The one Tea that never disappoints the most critical tastes.

on a Sealed Packet is Your Safeguard.

TOGOLAND

Togoland is one of the earliest and richest of German colonies.

Togoland is snaped like a hogshead. a 32-mile base resting on the Guif of Guinea, its sides swelling to more than three times that width. crowding the British Gold Coast pessessions to the west, French Dahomey on the east, and its narrow top tapering into the Niger region.

Germany annexed Togoland in 1884. the year she launched upon her colontal expansion with the acquisition also of Northeastern New Guines and the Bismarck Archipelago. Togoland was the first colony to dispense with imperial subsidy.

Along the seacoast Togoland's soil is rich and sandy, its climate warm and moist. The hinterland is higher. wooded and drier, but seldom arid. Thus the land is adapted to a wide variety of products, among which the growing of cocoanuts, corn, rice, tobacco and coffee already has been highly successful. The exports include considerable quantities of ivory. kernels, copra, palm oil and rubber.

This colony affords a commentary upon Germany's application of bureaucratic methods to her possessions. Despite heavy German emigration to the United States and South America and despite her effort to divert this flow to her colonies, only abount 300 Germans were to be found among the million natives of Togoland in 1910. Most of the 300 were engaged in Government service, either in the coast cities of Lome, a made-to-order town which Germany planted on the site of a fishing village, and Little Popo, or the inland Government stations at Misahohe or Bismarckburg.

Togoland lies along the famous Slave Coast of Africa. Behind the treacherous schools and bars slave traders

the native chiefs, especially the Da-

homeys, coastal people of Togoland as

well as of Dahomey, only too ready

to barter human beings for rum and

trinkets. Tribal leaders made forays

to supply the demand. Frequently they

burned villages by night and coralled

the inhabitants when they fled.

Any object blessed by the Dahomey priests became a fetich. Snakes were held in special esteem. Children were regularly sacrificed and human beings were amazingly intricate, some lasting 36 hours. So imbued were the Dohomeya with belief in immorality that they readily volunteered for sacrifice, and the wives of Dahomey, like those of India, often chose to die when their husbands did.

Germany edged into the Slave Coast because, in 1884, the narrow portion still ruled by the King of Togo was the only part from the Gambia to tne Niger not controlled by some civilized power. Bremen merchants had stations there. So Germans persuaded the Togo ruler to place Togoland under the suzereignty of Germany. Subsequently the Germans made claims to inland territory which brought about boundary disputes with France and Great Britain until the frontiers were fixed in 1899

PISH RECIPES.

Four Good Ones Give Needed Variety.

Take a fairly thick slice of codfish. shred it and parboil it. Cut up small one onion and four tomatoes and fry them in one ounce of margarine; add a teaspoonful of flour and stir well, then add a cup of water, some chopped parsley and pepper; stir until it boils, then add the flaked fish. Simmer for

half an hour. Serve in a border of mashed potatoes or boiled rice.

A FILLETED BAKED HADDOCK A haddock weighing about two pounds makes two good-sized fillets. Grease a casserole dish, put in the defied cruisers from the shelter of fillets cut in four, season with salt,

oven for twenty minutes. Sprinkle

with breadcrumbs and grated cheese,

and let the fish get brown on the top.

CURRIED PRAWNS.

These can be quickly prepared if

you have a the of prawns at hand.

For the currie sauce chop an onion

and a few slices of apple finely and

fry them in one ounce of margine. Stir

in half a dessertspoonful of curry

powder and the same of flour. Salt

to taste. Add a quarter of a pint of

stock or milk, cook gently for twenty

minutes, stir in the prawns, add a few

drops of lemon juice and a little chut-

ney, and when heated through serve

with a border of rice. This sauce

boring cells into the cavities of the s and plugs them up. Before the leaf falls from the tree all the elaborated materials which it contains that can be of further use are mobilized and stored in their proper places in the body of the tree. After

these valuable materials have been removed from the leaf, what remains is devoid of the active green chloroto a bright light or is examined in secphyll and the cells are nearly empty, as may be seen if the leaf is held up tion under the microscope. The yellow granular bodies of disorganized chlorophyll which remains give the predominating yellow color to autumnal foilage. The reds and browns are produced by various decomposition products which comprise the cell contents and which are formed under the conditions resulting from the maturing of the leaf.—From Scientific American.

Bit of Finnish History.

Finland, which has deslared its independence from Russia, has long been a buffer state between the latter and Sweden. After Peter the Great conquered Finland in 1721 and annexed its easternmost province. Viborg. Sweden made repeated but unsuccessfu efforts to regain this province. Finally Alexander I., in 1809, brought all the Finnish territory under the Muscovite yoke. Since about 1890, however, Finnish liberties have been greatly curtailed. 'The powers of the Finnish diet were canceled and its constitution practically abrogated. In 1993 a Russian distator was appointed and the country flooded with Russian spies; arbitrary arrests and banishments became daily occurrences; no means of Russification was left untried. The Finns are of Mongolian extraction and number about 3,000,000.

This is to certify that fourteen years ago I got the cords of my left wrist nearly severed, and was for about nine months that I had no use of my hand, and tried other Liniments, also doctors. and tried other Liniments, also doctors, and was receiving no benefit. By a persuasion from a friend I got MINARD'S LINIMENT and used one bottle which completely cured me, and have been using MINARD'S LINIMENT in my family ever since and I find it the same as when I first used it, and would never be without it.

ISAAC E. MANN. Metapedia, P. Q. Aug. 31st, 1903.

"Then your wife didn't enjoy her trip to Niagara?" "No: the minute she saw that rushing water she began to wonder if she hadn't come away from home and left a faucet running." -Pittsburg Post.

BITS OF WIT.

There are about 534,276 prize lies in training. But here is the champion lie: Once upon a time a man came home with a bun at 3.30 a. m. and his wife met him at the door with a kiss and helped him take off his shoes .-Cincinnati Enquirer.

"So you are not to be married?" "No. He says he had changed his mind." "What's his excuse"" "The war." "And you have not witnesses, nor love letters?" "No." "Well, isn't war just what they say it is?"-Cleveland Plain Dealer.

"Oh, doctor, I have sent for you, certainly; still I must confess that l have not the slightest faith in modern medical science." "Well," said the doctor, "that doesn't matter in the least. You see, a mule has no faith in the veterinary surgeon, and yet he cures him all the same."-Sacred Heart Review.

"She was completely prostrated, and made very ill by his perfidy." "Did she recover?" "Yes, \$5,000.—Boston Transcript.

USE OF THE RAT.

Had Its Part in World Ages

Ago. One of the zoologicar details con-

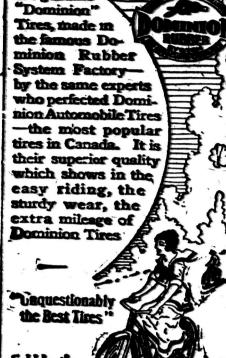

cause they have been killed by the nected with the rat is its failure to sustain any discoverable relation with the balance of nature. The balance carded by it. Botantists tell us that of nature seems remarkably even all their fall is due to the interposition of over the world, for no kind of life can become wholly extinct without affecting prejudicially the general environwhich cuts across the articulation of ment.

The rat seems the solitary exception to the general experience that interterference with the fauna of an environment invites disaster through an upset of the balance of nature, says a writer in Current Opinion. Other forms of life, vegetable or animal, upset it by their absence. It was thought until recently that a peculiar species of flea could thrive upon the rat alone. but some doubt is thrown upon this

idea by reports of plague investigators. There is, however, another view of the connection of the rat with the balance of nature, according to the Paris Revue Scientifique. The rodent has achieved its tack, performed its duty. The work was accomplished in past centuries, probably in Asia. Rats will attack very large organisms. Even the elephant is not respected. It is widely known that certain varieties of Asiatic elephants have a great dread of rats. Cases are reported in which a huge elephan: has succumbed to wounds made in its feet by rats. The rats gnaw the hoofs of horses when it can get at them. It would

that there has raged in the past a st your service.

Bicycle Tires

great warfare between the rat and certain gigantic forms of life. The brown rat seems to have had much to do with the extinction of certain great beasts in Asia. Perhaps the mastodon was routed by the rat. In any event, the rat may have played a glorious part in eliminating the bulky monsters that in time past kept man down numerically just as to-day the robin plays a glorious part in eliminating from the soil the pests that oth-

erwise would keep the crops down. The very voracity of the rat must have been of great zoological importance when it had to attack, perhaps, a herd of mastodons. The rats traveled, then, evidently in swarms. The swam rivers in swarms. Nothing could stand them or withstand the.n. Having eaten up everything that could not run or fly or fight back, the rat turned to Europe and had to satisfy itself with new habits and different foods; its connection with the balance of neture was destroyed and it is to-day a meaningless survival with nothing but a somewhat doubtful claim to a characteristic flea.

A QUAINT EXPERIENCE.

The Fact of Being Blown Up by a Shell.

To be blown up by a shell is a quaint experience, but devoid of excitement. Things happen so quickly that there is no time for psychological gymnastics. The events of your early life refrain from flashing across your brain in a second—at least mine did -end there is no preliminary agony ant, safe and guaranteed in every of mind! at the moment, to), no physical pain. You simply get what is coning to you, and invariably you get it with merciful despatch.

"Pop across and take over No. 10 platoon," said the adjutant. "Magrath's a casualty. Will you go now or wait a wee while?"

The Hun had just put down a barrage on us. Between me and the Tenth Legion shells were dropping with diagusting frequency. And Sergt. McEachern-my sergeant-was watching me understandingly.

"I'll go now," I said. I could have got there more quickly if I had trotted—sooner still if I had run. But I was sure that sergeant of mine was still watching me, still smiling grimly. He was a fine old sergeant, with ribbons on his breast and a twinkle in his eyes. I didn't have any ribbons. It may be that I had a twinkle, perhaps even a smile. I hope so. Anyhow, I would show him. I walked

"King's and Queen's South African, 1914 Star, Military Medal, D. C. M.— op efficient but maybe he's just wounded a satisfactive or involved. Blighty.

I signed. This time the shell screem sounded RELIABLE WOMAN FOR SANITOR a little shriller. I wondered if it would drop in front of me or in rear. wondered if it had my name on it A week later I woke up. A nurse

was standing by my bed. "Feel all right now?" she asked. I grinned. White sheets in a bed

felt good to me. "Drink this and tell me how it happened."

"Something about a shell," I answered. "Went into the ground under my feet, then—this. It's lovely tea." When she had gone I regarded the little card with the pencilled words. It said: "Comp. Frac. Left Tibia. Comp. Frac. Left Fib., Simp. Frac. Left Ulna, Left Raidus Risiet, Concussion."

That meant I had a broken leg, broken arm and a headache.

Getting Past Dundee.

A Highland farmer handed a rather frail looking box to a porter at a small railway station in Scotland. "Dae ye think it is strong enough to trust in the van?" he asked. "I doot it's noo," replied the porter, "but we will see." He lifted the box high in the air and let it fall with a crash. "It'll get that here," he said. "An it'll get that'-giving it another bang -"at the junction. An' at Dundee it will get that!" The third "that" burst the box, and its contents were scattered over the platform. The porter shook his head. "Na," he said. "I think it winna get past Dundee. If it's goin' farther, it's so strong

NEGLECTED COLDS Lead to Consumption

Unless a complete cure is effected the inflammation passes rapidly to the throat bronchial tubes, and then

to the lungs. You can't make new lungs any more than you can make new fingers or a new nose hence consumption practically incurable.

But Catarrh can be cured, except in its final and always fatal stage.

Catarrhozone **Guaranteed to Cure**

The purest balsanis and the greatest antiseptics are sent to every spot where catarrhal trouble exists germs are killed, foul secretions are decure comes quickly.

Colds and throat troubles can't last if the pure healing vapor of Catarrhozone is breathed—sneezing and coughing quase at once, because irritation is removed.

Use Catarrhozone to prevent—use it to cure your winter ills-it's pleas-

Two months' treatment, large size guaranteed to cure, price \$1, small size, 50c.; sample size, 25c.; sold everywhere.

Worth Knowing.

If a practice is made of dusting little powder into gloves before putting them on, the gloves will keep their shape better and wear longer. If the wick of the oil lamp is too short, is crowded, or is cut unevenly, the lamp will not give a perfect light The top of the wick should be rubbed off every day after it is used. A piece of blotting paper is excellent for this: it removes the charred particles from the wick and does not break the threads, which cutting often will do.

A boiling of the wick and burner in vinegar and water will clear it up wonderfully. Plenty of time must be in the rudely-tashioned buildings of allowed for the wick to dry thoroughly. When popcorn refuses to pop as it should, it is covered with water for

wet, then drained and dried, it will be found very much improved. It is best to let it dry about 24 hours after soaking. When pressing tucks in crepe de chine use a piece of tissue paper be-

tween the iron and the right side. The tucks can be seen and at the same time protected. In order to thread a needle easily

with worsted, take a scrap of cotton wool and twist it around the end of the worsted: this will allow the yarm without further trouble.

Minard's Liniment Cures Diphtheria

The Valient Engle.

The eagle has been used as a device on royal banners from very remote times. It was the ensign of the ancient kings of Persia and Babylon. The Romans adopted various other figures on their camp standards, but Marius made the eagle the chief ensign of the legions, and to the subdivision assigned various other figures. Constantine was the first emperor to introduce the two headed and to the subdivision assigned various other figures. Constantine was the first emperor to introduce the two headed eagle as a royal or national device to indicate that his empire had two headed or kings, but was nevertheless one body or empire. The two headed eagle is now, used to signify a double empire. Austria claims to be the successor of the Caesars of Rome, and also of the Charlemagne, and the one head represents the eastern and the other the western empire. Russia also has a double headed eagle, having added that of Pokand to her
