TRICKS OF WAR-WIDOWS. Traps for Fortune Hunters by Designing Females.

Little did the British government realize when it provided that a war widow should receive a dowry on re-marrying.

Unwillingly, too, a number of traps were set for "fortune-hunters. One widow was persuaded to go through the ceremony of marriage with her grandfather or some other person in the prohibited degree, and subsequently she sent in her "ring"-paper and claimed the remarriage gratuity.

Somehow, again, there is a bit-terly disappointed man who married a widow only to find that she was not entitled to the pension she was drawing, and consequently not eligible

THE CHANGE IN WOMAN'S LIFE

Mrs. Godden Tells How It May be Passed in Safety and Comfort. Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and a general run down condition, so it was hard for me to do my work.

Kind annoying symptoms as heat flashes, nervousness, headache, irritability and "the blues," may be speedily overcome and the system restored to normal conditions by this famous eye and body-cure, Lydia E. Pinkham's Vegetable Compound.

for the gratuity. I tried to bear this blow, but I was unable to find my way through it.

There is, however, another side to the shield. Not long since, for instance, a certain local war pensions committee, announcing that she had "come about marriage money."

"But," protested the official, "you've been remarried, and had the gratuity."

"I don't mean that," said the woman, drawing from her pocket an official envelope. "The other poor dear's gone now and I want to know how I shall go on if I marry a third time!"

PROOF TO THE CONTRARY. There is a certain long-suffering father whose nerves sometimes give way under the constant fire of questions from his talkative eight-year-old son.

January is called "the hard moon"; February, "the raccoon moon"; March, "the sore-eye moon"; April, "the moon in which geese lay eggs"; May, "the lasting moon"; June, "the moon when strawberries are red"; July, "the moon when choke berries are ripe"; August, "the harvest moon"; September, "the moon when rice is laid up to dry"; October, "the rice-drying moon"; November, "the deer-killing moon"; and December, "the deer moon."

GUARD THE CHILDREN FROM AUTUMN COLDS

The fall is the most severe season of the year for colds—one day is warm, the next is wet and cold and unless the mother is on her guard the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mother's best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet.

Some New Views on Old Prophecies

The climate of the temperate zone influences unfavorably sometimes the state of man's health. We may take it for granted, if he is just a writer, that he never discovered this for himself, but is merely recording a fact that has been demonstrated by scientific observers.
