### CRAFTY BEGGARS.

#### Two Dodgers That They Work On Pedestrians.

"I resent, and I have always resented," said Mr. Stogdole, "the beggar who strikes me when I am looking in at a window."

"When I am walking along the street I am on the alert. If I see a beggar coming, I can sheer out if I want to, and I can avoid him or I can keep on and meet him face to face. I have a chance to decide as to whether I should give or not."

"But when he comes upon me quite without warning, as he does when I am looking in at a window, I resent it deeply, and in such circumstances I never give at all."

"At the same time, unsportsmanlike as I must regard such approach to be, there is another surprise attack the beggar makes that for its extraordinary nerve I cannot but view with a certain measure of admiration, this being his surprise of two men at once, two men on the sidewalk talking together, standing face to face, and wholly engrossed in their conversation."

"Suddenly beside them appears the beggar, a totally unlooked for, unpleasant, and it may be embarrassing interruption. What happens then depends upon which of the two surprised men recovers first."

"If this man shakes his head and the second man does likewise, for even though the second man might have been disposed to give something, he cannot now give without seeming to disparage the first man's judgment. But if the first man gives, the second man

the blood trail whether the animal was worth following up at once or the next day.

The tiger, having gone a little distance, turned at right angles from its original direction, which brought it behind and in line with the tree in which Miss Sneyde was seated. Here it was fired at again. It fell, but once more made off, being too far gone to charge.

The two men, after walking a little to allow time for the second shot to take full effect, again followed up the track of the beast.

What happened next can only be deduced from the appearance of the ground.

Miss Sneyde, on the report of the second shot coming to her ears, apparently decided that the bullet had found its billet, and, alighting from the tree, proceeded the shot had been fired, only to meet that infuriated and mortally wounded animal almost face to face.

The brothers, following the blood trail of the tiger, found at the end of it the lifeless body of their sister, while a few paces away lay the tiger, also dead.

does, too, whether he wants to or not, for he would fear that by not giving he might appear in the first man's eyes as stingy.

"So here the beggar gets double or nothing. But this tacking of two men at once is a far bigger game than just holding up one lone man looking in at a window, and I think it must be to the beggar correspondingly more interesting. I know it is more interesting to watch."

### JUNGLE TRAGEDY.

#### English Lady Killed by Fatally Shot Tiger.

A distressing tragedy of the jungle has occurred in the Peshawar district of the central Punjab. Where Miss Sneyde, sister of the late Mr. Sneyde, in charge of the Peshawar irrigation works, was killed by a wounded tiger.

The tiger, going hard, broke cover between two trees, and fell to a shot from Mr. Sneyde, but managed to get away apparently badly injured.

The two brothers, after directing Miss Sneyde to remain in her tree, went a short distance to decide from

"You have the money to redeem it," he was asked.

For answer the American counted out the exact amount and placed it on the counter. The broker went to the safe and brought back the pearl that was pawned. He had cleverly tricked the broker. He knew there was only one chance of getting his money back and that was to make the customer believe the pearl had been destroyed. He resorted to this ruse and did not destroy the pawned pearl but a substitute. A surprised American walked out of the place with his counterfeit jewel, gnashing his teeth just like the smooth villain in the melodrama of old.

### A SEVERE MEDICINE FOR THE CHILDREN

Baby's Own Tablets are the best medicine a mother can give her little ones. They are a mild laxative, which quickly regulate the bowels and stomach, and are guaranteed to be entirely free from any injurious drugs. Concerning them Mrs. A. D. West, Loreburn, Sask., writes: "Baby's Own Tablets have given me more satisfaction than anything else I have ever given my children. They are easily taken; always work well and, though I have given quite a few to my baby, they seem to work as well now as at first, which is something other laxatives seldom do." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

### THE CHILD.

#### Let It Work Out Own Entertainment.

Let a child entertain itself, or children entertain each other most of the play hours. Of course little suggestions and helps from grown-ups are welcome that will "start the ball rolling," as it were.

But let it be only a start, if you wish your child's imagination developed, if you wish to strengthen the initiative powers, which lie dormant in every child, and which, if developed, prove such an asset in after life. Resourcefulness is another talent nipped in the bud, when a child is continually entertained, so that play means no effort at all. What is known as "the spoiled child" is usually the result of childhood's days where no effort is ever made for itself, in work or play. No wonder such a child is restless, unmanageable, mischievous, with no outlet whatever for stored-up energies and mentality.

Even the story hour will be made a more telling factor if the usual rule is sometimes reversed, and the child tells mother a story, instead of always being told one. And it is, indeed, remarkable when this is done, what exquisite little fancies are found to emerge fresh and dewy from fertile little brains.

### British Women Voters.

The women voters of Great Britain are a great host.

Their country recognized their ability and its need for their services. About three million British men are on the continent in military activities.

A great legion of women are there, too, equally as devoted to winning the war.

The women at home, millions of them, are the mainstay of those who are at the front.

There has been no service which British women have not willingly rendered to defeat the Hun.

The parliamentary franchise has been conferred upon British women without regard to property qualifications.

The age limit has been fixed for the present at 30 years, and the privileges of the franchise thus becomes an honorarium (or a consolation) for those who have reached the ripe maturity of three decades.

### A FLAT EARTH

#### Are People Deceived by Their Own Senses?

"The Great Physician," the subject of a sermon reported in a recent issue, is very needful to-day. It is well for the world to have its attention drawn not only to its need of healing, but to Christ Jesus as an exemplar of healing as well as for moral reform. There is one phase of the sermon, however, to which objection can be taken, and that is to the insistence of the cry that sin, sickness and death are real because they seem real. Although the sun seems to rise and set, and although millions of people for centuries believed it to rise and set, in these latter days we are better informed.

First question: Has the writer, Mr. G. R. Lowe, or any other Christian Scientist, proved what is here advanced? If not, why has he adduced as evidence a mere assumption, that our senses are deceived? Those who have observed phenomena in relation to these things confidently assert that "water is level" everywhere, and show a horizontal plane surface on lakes, canals, or seas. It is one of the pet assumptions of Christian Scientists to affirm as above, and their numerous lectures, that we are deceived by our senses and that all into this astronomical falsity, as recorded above. The laws of perspective easily explain these things when tested by true and proper means.

Second question: Has the writer ever fixed a prop or pole to his garden wall, pointing to the North Star? If he

will just do that and keep it there for a month or more, he will have evidence enough to convince him, that the earth is a firm, solid, Divine truth as it is. Let him look up to the star along that pole daily, or when he can see it, and he will find the globe theory smashed entirely, and proof that what I advance is correct. They discard "Materia Medica," one of the so-called sciences of the last days, as out of court with their detumescence on the knowledge of God, the healer, and which they prove I agree with them in this principle of truth; then why discount the Word of God in other respects so to what the Bible says about God making the sun and moon, as it is recorded in the Sacred Word? It is an astounding assumption on their part. I give them proof for themselves to put to the test, and prove that astronomy is false in this respect. It has never been proved. Their claims for true thinking in this matter is challenged. They have accepted blindly what has never been proved, just like people who do not think as God thinks, regarding the material evidence in general, they get left in the lurch of uncertainty, and undemonstrated facts of that which is true. So that the confident Christian Scientist, wherever he may be, uses the so-called facts of astronomy "as proofs." Even the astronomers are not all agreed upon these matters here advanced. Their great mistake has been to suppose that the stars are like the rest of the starry firmament. It does not follow; the wish is father to the thought.

There are 100 positive proofs that the earth is not a globe, issued by Wm. Carpenter, of Baltimore, U.S.A. They are here in our public library in Manchester. Proof 31.—The astronomer's theory of a globular earth necessitates the conclusion that, if we

travel south of the equator, to see the North Star is an impossibility. Yet, it is well-known that this star has been seen by navigators, when they have been more than 30 degrees south of the equator. This fact, like hundreds of other facts, puts the theory to shame, and gives us a proof that the earth is not a globe.

Another proof: "The midnight sun is seen in the northern regions during the whole of the 24 hours. The atmosphere permits this singular fact, and is a positive proof that the sun moves around the earth, which is a plane, fixed by the power of God, and that the earth is not moving as the astronomers vainly describe it."

Another proof in these days is: "The aeroplane passing over your house as you stand at the door, is a proof against the theory of a whirling globe. Astronomy says that we are travelling through space at 68,000 miles an hour, as that is more than 1,000 per minute. Well, the aeroplane is propelled by a generated force independent of the earth as it makes its journey through space to some distance up country beyond your point of view, travelling only 70 miles an hour. You can see her going, and leaving you a spectator far behind, is this not a fallacious exposure of the whirling globe theory?"

Are you deceived by the ocular demonstrations I have watched these flyers dash across the sky, the Lancashire coast, and find adequate proof that they are moving and we are not. What is the conclusion drawn? It is time the Christian Scientists defended their healing truths from sounder data concerning their defence of Jesus' teachings. He is admitted "the most perfect man that ever trod the globe" (earth) should be. He defended Moses' writings, saying, he wrote of "Me."

**THE FIELD CASHIER.**

**Wonder Worker of the British Forces.**

A writer in the London Daily Mail says:

To me the Mystery Man of the Expeditionary Force is the Field Cashier. Once a week he comes to the little French town where I am billeted. There is always a queue of officers awaiting him, and never twice the same queue, yet he always manages to supply their pecuniary needs—their and their men's as well.

Everybody notices this element of mystery about the Field Cashier. In his sanctum reigns a cloister-like

calm. Even the tones of the senior major are hushed, and the voice of the adjutant is not heard in the land!

The officer blew a whistle and a fatigue party appeared carrying three sacks filled with cowries.

There was a fascinated stillness among the onlookers, broken only by a Canadian, who murmured, "his inevitable, 'Got yer, Steve!'"
