REUMATIC PEOPLE

on Only Find Relief By Enrich of his teach ing the Blood.

mistism is a disorder of the od is overcharged with acid and thus setting up inflammain the muscles and joints. Wet her or cold weather of autumn start the tortures of rheumatism. is not the cause. The cause is in he blood and the blood only. Victims in malady have every reason to the first dull ache in the limbs joints, followed by sharp pains through the flesh and muscles; these are the symptoms of poison in the od which may shortly leave the letim painracked and helpless.

There is only one way to cure rheutism, and that is through the blood. ents, hot applications, and rubng may give temporary ease, but not possibly root the trouble out of system. That can only be done by he rich, red blood which Dr. Wilof Pink Pills actually make. This blood drives out the poisonous cids and impurities, and the rheuma-ism disappears. If you are a sufferor from this painful malady begin ng yourself to-day by the use of Dr Williams' Pink Pills, and see how n the pains and stiffness of the sints fade away, leaving behind new ray and new health.

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

Lesson III. Oct. 19th, 1919. Jesus in Peter's home. Mark 1: 29-39.

COMMENTARY-I. Healing in a me (vs. 92-31). 29. Forthwith, when hey were come out of the synagogue It was on the Sabbath and Jesis vine power of the synagogue of Caperout of the demon Jesus with the four went from the synagogue service to Peter's home (Matt. 8;14), where Andrew also dewit, 30, Sick of a fever She was prostrated. Fevers were grevalent about Capernaum, on account of the marshy region near. Acsording to the physician Luke it was "great" fever. Intermittent fever and dysentery, the latter often fatal, ers ordinary Arabian diseases. - Mac-Anon-"Straightway." - R. V. Tell him of her-The mighty cures which Jesus had already wrought pre- for thee. Took her by the hand and Mind her up—Matthew says, "He Mited her up Matthew says, "He (Mark 1. 28), and the femands upon Jesus was God's ideal of manhood.

Southed her hand." This was a token him were great. It was for the tem- Unlike his forerunner, he was not left her-"He willed and it was done. The curative virtue is in Christ's will, mot in instrumentalities." Ministered anto them-Such fevers naturally seave the patient weak and liable to langerous relapses, and much time and care are required to cover the ususi strength. In this case strength was given immediately, and they cured woman went about the household tasks that awaited her. Through the coming of Jesus into the home health came instantly to one who was seriousl vill. Blessings ever attend the presence of Jesus, and happy are they who give him welcome. Cures were sometimes grought by our Lord, which were not instantaneous, as in the case of the blind man whose sight was restored gradually (Mark 8; 22-26); but

usually he healed completely and in-

ctantly.

II. Multitudes healed (vs. 32-34). 32 Even-Evening. Jesus had attended the Sabbath service in the synagogue. The sun had set and the Sabbath was They brought unto him-Since the Pharisees considered it unlawful to carry a bed on the Sabbath, the friends of the sick refrained from bringing them before the close of the Then also it would be coolor than in the heat of the day. Possessed of demons. (R. V.)—A condition in which demons or evil spirits took control of the person to such an extent that he was unable to restrain both showed that the gospel came for himself from acts of violence or wickdness. 33. All the city was gatheredtresses. Two notable miracles had been wrought that day. The cure of the lemonias in the synagogue had astonthed the people beyond measure and the healing of Peter's wife's mother had occasioned great wonderment. reports of these cures spread rapidly shroughout the city, so that by evening the crowds had assembled, bringing those who were afflicted. At the door. The multitudes pressed to the door of Peter's home. They were convince of Jesus' power and willingness to relieve those who were in dis-34. He healed many-Matthew "And healed all that were sick" (8:16), and, connected his work with as, 53; 4, as being the fulfilment of hecy there recorded, and said, it ma bye fulfilled which was speken by Esaias, the prophet, saytvers diseases Many different dis- bid the demons that He cast out to ist could baffle the skill of the great next morning? and he would not permit lips on to lying, to testify to his divis-The works that Jesus perform ity and simplicity of his teachings and his own declara-tions concerning his nature and mission, joined with the testimony from heaven, made clear his defty.

III. Jesus at prayer (v. 35). 35, In the morning-The day following the Sabbath. A great while before day-The fact that Jesus rose thus early in the morning shows how important sary He understood it was and neces for Him to pray. It indicates how great was the burden upon His heart for a lost world. A solitary place-A remarkable feature of the Lake of Gennesarat was that it was closely surrounded with desert solitudes. These desert places, thus close at hand on the table-lands or in the ravines of the eastern and western ranges, gave opportunities of retirement for rest or prayer. —Stanley. And there prayed—His soul craved communion with the Pather that He might carry forward the great work committed to Him. He prayed for the world that He came to redeem. His praying, however, was not wholly on His own account and for His own need, and on behalf of others, but it was an example for us. Prayer is indispensable to the Christian's life. He can not maintain His experience of

saving grace and of heart cleansing without this exercise. He cannot grow in knowledge and love of God without prayer, nor can he be a successful fisher of men unless he is much in prayer. Peter and John and the other disciples were learning of Jesus, being prepared for the great work they were to do for Him, and this example He gave them of frequent and earnest prayer would be of inestimable value to them throughout their ministry. IV. Spreading the Gospel (vs. 36-39). 36. Simon and they that were

with him-With Simon Peter were his brother Andrew and James and John. Followed after him-Jesus had im. Immediately after the casting probably tarried long in prayer, and because the people were desirous of ples whom He had recently called coming to Him, His disciples went in search of Him. 37. Had found Him-They doubtless knew where they would be the most likely to find Him from their acquaintance with His ways in the past. It is well if the followers of Jesus are so given to prayer that those who know them have the knowledge that they are often to be found in that exercise. Jesus was just entering upon His great Galilean ministry and a season of communion with the Father would be a most help- of heaven is a home where Christ ful preparation for it. All men seek reigns. His dominion bars its portais n**arka**ble power in healing and casting out evil spirits had reached the people throughout Galilee of the application of power. The fever poral good that Jesus bould bestow, rather than for the epiritual good that he desired to impart. that the people were seeking Him. 38. Into the next towns-The word "towns" here means "places larger than villages!"-Whedon. Preach there also-His labors must not all be expended upon one community, but He must carry the gospel and its blessings into the regions beyond. This was the first missionary circuit of Jesus through Gaillee. For therefore came I forth -His mission was to do good to the souls and bodies of men. He did not undertake Hie earthly mission for the sake of being held in admiration by the multitudes or to work miracles to eatisfy their curiosity, but to bring them to a knowledge of the only way of salvation. 39. In their synagogues. -He made use of every opportunity to preach the gospel, entering the synagogues scattered here and there. even though the worship was practically lifeless .The law was read, and He was given an opportunity to unfold its epiritual and powerful truths. He could give the true interpretation to the scriptures that were there read to the people and could show that the prophecies concerning the coming of the Messiah were being fulfilled their very presence. A new and weighty responsibility was thus placed upon them. And cast out devils -He both healed the sick (Matt. 4. 23-24) and cast out demons. Divine power was required for either work, and the deliverance of man from his dis-

se send me two bettles of your mixture. I enclose ten cents to packing and mailing. Do this to-day as for a limited time

Spiritual ailments and bodily diseases | veloped, every type of merchant vesse were embraced in the sphere of his purpose and ministry (Psa. 103: 3: Matt. 8: 17).

I. The home. The home was the first divinely-ordained institution among men. It involves the family which was the first relation established in primeval conditions and innocence. It antedates the church and nation and is the foundation of both. Domestic relations precede, and in our present existence are worth more than all other social ties. Both Jesus and the apostles placed special honor upon, and rigidly safeguarded, the sacred relation in which it originates. He graced with his presence and blessed with his benediction the marriage in Cana, and solicitude for its unmarred sweetness called forth the first exercise of his miraculous power and "glory" (John 2: 1-11). Upon the integrity of the home depends the well-being of the race. The perpetuation of the latter under the most favorable conditions of heredity and environment is its first design. The development of character under equal advantages is second. It is the chief school of human virtue. Upon it depends the perpetuity of any nation. Joseph Cook said, "Only the home can found a state. The moral tone of any people is shaped by the home life, and can never rise above its average Its virtue or virus permeates the entire body politic. It is the safeguard of private virtue and of public liberty. The best place to make men of boys and women of girls is here. We should jealously beware of any influence or agency which tends to lower its sacredness or intrude upon its inviolate domain, under whatever insidous guise or disguise it may present itself."

II. Its bulwark. The Christian system recognizes and regulates all human interests. Apart from its teachings and moral force none can attain their best or remain secure. All other restraints prove but feeble barriers in the presence of unleashed passion. Christianity inculcates those principles of authority, obedience, affection and orderliness which are inseparable from an elevated domestic life. It is at once the source and security of all human progress. The sweetest type which Jesus says is equiva lent in its effect upon character to overt violation of its obligations. ascetic. He sanctified all the relations of human life into which it was possible for him to enter, by fulfilling them. In Cana, Capernaum, Bethany and Jerusalem he entered into the domestic and innocent social life of those among whom he went, and he moved as a living benediction among them. Christianity is the bulwark of W. H. C. the home

Work of the Mystery Ship

Of the numerous sideshows of the British Navy during the war of the past four the part played by the "Q" boat or mys-tery ship. The story of the work done by these special vessels, as told by Lieutenant-Comamnder Austen, V. C., who was one of the first officers gazetted to them, truly forms a romantic chapter in Great Britain's naval history. Between them and their opponents, the U-boats, it was a veritable war of "stunt" and camouflage. They were typical tramp steamers from Bristol Channel ports and fitted out for their mission in naval dockyard, in 1915, when the U boat menace was becoming serious. It was not until October of that year that they were ready for their roving com-mission, to decoy and sink enemy submarines. Although they scoured the seas for many months of wearying strain. for many months of wearying strain, without ever sighting their prey, they were ultimately rewarded with conspicuous success. Their task was made none the easier by the knowledge which the Germans had of the types of English merchant ships hailing from the different ports, for many of the men of the enemy craft had been trading with the English ports before the war and were well acquainted with the sort of craft likely to be on a particular stretch of the sea. So, a "Q" boat commander had to be careful to avoid steering a course which would not agree with the appearance of his ship. Once the ene ny's suspicions were aroused, the submarine remained submerged and fired per torpedo at the ship. As the work of the mystery ship de-

me and Mama says even if pape is not along The Little Girl is Right. The WALKER HOUSE Management take special pains in catering to remen and children when travelling The WALKER HOUSE T

upon the seas was pressed into the ser vice; and, concurrently with its develop-ment, the trustfulness of the Germans was changed for distrust and extreme warrness. There was no outward sign in any of the vessels to arouse this distrust, which was the result solely of unpleasant experience which contributed small degree to the success of the "Q" boat service. It was twofold, material and moral. They not only destroyed many U-boats, but by the caution they instilled in the Germans they enabled many merchant vessels to escape which otherwise would have been lost, and they caused the enemy to waste numero costly torpedoes and forced many of their beats back to port and so shortened their period of activity. In fact, the influence of the "Q" boat upon the war must not be measured solely by the actual number of enemy craft sunk, considerable though it was; as the author says, "it was a case of the moral outweighing the material effect of the new warfare."

The most astonishing leature of this campaign was the heroism and unflagging perseverance of the crews, who were all volunteers, eager to meet a submarine and try issues with her. It was veritably a service which demanded a self-restraint and courage which could only be found amidst the surroundings of the sternest discipline. It was only perfect discipline, combined with sporting instinct, which could enable men to put up with dire discomfort, to lie, sometimes for hours under shell fire, often wounded and uttering no complaint; waiting for the supreme moment when they could give the enemy his knockout blow. Under the cloak of apparent gross indiscip-line, these crews, dressed as merchant service men, readily submitted to the most iron discipline, and it seems little short of marvelous how readily "they conditions. Throughout hours of almost unendurable tension and excitement, they preserved their self-control, and, more wonderful still, their sense of humor."
Their spirit will be understood by what one of Lientenant-Commander Austen's men said to a visitor to the Suffolk Coast: "We don't mind explaining the ship to people, sir, but they expect us to talk about ourselves.'

COPPER AND BRONZE.

One of the most interesting discoveries by Egyptologists throws new light on the relative origin of copper and bronze in the Mediterranean countries. At Ortu Commidue, alongside some ancient copper mines of prehistoric age, a foundry has been uncovered with all the furnaces for smelting and molds for casting, just, as !: was abandoned thousands of

STORING VEGETABLES FOR

WINTER. Potatoes, carrots, parsnips, oaila, turnips and other root crops, also canbage, celery, pumpkins, squasae, etc., can be eately stored for use throug'sout the winter.

A cellar under the house or outbuilding makes a good storage plane An outdoor cellar is desirable where the quantity stored is to be large, and banks can be made in the field that will safely carry the crops through the winter.

Pumpkins and winter equasa, requiring dry, warm, storage, will keep in unused rooms or closets.

in the cellar the vegetable storage room must be partitioned off, where the temperature can be controlled and tatilation supplied by an outside window.

Outdoor storage cellars possess all the advantages of the storage room in the basement and are cuperior in many respects. It is possible to keep such a cellar cool and quickly reduce the temperature of the stored products by opening the door during the night and

air becomes warm. The most popular type of storage cellar is built largely underground only the top of the side walls appearing above ground, constructed of wood concrete, stone or brick. The roof should be matched or boa aed up on the inside and also on the outside, the space between well pa ked with sawdust hay or straw and then shingled or given some other kind of a water proof outside covering.

If the roof is to be covered with earth, only one thickness of boards will be necessary, strong enough to support the weight.

Storage in outdoor banks is the least expensive method of keeping many vegetables and is fairly satisfactory, where the ground is well drained. The method does not compare in convenience, however, with storage in cellars since in periods of bad weather the vegetables are often accessible with difficulty.

Do not make the mistake of starting the work by excavating as advised by some of the agricultural departments. Where there are excavations water is likely to get in and start decay and cause serious loss. Accept the advice of one who has stored vegetables out of doors through the most severe winters for thirty years

or more, without loss. Select a well-drained and cover the ground for a foot deep with hav or straw. On this, in a conical or lengitudinal pile place the root crops. hallding up piles not more than three feet high.

Cover the pile with a foot of straw and this with three or four inches of earth. Allow a handful of the straw to protrude through the earth for ventilation. As winter approaches the

earth covering should be increased.

Six to eight inches of earth should be the final amount. Later give this a covering of a foot of straw and another covering of earth and the bank will carry the vegetables through a winter where the temperature goes 25 degrees below zero. Dig a trench around the bank to carry off all surface water.

Vegetables suitable for etorage should not be harvested and stored until cool weather arrives, or about the time of the first killing frost. However, potatoes should be harvested as soon as they reach maturity, and if basement or outdoor cellar storage is available, they should be stored immediately. They should not be stored in banks or pits until the weather gets cool. Onions should be put in storage as soon as they are matured and thoroughly cured or dried. WINTER STORAGE OF SQUASH.

Squash to be carried successfully in storage must be well matured and free from bruises, broken stems, cuts or frost injury. If one disposes of the well-colored, best matured squash and tries to keep those not well ripened, failure is likely to result under the most favorable storage conditions. A squash may be sufficiently matured for immediate use, but not be suitable for storage. In selecting forstorage, therefore, pick out those which have had the longest period of growth, and just here it might be said that to get a large proportion of the crop for storage, due attention must be given to having the plants started early. It is well also to turn the squash occasionally when growing in order to develop a hard shell on all sides. They should be handled carefully and placed immediately in a well-ventilated, dry, warm room with a temperature around 80 degrees until the shelfs and hard and dry, and then removed to a cool but dry, light and well-ventilated room. Under such conditions we have been able to keep squash until spring in perfect condition.-W. S. Blair. Superintendent. Experimental Station, Kentville, N.S.
