BE CAREFUL TO HIS TRUST.

Native African Kept Eyes On Watch for Hour.

France has many black fighting men from Senegal in the field; nor are they the only troops recruited from savage or semisavage races engaged in the great conflict. A young British officer found himself one night, by a mischance to his motorcycle, stranded by the wayside, and with only a little group of negro stragglers anywhere in sight. He was very tired, having had no sleep for many hours. One of the Africans talked the pidgin English of a coast town, and this man informed him that some motorlorries would be coming along soon, upon which it would be possible to get a lift.

"Soon," in the mouth of an African, is an elastic term, but the captain thought he could afford to wait an hour before setting forward on foot in search of some other means of transportation. He wanted a nap—wanted it desperately—but he could not trust himself to wake at the end of an hour. The African could not tell time, but the captain determined to depend upon him, nevertheless. Showing him the dial of his wrist watch, he explained that he wished to be awakened when the long hand reached there and the short hand there. Then he lay down, with arm extended, and the negro crouched beside him, with his eyes on the dial.

Exactly at the right moment the sleeper was called; and as he opened his eyes they fell upon the African, in precisely the same position, with

something strained in his aspect that suggested inquiry. It appeared that he had not dared look away during the entire hour.

"For sure, him clock trabbel slow, massa," he explained. "But I pose him stop go walkee, walkee? S'pose him go jump, jump.

Upon a river steamer in Africa Miss Mary Kingsley, the English explorer, face heard other passengers giving directions to the native steward in the adjoining main saloon:

"You savvy six o'clock? When them long arm catch them place, you call me in the morning time."

"You savvy five o'clock? When them long arm—?" And so it went on, until each passenger had pointed out on the clock face the proper reaction of the two hands to each other at the moment he desired to be called. The ignorant native steward, who could not tell time and could not learn to, was yet sufficiently observant to place and remember the call correctly; he never got them mixed.

Keep Minard's Liniment in the house

NOTES OF FASHIONS.

Black, cream, jade and tobacco brown hair-rehairs are prominently used in millinery.

Pastel large hair hats will likely be an important summer item.

Charrreuse is used by leading milliners for large shade hats, faced with georgette.

Petals of all sorts are freely used in hat trimmings. Sometimes the brightest of the better.

Orchard seems to be a favorite for undergarments where color is wanted.

The fad for pastel colors has invaded the cotton undergarment field.

The gilet camisole is meeting with a good deal of favor in some quarters.

FOR THE BRIDE.

Elaborate bridal sets of undergarments made from white satin are among the ones most wanted, it is said.

Satin and chiffon in two-tone effects are combined with a skirt draped as in lace flouncings.

Black lace spangled with silver is used over silver cloth in some dresses.

One taffeta frock seen in a prominent window was tunicked in satin.

The square bib collar of lace is used at both front and back on silk dresses.

Many of the new afternoon and informal evening dress models show the

Minard's Liniment Co., Limited.

Dear Sirs—Your MINARD'S LINIMENT is our remedy for sore throat, colds and all ordinary ailments.

It never fails to relieve and cure promptly.

CHAS. WHOOTEN.

Port Mulgrave.

short, tight-fitting dress sleeve or the puffed baby sleeve.

AN INDIAN NOTE.

An Indian draping is a feature of a gown of white satin.

Gowns of Empire and Directoire types are worn by both brides and bridesmaids at weddings.

Odd belts on the latest spring imports of coats and suits show pearl buttons used as the backing of embroidered eyelets spaced two inches apart.

Cheruit features the odd color combinations of leather and rose in a motor wrap of the latest.

An attractive cape of pearl gray drevytn has a deep circular yoke of heavy novelty applique lace dyed to match.

Quilted pongee coats are shown for summer motor wear.

The Greek note is strong in the embroidery on a recently imported series of voile over-bouses.

WHAT NEXT?

Oriental ear pacques.

Rhinestone embroidered hosiery.

Upper bodices of tulle which veil the chin.

As an evening fillet with an attached chin-strap.

What next?

Bringing the Troops Home

A returning soldier on a transport in a Canadian harbor is not expected to philosophically await facilities of transport. A cheering crowd in an inland town, waiting for troop trains to arrive, isn't likely to be perfectly patient either. But a fairly large proportion of the workers of Canada—those engaged in railway service—are putting in long strenuous days, these times of demobilization, to get the fighting men back to their homes with the least delay possible.

Just how stupendous that work of rail transport is, may be surmised from the fact that from March 17 to April 23, both dates inclusive, this year, from the port of Halifax there have been handled over the rails of Canadian National Railways to interior points, 49,009 military passengers. This colossal movement required the utilization of 107 special trains as enumerated in this newspaper from time to time, and it speaks volumes for the self-sacrificing zeal of the rank and file of the roads that total of almost fifty thousand men have been moved as swiftly and silently as if the total had been a tenth of those actually transported.

Probably never again will Halifaxians see such a procession of great ships loaded with soldiers in that magnificent harbour. The last day by day, is imposing.

On March 17, the Carmania docked at 9.15 a.m., with 2,769 soldiers and

Give Cuticura the Care Of Your Skin

And watch that troublesome eruption disappear. Bathe with Cuticura Soap, dry and apply Cuticura Ointment. For eruptions, rashes, irritations, etc., they are wonderful. Nothing so insures a clear skin as your good hair as making Cuticura your every-day toilet preparations.

Cuticura Soap, Ointment, 25-cent tins, Talisman Co., 1140 Broadway, New York, N. Y.

275 civilians. The ticketing was rushed through and nine special trains were despatched in 6 hours. Two days later the Celtic warped in to her berth at 7.04 in the evening. She carried 2,810 troops of all ranks. In less than 4 hours the soldiers had been forwarded, the actual time for dispatching being placed at two hours and a half. The day following, March 20th, the Baltic docked. She carried 3,200 returning men, to handle whom five special trains were sent out in three hours and 35 minutes. There was an interval of four days before the Celtic docked at 8.05 a.m., with 1,802 soldier passengers. Again, four special trains were moved out in two hours and 45 minutes. Next day, March 26th, the Royal George, with 1,338 troops aboard docked at 11.45 a.m. Three special trains were despatched in one hour and three-quarters.

Then came the giant Olympic with 4,846 aboard. High winds prevented her immediate docking, and the troops or most of them, had to be brought off by tenders. This proved a laborious job for all concerned, but by dint of hard work, special after special was sent forward until the great liner was cleared. This consumed a great deal of time, and, before there was much time to think about it, the Cedric with 3,520 men, and the Minnehaha, with 2,461 reached dock, both on March 27th. Eight special trains were utilized to handle the complement from the Cedric, while six were necessary to take care of the forwarding of those from aboard the Minnehaha.

On March 30th, at 5.30 p.m., the Regina docked with 1,981 officers and men from practically every province in Canada. Within three hours and 20 minutes, 5 special trains had been despatched and the local units had been ticketed for the regular trains. On April 1st the Canada docked at 9 o'clock. She carried 1,351 soldiers. Three special trains had been despatched within 3 hours and 35 minutes after disembarkation; the actual time between departure of the first and that of the last, being three-quarters of an hour.

On April 6 the Northland docked at 4.40 p.m. She carried 1,237 soldier passengers. Two hours later her complement had been forwarded, only 13 minutes passing between the departure of the train, it is at the point in the records that the first prominent mention is made of the large amount of military baggage to be handled. On the same date the Caronia docked at 8.10 p.m. She carried 3,364 passengers and 8 special trains were despatched in 4 hours. On April 9 the Megantic arrived in the harbor with 1,179. The Megantic did not dock at

once and the disembarkation of troops was carried on by tender, necessarily a slow, laborious process, but three soldiers and three-quarters of a civilian passenger and three-quarters of a ton of baggage were despatched in 5.30 in the evening with 1,974 passengers, and in a little more than three hours later, 4 special trains were despatched. Eight days later—on April 13—the Carmania docked at 7.25 p.m., with 2,600 troops. Six special trains were despatched in a little more than 6 hours. There is also note in the records in the case of this ship about the quantity of baggage to be handled. Two days later—on April 20—the Adriatic arrived at 8.25 p.m., with 1,841 passengers. Four special trains after the time of docking, a special train had been despatched.

Then on April 21 the Olympic was back again. She docked at 11.30 a.m., and carried 5,572 military passengers and 300 civilians, a total of 5,872. Eleven special trains were despatched within seven hours and a half, and a civilian special was also sent forward carrying about 200 passengers. There was an unusually large amount of baggage to be handled, but this is regarded as one of the best troop movements since the first of the year.

On April 23, the Belgic, with 3,323 officers and troops aboard, came in a day ahead of schedule. Six hundred of these passengers were dispersed from Halifax, but the remainder were moved out over C. N. R. rails in seven special trains.

The handling of these 49,009 troops and civilians by special train movement is regarded in Canadian railway circles generally as a highly satisfactory performance, and it reflects special credit upon the staffs of the old Government lines which are now the Maritime Provinces portion of Canadian National Railways. The railway service is keenly responsive to the great obligation of handling such large bodies of troops over long distances by rail. There is also a desire on the part of the trainmen to facilitate the movement of the trains with all possible speed, and the men in the operating departments especially so, as carrying, and we continue to carry, heavy responsibility on their last troop ship and the last body of Canadian troops have been cleared from the ocean ports.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal remedy. They regulate the bowels, soothe the stomach, banish constipation and indigestion, break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them, Mrs. Maise Cadotte, Makamik, Quebec, writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

IN A PARACHUTE.

Sensations of Men Who Made Daring Drop.

The pilot pushed back his goggles and motioned to me.

I could see his lips move, and though I could not hear a word, this excuse I could not avail me, for I knew very well that he was trying to convey what he had reached the right attitude and that it was time for me to get on.

The open country-side below looked horridly far off, to let oneself drop helplessly into that aching void seemed an madness. But I had only myself to thank for having asked to be allowed to make a "low altitude" descent from an airplane. I had the inventor's word for it that the parachute would open in from two to two and a half seconds—say 150 feet of "free" fall. After that I would glide gently to the ground, and immediately I touched it was to be sure and operate the quick release, otherwise I should be dragged helplessly along.

Mastering my inclination to glance over the side again, I looked at the buckles of the harness and the release device. Everything seemed to be all right. The parachute itself, neatly folded in its mummy-shaped container, was clipped to the side of the fuselage. The few seconds seemed like so many years.

Very, very gingerly I throw one leg over the side, and then the other. The pilot, from his secure command cockpit, crinned encouragement. We were speeding at ninety miles an hour through still air.

I shut my eyes and let go.

For a second or two I dropped like a stone, and then I felt a terrific tug at the harness, which told me that the parachute had left its casing. I could feel the increasing strain on the harness as the envelope opened, and I swayed in wide, mad arcs in the empty air. The earth rushed upward, awfully rapidly, but only for a few moments. My particular homed up as if to greet me. (As a matter of fact I landed nearly a quarter of a mile away from it.)

I was fully supported now and dropping comparatively slowly. Barely passing the top of some big alms, I came down with a bump, not nearly so hard as I had expected. Before I had time to get at the release, the straining parachute had dragged me off my feet momentarily clear, a little shaken up, but otherwise none the worse for my fall of 500 feet.—London Daily Mail.

THIS GOVERNMENT LEGEND GUARANTEES PURITY AND IS ON EACH CAN OF CLARK'S PORK AND BEANS

W. CLARK

Minard's Liniment used by Physicians

Chinese Do It, Too.

A department store was opened recently in Shanghai, China, and has been such a success that it will stay there. The Chinese are going to this department store rather than to amusement places, finding it more interesting to walk around and pick up bargains than to patronize the theatre. They are credited with buying things they don't want, just as people do in the United States. Human nature is pretty much the same all over the world.

We all applaud victory, but defeat may leave a man with a clearer conscience.

"IT'S JUST DANDY"

THE DANDY BURNER is a device for making and burning gas from COAL OIL, WATER and AIR right in your coal or wood stove. Regulated by a valve. Easily installed in 5 minutes. Burns and bakes better than coal or wood. No kindling, ashes, soot, dirt or odor. SAVES MONEY, TIME and WORRY.

DURABLE, ECONOMICAL.

Price \$15. Write

CHURCH TO BORROW.

New Glasgow Congregation Permitted to Issue Bonds.

Under the title of a bill to amend an act to incorporate the trustees of the First Presbyterian Church, New Glasgow, the trustees of that congregation are empowered to raise a loan of \$20,000 for such purposes as they may deem desirable at a rate of 7 per cent. The debentures shall be in sums of \$100 and the coupons attached shall bear the name of the secretary for the time being of the trustees. The trustees may sell the debentures from time to time for such sums as they can obtain. It is provided that all moneys so borrowed shall take priority over all mortgages or other encumbrances. They are to run for twenty years, but may be redeemed at any time after three months' notice. It is a new way of financing a congregation—new at least in that part of Canada.

Ask for Minard's and take no other.

An Official Flycatcher.

Redlands, a town in California, some time ago established the office of municipal flycatcher. That official acts on a single observed fact—that flies instinctively fly upward and toward light. He constructed a large trap, a screened frame, 12 inches square and more than two feet in height. He raised this two inches from the ground, and attached to the bottom a cone-shaped screen, with the large end down. He nailed the contrivance to a post on a street corner and the flies did the rest.

In the first month, from the 100 traps that he scattered throughout the business section of Redlands the official fly-catcher had emptied and burned 50 gallons of flies. That means not far from 4,000,000 flies.

There are now many hundreds of the flytraps in Redlands, and according to the residents, all the flies in Redlands were in those traps last summer.

The Toad.

The toad is useful because of its diet. No less than 83 specimens of insect, mostly injurious, have been proved to enter into his dietary. George W. Hunter says: A toad has been observed to snap at 128 flies in half an hour. Thus at a low estimate it could easily destroy 1,000 insects during a day, and do an immense service to the garden during the summer. It has been estimated that a single toad may, on account of the curcurns which it kills, be worth \$19.83 each season that it lives.

Catarrah Cannot be Cured

BY LOCAL APPLICATIONS, as they cannot reach the seat of the disease, CATARRH is a local disease, greatly influenced by constitutional conditions, caused by the mucous membrane of the System. HALL'S CATARRH MEDICINE is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in HALL'S CATARRH MEDICINE is what produces such wonderful results in catarrhal conditions.

National Prayer Days.

The first time the people of the United States were called upon to observe a day of national prayer was May 9, 1798, by proclamation of President John Adams. A controversy had arisen between this country and France and all Americans were called upon to pray for a continuation of peace. In 1815, when the United States was about to make war on Algiers, President Madison proclaimed a day of prayer. During the Civil war three presidential proclamations were issued to observe days of prayer for peace. In 1905 the same was called upon the people to pray for Lincoln, and in 1901 President Arthur proclaimed a day of prayer to mark the burial of President Garfield. In the autumn of 1914 President Wilson issued his proclamation for prayers on "Peace Sundays."

Compulsory Change of Name.

A notable instance of compulsory change of name occurred in Scotland in the seventeenth century, when the clan Macgregor was ordered to abandon and forget its ancient patronymic. The English government thought by this means to stamp out the spirit of Rob Roy's redoubtable kinsmen, and so sternly was the decree enforced that the use of the old name was treated as a capital offense. For the time the clansmen submitted and took other names; but, so far from forgetting the old designation, later generations proudly reverted to it, and to-day there are more Macgregors in the world—to the world's gain—than ever before.—London Standard.

How little we pay our way in life! Although we have our purses continually in our hand, the better part of services goes still unrewarded.—Stevenson.

The Largest Frog.

Among the rare specimens not open to public inspection in the Harvard zoological museum is what is claimed to be the largest frog in the world. It weighs about six pounds, is twenty-seven inches long from tip to toe and of a slaty black color. Its web feet are equal in size to those of a large swan. But three of its kind have ever reached the United States. Dr. Boulenger of the British museum was the discoverer of the new species in 1906 while on an expedition in central Africa. All known specimens have been found in two districts, called K-tibi and Etulan, of the German colony Kamerun.

She Didn't Say.

If a Maori wishes to speak words of insult to another Maori he calls his adversary some kind of food. Any kind will do, living or dead. One Maori chief once told another that he was a roast veal. Then he fled to the bush, hid in a cave, was tracked, captured and beheaded. The cave is still shown to visitors, and when Lord Kitchener was in New Zealand he was taken to it by a pretty Maori girl acting as guide. She told him the whole story, and at the conclusion the stern soldier's face softened into a smile as he said:

"Ah, then, I suppose it would be highly dangerous to call a Maori lady a little duck?"—London Mail.

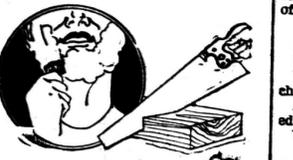

NERVOUS PROSTRATION

May be Overcome by Lydia E. Pinkham's Vegetable Compound - This Letter Proves It.

West Philadelphia, Pa.—"During the thirty years I have been married, I have been in bad health and had several attacks of nervous prostration until it seemed as if the organs in my whole body were worn out. I was finally persuaded to try Lydia E. Pinkham's Vegetable Compound and it made a well woman of me. I can now do all my household and all my work and I will guarantee they will derive great benefit from it."—Mrs. FRANK FITZGERALD, 25 N. 41st Street, West Philadelphia, Pa.

There are thousands of women every where in Mrs. Fitzgerald's condition suffering from nervousness, backache, headaches, and other symptoms of a functional derangement. It was a grateful spirit for health restored which led her to write this letter so that other women may benefit from her experience and find health as she has done.

For suggestions in regard to your condition write to Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of that 30 years experience is at your service.

Do you shave with a saw?

FOOLISH question with No. 11991 Maybe. But compare for a moment the illustrations above. They show pretty well what we're driving at; that is, unless a blade is stopped regularly it develops an edge very like a saw, and causes that "pulling" and after-razoring of which you complain.

Not so with the Auto-Stop Razor. For the self-stopping feature, you see, reforms the saw-like edge that results from shaving, and provides you with a sharp blade for every shave. The beauty of it is you don't have to remove the blade from the razor to sharpen it, nor do you have to take the Auto-Stop Razor apart to clean it. From start to least-stopping, shaving, and cleaning—the blade remains in the razor.

Razor - Stop - 12 Blades - \$5
