

# HUN IS HUMANISH TO THE VERY END

### Characteristic Note in Announcing Submission.

### Again Prates of Honor of Germany.

Weimar Cable — The National Assembly this afternoon voted to sign the peace terms unconditionally, the Government having succeeded in overcoming the opposition of those who insisted on two conditions.

### DREAD CONSEQUENCE.

Paris Cable — In announcing its intentions to accept and sign the peace terms, the Government of the German Republic has sent the following note to M. Clemenceau, president of the Peace Congress, through M. Haniel von Haimhausen:

"The Minister of Foreign Affairs has instructed me to communicate to Your Excellency the following: 'It appears to the Government of the German Republic in consternation at the last communication of the Allied and associated Governments, that these Governments have decided to wrest from Germany by force acceptance of the peace conditions, even those which, without presenting any material significance, aim at devastating the German people of their honor.'

"No act of violence can touch the honor of the German people. The German people, after frightful suffering in these last years, have no means of defending themselves by external action.

"Yielding to superior force, and without renouncing in the meantime its own view of the unheard-of injustice of the peace conditions, the Government of the German Republic declares that it is ready to accept and sign the peace conditions imposed.

"Peace accept, Mr. President, assurances of my high consideration. (Signed) 'Von Haniel.'

### Dust Causes Asthma.

Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life is at stake. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest and health. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

# WAGE WAR ON PROFITEERS

### New Italian Premier Speaks to People

### And Threatens Severe Punishment.

Rome Cable — Francesco Nitti, the new Premier, has addressed a circular to all the prefects in the kingdom in which he says that Italy's sacred claims cannot be sacrificed by the Government unless the united strength of the country. The circular urges the prefects to use the utmost vigor in preventing the breaking down of national energy through dissension.

"The supreme necessity of the country," says the circular, "is to produce, and it is impossible to produce without order."

The Premier threatens severe punishment to whomsoever contributes to augment the dearth in the cost of living and promises a speedy abolition of all wage restrictions.

The new Cabinet has been chosen to succeed the one headed by Vittorio Orlando, which resigned last week. Orlando, Premier and Minister of Interior, Francesco Nitti; Foreign Office, Tommaso Tittoni; Foreign Office, Tommaso Tittoni; Colonies, Luigi Rossi; Justice and Worship, Signor Morata; War, Lieut.-General Albricci; Finance, Francesco Tedesco; Treasury, Signor Schanzer; Marine and Interior, Rear-Admiral Sochi; Instruction, Alfredo Baccelli; Public Works, Signor Pentano; Transport, Signor Deleo; Agriculture, Signor Viscochi; Industry, Commerce, Labor and Food, Carlo Ferrari; Posts, Signor Chizzini; Military Assistance and Pensions, Signor Paccaia; Liberated Provinces, Signor de Nava.

# COSTLY PAINTINGS.

### Famous Pictures Bring Big Prices at Christie's.

London Cable — Three Remneys were sold at Christie's, Saturday, for 15,300 guineas. The highest price was paid for 'The Wolfen Family.' The child in the picture, Elizabeth Harriet Warren, afterwards became a 'discount' Marine pay. The canvas, 26 inches by 22 inches, was bought by Albert Amor for 5,000 guineas. Two Remney portraits of Mrs. Lowe, the painted when that lady was 15, were bought by Knodler for 5,000 and 4,000 guineas, respectively.

Remney's portraits of the Hon. Charles Francis Greville, and Charles, 3rd Duke of Richmond, were bought by Agnew for 1,500 and 800 guineas, respectively. Other prices were Sponner's portrait of George, Lady Vernon, 2,500 guineas; Remney's portrait of Sir Walter Scott, 1,500; Reynolds' portrait of Dr. Samuel Johnson, 800; Gainsborough's portrait of Dr. Haveland, 800; Sir Peter Paul's portrait of Ann Duchess of York, 800.

### An Oil for All Men.

The sailor, the fisherman, the workman, the out-door laborer and all who are exposed to injury, and the elements will find in Dr. Thomas' Eucalyptic Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it has no equal. Therefore, it should have a place in the home medicine and those taken on a journey.

# DEFENDS CANUCKS.

### Conan Doyle's Views on Recent Outbreaks.

London Cable says — Sir Conan Doyle, writing to the Times of the docks strike, suggests that if the docks strike is the only reason Canadians are disappointed in transport, a call should be made for volunteers from among them to take the places of the dockers. He, however, questions whether some blame does not lie with want of tact or want of hospitality, and says that having had a whole Canadian division encamped for a year close by his home at Crowborough and many officers under his own roof, he can testify that no men could have behaved better.

The Sunday Times also suggests encampment of troops near debarkation ports so that they could see for themselves what barriers detain them. A Canadian officer's letter to the Times appeals to the people not to lay responsibility on the whole Canadian force for the dastardly acts of a few, whose conduct and character are as much condemned among all the British public.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their ready effect upon worms. They have been a successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to thousands of children, who, but for the good offices of this superior compound, would have continued weak and enfeebled.

### Best Foods for Children.

What are the best foods for my children? This question is perplexing more than one family, and to be able to answer it, the workers in foods at the New York State College of Agriculture have been giving it much thought.

For children from 4 to 8 years of age it is suggested that four meals are desirable. For breakfast, steamed fruit, cereal, with whole milk or thin cream, or bread and milk, and when possible morning meal, milk, with a thin slice of bread and butter, is adequate.

The dinner may consist of a lightly-cooked egg, spinach or peas or string beans, mashed baked potatoes or boiled rice and steamed fruit.

A well-cooked cereal with thin cream, milk to drink, and steamed fruit, makes an acceptable supper. A lightly-cooked egg, bread and butter, milk to drink and a baked apple are likewise desirable for the evening meal.

Fried eggs are not suitable for children.

### WOULD WORK WITH MEN, TOO.

The boss was giving instructions to a new clerk. "Now if you can't wait on a lady immediately, give her something to interest her."

"Ask her to examine one of our new hand mirrors."—Louisville Courier-Journal.

### THE SHREWD TRAVELER.

"Change at Bristol," said the booking clerk to a West Country dame who was taking a ticket from a way-side station to London. "None of them tricks, my lass," declared the old lady. "I wants my change here, before I gets into that train!"—London Tit-Bits.

# SUMMER CARE OF VEGETABLES

(Experimental Farms Note)

Root crops, such as beet, carrot and parsnip, should be carefully weeded and thinned while the plants are still small. Parsnips should be thinned to about four inches apart; swede turnips six to eight inches. Carrots may be thinned to one inch apart and, when large enough to use, alternate roots pulled, leaving the remainder about two inches apart. Garlic should be sown in rows about three feet apart. As best tops make about four inches. As best tops make about four inches. As best tops make about four inches.

The soil should be kept cultivated and never allowed to become hard. This is particularly true with peas and beans if a tender, succulent crop is desired. Beans, however, should not be cultivated when moist with either rain or dew, as the plants if injured under these conditions, are particularly subject to bean rust (the spores of this disease developing in the injured tissues).

Corn that has been sown in hills should be thinned to three or four plants to a hill. If the hills are two to two and a half feet apart, 100,000 and 100,000 plants require eighteen to twenty inches of space to each plant in the row, and the rows should be two and a half feet apart. The soil should be kept well hoed to conserve the moisture and encourage rapid growth. Where space is limited tomatoes may be grown in rows three feet apart and the plants eighteen inches apart in the rows tied up to stakes.

Corn, tomatoes, cucumbers, squash, pumpkins and melons all grow best on a light, warm soil. Five or six cucumber plants may be grown in a hill, three feet apart and the plants eighteen inches apart in the rows tied up to stakes.

Potatoes should be thoroughly cultivated to conserve all possible moisture; "riding up" also saves the tubers with loose soil in which to develop. However, in areas where there is a light summer, the limited soil moisture may be satisfied. Spraying should not be delayed until there are signs of injury from the well-known potato beetle, or from one or more of the many potato diseases. Paris green and arsenate of lead have been found very satisfactory poisons for the beetle and can be applied at the rate of one ounce of Paris green or four ounces of arsenate per ounce of lime to neutralize any free arsenic present. Arsenate of lead adheres better to foliage than Paris green and may be applied at the rate of one ounce to a gallon of water. If the waste form is used or one is employed, Bordeaux mixture may be done up in small quantities in the following manner, employing the wooden pail for mixing the spray. In each gallon of water dissolve two ounces of copper sulphate (blue-stone) and one ounce of lime in one gallon water, stir thoroughly and then add one ounce of the two ounces dissolved blue-stone.

# LITTLE CHANGE IN CROP OUTLOOK

### Haying is Now Well Under Way.

Toronto Report — Little change has occurred in the crop situation throughout the Province during the last few weeks. Haying is well under way, with ideal weather conditions. Fall grains are reported in good shape, but more rain is required to save the dry weather in some parts of the Province.

Corn on well drained or light land has made a splendid start, but it is too early to make a definite statement regarding prospects. Roots, potatoes and tomatoes are showing effects of the dry weather in some parts of the Province.

Western Ontario, as a whole, seems more in need of rain than the eastern counties. While some localities reported heavy showers last week, the majority of the farming land was not visited. In Elgin county wheat fields just coming in head are in grave danger unless more rain comes. Spring grains are late and are not making a promising start. Hay and clover is reported as excellent in most sections, though in heavier land fields are patchy.

Early cherries are ripe in some localities. The crop will be a light one. Late varieties will give a fair to a good crop. Peas promise well and have apparently recovered from the injuries reported a year ago.

Strawberries are ripening much too fast to give a good yield. More rain is required. Raspberries look promising. Gooseberries will be a good crop. Peach orchards are reported to be in rather bad shape. Trees are yellowing and sickly-looking.

# BELGIUM FIRST TO GET GERMAN INDEMNITY

### Wipe Out Her Debt.

Paris Cable — The Council today signed a document giving formal approval to priority for Belgium in reparations to be paid by Germany, to the amount of 2,500,000,000 francs. The Council also confirmed the plan to wipe out the Belgian war debt through the substitution of German bonds for the Belgian obligations, the four great powers to take over the German bonds, subject to the approval of their respective legislative bodies.

The bonds the powers propose to take over are of a special issue which the peace terms require Germany to make, to reimburse Belgium for all the sums she was obliged to borrow in consequence of the violation of the treaty of 1839.

A thorn in the flesh is worth two in the stocking.

# MILITARISTS STILL BUSY

### Prussian Army Chiefs May Cause Trouble For Rulers Agreeing to Sign Treaty.

Berlin, Tuesday, Cable — Long accounts, written for the Berlin papers by correspondents at Weimar, telling of events preceding the decision of the German Government to sign the treaty of peace, show that there was a threat by generals and officers of the volunteer troops to quit if the treaty was signed, without reservations. Gustav Noske, Minister of Defense, proffered his resignation, but later succeeded in appeasing the officers. He then withdrew his resignation, under pressure from his party and Cabinet Ministers.

Feeling among military leaders is still running high, notwithstanding the fact that they are admonishing the troops to continue in the service. Major-General Baron von Luetwitz, in a special call, reiterates his opposition to the peace terms, while Major von Gilsa, Herr Noske's adjutant, has announced that Prussian War Minister Reinhardt "will endeavor to defend the menaced honor of the army and its leaders by the adoption of special measures."

He will confer with Herr Noske today. Correspondents at Weimar are unanimous in the belief that the prestige of Matthias Erzberger has been damaged because of his mysterious, but emphatic, assurances that the entente would be willing to yield on the honor issue, which failed to materialize. Herr Erzberger's position is a subject of much speculation, and it is believed that as soon as the peace crisis is passed he faces a rather trying period.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Cure, the simplest and best cure offered to the public.

# FLOOD RIOTS IN BERLIN.

Berlin, Cable — Police and soldiers, who intervened in food riots in the northern suburbs of Berlin today, exchanged shots with mobs of men and women but there were no casualties. A number of shops were plundered. Reports from Mannheim say that eleven were killed and three severely wounded in the rioting there Sunday. Two hundred persons were arrested.

# INHABITANTS ALL REMOVED.

Ferne, Despatch — After fighting for 24 hours forest fires which threatened to sweep the town, the inhabitants of Natal, B.C., were removed from the town in a special train early Sunday morning, while a volunteer fire corps under Chief MacDougall extinguished the blaze after blaze within the town itself until the fire in the immediate vicinity had spent itself. Forest fires are reported from many districts near here, and some ranching property is threatened.

# SLAYER TO DIE

### Bank Robber is Convicted at New York.

New York Wire — Gordon Fawcett Hambly, alias Jay B. Allen, self-confessed slayer of two employees of the East Brooklyn Savings Bank, in a hold-up last December, was convicted of murder in the first degree today by a jury in the Brooklyn Supreme Court following a trial lasting but two days.

Death by electrocution is the arbitrary penalty for first degree murder in New York State. The jury was out less than one hour. Immediately after the verdict Hambly was remanded to jail for sentence next Thursday.

Extraordinary precautions have been taken by the jail officials to prevent the convicted man from escaping. On several occasions he has openly declared he would rather be shot by his guards while escaping than suffer the disgrace of being electrocuted.

Hambly during the trial offered no defense in his own behalf. He even went so far as to request his lawyer not to cross-examine witnesses, object to questions or make any summing-up speech and his wishes were obeyed.

# BULLET PROOF.

Recent accounts have told of tests made of a type of body armor invented by a New Jersey doctor.

The doctor donned his armor and proceeded to let army officers fire a machine gun at him at close range. The proof that the bullet were properly shed lies in the fact that the doctor is alive and unharmed, although the little leaden pellets went straight for the middle of his chest.

The only apparent fault of the armor is that it weighs close to 60 pounds. It was V-shaped, covering the front of the head and body. Pneumatic cushions at points eliminated much of the shock from the impact of the bullets, and the doctor in the tests, though staggered, was able to keep his balance.

# INSULTED THE HORSE.

As an illustration of the veneration with which the Argyll family was regarded in Roseneath parish years ago, Prince Stuart, then minister of the parish, used to realize that one of his parishioners in detailing to the duke's factor some grievances he had sustained from a neighbor added, "And, mair than that, he had the impudence tae strike me in the presence of his grace's horse."—Westminster Gazette.

# KIDDIE KLOTHES.

Unbleached muslin frocks. Patchwork motifs applied on fabrics. Lace and net aprons imported direct from Paris. Picture an apron of pale blue taffeta with kimona sleeves. Black stitching on pastel colors quite the smartest of juvenile touches.

# HUN OFFICERS BRUTES TO END

### Shot Down Sailors On Sinking Fleet

Thurso, Scotland Cable — German sailors were shot by their own officers when they attempted to obey the commands of the British officers to return to their ships and shut the sea-cocks. This statement was made by Lieut. Nuttall, of the steamer Alouette, which has reached here today from Scapa Flow, where the German ships were sunk. "I pulled along a German destroyer, when I saw the ship begin to settle," Lieut. Nuttall, "and ordered the Germans back to close the sea-cocks. Four or five of them turned back, whereupon the German officers shot three of them dead."

"We then opened fire on the officers and several of them dropped."

"Others among the Germans then returned and closed the sea-cocks. The Germans were also driven back to four or five other destroyers; they closed the sea-cocks in time to keep the vessels afloat."

Lieut. Nuttall reports that the Emden has been pumped out and is now afloat. The Baden's crew were forced back to that vessel and compelled to shut the sea-cocks.

"Directly the first red flag and German ensign were hoisted on the first battleship the German admiral put off in a motor boat post haste to the British air station ashore. He stated that the ships were sinking and requested assistance for the crews. The admiral was arrested. Naval men believe that the trip was a ruse to lead to the belief that the crews were taking charge of the ships. This, however, was not substantiated by what actually happened."

Many mothers have reason to bless Mother Graves' Worm Extremator, because it has relieved the little ones of suffering and made them healthy.

# NECESSARY TO FIX WHEAT PRICE

### Says Expert Before Cost of Living Probe.

Ottawa Report — During the course of his examination before the cost of living committee this afternoon, Mr. W. A. Black, vice-president of the Ogilvie Milling Company, was asked to express an opinion in regard to the fixing of a price on wheat. In reply, Mr. Black referred to the situation in the United States, where the farmers will receive a price of \$2.2 per bushel guaranteed by the Government. He was inclined to think that unless something were done there would be a considerable slump in the price of wheat. He expressed the view that the wheat trade and the banks will be afraid to purchase in large quantities, because of the possibility of incurring a loss. On the other hand, he said, if a price were fixed in Canada, even at a lower figure than in the United States, wheat could be purchased with confidence.

Mr. Black suggested another method of dealing with the situation. He said the farmer might be paid, say, \$1.25 per bushel by the Government, which would handle the crop. At the end of the season the farmer could be given any additional profit which might occur to him as the result of the sale of his wheat.

# Alternative is Gov't. Handling of Crop.

# Through the Canadian Alps

In Canada, opening up an Alpine region of extraordinary beauty. It will be possible to motor from Calgary to Windermere between sunrise and sunset through a hundred miles of the most glorious scenery in North America. A good automobile road runs south to Fort Steele and Cranbrook, and from Cranbrook there are excellent roads to Spokane, or eastward through the Crow's Nest Pass and back to Calgary. The Good Roads Association of Alberta is enthusiastic over the prospect as this will mean the advent of many tourists from all over America. The new road will also be of great benefit to the Upper Columbia Valley which has many attractions for settlers on account of the fertility of the soil and suitability for mixed farming. This valley is served by the Kootenay Central Railway, a recently constructed branch of the Canadian Pacific.

Between Banff, the popular summer resort in the Canadian Pacific Rockies and Lake Windermere, the head waters of the great Columbia River, lies an Alpine ridge of spectacular beauty, forming part of the Great Divide. This ridge is penetrated by two comparatively easy passes, the Simpson, and the Vermilion which lead into the Valley of the Kootenay River, a region abounding in game on account of its being well south of the main line of the Canadian Pacific Railway.

Between the Kootenay River and the Columbia River is a small range of mountains through which the Sinclair Pass and Canyon provide an easy road. When the first surveys were made for an automobile road between Banff and Windermere it was planned to use the Simpson Pass, named after Sir George Simpson, Governor of the Hudson's Bay Company, who made this crossing in 1841. But the route over the Vermilion was found to be easier and at the same time more beautiful, and construction of the Highway of the Great Divide was commenced from opposite Castle Mountain in this direction. At the same time the road from Windermere through the Sinclair Canyon was also commenced and at the time of the outbreak of war a gap of only thirty miles separated the two roads. War put an end to construction, and a great washout destroyed several miles of the western end, so that the project seemed to have been abandoned.

Now, however, the Dominion Government has made an arrangement with the British Columbia Government by which the route of the road comes under the jurisdiction of the Dominion. A substantial appropriation has been allotted to finish the work. In this way there is every prospect of the early completion of what will be the most wonderful automobile road

Printed satins good. Pink dotted silks for next spring. Printed chambrays in coming late fashion. Draperies and Pompadour silks for summer. Radium and chiffon taffetas for present wear. Heavy silks for fall—the kind that "stand alone."

# Saves Space.

If you have not a kitchen cabinet to hang cooking utensils in, get a large box, place it in the corner nearest your stove, paper it inside and drive nails in the sides, on which to hang different articles. Have curtains for the front and cover top with oilcloth, which will also get you a handy kitchen table at a very small expense.

# They Cleanse While They Cure.

The vegetable compounds of which Parmelee's Vegetable Pills are composed, mainly dandelion and manna, cleanse the system and intensify the effectiveness of the purgative action. Hence they are the best remedy for biliousness available today. A trial of them will establish the truth of this assertion and do more to convince you of their value than anything can be said of these pills.

# BLINDED FOR A DAY.

Moncton, N.B. Despatch — During a very heavy storm and rain storm at Shediac Saturday afternoon had the size of the fishery and some damage was done, as reported. The storm was a six-year-old boy, who was in the doorway at the time the storm struck, was struck by lightning and fell from his feet. The lad was rendered unconscious for two hours, and when restored was totally blind. Today, however, young Gaudier recovered his sight. Damages were struck in different parts of the surrounding country.
