JARVIS REPAIR and SUPPLY GARAGE

REPAIRS FOR FORD CARS

These will save you a lot of trouble and repair bills.

3-4 V. 2 c.p. single and double connection.
6-8 V. 2 c.p. single and double connection.
6-8 V. 15 c.p. Mazda, double connection.
6-8 V. 20 c.p. Mazda, double connection.
9 V. 18 c.p. Mazda, double connection.
9 V. 27 p.c. Mazda, double connection.
18-24 V. 2 c.p. single connection for Ford double bulb tail lights.

RE PUMPS

We handle the Rose Tire Pump which will not leak and puts all the air in the tire

E. W. ANDERSON-- ON THE CORNER

Traditions of Islam.

The Bedouin tribes of North Africa are perhaps as impervious to the influence of modern civilization as any people in the world. Since the French took control of North Africa these tribes have been, supposedly, under military discipline and guardianship, but they have maintained their own tribal organizations and almost complete independence, so far as their actual lives are concerned.

They follow the traditions of Islam and their dwellings, their furnishings (which are few and far between) and their clothing date back to the days of the Bible.

A Wedding.

The bride-elect had been showing her presents to a party of admiring friends. "And I've got such a good idea," she gushed, "I'm so afraid people will get over me, I'm away married that I'll never see you again, that when I was at the altar, I thought I'd better tell you something, just in case I should not see you again, except in heaven." A sympathetic friend shook her head. "Don't," she said in tones of sad wisdom. "I tried that plan -- and my husband never got over it!"

His Motive.

"How modestly she dresses, and how sensibly!" "Yes, that woman will do anything to attract attention."

We have the Furniture

At Falls---don't say Have you got it; just say 'Show it to me'

Furniture Department these days are of two kinds. In one, you say, **HAVE YOU GOT SO, AND SO,** and sometimes they say **Yes,** but sometimes they say **No.** In Falls you just say, **SHOW ME SO-AND-SO,** and we show it to you. **NO APOLOGIES, NO EXCUSES** or evasions, whatever kind of Furniture you want, for whatever room in your home, we have it Falls and it looks very much as though it is very much to your interest to come to Falls if you have a Furniture requirement. The Past year we have sent thousands of dollars worth of Furniture to points listed below. It speaks for itself—

Walsingham Centre	Brantford	Forestville
Fairground	Port Arthur	Walsh
Tyrell	Sarnia	Victoria
Nelles Corners	North Bay	Port Dover
Cakville	Sq'rathroy	Lynn Valley
Owen Sound	Kitchner	Selkirk
Currie	Galt	Fisherville
Wilsonville	Guelph	Cayuga
Dundurn	Osterville	Hagersville
Dundas	St. Thomas	Caledonia
Carlyle, Sask.	Paris	Mount Zion
Copper Cliff	Drumbo	St. George
Gore Bay	Mt. Pleasant	Ingersol
Winnipeg	Oakland	Marburg
Welland	Yilla Nova	Nanticoke
St. Catharines	Windham Centre	Pt. Ryerse
Hamilton	Delhi	Fisher's Glen
Toronto	Jarvis	Fort William
Ottawa	Renton	Silverhill
London	Nixon	Norwich
Leamington	Courland	La Sallette
Woodstock	Tillsonburg	Vanessa
Chatham	Wallaceburg	Lynville
Longwood	Port Rowan	Lyndock
Cedar Hurst	St. Williams	Langton
Boston	Scotland	

"The old days never come back again—because they would be getting in the way of the New Better Day—whose turn it is.—John Brown."

This Season's Goods must be sold this season. These are Stock Taking Days, Days of opportunities throughout every department of the Store—Take Advantage.

Women's Winter Coats

The January Sale of Women's Winter Coats in Stock Now and on the way

Reduced in a rising market from prices that have been under the market all the season long. Saturday we begin a sale of Women's Coats and mark down prices which have never been market worth. The applies not only to our present stocks of Women's Winter Coats but to belated deliveries of coats now in transit. Nothing that we could possibly say to you could furnish a better demonstration of what a really splendid opportunity there is for you in this remarkable sale

The finest \$75 to \$85 Coats are reduced.
The finest \$65 to \$70 Coats are reduced.
The finest \$50 to \$60 Coats are reduced.
The finest \$40 to \$45 Coats are reduced.
Even the \$25, \$30 and \$35 Coats are reduced.

A SEAT OF CANADIAN LEARNING

Rabbits Inoculated and Rendered Immune against Influenza under Observation by Dr. G. B. Reid and Assistants, at Queen's University, Kingston

Assay Furnaces under Prof. G. F. Mackay in operation in Metallurgical Building.

The installation of a new Chancellor and a new Principal on the same date will bring a great many distinguished Canadians and Americans to Queen's University Kingston, on October thirteenth. For although a comparatively small University, Queen's has sent so many distinguished graduates into the world and has gained such a character for sound learning and enterprise in research and education, that it stands high among the institutions of its kind on this Continent.

Queen's came to the front under Principal Grant who was a born leader of men and gathered round him a brilliant staff of lecturers and professors. Under Principal Gordon, who succeeded Grant, the University continued to prosper and the number of students doubled while the number of buildings was trebled. The new Principal, Dr. Bruce Taylor, has already shown his mettle by raising the half million dollars required to fulfil the terms of an endowment of a further half million dollars promised by the late Dr. Douglas. With a young and active new Chancellor such as Mr. E. W. Reatty, President of the Canadian

Pacific Railway, to lend his support, Queen's has every reason to expect to continue to go ahead.

Recognizing the importance of industry to Canadian development, Queen's has carried on important industrial research work, and Mr. G. F. Mackay, the popular Registrar, has contributed \$50,000 to the endowment of a Research Chair.

Professor Clark, who holds the Chair of Physics, has established a laboratory for the investigation of substances under extremely low temperatures, with the use of liquid air and liquid hydrogen, the only laboratory of its kind in North America. Dr. Reid has been investigating the causes and suggested cures for influenza, and has made valuable discoveries tending to combat the recurrence of future epidemics. Professor MacClemens is an expert on the noxious fungi which would destroy our great Canadian forests if left to themselves. Dr. Lathrop has been carrying on valuable research work on trench nephritis, with the object of discovering the true nature of this curious disease of the European battlefields.

The Arts Faculty of the Queen's

is conducted by Professors, who in their own fields of work are just as enterprising and the same or better with a Queen's degree has an excellent chance of succeeding in whatever learned profession he or she may adopt. During the year 1918-19 there were 381 students registered in the Arts Faculty. Special efforts were made by all faculties to meet the requirements of returned soldiers whose education had been interrupted by the war. A Summer School of learning restricted to men who had been overseas, saved an academic year to a large number of such returned men and was conducted without Government assistance at the expense of the University itself.

For the last three years the new Arts building and the Grant Hall have been used as a hospital by the military authorities, and there has been abundant testimony to the satisfaction that the patients have felt in being housed so well amid such beautiful surroundings. The soldier patients are now transferred elsewhere, releasing the class room space for the growing requirements of the University.

HUNTING WHALES.

Traveler Tells About an interesting experience.

"It was a week when I came on deck and the sun was just rising out of the sea, a great red ball of fire. The man in the 'barrel' at the mast-head was scolding about watching the water about. Suddenly he clapped his hands to his eyes, raised his head and shouted excitedly. 'There's a whale!' writes Roy Chapman Andrews in Asia. I jumped as though a bomb had been exploded on the bridge and whirled around just in time to see a silvery whale's back about up almost to the top of the mast. It hung a moment in the air, then drifted away in the wind, just as two other white whales came out of the water near the mainmast. I saw three more whales in the distance. The Main Mast was in the hollow of the ship. Suddenly the crew were ordered to back the mainmast forward. The mainmast leaped forward, the ship began to swing, and heaved up. The whale had reached the surface, but the water where the engine had been was swinging in a great circle. Suddenly three white whales shot up about a quarter of a mile away. The engine-room bell of heavy metal, and the vessel kept through the water at full speed. The whales came up astern next time and we swung about to intercept them, but they spouted only once and slipped under water and headed towards the beach. The Main Mast was now twisting and writhing about as though possessed of a demon. We circled about, each time coming closer to the whales, but the animals were still heading for the rocks not more than half a mile away.

Then something happened which made me forget my seasickness and the cold and the wind. The man in the 'barrel' with both hands to his mouth was following 'Takamatsu Takamatsu!' and pointed wildly out to sea. Melson wheeled around, his face red with excitement and shouted: 'Killers! Now we'll get 'em. The killers are coming. Stand by and you'll see some fun.'

I jumped on the gun platform by the side of the captain and when the ship rose to the crest of a huge billow we saw half a dozen scythe-like black fins cutting the water in streaks of white foam. On they came, six abreast, their high dorsals aloft like the standards over a charging cavalry troop. They were the dreaded killer whales, the savage sea wolves, which hunt in packs and are the terror of everything that swims.

Just then the gray whales spouted two hundred fathoms away. The killers darted forward after the gray whales like bloodhounds. They seemed literally to fly through the water toward their victims, who were now blowing lazily. Suddenly one of the gray whales spied the killers, and hurling his gigantic body half out of the water, he turned head-down in a long dive. The others followed, but by this time the racing killers had nearly reached them and all went down together. The ship was running at full speed in the wake of the whales, but lay to with engines stopped at the spot. We hovered for fifteen minutes over the spot where the killers went down, the Main rolling drunkenly on the swell. About fifty fathoms off the water was beginning to smooth itself into a glassy green patch within two circles described by the animals swimming just beneath the surface. A devil fish shot to the surface followed by two killers. The huge black whale thrust itself half clear of the water, falling back in a shower of spray as the killer dashed for its head. The devil-fish twisted about, thrashed the water with its ponderous flukes, tried to dive and escape, but the killer closed in on it.

Instantly it rolled to the surface, this time almost under the bows of the ship. I saw the captain bend over the gun, the tip of the harpoon drop a little, and the next instant a blinding cloud of vapor shot into our faces. The blast of the gun was deafening. Through the clearing cloud of smoke I saw black flukes hurled out of the sea, and the devil fish fell back with a tremendous, smashing blow upon the water. Then the gigantic figure quivered, straightened out, and slowly sank. For a moment there was not a sound on the ship save the measured 'dop, dop, dop' of the line on the deck as the dead weight of forty tons dragged it from the winch. The killers had disappeared at the flash of the gun, but before the winch brought the carcass of the devil fish to the surface we saw all six of them in full pursuit of the other two gray whales which were racing for the shore. I tried to follow them with my glasses, but they were lost in the surf and I never saw them again.

A Chinese Superstition.

It is not at all uncommon for the dead bodies of Chinese infants to be cast away, instead of being buried. The charitable explanation is that this is done to save burial expenses. The true reason, however, is said to be the deep-rooted superstitious belief among them that the death of a baby arises out of punishment to its soul for sins committed in a previous state of existence. It is an accursed creature, whose coffin no one will follow. It is, therefore, a common sight in China to see dying babies laid down by the roadside to break their last journey.

The parents will not allow them to die in the house, the belief being that infants, after their death, become wicked spirits. To allow them to die under the parents' roof will bring nothing but evil upon the family.—Tit-Bits.

Soap from Oil-bearing Nut?

Government scientists in the Philippines are investigating the soap-making possibilities of an oil-bearing nut that has been discovered there.
