as fragrant!

"SALADA" TEA

is just the tiny buds and young leaves from hill-grown shrubs—So economical because it yields so generously in the teapot.

A Doctor's Ten-barreled Gun

Maxim's was by no means the first machine-gun. During the Civil war a Chicago physician brought out a very ingenious ten-barreled gun, the barrels being fired one after the other by the turning of a hand-crank. Although Dr. Gatling was a graduate of a medical school, he was far more fond of tinkering with machinery than doling out pills. He invented a number of clever mechanisms, but the one that made him really famous was that machine gun. At first our government did not take the invention seriously. It was tried out in the war, but whenever it went into battle it was fired not by soldiers, but by a representative of Dr. Gatling's company, who went into the army to demonstrate the worth of the invention. It was tried out in the war, but whenever it went into battle it was fired not by soldiers, but by a representative of Dr. Gatling's company, who went into the army to demonstrate the world of the invention. Not until long after was the Gatling gun officially adopted by our army. Then it was taken up by many of the European armies as well. Although many other machine guns were invented, the Gatling was easily the best and most serviceable, until the Maxim invention made its appearance, and even then it held its own for many years; but eventually it had to succumb. The Maxim did not have to be cranked—it fired itself, which was a distinct advantage; and then, instead of being a bundle of guns all bound up in a single machine, Maxim's was a single-barreled gun and hence was much lighter and could be handled much more easily.—"St. Nicholas."

His Name's McRAE

American Soldier Thrilled by Trossachs Beauty. London Cable.—It was in the centre of that famed beauty district, the Trossachs, that I found him, says W. Harrow, in *London in the Daily Mail*.

To be precise, he was lounging contentedly on the shore of Loch Katrine, his very blue eyes caught by the witchery of Ellen's Isle; a little sprig of still green heather held tightly between his white teeth. The opening of conversation was, I found, easy enough. "Do you know," I said, "you're the first American uniform I've seen in the Trossachs?" "That so?" he returned pleasantly, as he rose. "Well, I reckon you'll see plenty of the boys before they go back home."

WHOLE BUNCH OF MACS.

My eyes must have shown surprise. "Oh, there's a whole bunch of Macs come over," he said. "My father was born and bred right close to the Brig o' Turk. Back home we've got a picture of him hanging on the parlor wall—a proud-looking, handsome old fellow, who died long before I was born. Dad said to me, 'Jim,' he said, 'when you get to the other side have a shot at visiting my father's place. I'll give you a thrill if all the old man used to tell me was true.' "And you have had the thrill?" I asked. He grinned. "Bet your life," he said.

At the Chinese Play.

We ascend by way of narrow, rickety stairs and find ourselves in a three-sided balcony with boxes in tiers. The space near the wall is left for the passage way. Our box will seat about eighteen persons, and contains very comfortable chairs and a nice little shelf for the teacups and establies, with a gutter attached to receive the debris. We are no sooner seated when the ticket man approaches. After a polite inquiry as to the state of our health, and hoping we shall enjoy the performance and assuring us of honor we are bestowing upon the theatre by being present, he would appreciate very much our handing over the required amount for the tickets. We ask him the sum total of this important transaction and he replies, "Six dimes for the tickets and six cents for the ushers and one cent for each person. Ushers and conies are allowed one cent for every ten cents paid." After this generous thanks and, "Bearing your pardon for disturbing you," he takes his departure, but is quickly followed by a coolie bringing teapots and cups. He places those on the little shelf and leaves without a word. As soon as he has disappeared another coolie appears, bringing a number of small dishes, each filled with the delicacies of the season, but always including the watermelon seed. You notice the same performance going on all about you and wonder just how a Chinese gentleman would feel if he had to sit through some theatrical performance without his teapot and melon seed.—Frank S. Williams in "Asia."

Concerning Peanuts.

The peanut isn't a nut at all, but a member of the pea, bean and clover family. It is a legume and gathers nitrogen from the air. Peanuts do not grow from roots, but on shoots which grow out from the plant above ground, bear a little sprig yellow blossoms, and then shoot directly into the ground, where they "peg," that is, where peanuts begin to grow on them. The peanuts are pulled from vines or roots, and the roots are then plowed back into the ground to allow the nitrogen to feed the soil. The peanuts are then taken to "peanut factories." In these buildings the peanuts are cleaned and sorted. The largest are saved and put through a "rumblor," which polishes the shells. These are sold in the shells. Other first grades are shelled and sold for salting; and one big packing company buys only first grades for peanut butter. If the plants are pulled roots and all, the peanuts are dried out by stacking on poles, then pulled off and sold. Broken peanuts are pressed and the oil extracted. Much of this oil is sold as "pure olive oil." In fact, it is quite as rich and nutritious as olive oil. The refuse is pressed into cakes, and sold as oil cakes for feeding stock and especially dairy cows.—"St. Nicholas."

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Medicine. Catarrh Medicine has been tried by catarrh sufferers for the past thirty-five years, and has become known as the reliable remedy for Catarrh. Hall's Catarrh Medicine acts through the blood on the mucous surfaces, expelling the poison from the blood and healing the diseased portions. After you have taken Hall's Catarrh Medicine, you will see a great improvement in your general health. Start taking Hall's Catarrh Medicine at once and get rid of Catarrh. Send for testimonials, free. F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, 75c.

TRADE BRIEFS

The manufacture of "Engalith," which is the term used in England to designate the composition known as "galalith" in Germany, has been undertaken by three concerns. Large quantities of this substance are being made for war purposes, as well as for export to America, France, Spain and Italy. It is produced in rods, tubes and sheets, and in some sixty different colors, and is worked up into a great variety of articles, such as buttons, combs, beads, hair and hat pins, hair and clothes brushes, toilet articles, carriage and motor fittings, pencils, penholders, telephone accessories, scientific and electrical instruments and fittings, switchboards, labels, pipe stems, cigar and cigarette holders, umbrella handles, piano keys, chessmen, marbles, drafts, dice, camera, pocket and fruit knife handles, paper knives, photo frames, finger plates and jewelry; but being slightly hygroscopic is not adapted for articles that have to come into frequent contact with water or acid, such as table knife handles, bath-room tiles or basins, fountain pens, fishing tackle, electric storage cells, and tooth brushes. "Engalith" is an excellent substitute for celluloid, although it cannot be used to replace the latter in the manufacture of very thin articles. American manufacturers should bear in mind that the farms of Europe are small, and that small tractors (about 20 horse-power) are much more in demand than heavy tractors, although there is a demand for the 35 and 50 horse-power machines in Algeria and Russia. A tractor for European sale must be an all-purpose tractor that can do heavy and light work; it must have a good speed for road haulage and a pulley for threshing and grinding. Dundee's (Scotland) customs and excise revenue during July totalled \$209,624, compared with \$139,427 in the corresponding month last year, an increase of \$160,197. The customs receipts amounted to \$91,691, and the excise to \$207,933. During the war the imports from Brazil to the United States have grown markedly. In 1917 the United States took half of the total exports of Brazil. British imports from Brazil have remained about stationary. As regards exports to Brazil, the United States and Great Britain appear to have changed places, so far as the total value of trade is concerned. In 1912 the United States exported \$9,391,222 to Brazil and Great Britain \$2,522,221. By 1917 British exports had fallen to \$2,841,717, while the United States had increased to \$66,307,970, an increase over the 1912 figures of about 40 per cent.

Strategic Site of Bagdad.

To appreciate Bagdad one must come to it as we do, and as I do, I come, out of the desert. How beautiful it seems as you see it in the distance, a mass of verdant palm trees rising out of the treeless plain, and glittering about these low wonderful gold domes of the mosque towers in the sacred and fanatical suburb of Karamanli. Bagdad straddles the Tigris at the point where that river crosses the Euphrates most nearly opposite, opposite a natural caravan route up the Diyala River, which joins the Tigris at this point, through the Zagros or Pushtli-Kly Mountains to Kermanshah, and Hamadan in Persia, and so on to Central Asia. Commanding both the river route southward to the Persian Gulf, and the caravan routes northward up the Tigris to Asia Minor and the Black Sea, and westward up the Euphrates to Syria and the Mediterranean, as well as the road eastward to Persia and Central Asia, this general locality is the natural site of a capital.—"American-Review of Reviews."

Worth Remembering.

Do not keep canned fruit in your pantry. Canned fruits should be kept in cold, dark place. To make shabby oldcloth look new, give it a thin coat of varnish; let it dry, then give it a second coat. A box of fresh, dry sand is an excellent thing to have in the pantry. If apples or lemons are packed in it they will keep fresh for a long time. To set delicate colors in an embroidered handkerchief, soak 10 minutes previous to washing in a pail of tepid water in which a dessertspoonful of turpentine has been sweetened. Baking soda will sweeten milk vessels, clean brass and is good for softening water in which dishes are to be washed. It is also a soap saver. Soaking in cold water makes the washing of garments much easier. When ironing, the garment is scorched, put it immediately under the cold tap. If the water is allowed to run on it the scorch will at once disappear.

BE CURED TO-DAY OF BACKACHE

Your persistent backache can have but one cause—Diseased Kidneys—and that must be strengthened before the backache can be cured. Your best remedy, and the quickest to act, is Dr. Hamilton's Pills; they cure kidney backache in a hurry. Simply wonderful is the action of this grand old medicine, which for liver, kidney and stomach disorders has no equal. Dr. Hamilton's Pills will surely bring you good appetite, color, strength and good spirits. Being purely vegetable they are mild, not drastic. Get a 25c. bottle of Dr. Hamilton's Pills to-day.

WORTH KNOWING.

Apples cut in irregular pieces will cook more quickly in a pie than if sliced, for they do not pack closely as sliced do and so the hot air comes more quickly in contact with the fruit and cooking is facilitated. To cleanse a frying pan which smells of onions or fish, fill the pan with water, and when it boils drop in a red-hot cinder. Forward rinse and wash in the usual way. When the grate is cleaned and polished rub all over a piece of old velvet. Old velvet is also very useful as a final polishing cloth for waxed surfaces and door knobs. A little vinegar rubbed on a steak before it is fried or broiled will add to its tenderness. If the beef roast is tough, rub it over with vinegar before putting it in the oven, and baste with water to which a tablespoonful of vinegar has been added. If boiling meat is inclined to be tough, add a teaspoonful of baking soda. Meat may also be kept fresh by immersing it in seawater.

HELP WANTED—FEMALE

EXPERIENCED WEAVERS WANTED. Also experienced, steady work. High wages paid. Apply Sibley Mfg. Co. Ltd., Brantford, Ont.

WANTED—A MAID, NO WASHING or ironing. Two in family. Apply to Mrs. Mills, 15 St. Matthew's Ave., Hamilton, Ont.

WANTED—BALED HAY. QUOTE price delivered at Bothwell. Baid Bros., Bothwell, Ont.

FOR SALE—WOOD AND SPLITTER and Motor saws. Also Two Dump Wagons. Apply Theo. Myles' Sons, Hamilton, Ont.

FOR SALE—TWENTY-TWO STEERS—Durham grades; dehorned; about one thousand pounds; an extra fine finish for Christmas. Apply W. H. Littlefield, Brantford, Ont. Telephone 44.

112 ACRES—MORE OR LESS—LOT 27, Concession 2, Brantford. Good stone house, up-to-date bath; good stables, with water; closed in several acres; big barn; 1000 bush (hard timber) land; windmill, good orchard; farm in good state of cultivation. Good school, well-kept; school-house; two churches close by. Apply W. H. Littlefield, Brantford, Ont. Telephone 44.

TWO HUNDRED ACRES, CLOSE TO EASY TERMS. D. L. Gilmour, Collingwood, Ontario.

NEAR TILSONBURG—100 ACRES: splendid soil; fine dwelling; large barn on 8 foot concrete walls; good water; garage; telephone. Ten acre bush (hard timber) 20000. Terms \$1000 cash. Retiring. Box 14, Tamblinga, P. O. Ont.

PROPERTIES FOR SALE. BRICK HOUSE—ALL TOWN CONVENIENCES—one and half acres garden. For full particulars apply Box 263, Barrie.

POULTRY. FOR SALE—500 BROWN FAMOUS LAYERS, English White Leghorns, Hens, Cockerels, Poults, \$2.00 and \$2.50 each (Breeding pen method); 6 Silician Butter Cup hens, unclipped Cockerels \$14.00; 6 English Penedra Indian Runner ducks unrelated Drake \$14.00. Square deal guaranteed. For particulars write John W. Nash, 524 4th Ave. Owen Sound, Ontario.

WOOLEN MILL HELP WANTED

We have several good openings for experienced and inexperienced male and female help. We require girls for weaving and winding. Every assistance given to learners and good wages paid during apprenticeship. Workers in this line earn very high wages and are always in demand. Only a couple of weeks' time necessary to learn. Several good openings for steady men. Special arrangements shown to family of workers. Rent and cost of living reasonable in Brantford. Moving expenses advanced. Suitable families and housing accommodations arranged. Full particulars cheerfully furnished upon request. Write us, THE SIBLEY MANUFACTURING CO., Limited, Brantford, Ontario.

To cut hard-boiled eggs in smooth slices, dip the knife in water.

No matter how much dripping is used, fish when being fried is apt to stick to the pan's bottom. If a tablespoonful of dry salt is put into the pan and rubbed over it will be found satisfactory.

The secret of flaky piecrust is the use of hot water (not boiling) rather than cold in mixing the dough. If this hint is followed the crust will always be flaky, tender and crisp.

After draining the water from boiled potatoes, put a clean dry cloth over them and tuck in closely around the edge of the kettle, says Good House-keeping. When ready to serve they will be light and flaky, as the cloth absorbs the moisture. The cloth also serves to keep the potatoes hot. If dinner is delayed by some unforeseen reason, this method of covering will keep the potatoes palatable for at least an hour.

Little Things of Fashion.

Ostrich is used in some of the smart late summer hats of straw, with especial effect on those of sailor shape. Jet trimmings are shown on some of the newest serge frocks—buttons and long, flat beads worked along in straight or curved, but very simple designs. White jersey collars are worn a good deal on dark jersey frocks. Black satin sashes, with long fringed ends—the fringe of heavy, knotted silk—are much used on new frocks of navy blue serge. If you travel by motor this year, and many persons do, because of the congestion on the railways, then you may find a motor hamper convenient. There are all sorts of lampers, made of wicker or of leather, big enough to hold a large lunch for six or a small lunch for two.

DRS. SOPER & WHITE

Specialists. Piles, Strains, Aches, Sprains, Rheumatism, Gout, Epilepsy, Rheumatism, St. Vitus, Glass, Nerve and Blindness. Call or write for free advice. Mailing form on request. P.O. Box 10, Brantford, Ont. Dr. Soper & White, Brantford, Ont.
