## Experimental Farm Notes

### WINTER CARE AND REPAIR OF FARM MACHINERY

"Let him use more machinery than," is the stock phrase and counsel prescribed by the "know-it-all" of the farmer's labour problem. This is just what he has been doing for a generation or ever since city wages were distinctly higher than those upon the farm. To-day machinery has doubled in cost because it does not grow upon the land by the frequency of sunlight like crops but is made in cities and by labour that exacts far more than the farmer's wage. Thus there is a limit to the machinery the farmer can afford to buy and to the extent to which he can substitute machinery for expensive labour. In other words machinery is now expensive labour.

Farmers, therefore, are going to house their machinery in some way since the life of an implement will extend for a longer time if it is stored in the best possible condition. An engine farmer will not allow his horse to grow to stand out in the rain or snow. He will not get his tractor on the ground on time and in the best possible condition and he will gather his harvest promptly and carefully so that there is the least possible loss. Many of us will do all these things and still allow a part of the oil engine revenue to be swallowed up in the purchase of sky-scraping and machinery or in expensive repairs.

See to it that each implement wears out and does not rust out. Every one knows that that it should be housed, but housing under any condition and not properly caring for it otherwise, constitute very poor care. Machinery may be just as well cared for if it is allowed to stand in the shade of a tree as if it is stored in some of the leaky sheds, open sheds, poorly drained sheds or combined implement sheds and hen roosts which are found.

Do not merely go through the motions but shelter considerably and before doing so, first list the repairs needed for next season and secure them along with an assortment of bolts, rivets, springs etc., in time to have each implement repaired and ready for use on time. An implement repaired at all times will have a longer life and will give more satisfactory service during its life than one receiving irregular attention. Secondly clean and oil each machine and give all polished surfaces an application of some anti-rust preparation. Axle grease or other lubricant will answer the purpose.

Another "critter" occupies space in the implement shed, the twenty-four-hour-day-iron horse or tractor has arrived on the farm. To insure more efficient use of this implement next season there are two things that should be given special attention. First, take steps to put it in the best possible condition now, and secondly learn as much as possible about the fundamentals of tractor operation. Read carefully the instruction book; newspapers, books and magazine articles also furnish a wealth of information. If possible attend one of the tractor schools which will be conducted during the winter. Leave nothing undone that will fit you to become a more proficient tractor operator.

A properly fitted work shop is a necessity on most farms. It provides a means of repairing the "knack" in doing repair work. Again at critical times, such as harvesting or a cold season, one long trip to town for repairs may cause a loss more than equal to the value of a well equipped shop.

Paint although last mentioned is by no means the least important factor in prolonging the usefulness of an implement. Painted machinery on the farm is an expense rather than a general rule. The chief utility of paint is in protecting materials rather than improving appearance. Paint of good quality only should be used and the surface to be painted should be dry and clean before the paint is applied.

## Square Deal Store

The Greatest Word in Groceries

### "VALUE"

Value means the best quality and the largest quantity for the least price. In opening this grocery store it will be our aim to live up to this motto.

We have bought our stock right and it is our intention to keep it to the highest possible standard.

We are seeking a fair portion of your valued trade and trust that our solicitation will meet with your approval.

We are handling the best of everything in the grocery line.

### The Calendar.

The month of January always begins on the same day of the week as October and the same is true of April and July, September and December. February, March and November also begin on the same day of the week. This, however, is only true in normal years of 365 days. A century can never begin on Wednesday, Friday or Saturday. Furthermore, the ordinary year ends on the same day of the week as that on which it begins.

### Speedy.

"Yes, in teaching stenography, we are strong on accuracy," said the business college professor. "How are you on speed?" "Well, the last girl we graduated married her employer in three weeks."

### Rod and Gun

"That Race at Les Rapides" is the title of a thrilling story of the North Country written by William MacMillan which appears in Canada's premier sportsmen's magazine, Rod and Gun in Canada for January. Another interesting narrative is entitled, "The Legend of the Buried Run"; this deals with the rain traffic of the famous Hudsons Bay Company in Temagami. Bunycastle Dale, best known natural history writer in Canada, contributes his usual monthly article, telling with pen and picture the story of the natural life on the Atlantic Coast. Fishing through the ice is a wholesome winter sport that very few people enjoy through lack of knowledge—Robert Page Lincoln has a descriptive article telling of the fine points of the game in this magazine. For the gun "crank" there is the usual high grade Department with a special article dealing with all the latest goods on the market. Rod and Gun in Canada is published by W. J. Taylor, Limited, at Woodstock, Ont.

### ANNIVERSARY

The Anniversary of Knox Church, Jarvis, will be held (D. V.), on Sunday, February 1. The services will be taken by the Rev. J. A. Wilson, B. A., of St. Andrew's Church, Hamilton. Rev. Wilson is minister of one of the largest churches in Hamilton. Mrs. Howard, one of Hamilton's leading soprano soloists will assist the choir.

### Old Veteran Shop

I DESIRE to announce to the people of Jarvis and vicinity that I will start a Butcher Shop on Talbot Street, East, on Saturday, Nov. 29. I will handle a complete line of fresh Meats.

What the Brunswick Method of Reproduction Means to You

BRIEFLY, it brings two great exclusive features.

First, the Ultona, a new conception for playing all records at their best. Just a turn of the hand means the correct position on the record, the proper diaphragm and needle for every make.

Second, the All-Wood Tone Amplifier built-up on the violin principle.

Tones hitherto lost are brought out in rich clarity by these exclusive Brunswick features.

Hear The Brunswick before you buy or even make a tentative decision. Doing so will not place you under the slightest obligation.
