GERMAN SPY IN UNITED STATES

And How He Was Caught and Used.

Told by Custodian of Alien Property.

(Christian Science Monitor)

A Mitchell Palmer, Attorney-General of the United States and former custodian of alien property, told Victory Loan workers, at Buffalo, of the methods the United States Government had used during the war to combat German efforts.

"A western school teacher of German birth," said Mr. Palmer, "left \$10,000 in her will to von Hindenburg. I got it. It was used to buy munitions, and Pershing's boys delivered the bequest to von Hindenburg at his home address.

"In this war we have made the enemy property fight the enemy. The Germans sent capital to America to undermine the industry of this country. We took over that capital and turned it into a fighting war machine to fight Germany.

"In Passaic, New Jersey, six or seven great woolen mills worth from \$60,-000,000 to \$70,000,000 were owned by German capital, and they were the finest in the world. In some of them before the war the German tongue was officially used and in two of them when America entered the war the managers refused to fly the American

flag. They also refused to accept government work, accepting only civilian work with enormous profits. One of them capitalized at \$3,600,000 did a business of \$30,000,000 with a profit of \$10,000,000 during 1917-18. We took them over, put American directors in charge, ran up the American flag and set them to work on army and navy

"Germany through the German-American Lumber Company of St. Andrew Bay, Florida, owned by a cousin of the former Kaiser, controlled the Panama Canal. This concern also had an office in Pittsburgh and was one of the bigger soy centres of America. The concern refused to allow any American railroad to operate near the place or allow development. Upon investigation is was learned that this concern kner nothing about the lumber business and that its files were choked with Pan-German literature, correspondence and propaganda. "One of the greatest spy centres in

america was located near Pittsburgh at a little town named Koppel in Beaver County. These was located in the plant of the Orenstein, Arthus, Koppel Company, owned entirely by German interests. They built mine cars and steel equipment.

"By clever manipulation they required all customers to furnish them with complete plans and blue prints of floor plans and elevation of their plants before they would begin work on a contract. As a result the company was able to secure vital data of practically every large American industry which were sent to Germany and filed. Eighteen large German insurance companies located in America also secured vital statistics of American industries, and when America entered the war, Germany knew just what American industries could produce, or at least she thought she

"The Orenstein, Arthus, Koppel

Watch your children's skins. As soon a: you see the slightest trace of a rash or sore, apply Zam-Buk. This antiseptic balm will protect the sore place from infection, prevent it from spreading and healing soon follows.

Careful mothers always keep Zam-Buk on hand for their children's injuries—it ends pain so quicily and prevents any possibility of festering. Best for cuts, burns, scalds, bruises, ringworm, accip sores, eczema and tuething rast. All dealers 50c box.

Company also advised the German Government that it could perform a service to the Fatherland by taking American contracts and then falling down on them. This company was

"The Germans also controlled the entrance to the Caribbean Sea by holding a terminal at St. Thomas in the Virgin Islands. Under the guise of a terminal they had built concrete emplacements and could have established an invulnerable fortress there had not their plans been uncovered by the American secret service operatives. The holdings were originally secured by clever German agents posing as Danes. The United States now owns | Scribner. this terminal."

Mr. Palmer said the many explosions in munition factories during the war were perpetrated by German agents supplied with information by the Orenstein, Arthus, Koppel Conpany and the 18 German insurance companies. He said the day the armistice was declared, Germany had 150,-000 agents in Spain disguised as salesmen ready to work in America and South America to regain German com-

Medicinal Value of Fruits.

Edible fruits do not exert direct medicinal effects, but they encourage the natural processes by which the acids are produced.

Oranges, figs, prunes, mulberries, dates and nectarines are laxatives. Cranberries, blackberries, dewberries, raspberries, quinces, pears, wild cherrics and barberries are astrin-

Grapes, peaches, huckleberries and black currants are diuretics. Gooseberries, currants, pumpkins

and melons are refrigerants. So are lemons, limes and apples, and these last are also stomach sedatives Apples are corrective and useful in nausea.

The green fruit of the persimmon is highly astringent, containing much tannin, and is used in diarrhoea and incipient dysentery. The oil of the cocoanut is recommended as a substitute for cod liver oil and is used in Europe for phthisis.

me. I have also given it to my family for colds and it cured them in a very short time. We must have had about 4 dozen bottles of the 'Golden Medical Discovery's contract to my family for colds and it cured them in a very short time. We must have had about 4 dozen bottles of the 'Golden Medical Discovery's contract to my family for colds and it cured them in a very short time. We must have had about 4 dozen bottles of the 'Golden Medical Discovery's contract to my family for colds and it cured them in a very short time.

Swift-Running Animals.

The swiftest dog in the world, the borzoi, or Russian wolfhound, has made record runs that show 75 feet in a second, while the gazelle has shown measured speed of more than 70 feet a second, which would give it a speed of 4,500 feet in a minute if the pace could be kept up.

COLDS, CATARRH RELIEVED

MINUTES

Consumption can be traced back in most instances to a bad cold or catarrh that was neglected. Don't court this white plague ensure yourself at once against it by inhaling Catarrhozone, a pleasant antiseptic medication that is inhaled into the lungs, nasal passages, throat, and bronchial tubes, where it kills disease germs and prevents their development Catarrhozone heals inflamed surfaces, relieves congestion, clears the head and throat, aids expectoration, and absolutely cures Catarrh and bronchitis. WHAT ANIMALS EAT.

Some Novel Figures About Their Foods.

An average cow during her life eats 27 tons of dry fodder and produces 21/2 tons of dry human food in the form of milk, veal from her own calves, and cow-meat from her own carcass. Hence, 12 pounds of dry fodder are required to produce 1 pound of dry human food. The cow eats hay and grass and concentrated

foods like bran and oilcake. A pig eats 7 pounds of barley (6 pounds dry weight) and produces 1 pound of pork, containing half its weight in water. Hence, here again it requires 12 pounds of dry fodder to produce 1 pound of dry human food; but the pig consumes a product which can be made into barley bread, and hence competes with man

for a precious bread-making grain. A fowl eats 100 pounds of corn and meal during 18 months, and produces 180 eggs and 4½ pounds of food when killed. The relation between dry fodder and dry human food is 14 to 1.

A sheep eats 600 pounds of dry fodder in a year and produces 28 pounds of meat. Here 24 pounds of dry fodder produces I pound of dry human food. But a sheep also yields 10 pounds of wool, which is invaluable and is supplementary to the food value of the animal.

Finally, a fat ox eats 8 tons of dry fodder during three years of life, and produces 800 pounds of beef, or 250 pounds of dry human food. The astonishing value of 64 pounds of dry fodder for the production of 1 pound of dry human food is revealed. To produe the roast beef of old England requires more than five times the quantity of fodder that is required to produce the same food value in the form of milk, veal, and cow-meat. A fattened ox is indeed a costly product. For example, if a steer weighs at the start 1,016 pounds, at the end of three months of fattening he may weigh 1,226 pounds, and if during the period he has eaten 196 pounds of fodder weekly, and dried fodder used in the production of 1 pound of human food will amount to 55 pounds. But if the process of fattening be continued, as is usually the case, then at the end of another three months the animal may weigh 1,275 pounds. If the fodder during this interval has amounted to 224 pounds weekly, it may be calculated that 100 pounds of dry fodder yielded only 1 additional pound of dry human food. It was evident that the fat ox was too extervagant a product for England to maintain.

AFTER INFLUENZA-WINTER COLDS—

BAD BLOOD

You are pale, thin, weak-with little vitality. Your liver is sluggish and the bad blood causes your stomach muscles to lose their elasticity and become flabby and weak-then indigestion.

Doctor Pierce's Golden Medical Discovery, made from wild roots and barks, and free from alcohol or narcotics, is the great and powerful blood purifier of to-day. Ingredients printed on wrapper. This tonic, in liquid or tablet form, is just what you need to give you vim, vigor and vitality. Take it as directed and it will search

out impure and poisonous matter throughout the system and eliminate it through the natural channels.

You can procure a trial package by sending 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

SINTALUTA, SASK.—"I have taken Dr. Pierce's Golden Medical Discovery for liver trouble, and found it excellent, and would not be without it. I suffered from congestion of the liver about six years ago and I always say that this medicine cured me. I have also given it to my family for ery.' "-Mrs. Enoch Mitchell, Box 120.

KITCHENER, ONT.—" I had become all blood was bad also. I took the 'Golden Medical Discovery' and was completely restored to good health. I am always recommending this medicine to my friends, many of whom have had equally a "-MRS. EPH. KETTYLE, 64 Breithaupt Street.

GREATEST ROBBER KING.

Fredericw the Great, Founder of "Prussianism."

They have taken down the statue of They have taken down the statue of Frederick the Great in Washington. Let us ask ourselves why he was called great. He tried to do many things, and from the position he occupied he was able to essay them under the most favorable auspices. In which of them, then, did he excel to such a degree as to germent the title. excel to such a degree as to earn the title by which he is known.

He tried to write poetry, but even Voltaire's hired praise (which he reversed as soon as his pay was stopped) has rot convinced the world that he was great in that department. He tried the flute and the fiddle, but we should inquire in vain far any evidence that he ravished any ear on those instruments. He tried to be a lawgiver, but outside of kicking the shins of his judges when they objected to his intereference he acquired no greatness in that attempt. In what, then, was Frederick great? The answer is too plain that ne was great only in those qualities of perfidy, faithlessness, cruelty and rapacity that made him the greatest and rapacity that made him the greatest robber king who ever sat upon a throne. In that greatness he has had few emula-tors, and in our times, at least, they have been confined to his own family. Frederick, to do him justice, pretended to be nothing but what he was. When

he started out to rob a neighbor he did not go forth canting about his mission. He called things by their right names. When he started out to rob Maria Theresa of Silesia some flatterer about the court inscribed a banner to be borne by the anmy with the words, "For God and Our Country." Frederick regarded it with disdain. "Strike out 'For God,' he

taking too much pride in his looks. Thus we have him writing home in a vein of questionable pleasantry. "I have the honor to inform your humanity that we are Christianly preparing to bombard Neisse; and that, if the place will not surrender of goodwill, needs must that it be beaten to powder." It is easy to imagine the present wielder of Frederick's sword rubbing his hands in the same way before Louvain and Rheims. It was to the same corespondent that Frederick wrote in his daredevil and cyn'cal humor, "My dear Monsieur Jordan, my sweet Monsieur Jordan, my quiet Monsieur Jordan, my sweet Monsieur Mons dan, my good, my being, my pacific, my most humane Monsieur Jordan—I announce to your serenity the conquest of Silesia." It was in such humor that he

pursued his greatness.

If treachery to an ally is a title to greatness Frederick was great in that. He made an alliance with France and then came to secret terms with Austria by which he was still to pretend to make war against her, but to allow her to withdraw her army from in front of him to surprise his ally in another quarter. The record of his treachery was made in Frederick's own band. "In exchange for Silesia we will go no far er. We will besiege Mese tor form. The commandant shall surrender and depart. We will go quietly into winter quarters; and they (the Austrians) can take their army where they will. Let all be fin-ished in twelve days."

This is the Frederick who was called

Great. He was the founder of Prusslan-ism, the full fruits of which the world

THRONES.

Some Royal Seats.

The throne of Russia was, and isfor, although it stands empty, it has not been injured or dismantled -a wide chair, placed upon a dais apsaid, "we are going to get a province, not to defend religion." He was under solemn treaty pledge to respect the Queen of the end of an enormous hall of coetly ment they make in the appetite, health the province of the coefficient of the speedy improvement that the province of the end of an enormous hall of coetly ment they make in the appetite, health the end of an enormous hall of costly ment they make in the appetite, health Hungary's title to that province and cynically admitted it. But his ambition and his interest, he said, demanded a war of conquest to which processes to which the conquest to the conquest ornate canopy above it. The chair itof personal vanity. cassively built of costly woods much carved and is said to have cost £40;gold set with emeralds, its very high back is adorned with the imperial coat of arms, in gold, and the kaiser, when he occupied it, sat beneath a canopy of cloth of gold, with one foot resting upon a cushioned stool covered with the same material.

Great Britain preserves a taste for splendor on splendid occasions, but the throne of King George, in the house of lords, is built fudametally of material chosen for sentiment rather than for magnificence. It is of British oak adorned with ivory, gold and silver, and is draped with priceless tapestry. On the back of this chair of state are the emblematic lion and unicorn, carved and gilded. The arms of the throne terminate in a pair of lions heads of gold with open jaws.

Presumably, however, there will

never be a throne to compare with that of the Mogul emperors of Hindustan. The famous "peacock throne" at Deihi cost at least £4,000,000 possibly twice that sum. Behind it stood two life-sized peacocks, enameled with rubies, sapphires, emeralds and other precious stones of colors appropriate to represent the birds in life.

The chair was of solid gold profusely studded with gems and surmounted by a canopy upheld by 12 golden pillars. On either eide was an umbrella (an Oriental symbol of sovereignty) of crimeon velvet, embroidered and fringed with pearls. It was carried off to Teheran in 1739 by Nadir Shah, the Persian conqueror, after the sack of Delhi, and was eventually broken up.—Philadelphia North American.

Minard's Liniment used by Physicians

Worth Knowing

Often discolorations on enamel ware may be removed by rubbing with a cloth dipped in vinegar.

Ordinary baking soda is an excellent cleaning medium for mud stains. Dampen a cloth, dip it into the soda and rub the offending spots. If pressing is necessary, do it on the wrong side of the machine.

In dusting, wipe the dust off; do not flick it. Butter should always be kept in a stone jar, with the lid on tight, otherwise it is

liable to absorb odors of other foods kept in the chest. The lightness of pancakes depends

their beating.

The sandwich with a rich filling does mot require butter.

Mayonnaise which has curdled may be restored without the use of additional eggs and oil by putting a teaspoonful of cold water in the bottom of a mixing bowl and beating the curdled dressing, a bit at a time, into the water.

DISEASE COMES

To Gure Common Ailments the Blood Must be Made Rich and Red.

Nearly all the common diseases that affict mankind are caused by bad lumbago and rheumatism, debility and indigestion, neuralgia, sciatica and other nerve troubles. It is bad blood that causes disfiguring skin diseases like eczema, and salt rheum, pimples and eruptions. The severity of the trouble indicates how impure the blood is, and it goes always from bad to worse unless steps are promptly There is no use trying a different medicine for each disease, for they all comes through the one trouble-had blood. To cure any of these troubles you must get right down to the root of the trouble in the blood. That is iust what Dr. Williams' Pink Pills do. They make new, rich, red blood. They simply purify and enrich the blood. why Dr. Williams' Pink Pills have cured thousands of cases after other medicines had failed. Here is proof of the power of Dr. Williams' Pink Pills to cure. Mrs. M. Stills, who resides near the town of Napanee says: I cannot praise Dr. Williams' Pink Pills too highly. I was very much run down in bealth, suffered from frequent spells of indigestion, billiousness, and sick headache. I had an almost constant pain in my head and my housework was a course of dread. In fact. I felt so miserable that life held but little enjoyment. I was advised to try Dr. Williams' Pink Pills, which I did, and the result was simply marvellous, and can best be summed up Celebrated and Costly by saying that they made me feel like a new woman, and fully restored my health. I would advise every woman and girl who has poor blood, or is rundown in health to give these wonderful pills a trial. I am never without them in the house.

At the first sign that the blood is out of order take Dr. Williams' Pink and spirit. You can get these pills through any medicine dealer or by mail at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

CHILI CON CARNE.

Here's How to Make a Good Substitute.

The Mexicans have a dish known a "Chili con carne" (meat with Chili pepper), the ingredients for which one would doubtless have difficulty in obtaining except in the Southwestern

would doubtess have difficulty in obtaining except in the Southwestern United States.

However, a good substitute for it may be made with the foods available in all parts of the country. The Mexican recipe is as follows:

Remove the seeds from two Chili peppers, soak the pods in a pint of warm water until they are soft, scrape the pulp from the skin and add to the water. Cut two pounds of beef into small pieces and brown in butter or drippings. Add a clove of garlic and the Chili water. Cook until the meat is tender, renewing the water if necessary. Thicken the sauce with flour. Serve with Mexican beans either mixed with the meat or used as a border.

border.

In the absence of the Chili peppers, water and Cayenne pepper may be used, and onlons may be substituted for garlic, and the Mexican beans, red kidney beans, either canned or fresh make a good substitute. If the canned beans are used they should be drabud and

Madegascar Graphite.

Production of graphite on the island of Madagascar in 1917 was estimated at 35,-000 tons, and exports amounted to 27,838. Shipments to England totaled 15,506, and those to France 17,322 tons. While direct shipments to the United States have not been permitted, it is understood from been permitted, it is understood from consular reports that 8,000 tons reached that country from Marseilles in 1917; and a considerable quantity has also been shipped from the port during the present year, principally through a consortium of French firms which, up until now, has controlled the bulk of the output of Madagascar graphite other than that Madagascar graphite other than that shipped to England. Inasmuch as the French firms belonging to the consortium are represented in Madagascar, it is ium are represented in Madagascar, it is not unlikely that they will endeavor to control such graphite as may be shipped to the United States direct from the is-land, when restrictions are removed, while it would appear that various independent produces are endeavoring to form direct connections with the American importers.

Bring Up the Reserves.

John was visiting his grandmother, who lived in the country. One day his grandmother found that John had but a few clean clothes left, so she told John to write his mother and tell her to send him some new clothes. John obeyed immediately, and in a few minutes returned and showed her the letter, which was as follows: Dear mamma, please send me a reenforcement of clean clothes."
