The Product of Experience

AT first sight the Chevrolet "FB 50" inspires confidence—confidence that grows with intimacy.

And there's nothing more gratifying than the knowledge that its convenience and unusual comfort are costing you a minimum of expense.

CONSTIPATION

By the term CONSTIPATION is meant either infrequent, difficult or insufficient evacuation of the contents of the Lower Bowel.

The Symptoms are Headache, Dizziness, Mental Sluggishness, Lack of Concentration, Lassitude or a feeling of General Indisposition, Bad Breath, Coated Tongue, Loss of Appetite, Sallow Skin which may become dry and rough and Pimples may appear. Sometimes there is Heart Palpitation, Hysterical Spells and Nervous Exhaustion.

IT IS IMPORTANT to treat Constipation promptly as this condition generally leads to many serious disorders.

Careful judgment should be used in selecting a proper remedy; ordinary Cathartics and Laxatives have a weakening effect upon the system, others Grip and Purge and Mineral Oils, if taken several times a day may retard secretion of the gastric juice and also interfere with the absorption of food. HACKING'S KIDNEY AND LIVER PILLS form an ideal tonic-laxative for Constipation and its evil results.

We give herewith the medicinal action of the ingredients of HACKING'S KIDNEY AND LIVER PILLS in order that you may form your own opinion as to the value of this wonderful medicine.

CASCARA—Laxative, Cathartic, Tonic to the Liver and Intestines, does not cause Gripping or unpleasant symptoms, good for Chronic Constipation when used in small and repeated doses for a considerable period of time.

MAY APPLE—Useful in Fevers and Inflammations of almost every type and for all disorders of the Liver and Spleen. For Indigestion, Jaundice, Piles, Constipation, Dropsy and Skin Eruptions.

CULVERT'S ROOT—A Laxative and Tonic, useful in Dyspepsia, Jaundice, Piles, Diarrhoea, Dysentery, Cholera. Corrects Liver Troubles. Gives tone and vigor of action to the entire secretive apparatus of the system. Also for Inflammation of the Bladder.

GAMBOGE—Used in Obstinate Constipation and Dropsies attended.

These are the principal ingredients of Hacking's Kidney and Liver pills, you will find that this combination will produce a healthy condition of the Stomach, Liver, Kidneys and Bowels.

No other drugs or combination of drugs, oils, laxatives, pills or purgatives will have such beneficial effect as HACKING'S KIDNEY AND LIVER PILLS, but you must be sure to get HACKING'S as no other kind will do. Price 35c a box, 5 for \$1.00. Sold by all dealers or by mail. Hacking's Limited, Listowel.

with Intestinal Torpidity. This acts best when used in combination with other drugs and herbs.

HYOSCYAMUS—Helpful to the Kidneys, stops pain, soothes the Nerves, lessens irritability of the Nerve Centres. For Functional Palpitation of the Heart, helpful to the Mucus Membrane of the Kidneys and Bowels. Chiefly employed to relieve pain and to quiet Nervous excitement.

CAPSICUM—Stimulant and Stomachic, useful in Feeble and Languid Digestion, Dyspepsia, Atonic Gout, Colic and Cholera.

PEPPERMINT—Useful in Flatulent Colic to check Nausea and Colic. For Spasmodic Pains of the Stomach and Bowels, for Neuralgia and Rheumatism, prevents griping and for gas on the stomach.

CHOOSING LUBRICANTS

Practical Advice Regarding Use of Machine Oils.

They Should Possess the Qualities of Adhesion and Cohesion—Mineral, Vegetable and Fish Oils All In Use—Planting Potatoes for Seed.

(Contributed by Ontario Department of Agriculture, Toronto.)

WHILE possibly every care and attention is given to the mechanism of farm machinery, few, if any, give consideration to the quality of the lubricants used.

The efficiency of any power is seriously affected by poor or improper lubrication of surfaces in frictional contact, indeed, it is estimated at about 50 per cent. of the available amount of energy in useful work.

The object of lubrication is not only to reduce friction, but also to carry away whatever excess of heat may be generated, for a certain amount of work will produce a given quantity of heat, but the carrying away of the heat is only an incidental condition, for heating of the bearing should not arise.

Oils for lubricating purposes should possess two qualities—that of cohesion and adhesion. Their cohesive properties lie in the character of their molecules to cling to each other, and their adhesive quality to stick to anything else. The union of these two properties make up what is known as viscosity, that is the body of the lubricant. This in a greater degree than any other factor determines the lubricating value of the oils. While viscosity of an oil determines its value as a lubricant, fluidity indicates its adaptability to any one particular machine. It is because of the struggle between viscosity and fluidity that the same oil will not do for the heavy engine shaft, and for light weight machinery. Each requires an oil with just sufficient "body" to carry the load without being squeezed out of the bearing. Beyond this condition the more fluid and easier moving the oil the better.

A thick lubricating film of good residual body is needed for the inner shaft of an ocean liner, but a drop of the same oil would put a watch out of commission.

Practically all the lubricants now in use are of the mineral oil foundation treated to free them from acid, and to improve their suitability for special purposes. Sperm oil is especially good for high speed light machinery; for heavy bearings castor oil, but both are expensive. For great pressure at slow speed lard, tallow, and other solid lubricants are suitable. If pressure is great, and speed high, castor, sperm, and heavy mineral oils are used. For low pressure at high speed, olive, sperm, rape and refined petroleum give satisfaction.

Vegetable and fish oils are drying oils, that is, they oxidize rapidly causing gumming or clogging of the bearings to which they are applied. A mineral oil does not oxidize, neither does an animal oil. But mineral oils have a low flash point; that is, they fire at a low temperature. Animal oils develop fatty acids; these corrode and pit the metal they are used to lubricate.

Adulterants of various kinds are added to oils and greases to give them "body." Gum, soap, lime, resin, tar, soda and low acid all have their own distinct purposes. Simple tests may be applied to lubricants for quality and viscosity. To test for acid saturate a bit of cotton waste with the suspected oil, and lay it open upon the surface of polished iron or brass for twenty-four hours. If it does not even a slight corrosion or, if the brass turns green, free acid is present. To test for gummy adulterants place a drop of oil upon a piece of glass inclined at such an angle as to permit it to flow gently down. If any gum, resins or other viscosity producing elements are present they will be apparent by the color of the oil streak, as the adulterants deposit themselves upon the glass in the form of sediment.

A good quality of lubricant will not break down, when rubbed between the finger tips, as quickly, as a poor one.

It would be economy in three ways at least to use two different kinds of oil; economy of power, of machine wear, and of oil, and in addition there would be greater efficiency. Jao. Evans, O. A. College, Guelph.

Planting Potatoes for Seed.

This refers entirely to the production of seed potatoes; not those intended for human consumption. The growing of seed potatoes is better divided into two sections, the early and the late. For growing early potatoes of the Irish Cobbler variety the seed should be selected true to type and free as possible from any of the various diseases which affect the potato plant or tuber. These should be from 8 to 12 ounces in weight and cut up into pieces 2 to the piece. They are planted about the 10th of June and are given every possible cultivation with the soil in a state of high fertility; better having been clover sod well fertilized with barnyard manure to which has been added a considerable quantity of commercial fertilizer, about 300 lbs. per acre. Thorough spraying to control leaf diseases and the Colorado Beetle should be given throughout the season. For the late seed the Green Mountain or Rural New Yorker is used. The planting is generally done about June 1st to June 5th under similar conditions to the former. In all cases it is necessary to select a soil that does not dry out during the summer time, as potatoes for seed should not be subjected to a check at any time during their growing period.

An abundance of water is absolutely essential for thrift.

Remember! At Our Expense! Special One Week Price-Breaking Sale of Men's and Young Men's Suits at the uniform prices of

\$29 - and - \$39

Straight from our \$35 and \$45 piles and what's not sold at \$29 by Saturday, May 8th, will be \$35 and \$45 again Monday morning, May 10th.

In a nut shell, for one week at \$29 you can buy better suits than nine men's Clothing stores out of ten sell for \$35 and \$40.

For one week at \$39 you can buy better suits than nine clothing stores out of ten sell for \$45 and \$50.

Fine goods are scarce. Production is slow. Prices are high. Prospects are higher. But there is one thing still higher than anything else, and that is our determination to fight relentlessly till we can bring about a restoration of normal conditions in the clothing business. We want to break prices and we are willing to pay for the privilege. In former years we have been able to have a May Clothing Sale by resourceful and forehanded buying. But this season it has taken forehanded buying to maintain the low level of our regular prices. So our only alternative was to take a loss on some of our regular Stock or forget it, but we never forget—and the public never forgets—and their going to remember this one week Clothing Sale longer than any of its predecessors, because, it when it represents a man-to-man sacrifice between us and our patrons.

The Fact Is: The opportunity for holding this sale is as poor as the public need of it is great, and that is why we are sacrificing a limited quantity of our regular stock rather than disappoint the hundreds of men who are looking for us to do something.

The suits comprise all the kinds that we are selling, and all the kinds the people are wearing. Therefore, further details are unnecessary.

Sale Opens Saturday morning at 9 O'clock. The H. S. Falls Co.
