PTE. KENNETH CHURCH
Son of Mr. and Mrs. John Church, of this place, officially reported as
"KILLED IN ACTION"

Lost at Sea

Official word has been received by Mr. C. E. Bourne of this place, that his second son Arthur S. was a passenger on the ill-fated steamer, the Princess Sophia, which went down off the Pacific coast as reported in the Canadian Press despatch of Monday. Mr. A. Bourne, who has been in the employ of the Northern Commercial Co., of San Francisco, at Iditarod, Alaska, for the last four years, was on his way to the Company's headquarters and it was his intention to spend the Christmas holidays with his father and relatives here. Although Mr. C. E. Bourne has received a number of telegrams from the steamship company, no word as yet has arrived as to the recovery of his son's body.
The deepest sympathy of the whole community goes out to the bereaved father and relatives.

Sapper J. W. Maloney Entertained

The following is an extract from an English paper and was handed to the Record by Mrs. Harvey Abraham, and will prove interesting to many of our readers.
On Tuesday evening Sapper J. W. Maloney, of the Canadian Engineers, was entertained at supper at Mrs. Wall's Central Cafe. Sapper Maloney came to Merthyr after the great snowstorm of March, 1916, with a company of Canadian Engineers to repair some wires, which were blown down during the storm. Whilst in Merthyr they made a great many friends, and several of them have spent their leave in the town. After a splendid repast, a musical programme was contributed to by Mrs. Howell Meredith, Mr. Geo. Daniel, Mr. Chas. Lee, etc. Speeches were made by Mr. C. Lee, Mr. Geo. Daniel and Mrs. Wall, wishing him God speed and a safe return. Mr. J. Thomas, L.C.M., was the accompanist.

Farmers' Exports Bringing the Boche

Last year the people of Canada loaned to the Government \$419,000,000 to carry on the war. Out of that sum were spent huge sums to finance the purchases of the British Government in Canada for food and munitions. Since the war began the Imperial Munitions Board has awarded contracts in Canada amounting to \$1,200,000,000 and about \$400,000,000 have been advanced by the Government and Banks. Besides there were very heavy advances to assist in the export of Canada's agricultural products.

These sums have been the cause of a tremendous expansion of industry. Farmers, as well as manufacturers, have been able to sell their surplus products to Great Britain and to get the money at once. They have gone on multiplying their efforts and doing their part in winning the war, for Great Britain had to eat while her soldiers were away fighting. In the past year the Government has advanced \$100,000,000 to finance our agricultural and animal products to Great Britain. The bacon output was entirely handled out of Loan funds. And this year there will be some heavy calls out of the 1918 Victory Loan. Canada has a surplus of cheese for export amounting to \$40,000,000. Butter, eggs and condensed milk will amount to \$10,000,000 more. The Victory Loan will get these to their only market, Great Britain. The exportable wheat crop will be 1,000,000 bushels and the value \$225,000,000. Victory Loan money for the most part will finance this.

It is a big story. Perhaps we may better understand the tremendous import of the Victory Loan by comparing the agricultural and animal exports of the last fiscal year with four years ago. In 1915 Canada exported of those \$200,000, last year the figures grew to \$740,000,000, because the Dominion Government was able to find the money for the handling of these exports. In manufacturers exports have increased from \$65,000,000 in 1915 to \$636,000,000 in the last fiscal year. Many great industries have been built up. The whole country has felt the impulse to greater endeavor. This is the spirit that is winning the war. We must not let it flag. Subscribe to the Victory Loan.

Winter Apples and Their Care

(Experimental Farms Note.)
As winter apples are expensive it is important that the buyer and consumer should, when laying in the winter supply, obtain varieties that will be in best condition successively through the winter. He should also keep his apples so as to lose as few as possible from over-ripeness or rotting. As soon as the fruit is received it should be put in the coolest place available without frost. A temperature from 32 to 35 degrees Fahr. is best. If there is a choice in the house, that with the moisture atmosphere, such as a cellar without a furnace, would be the better for the air is too dry for keeping apples well in many houses.
If the apples are in good condition, they may be left in the barrel or box. If, however they show signs of rotting they should be sorted and the unaffected specimens wrapped in tissue or news paper which lessens the danger of any rot spreading. If the room is very dry it will be better to put them back in the barrel or box after wrapping as they will shrivel less than if exposed more to the air. It is important to keep the fruit in clean receptacles, otherwise they may absorb unpleasant flavours.
Among the best varieties of apples in good condition early in the winter are Fameuse or Snow, Ribston Pippin, Hubbardston Non-such.
