

ECZEMA IN RASH CUTICURA HEALS

Very Itchy and Burned. Troubled Six Weeks.

"Our daughter's face came out in a rash that we were told was eczema. Her cheeks got sore and she rubbed causing loss of sleep. The breaking out was very itchy and burned so that I had to tie gauze on her hands to keep her from scratching. This trouble lasted about six weeks before I used Cuticura. I used one large box of Cuticura Ointment with two boxes of Cuticura Soap when she was healed." (Signed) Mrs. H. Starns, Blenheim Rd., Oak, Ont.

Cuticura Soap, Ointment and Tablets are ideal for daily toilet uses.

soup, from his first appearance as a fat, noisy little boy, through all the successive stages of rapid emaciation to the last fearful scene, which shows a little grave, surrounded, not by the regulation funeral urn, but by a soup tureen!

Slovenly Peter first appeared in print in 1848, being the work of the physician Dr. Heinrich Hoffman, who wrote it for his own children and then published it for other children. Three years after its first appearance it passed into its twenty-third thousand and up to the present time, for it is still being published, has gone through over one hundred and forty editions. Certainly few books rival Slovenly Peter in popularity and his appearance on tableaus testifies that he reigns over more worlds than one.

SMART LOT OF BOYS.

Within the last few years boys of Japan, none of them over 15 years old, have turned out typewriters, telephones, pianos, dog locks and some of the most ingenious mechanical toys ever placed on the market. Most Japanese boys have great natural skill with tools, and there is now a shop at Tokyo, run by a boy, in which 50 boys are constantly at work. A young Jap is as sharp as a razor. He works during the day and goes to school at night.

CHILDHOOD CONSTIPATION

Constipated children can find prompt relief through the use of Baby's Own Tablets. The Tablets are mild but thorough laxative which never fail to regulate the bowels and stomach, thus driving out constipation and indigestion; colds and simple fevers. Concerning them Mrs. Gaspard Dalgle, Demain, Que., writes: "Baby's Own Tablets have been of great benefit to my little boy, who was suffering from constipation and indigestion. They quickly relieved him and now he is in the best of health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville Ont.

DESERT BEAUTY.

Wonderful Coloring in the Western States.

Every year more and more American painters are going westward, drawn by the strange beauty of the desert regions principally. If this seems strange and perverse to the man uneducated in the language of art it must be remembered that the painter who knows his business uses his material, his natural-historic fact, merely as a symbol. Just because he seems to be dealing less directly with ideas than, for instance, the musician, he often treats his symbols with a certain brusqueness, not to say incivility, to point this fact. Bareness, and even aridity of landscape, which might be repellent to the botanist or farmer, may therefore appeal to him as a desirable hunting ground because this condition result in peculiar atmospheric states which in their turn produce unusual and beautiful colors, and not at all because of any lack of vegetation for his own sake.

Sometimes, too, as in the view from Furnace Creek, the aridity discloses the essential shapes of hill and mountain, as moulded by wind or rain, shapes which often reveal grandeur of outline and solidity of structure that would be lost in a well-wooded country. These bald hills and mesas, too, are often of vivid coloration; orange, rose and intense red being frequent, and in the clear, dry atmosphere these take on unbelievable hues of purple and deep blue as they recede and as the light declines. At other times, as at noon, for instance, the tendency is for the landscape to present a wonderful gamut of iridescent harmonies of the character of mother-of-pearl; pale gray-greens, yellow and innumerable variations of lilac and blue. From this background, neutral in final effect, the occasional flare of the weird scintilla or hemi-colored cactus, adds an interest more vivid and intense by contrast with its unpromising surroundings.

Bear Island, Aug. 26, 1908. Minard's Liniment Co., Limited.

Dear Sirs,—Your traveler is here to-day and we are getting a large quantity of your MINARD'S LINIMENT. We find it the best Liniment on the market making no exception. We have been in business 13 years and have handled all kinds, but have dropped them all but yours; that sells itself; the others have to be pushed to get rid of.

W. A. HAGERMAN.

An Author's Luck.

A curious illustration of the "luck" with which some books meet is shown in the history of Henry Seton Merriman's novel, "The Grey Lady." The first edition was brought out among the holiday issues of 1895, and although favorably received by the reviewers and described as "intensely dramatic," "with fresh, vigorous plot," etc., very little attention in general seems to have been paid to it, and eighteen months later the first edition was sufficient to meet all demands. Some time later, however, a second edition was published, appearing with a specially designed cover in gray and gold. Far from repeating the experience of the first edition, the second was sold out almost immediately and orders were received for fully half of the third edition. It is but another curious instance of that fickleness of the literary taste of the public.

Refilling the Teakettle.

Never use water which has been standing overnight in the tea kettle. In the morning fill it with fresh water, boil and use at once.

The Flashing Frog.

There is a hideous reptile, known as the flashing frog, which angles for its game as expertly and with as great success as the most adroit fly fisher. He is a clumsy, awkward swimmer, but nature has compensated him for his unwieldiness by furnishing him with an equivalent for a rod and line, with a bait always ready for use. Two elongated tentacles spring from his nose, which taper away like actual fishing rods. To the end of them is attached, by a slender filament, which serves the purpose of a line, a bait in the form of a shiny bit of membrane. The hooks are set in the mouth of the fisherman below, and in order to induce the fish to venture within reach of them, the angler stirs up the mud at the bottom with his fins and tail. This attracts the fish and conceals him from observation. He then plies his rod; the glittering bait glows in the water like a living insect. The dazed fish are taken in great numbers, perfectly circumvented by the trick of the crafty angler.

New British Gun.

Experiments which have been taking place in connection with a new British field gun have now resulted in the solution of a weapon which is considered to be the best of its kind in the world.

The advantages of the new gun are:

- Take two women, in equal circumstances, with an equal amount of responsibility to bear, and of an equal age—say, 30 years. Why does the first impress one as "on the shelf," so to speak? She is "settled" in figure, manner, and outlook, and her face, though not old, has still lost its flush of youth—its pulsating quality of expectation.

The second, though the same age,

FREE

To Asthma, Hay Fever and Catarrh sufferers. Write to-day and get a trial treatment of the world's greatest remedy, Buckley's two bottle mixture; nothing ever drives the poison from the system. Something different; no burning or nerve wrecking drugs, but two scientific mixtures that will conquer any of the above ailments. Don't hesitate a minute longer. Fill out the blank below and get started on the road to health.

W. K. BUCKLEY MANUFACTURING CHEMIST, 97 Dundas St. East, Toronto.

Please send me two bottles of your mixture. I enclose ten cents to cover cost of packing and mailing. Do this to-day as for a limited time only I make this offer.

NAME: _____ ADDRESS: _____

that it will fire the heavy 18 1-2 lb. shell used in the ordinary quick-firer a further distance and with greater rapidity than has ever been attained with a field-gun before.

In fact the new gun increases the range of the British normal field weapon, by at least 2,000 yards, and it is expected that further development will extend the vulnerable point by another 1,000 yards.

Experiments have shown that the new gun can discharge as many as 23 rounds a minute.

One of the difficulties at first experienced was that, although the increased distance could be attained with comparative ease, accuracy could not be wholly relied upon at the lengthened range, and although the gun was used on a limited scale during the closing stages of the war, its far-reaching effects were not utilized to their full extent for this reason.

The vibration set up by the extreme rapidity of fire also operated somewhat against accuracy, but it is understood that both these difficulties have now been overcome, and that the gun has been found to answer all requirements.

Minard's Liniment Cures Burns, Etc.

Mrs. Newbridge—When you found that you couldn't accept the invitation to our wedding, why didn't you send your regrets? Miss Rival—Oh, I thought you'd have enough of your own pretty soon, dear—Kansas City Star.

THE MIRROR.

I lift baby up to the mirror And let him look in the glass To offer to the reflector His flower or leaf or grass.

And the baby he sees in the mirror Returns his very smile And offers a flower or leaf or grass And is just as free from guile.

And God lifts me up to the mirror, And holds the world as a glass; I offer his life reflector Love's flower or leaf or grass.

And the world I see in the mirror Returns my very smile, And offers a flower or leaf or grass If it finds me free from guile.

For what after all is the gift divine That I can offer a world? Save a hopeful smile in life's mirror That my soul may be unfurled.

—Harold W. Gammans in the Nauticus.

HER AGE.

It All Depends On the Woman Herself.

Justice in Wrong.

A celebrated barrister undertook a trade-mark case that looked hopeless for his client. The client went abroad, leaving his telegraphic address, with instructions that he was to be notified of the decision.

He won the case and the barrister cabled: "Justice has triumphed." The client wired back: "Lodge immediate appeal!"

A GREAT STOMACH BRACER

Make You Feel Lively and Young—Removes That Tired Feeling.

At some period in our lives there is sure to come a time when the stomach is "off"—not working well, failing to enjoy and digest its food. Main thing then is to get it right, remedy. You really want a soothing medicine, one quick to act, sure on results, combining the virtue of a gentle laxative with a tonic effect upon the stomach, liver and kidneys.

Certainly the world affords no better medicines for the stomach than Dr. Hamilton's Pills of Mandrake and Butternut. Their laxative effect is ideal—can't be beaten! But in addition to their helpful action upon the bowels, these pills contain certain ingredients that strengthen and invigorate the muscles of the stomach, thereby relieving all sorts of stomach misery, indigestion, sourness, rising gas, headache and biliousness.

Just try Dr. Hamilton's Pills—they'll make you full of energy—brimming over with snap; they bring and maintain robust, sound, vigorous health, and isn't that just what you've looked for these many months? DR. HAMILTON'S PILLS. 50c per box, all dealers.

Coal Beneath the North Sea.

"It is often said that Britain owes her commercial supremacy to her coal. For her size she has more and better coal than any other country in the world, and for steam purposes, South Wales practically supplies the world. Where did the coal come from? The coal seams, lying one below another to an unknown depth, and not infrequently cropping out at the surface, are sure proof that tropical conditions once prevailed in the latitude of these islands. In primeval times, a period whose remoteness is measured by millions of years, the district which is now Britain was connected with the continent, and the coal of England doubtless runs under the Channel and the southern part of the North Sea, and is continued in the coalfields of Northern France, Belgium and Flanders.

All this region was covered thick with great tree ferns, growing to a gigantic height, of exceedingly rapid growth, in the damp steaming heat of a tropical climate which exceeds Africa to-day. Growth succeeded growth, and in the course of ages probably seas flowed over it and deposited the sand which is now rock. Then came another period of growth, and the pressure carbonized the fern-wood and vegetation and formed layers of coal, pieces of which still bear imprinted upon their flat surface the beautiful tracery of the original fronds of the tree-ferns—Tit-Bits.

"Mayne changed countenance when I saw her at the beauty doctor's." "Naturally. That's what she went there for."—Baltimore American.

OLD-TIME CHINA

In museums and on the shelves of old-time china closets may be seen specimens of the table ware that was in use in the days of old and a specially interesting variety and one much sought after by collectors may be designated the landscape pattern, representing scenes in France, India, Africa, England and America, the latter being the most highly prized in this country, and bringing quite stiff prices in many cases.

The ware is English, several famous potteries making a specialty of landscape, among the best known being the Ridgway and the Burslem potteries of Stubbins and Enoch Wood.

At first the color of the landscape pottery was a beautiful dark rich blue, but about 1830 pink, brown, rose, green, lilac, light blue and mulberry were introduced, but the dark blue is still the most desirable.

"RIVER EUPHRATES PLATE."

A specimen of the Ridgway pottery is the "River Euphrates plate," an old-time tea plate, much worn of a pleasing pale blue, which depicts what purports to be a scene on the River Euphrates, one of the "Four Great Rivers of Paradise." There is a castle with minarets and palm trees growing on the banks of the river on which Nimrod is said to have built Babylon. The plate is of small intrinsic value, but is interesting as a good specimen of the landscape table ware manufactured by William Ridgway some time between 1830 and 1840.

We are all familiar with the species of pottery called iron-stone china, the opaque porcelain, which when first manufactured was recognized as being so superior to the ordinary table ware in use that its popularity was immediate and never waned.

In 1805 the Spode-Copeland firm, founded in 1770, began the manufacture of iron-stone china, and in 1905 celebrated its centenary and revived what was probably the most popular pattern it had ever sent forth to an eagerly buying world. That is what is familiarly known as Spode's "Tower Pattern," of a fine rich dark blue and most attractive in color, design and finish.

Side by side with the River Euphrates and the Spode Tower plates may be seen a rather small plate, cream white in color, decorated with a large central figure and a succession of smaller ones around the rim. But, oh! what a wealth of delightful association is evoked by the mere mention of the name of this little piece of china ware, the "Slovenly Peter plate."

Slovenly Peter, who conquered the childish world some three scores years ago, with his unkempt hair and his lengthy finger nails, and his equally interesting and never-to-be-forgotten companions, Johnny-Look-in-the-Air, Sammy Sweet Tooth, Prying Will and Pauline the rash child, who would play with matches and her consequently untimely end, to touchingly mourned by her faithful pussy cats.

The Slovenly Peter plate came from Prague a few years ago and well repaid the trifling sum paid for it, for it has been a never-failing source of pleasure. In the centre stands the inimitable Peter himself, and though his hair may be a trifle darker in hue than on the printed page of the book, yet it is of the accepted length and stands out in the same uncompromising stiffness, and his finger nails have not been clipped even the fraction of an inch, and altogether he is an excellent china representation of the famous Peter.

Around the rim of the plate is depicted the whole remarkable history of Augustus, who would not drink his

HELP WANTED—MALE

ROOM FIXER—FIRST CLASS MAN ON blankets and heavy woollens. State full details of experience, age and whether married or single. Apply Slingsby Mfg. Co., Brantford, Ont.

PEACH RECIPES

Peaches are now in season. There are hundreds of ways of giving piquancy to other dishes by peach admixture.

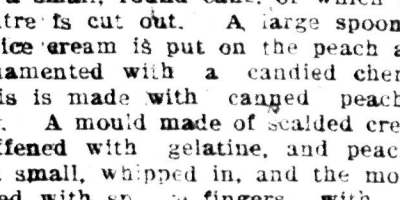

Rice goes especially well with peaches, also ice cream, and an excellent combination is of a ripe cantaloupe melon, with peaches so cut up and sugared, put into the centre when emptied of seeds; these eaten together with ice cream, if liked, is an unusual nice dessert. Peach sponge is made with rice cooked until soft with milk and sugar and a pinch of salt. Squeeze gradually the juice of a lemon, beat some whites of eggs stiff and fold in; pour into a ring mould, stand in hot water, cover and bake in moderate oven for half an hour. When cool turn out, cut sliced peaches round, and fill the centre with cup-peaches, and top with whipped cream.

PEACH MELBA.

Peach Melba is a great favorite. Pare, stone and cook the peaches in syrup. When cool put half a peach on a small round cake, of which the centre is cut out. A large spoonful of ice cream is put on the peach and ornamented with a candied cherry. This is made with canned peaches, too. A mould made of scalded cream, stiffened with gelatine, and peaches cut small, whipped in, and the mould lined with sponge fingers, with the centre filled in with the fruit; and cream is most refreshing if left on the ice for a hot day.

CANNED PEACHES.

For canned peaches the following seems good: Six pounds peaches, peeled; three pounds sugar; 1-2 cup of water. Drop the fruit into cold water when peeled. Place layers of peaches and sugar in the kettle, pour in water and a few leaves if you have them. Place over a slow fire until tender. Remove leaves and seal in jars. A unique method is to put the peaches and put them in a slow oven until baked soft, and serve with cream and sugar.

When you think of TORONTO always think of THE WALKER HOUSE

It is the Personal Service that Please and there is no other. Walker House is the most complete in the city. It is the only hotel in Toronto that has a swimming pool. The house is always ready to receive you.
