E. W. ANDERSON-- ON THE CORNER

ESTABLISHED 1872

CAREFUL and yet aggressive enterprise in both farm and factory should be the keynote of Canada's development for 1919. Taxation can only be reduced by increased wealth through increased production. The Bank of Hamilton is ready to encourage every legitimate enterprise toward increased production in farm, field and factory.

BANK OF HAMILTON
JARVIS BRANCH--J.H. Brown, Man.

The City of the Reversible Falls

The Bay of Fundy is famous for its tides which are reputed to be the highest in the world, and the variation in the harbor depth, owing to the great rise and fall in the tides, is from 20 feet at ordinary neap tides to 28 feet of water at ordinary spring tides. St. John is the winter port of the C.P.R. and has splendid facilities for handling ocean traffic. The harbor is entered from two channels, the east channel being used for large vessels and that on the west side for smaller craft. Numerous large berths stand in the harbor and alongside them there are many capacious warehouses and some big grain elevators. The war has stimulated shipbuilding in St. John.

The chief attraction for the tourist to St. John is the Reversible Falls, a curious phenomenon due to the great tides. When the tide of Fundy is low the waters of the St. John river pour under the great railway bridge in the form of rapids. But when the tide begins to rise it forces back the current of the river and rushes up into its bed with great force. This continues until full tide. Then as the tide recedes, the immense volume of water in the bed of the river dashes to the sea in a massive whirling sheet of foam. At low tide the piled up waters of the river are higher than the sea, and at high tide the incoming flood of tide is higher than the water of the river. That is the explanation of the phenomenon. It is only at certain periods of the day that the falls may be seen at their best. The river is deep, but no boat, however large, dare venture on these waters when they are falling. Small boats

deal to interest the traveller in the City of St. John, the commercial capital of New Brunswick. St. John has a population of 61,000. The city takes its name from the St. John river which was discovered by Champlain and de Monts on June 24th, 1604, the feast day of St. John the Baptist. No permanent settlement was made until 1782, when 2,000 United Empire Loyalists, who had refused to take the oath of allegiance to the United States after the War of Independence, made their home at the mouth of the St. John river and founded the city.

THE DOWER OF CANADA

Mineral Wealth of Country Is Very Large.

Some years ago a Dominion Royal Commission was appointed to make a trade survey of the British Empire. Lord D'Abernon was chairman. Six members represented the United Kingdom and each of the self-governing Dominions sent one delegate. Canada was represented by Sir George E. Foster, and Mr. Rider Haggard was one of the outstanding English members.

The commission visited all parts of the Empire, and had collected much of the necessary information when its work was interrupted by the war. In due course the special value of the survey as a branch of Empire intelligence was recognized, and the task of sifting and arranging the facts was resumed. The final report has been published in handy, cloth bound form, and can be obtained for 1s. 6d. from H. M. Stationery Office, London. The catalogue of Canadian resources of value to the Empire in peace and war is most interesting.

Of minerals, aside from the precious metals, Canada has a plentiful supply. Eighty per cent. of the world's production of raw asbestos is mined in the Dominion, and the industrial applications of this material are practically unlimited. Metallic cobalt is now being produced in Canada from high-speed steel, and for use in metal plating instead of nickel, which it resembles. The report says that in future it may be of great importance in the production of munitions of war. Canada is the chief source of the world's supply.

Canada in 1913 had the seventh largest production of refined copper, namely 34,300 tons. During the war this output was greatly enlarged. The Canadian production of pig-iron was also considerable; no less than 823,000 tons. Of late years, owing to the increase of electrical installations, there has been a great demand for mica. Canada is one of the chief sources of the world's supply, mining in 1913, 7,000 cwt. of the best sheet mica. Canada and India can meet the whole of the demand within the Empire.

Canada also provides the bulk of the world's nickel supply, producing in war years some 30,000 tons. Sulphur is procured in large quantities from pyrites, and we have notable deposits of molybdenum, which has great metallurgical importance. One cannot read the report without being impressed with the enormous natural strength of the British Empire. Raw materials abound everywhere, but the dower of Canada is priceless.

Provincial Grants to Education.

During the session of the Ontario Legislature, just ended, voters were passed for the spending of additional sums of money in connection with public education. Among the more important items were:—

- (1) To assist consolidated schools \$100,000, to be used for transportation and to increase grants to these schools, as well as paying for agricultural teachers.
 - (2) For medical and dental inspection in the Public and Separate Schools \$20,000. This work, it is stated, will be carried out through the Women's Institutes.
 - (3) For technical education, the major portion of which is designated to be used for industrial and technical education, day and evening classes, grants and contingencies, \$214,400. Of this amount \$14,000 is for salaries of organizers.
 - (4) For each of the Normal Schools at Toronto, Ottawa, London, Hamilton, North Bay, Peterboro and Stratford, \$7,000 for plant laboratories for the better studying of horticulture and botany.
 - (5) For Rural and Separate Schools general grants and contingencies, \$250,000, largely with a view to the bettering of teachers' salaries.
 - (6) For academic courses for training returned soldiers for teachers, \$10,000.
 - (7) For agricultural and horticultural grants for school boards, teachers and inspectors in Public and Separate Schools, \$53,000. This is additional to the Dominion grant devoted to this purpose.
 - (8) For assisting in providing community halls, \$20,000.
 - (9) For the National Institute for the Blind, \$30,000.
- N.P.—The total amount voted for education was \$3,424,547.

War Souvenirs.

A month ago a Canadian soldier in France cabled his father and mother in Toronto that he was returning home immediately with a Belgian girl. His father and mother, very prominent in the social life of Toronto, were somewhat embarrassed by the cablegram, for they thought their son of twenty-three, who had been three years at the front, had without notifying them married outside their social circle.

This particular Canadian soldier arrived home the other day, and with him was a Belgian girl, four years old. His father and mother were much relieved when he told them how he was walking through the streets of Brussels one day and the little girl ran and caught hold of his hand and said to him, "I want you to take me home." He could not resist the child's request, and Canada is the richer by one little Belgian girl four years old, and she is richer by a foster father and mother to take the place of those she lost during the war.

A returned member of the Canadian Aviation Corps has a little French boy, whom he adopted under the laws of France, because the little chap was an orphan and had only his grandmother, dying of an incurable disease, to take care of him. The little nine-year-old French boy will grow up to be a worthy citizen of Canada.

Magenta.
The color called "magenta" is named after the battle of Magenta, which was fought in the year of the discovery of the color.

Roses and Weddings and June Sale of China and Glass Ware

Roses and Weddings and a Sale of China and Glass Ware

Just One Little Word of Caution in Buying Furniture--Falls

We're not going to talk to you about price at all; that is up to you. All we want to do is to remind you that you can get a square meal for fifty cents, one dollar, or for two dollars, depending on how flush you are and how famished; but do not forget that you can get indigestion for the same money—and remember, that it is equally true in buying furniture. You can buy forty dollars of regrets just as easily as you can buy forty dollars' worth of satisfaction. BUT IT ISN'T WORTH IT.

We CLAIM to have the finest Furniture and Home Furnishing Department within fifty miles of Simcoe—because we HAVE it. Our shipping book shows that we have recently (not counting near-by places) made considerable shipments to the following points: Coderhurst, Coppercliff, Chatham, Toronto, Woodstock, Hamilton, Grimsby, Brantford, Paris, Drumbo, Selkirk, Nelles' Corners, Gore Bay, Perth, Port Rowan, Port Royal, St. Williams, Windham Centre, Courtland, Tillsonburg, Corinth, Curries Crossing, Forestville, Jarvis, Hagersville, Wilsonton, Port Dover, London, Vittoria, Kitchener, Norwich.

And now we have to add Port Arthur, because Wednesday of last week we shipped nearly a thousand dollars worth there.

We Question If You Could Buy the Material

In these House Dresses for the price we are selling the garment for.

Women's House Dresses in Striped Chambray and Percales all sizes, very good value for \$1.45.

Women's House Dresses in Percale and Gingham, good full size, many colors each \$1.98.

At \$2.29—Women's House Dresses in fine assortment of styles and colors, sizes up to 46. A \$3.00 value for \$2.29.

Many Fathers and Mothers are Buying Their Boys' Suits at Falls' Store

They are the pick of three manufacturers stocks—the careful selection of the best from large quantities of Boys high-grade clothes—all are from honest tweeds in light, medium and dark colors—To fit Boys 6 to 16 years—at the suit \$10, 12, 14, 16, 18, 20, and \$25. During the month of June every boy buying a suit of clothes at Falls store can have his choice of a schoolbag or we will start with a Bank Account in either the Molson's Bank of Hamilton or Commerce Bank in Simcoe.
