THE MUTUAL LIFE OF CANADA

DIVIDENDS

Our Annual Dividend Policy is the "last word" in life insurance. If the dividends are used to reduce premiums the substantial reduction of the second and subsequent premiums is "felt in your pocket."

If the dividends are accumulated under the P. and M. method they provide for the early maturity of your policy and in the event of prior decease, the accumulated profits and interest are added to your estate, for example:

Under the P. and M. method Ordinary Life Policies have become fully-paid up life policies in from eighteen to twenty-five years, according to age, thereafter receiving annual cash profits. Ordinary life policies have also matured as endowments.

Twenty-Payment Life Policies have become fully paid up in less than fifteen years, receiving annual cash profits thereafter. They have also matured as endowments.

Endowment Policies have been paid in cash several years earlier than the date set forth in the contract.
