New Perfection

The New Perfection Cook Stove has many advantages over any other type of cook stove yet devised. It will do more work than the cumbersome coal or wood stove and occupies less than half the space that such stoves take up.

The New Perfection Art Cook Stove is unsurpassed for baking, frying, boiling, for any or all purposes for which a cook stove is used.

We also handle the **Florence Coal Oil Stove**
Success Ovens with glass door or without.

Sandwich

A number from here attended the ball game and garden party at Fisherville on Thursday last.

Mrs. Calvin Hare and daughter were guests of Mr. John Pond on Friday afternoon of last week.

Mr. and Mrs. Edwin Lindsay and children spent Saturday with Mr. and Mrs. Bert Lonson.

Miss Jean Westery returned home on Saturday after a three week's visit her aunts in Rainham Centre and Dunnville.

Mr. Alex. Bartlett made a motor trip to Hamilton on Sunday.

THE WORKING DAY.

How Many Hours Should a Man Be Required to Labor.

The perennial question "How many hours a day should be devoted to work?" is the topic discussed by a writer in the London Illustrated News, who affirms "that from the scientific point of view much is to be said for the further limitation of the hours of work." He also contends that the kind of work indulged in should more or less govern the number of hours to be spent at it. As he remarks:

In monotonous or "repetitive" work, where the same manual operations have to be done through over and over again, the attention of the keenest workman becomes dulled after a time, which varies with the individual; and thereafter, without any necessary consciousness of the fact on his part, the pace slackens or the work becomes less accurate. Hence, when rapidity of output had to be combined with scrupulous accuracy, as with the turning of shells during the last three or four years, it was found that better results could be obtained by employing three shifts of eight hours each than by working men or women, however willing, for spells of ten or more hours on end. Taking six working days in the week, and making no allowance for Saturday afternoon, this works out at forty-eight hours per week for each shift.

Citing occupations that could bear a longer working period without fatigue, the writer mentions wood-carving and painting, which could, he says, probably be carried on for a longer period than eight hours without actual physical fatigue supervening; because the constant, if slight, change of attitude and finger play necessary would prevent any one set of muscles and nerves from being exercised unduly; and, although this could not be repeated daily, the difficulty would arise from the giving out of the worker's imagination rather than of his muscles. Moreover, in such a case, the artist is buoyed up with the pleasure which attends the execution of all creative work, so as to feel fatigue less quickly than one who is merely repeating a mechanical process every minute.

On the other hand, occupations such as those of engine driver, motor-man, trolley driver, or crane-man should not be for too long a period at a time—in fact, reasons this writer, "an eight-hour day would be impossible."

To take an instance that will be familiar to most, no captain in his senses would dream of keeping a horse at a stretch, except in some extraordinary and unforeseen emergency.

Therefore, the conclusion arrived at is that "no hard and fast line can be laid down for all trades, and that the hours of work which would be light for one would be excessively hard if always enforced for another."

The Dope.

A writer in the London Sketch discourses upon the influenza in a vein of gentle satire.

"Dr. Bjoernsen, I read, has invented a new process for the treatment of influenza. You take him your back, and he proceeds to expose it to a strong electric heat and light appliance, followed by the application of heat developing compresses, whereby an intense perspiration is induced."

"This, on the face of it, sounds good; and you imagine that the learned doctor can cure you, so to speak, on the way to business. But he does not claim that power. He has cured all his patients, he says, but the process takes from two to five days."

"My own process is somewhat similar, but less expensive. You take your back and put it in a warm bed. At the foot of the bed place a hot-water bottle, and on the bed lay a large number of thick blankets. Then drink hot whisky and water, or hot soup, or hot anything, smoke your pipe, read something cheerful, and remain in bed until the perspiration has passed off and you feel yourself again."

"This process, like the doctor's, takes two to five days—generally two. It is just a matter of taste—and financial means—which you decide to try."

Clark Buckley—That the report of the Finance Committee be adopted as read, carried.

Bradford McCallum—That the report of the Good Roads Committee be received and read, carried.

Cayuga, July 10, 1919.
To the Warden and Members of the County Council:

Gentlemen We, your Good Roads committee, beg leave to report as follows:

1. We have examined the accounts submitted by the Superintendent, and recommend them for payment.

2. That an advance of \$3,000 be made to MacConnell & Hicklin on contract account, Division 19 from Concession 7, Township of Oneida, going north to concession 2.

3. Would recommend that 200 yards of stone be given to repair division 18, between the centre side road of Walpole and Hagersville cemetery, the hauling to be done gratis.

4. That we continue to carry with the Employers' Liability Assurance Corporation a Public Liability Policy.

5. Application was made to the Workmen's Compensation Board to have the county employees placed under schedule 1 for stone crushing and road making. The application has been accepted.

6. That the contractors be allowed to use 2-inch stone for the first spread when they cannot procure a uniform size that will pass through a 4-inch ring.

7. That the Superintendent be instructed to build what culverts he considers necessary and have the balance put in good repair to avoid accidents.

8. That we accept the quotations of A. W. J. Bailey of Jarvis for 3 cars of steam coal, three-quarter lump, price \$6.90 per ton f. o. b. Nelles Corners.

9. That the Superintendent be given permission to rent a 3½ ton truck at \$25 per day for hauling stone, providing, after a fair test it gives satisfactory service.

10. That the Superintendent be authorized to procure suitable equipment for operating the two quarries, so that as large a tonnage as possible may be turned out daily.

All of which is respectfully submitted.
(Signed) H. B. SAWLS, Chairman.

Doyle-Wilton—That the report of the Good Roads committee be adopted as read, carried.

Sawle-Pyle—That the Clerk write to the committee having the funds of the hand instruments in their possession; that the county council claim the same, they having been purchased by the county, carried.

Sawle-Pyle—That this Council authorize the Clerk and Warden to place to the credit of the Treasurer in the Union Bank at Dunnville the sum of \$10,000 as per by-law re Good Roads account, carried.

Clark-Smelser—That the account of Mr. Mitchener, P. S. L., amounting to \$236.70 for expenses be paid, carried.

McCarte-Pyle—That this council do now adjourn to meet on Thursday, August 14, at 10 a. m. carried.
