## SCIENCE NOTES.

The foot pads of deaf cats are said to be much more sensitive than those of their fellows with hearing.

When Macquarrie Island, situated 600 miles to the south of New Zealand, was discovered in 1810, it was inhabited by a peculiar flightless parrot described by a contemporary who saw numbers of the birds which were brought to Sydney by sealers as "the glibbest of the loquacious tribe." Recent investigation of the island makes it almost certain that this strangely isolated specimen of the parrot family is completely extinct, probably as a result of the introduction of cats, which have become wild and overrun the island.

There are said to be 70 languages or dialects spoken in the ancient city of Tiflis, Asiatic Russia.

Of the 3,000 or more islands comprising the Philippines, only about 400 are inhabited.

The original canary birds were not yellow in color, but gray and green.

la Jamaica there are trees called the "whip trees," and from these the natives make strong whips with the lash and handle all in one.

Vomiting occurs only among flesheating animals, never among the veretable eaters, says Prof. George W.

#### MOHAMMEDANISM IN THE WAR.

(New York Sun) The war has shattered many of the The war has snattered many of the traditions and generally accepted beliefs regarding Mohammedanism and has wrought greater changes in Islam than in any other, of the leading religions. It has not only shown the form of a It has not only shown the form of a holy war to be groundless but is has given a new meaning to the somewhat indefinite term the Mohammedan world, the defeat of the largest indefinite term the Mohammedan world, has led to the defeat of the largest Moslem government, restored political independence to the holy cities of Islam, and has brought the long continued dispute over the Caliphate to the point that there is now no universally recongnized head of Islam, and for the first time no accredited temporal successor to Mo-

the "Mohammedan world" was formerly meant that great body of Mosiems, about 225,000,000 people, or one-seventh of the world population, a potential solidarity which owed allegiance above all to its religious head. Despite the fact that Great Britain was the ruler over the greatest number of Mohammedans, that Russia Frence, Spein hammedans, that Russia, France, Spain, Italy and the United States were the actual rulers of other large bodies, it was asserted that in Islam there was no nationality, and that the only unity was that based upon religion. The foundation of this relief was that Mohammedanism was from the beginning. anism was from the beginning a unified religion, and that in all its history, despite schismatic movements, it has had pite schismatic movements, it has made one universally accepted prophet, one unquestioned book, the koran, one holy shrine, Mecca, one confession of faith, and one representative on earth of the prophet, the Caliph. It was this unquestioned unity for aggression and protection that all efforts at proselytism among the Moslems confronted and to which they laid their failures.

which they laid their failures.

The war proved to the Christian world the incorrectness of this view. Scarcety had the declaration of hostilities been made than the Moslems of British. French and Russian territories declared their allegiance to their respective Governments. Djamel Pasha made a test of the sincerity of these declarations by atempting an invasion of Egypt, counting upon support from the Mohammedans of that country. They arose not only against him but they organized in defence of Egypt from all attacks of the Turks on the west by only against him but they organized in defence of Egypt from
all attacks of the Turks on the west by
Senousi, whom Turkish agents had incited to war. Mohammedans from India
and Africa fought with the British and
French on the western front. The
Arabs, who have been considered the
most faithful defenders of Islam, arose
against the Government of the Caliph
at Constantinople, joined the British in
the conquest of Ottoman territory and
fought valiantly against the Turks to
secure their own independence.

This alignment of the forces of Islam

This alignment of the forces of Islam gainst Turkey was effected despite against Turkey was effected despite one of the most carefully prepared and ahrewdly managed campaigns ever made to arouse the Moslem world. Peace conditions have disclosed the vigorous efport for the jihad declared at Saint

Sophia. Constantinople, in the name of the Caliph. It, however, was received with Little enthusiasm even within the Ottoman Empire; while protest came from India, Egypt. Morocco, Tripoli, in fact from every Mohammedan country, against the attempt to involve Islam in a religious war under any circumstances, and especially in support of Germany. As the result of this attempt came the proclamation from Mecca to the Mohammedans of the world that the Sultan of Turkey could be no longer recognized as the Caliph. As the right of the Sultan to this honor had been long disputed the Mecca proclamation met a more or less sincere approve by the Moslem world outside of Turkey. Constantinople acquired the Caliphate when it was the seat of the Turkish Government in the height of its power; with the passing of the glory of Turkey and its present condition of humiliation there exists no longer any reason that Constantinople should remain the religious head of Islam. On the other hand it is doubtful if the Mohammedan factions will agree upon its transfer to Mecca. At the same time it is impostions will agree upon its transfer to Mecca. At the same time it is impossible that, in accordance with the laws of the church, it can be bestowed elsewhere in view of the fact that there is no powerful, independent Moslem Government

is no powerful, independent Moslam Government.

The war has, in fact, disclosed the true strength of Mohammedanism and the problems which it must meet if it continues to hold its position as one of the great religions of the world. Dr. James L. Barton of the American Board of Foreign Missions in the Biblical Rewiew says: "The dream of a great united Moslem rule, that should not only unite all Moslems but ultimately subject all not Mohammedans to its religious and temporal sway, is dissipated forever." What great binding principle can Islam substitute for this underlying ideal? And will the changes that have thus come open up, as Dr. Barton believes, all Mohammedan lands to the advance of Christianity? of Christianity?

## **WELL SATISFIED WITH BABY'S OWN TABLETS**

Mrs. Emile Malette, Montpelier, Que., writes:-"I have used Baby's Own Tablets for some time and am well satisfied with them. They are surely the best medicine I know of for little ones." What Mrs. Malette says thousands of other mothers say. Once they have used the Tablets for their children they would use nothing else. The Tablets are a mild but thorough laxative; are absolutely free from opiates, narcotics or other harmful drugs and may be given to the youngest baby with perfect safety and good results. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## PRESIDENT WOODROW WILSON

Only a dominie, teaching a school, Careful, methodical, working by rule. Patient, industrious, forging ahead, He steadily climbed as a student, 'tis said. Such are the men that God chooses

EAGLES AND HAWKS.

Something About Those Found in America.

What do you know about the American eagle, the bird of liberty? Do you know there are 500 kinds of hawks? Many species resemble each other closely, writes Dr. A. A. Allen, Ph. D., of Cornell, in the American Forestry Magazine, of Washington. "All can be recognized by their short hooked bills," continues Dr. Allen, who is one of the foremost orthinologists in America, "their strong

talons and the absence of the facial disk which characterizes the owl. Parrots, which are somewhat hawk-like in appearance, have very thick bills and have two toes directed forward and two backward, instead of three in front and one behind. "Hawks vary in size from the gigan-

tic condor and the California vulture, the former measuring over twelve feet from tip to tip of the wings, to the pigmy falcons of India, which are scarcely larger than sparrows. The females are usually larger than the males, frequently exceeding them by several inches in length. Thus the male Cooper's hawk measures but a little over fifteen inches in length while the female averages nineteen

"Most species are inconspicuously marked with brown and grey, but some have quite striking patterns of blue and reddish brown. With some species, like the marsh hawk, the male and female are different, but usually the adults are colored alike addits tend to become very gray above and barred below, while the immatures are brownish above and breast.

"The color patterns of many species are so similar that it is much easier to or ten acres.

Thrilling Story of Torpedoing of U. S. Destroyer.

HEROES ALL

Automatic devotion to duty while in a state of unconsciousness was shown by a fireman aboard a United States destroyer when hit by a German torpedo. The destroyer's stern was torn off, but she reached port safely. One man was killed

Twenty were in the compartments near which the torpedo struck. None were seriously injured. Each was utterly blinded by gases and debris, yet all water-tight doors in that part of the ship were later on found closed, though the men did not remember having closed them.

The torpedo crashed into a storeroom four feet from where F. W. Kruse, a first-class fireman, was asleep in his bunk. Four structural frames 84 inches of the elde were torn off alongside him. Two depth charges exploded on deck just abovea tremendous blast of T.N.T.

Kruse groped from his bunk, out through the doors and up the ladder. He staggered forward along the main deck. Abreast one of the funnels, he

bent over, feeling for the hatch leading below into one of the fire-rooms, trying anxiously to undo its closed

"Are you hurt?" asked an officer, noticing his glazed eyes,
"Here in my bunk?" laughed Kruse. "Hell, no!

Surprised, the officer was about to pass on to the destruction aft. But Kruse made a convulsive movement. and light returned to his glance. 'What's happened?" asked the fireman, still dazed.

He was told "My battle-station's right under here!" said Kruse. "Guess I was bound there without knowing it!" 'You sure were!" said the officer.

He was right. The man who was killed deliberately sacrificed himself. He was "Rebel" Jugram ,a gunner's mate. Seeing the torpedo close aboard, he dashed aft to release the depth charges. On the way, he had to pass the after 4-inch gun, under which the torpedo hit. The explosions hurled the gun overboard, a sieve through which the whale and all that was seen of Ingram was stains all food collected from the patch of red, staining the wreck of the sinking gun and its mount.

Smoke was coming from the magazine under the chattered compartment, when officers went below to investigate. Hundreds of pounds of ammunition were stored there. Yet the fectious diseases among horses and mules. Its success as a preventive and cure for DISTEMPER, INFLUENZA, PINK EYE, COUGHS and COLDS for more than twenty-five years officers, without an instant's hesitation, wrapped wet towels about their EYE, COUGHS and COLDS for more than twenty-rive years is the highest tribute to its merit as a medicine. It is indorsed by the best horsemen and live-stock men in America. Buy it of your druggist. faces and plunged into the magazine with electric flash-lights. They closed the door after them. Ten minutes passed before they returned, to report that the fire was from the lignum vitae bushings of the starboard propeller shaft. But they had had no means of guessing that.

With her after gun gone, the destroyer was unable to attack or defend herself from astern. She could steam with her port propeller only, and at less than 10 knots. The submarine came to the surface about 1,000 yards off her beam. Four shots from a forward battery sent her under again. With nothing but the tip of her periscope out, she could have easily manoeuvred, attacked and "gotten" the destroyer from the read.

"But she didn't!" later said her ofof Hun cold feet!"

## Men, Men! Try It To-night— Feel Fine To-morrow

Simple Way to Get "Pep," to Be Put Right on Your Feet.

When a man has lost ambition to 'dig in' and stay at things—when he complains of headache, fullness in the right side, pains in the shoulder blade -it's purely a case of "Liver." These symptoms invariably indicate a clogged, inactive liver. The body can't get rid of its wastes, and the

whole system is haif paralyzed. Dr. Hamilton's Pills stimulate the liver into activity in one night. Being a mild vegetable laxative they produce results in a few hours. The bilious headache and constipation are cured, spirits rise, complexion clears, animation returns. Nothing in the calendar so efficient for that tired. lazy feeling as Dr. Hamilton's Pills. Very mild, don't interfere with work, invariably do lots of good. Try a 25c box, all dealers.

## Darkness Over the Sky.

The projectile of the gun with which the Germans have been shelling Paris from a distance of seventy-five miles must rise in its trajectory to a height of twenty-four miles above the earth. The Scientific American says it is probable that at that height there is so little air that the sky loses its blue appearance, because there is hardly enough of it to produce the refraction of light which gives it its faminosity. which gives it its faminosity.
"If we could accompany this shell on

"If we could accompany this shell on its course," continues the Scientific American, "we should probably find the sky growing darker and darker, until it becomes nearly black. In the black sky the sun would show as a ball of fire, while the stars which were not obliterated by the sun's light would also be visible. Below us we should have the reflection of sunlight from the earth and from the denser strata of the atmosphere."

## Told by President Harrison's Secretary.

A ROOSEVELT STORY.

Elijah W. Halford in the Christian Advocate.

A very prominent Republican Congressman was in my room one day after he had made a bitter attack in the House upon civil service reform, repeating many of the cheap current charges and critisisms upon the work of the commission, and particularly singing out Mr. Roosevelt for sarcastic comment. While he was talking with me the Commissioner came in. They did not speak to each other, and I was tactless enough to introduce them; when almost immediately the fireworks began, and in a minute or two the lie passed. I got between the two, and the Congressman at once the two, and the Congressman at once left the room. Mr. Koosevelt apologized to me, and said he realized that any man who structure another in the President's house could not remain his appointee, and he had determined if blows were exchanged at once to write out his

were exchanged at once to write out his resignation.

The sequel to this story, as related, is that some years afterward, in the same room, President McKinley and the Congressman were having a friendly ohat. Mr. Roosevelt entered, and seeing was present sat down in a corner. shat. Mr. Roosevelt whitelet, and seeing who was present sat down in a corner chair, awaiting his departure. The Congressman had observed who came in. chair, awaiting his departure. The Congressman had observed who came in. Without apparent/change in manner, but in a voice distinctly heard he said: "Me-Kinley, you remember a fellow named Koosevelt, who was Harrison's Civil Service Commissioner. He was the most impraticable assever. I notice you have as Assistant Secretary of the Navy a person with the same name, but it can't be the same man, for your man is about the most efficient officer I have ever known." Mr. Roosevelt sprang to his feet, walked across the room, extending his hand to his old time enemy, saying "Put it there; it's all right hereafter." They shook hands heartily, and from that day remained the best of friends.
