A.Y.P.A. meets Tuesday evening at 8 p.m.
Holy Communion on First and Third Sundays of each month.
All are welcome.

The Lady and the Glean

Once upon a time there was a Lady. This is a true story and the Lady never originated a thing. The always believed what she was told and was A 1 on the Glean. She followed the Glean, if you want to talk Highbrow.
She heard that it was Wonderful how many Cents you would have if you kept Every One that came your way and put it into a Jug till there was not even Standing Room Inside. She believed the Tale and hunted up a Jug. Then she Posted the Life out of Shopkeepers and earned many Grey Hairs around her Temples in the effort to make all her Change come back in Pennies. What did you you say?

Honest? Of course! Everything's honest in Love and War.
Well, the Jug became Full instead of Empty. And where did the Glean lead the Lady? You'd never guess! Straight across the Continent! She started in Boston and Gleaned all the way to California on that Jug full of Pennies. Honest she did!
What a Lady has Done another can Glean. Just shinn of the Possibilities in Thrift Stamps.

Last week there was put in Knox Church, Cayuga, a handsome memorial Window, four feet wide by six feet high, in memory of the late Rev. D. G. MacPhail. The window has been put in place by Mr. T. Fentiman, a representative of the McCausland Co., Toronto, under instructions from Mrs. MacPhail. It is a handsome piece of work, the setting representing "Christ, the Preacher", with a cross in the background, and the figure surrounded by wreaths of thorns. The inscription is as follows: "He that believeth in Me hath everlasting life." "In loving memory of Capt. Donald G. MacPhail, pastor of this church, 1907-1916, drowned on H.M. H. S. Llandovey Castle, June 17, 1918."

Hamilton passed the Hydro Radial By-law Saturday last by a majority of 2.737.

Paper From Leaves
Owing to a scarcity of other materials, paper was made in France during the war from dead leaves. The leaves are crushed, then the powdered portion is carefully separated and the fibrous ribs and veins turned into pulp. These are made ready for use by simply treating with lye, washing and bleaching. For cattle food purposes the leaf powder may be mixed with molasses and made into cakes. For fuel, the powder may be compressed into briquettes, or it may be converted into comparatively pure porous carbon by destructive distillation.

Best Annuals for the Home Garden

Annual flowers succeed exceptionally well in nearly all parts of Canada. For the "Home Garden" whether it be in the city or the country, the best annuals are the old favorites which have become so popular because they have fitted in with the needs of a large class of flower lovers. The reason for the popularity of the "annual" is that it can be raised easily and grown with but very little expense or labour. A few packages of seed costing five or ten cents each, a garden patch and someone interested in flowers form a combination which in the space of four or five short months may produce the most delightful results.
The old favorite annuals are the best because they have stood the test of time. In addition, they have been improved and increased in size, form and colour by the plant hybridist and by the seedman so that to-day they have almost reached perfection. In one hundred years or less they have made as much advance as most other forms of life have made in several thousand years. The "poor man's orchard" is the descriptive term for the modern sweet pea and the term is legitimate because the sweet pea of to-day is wonderful. It is a new creation as compared with the sweet pea of a century ago. The same is true of many other annuals.
The favorite annuals are those which can be depended upon to give results. The final results will depend upon: 1. Seed; 2. Culture.

1. Seed. Some annuals are difficult to raise seed and, therefore, the best for home garden are those which produce seed that germinate well. The seed of such annuals can be dealt with in two ways: (a) It may be sown in pots or flats in the house and the seedlings transplanted to the garden or (b) it may be sown direct into the garden. Latitude and climate must settle which method is better for the great success, although with many annuals either method might give good results.

2. CULTURE. The culture of annual flower is not a labourious task or trial of skill. The cultural directions are generally printed on the seed packages. Soil, cultivation and rainfall are three factors of importance. Soil should be of garden loam quality, and neither too sandy nor too heavy. Barnyard manure will stimulate good growth. Cultivation will keep the growth vigorous and healthy. Rain or artificial watering not less than once a week in the early stages of growth is almost essential.

Annuals are splendid for this purpose of cut bloom. Some of the best for this purpose as well as for garden display are as follows: China Asters, Sweet Peas, Nasturtiums, Sweet Sultan, Sweet Scabious, Snapdragon, Everlastings, Zinnias, Pot Marigold or Calendula.

Other good annuals are:
LOW GROWING - Pansies, California poppy, Mignonette, Petunias, Portulaca, Pinks, Drummond Phlox and Verbenas.

MEDIUM HEIGHT - Everlastings, Balsams, Coreopsis, Larkspur, Gaillardia, Clarkia, Salvia, Stocks, Poppies.
TALL GROWING - Cosmos, Helichrysum, Tall Larkspur, Nicotiana, Salpiglossis, Sunflowers.
