

Great Britain's Recovery

In spite of the fact that Great Britain's imports during March totalled £127,000,000, which was an increase of £5,000,000 over the preceding month and included £58,000,000 worth of raw cotton, its excess of imports over exports for the month dropped sharply to a new low figure, amounting to only £28,000,000. In February the United Kingdom's unfavorable visible trade balance was more than double this, or nearly £62,000,000.

The exceptionally good showing made by the British foreign trade figures for March thus is seen not to be the result of decreased imports, but rather to the new high record of its exports, which totalled £149,000,000 in March, as against £109,000,000 during the month preceding. The March exports, moreover, included a high percentage—namely, £122,000,000 worth—of strictly British goods, indicating the extent of the revival in British industries. Re-exports for the month amounted to £27,000,000, which also is a heavy increase over previous months and is equally significant of the progress being made by the United Kingdom on its efforts to recover its old-time supremacy as a market place for the world.

The fact that England is contriving

Vegetables in New Ways

When you get tired of vegetables cooked in the same old way, try these variations on your kitchen range, and see how very different they will taste to the family.

Slice large Bermuda onions into thin slices. Roll first in egg then cracker-crumbs and fry a golden brown in bacon fat. Put a border of them around the Hamburg steak balls the next time you serve them.

Saratoga onions are another delicious accompaniment to this rather plebeian dish. Get three large, white onions and slice them just as thinly as possible, keeping the rings whole. Soak in milk for 15 minutes, drain and dry on a cloth. Put a few rings at a time in the frying basket and fry a delicate golden brown. Drain on brown paper and fry more until all are done. Dust with salt and serve very hot.

DRINKS FOR HOT WEATHER

In making cold beverages it should be remembered that they are always much better if put together with a sugar syrup instead of using plain sugar. This provides a rich, smooth sweetening, and as the syrup can be prepared in advance and "canned" ready for use, a jar or two should stand ready on the pantry shelf for the making of these delightful summer beverages.

PLAIN SUGAR SYRUP.
Boil together for five minutes two quarts of water and six pounds of granulated sugar; then can as for fruit in hot sterilized jars. Allow one tablespoonful of the syrup to a glassful in sweetening any fresh fruit beverage.

LOGANBERRYADE.
Use one quart of loganberry juice and add the juice of two lemons, one sliced orange, sufficient of the syrup to sweeten and dilute to taste with chilled carbonated water, poured from a height. Pour into tall glasses, half filled with cracked ice.

TURKISH PUNCH.
Rub a quart can of apricots through a puree sieve, and add half a cupful of the sugar syrup, the juice drained

from the apricots, the juice of one orange and one lemon, two cupfuls of canned apple juice or cider, one quart of chilled water and a pint of cracked ice. Serve with straw.

GRAPE CUP.
Place in a large bowl one cupful of strained tea, three-quarters of a cupful of the sugar syrup and the juice of two oranges and two lemons. Stand on the ice for three or four hours to ripen and when ready to serve add one quart of unfermented grape juice, a bouquet of fresh mint and a pint of chilled whisky. Pour slowly over a small block of ice that has been placed in a punch bowl.

GINGER ALE FRAPPE.
This is delicious and well worthy to serve as a party beverage. Mix together a pint of large strawberries, cut in halves, add the juice of one orange, one lemon and a small cupful of the sugar syrup. Chill on the ice, turn into a punch bowl, place a quart over enough iced ginger ale to nearly cover the ice. Serve immediately in sherbet cups.

DR. WARD The Specialist

Men, Are You in Doubt?
As to your trouble? Have you some skin eruption that is stubborn, has resisted treatment? Is there a nervous condition which does not improve in spite of rest, diet and medicine? Are you going down hill steadily? ARE YOU NERVOUS and despondent, weak and debilitated; tired mornings; no ambition—lifeless; memory gone; easily fatigued; excitable and irritable; lack of energy and confidence? Is there falling power, a drain on the system? Consult the old reliable specialists.

SYMPTOMS OF VARIOUS AILMENTS.
Weak and relaxed state of the body, nervousness, despondency, poor memory, lack of will power, dizziness, irritable disposition, diminished power of application, energy and concentration, fear of impending danger or misfortune, drowsiness and tendency to sleep, unrefreshing sleep, dark rings under eyes, loss of weight, insomnia. Dr. Ward gives you the benefit of 25 years' continuous practice in the treatment of all chronic, nervous, blood and skin diseases. The above symptoms, and many others not mentioned, show plainly that something is wrong with your physical condition and that you need expert attention.

Dr. Ward's Methods Unrivaled, Thorough and Permanent.
Do you realize that you have only one life to live—do you realize that you are missing most of that life by ill health? A life worth living is a healthy life. Neglect of one's health has put many a man in his grave.
I have been telling men these things for many years but still there are thousands of victims who, for various reasons, have not had the good sense to come and get well.
Specialist in the treatment of nervous conditions, nervous exhaustion, headache, lumbago, rheumatism, stomach and liver trouble, acne, skin diseases, catarrh, asthma, rectal troubles, piles, fistula and blood conditions.

GRIT OF A SHARPSHOOTER.

Sergeant Halliwell's Feat at the Siege of Lucknow.

During the siege of Lucknow in the Indian mutiny there was afforded what was probably the most notable instance of the record in war of a crack shot.

The rebels were endeavoring to mount two eighteen-pounders, which they had hauled up to the flat roof of one of the palaces surrounding the city, and it was necessary to prevent this being done, or they would have been able to pour down a heavy fire on the defenders. Sergeant Halliwell was chosen for this duty. He was a crack shot of the Thirty-second Foot. Being given the best rifle that could be found, his orders were to prevent

the guns being mounted. He took up his position behind some battered masonry where there was only cover for him to lie at full length. His only chance was to roll over from his back to his stomach. His eyes were ever kept on the dismounted guns, and whenever the Sepoys attempted to mount them his unerring rifle played havoc among them and prevented their object being accomplished. Food was brought to him at night by men who crawled to his position.

After some time a sortie was made, and the Sepoys were defeated. For this brave work Sergeant Halliwell received the Victoria Cross.—Harper's Weekly.

The longest time during which a note has remained outside the Bank of England is 113 years. It was one of £25, and it is computed that the compound interest during that long period amounted to no less than £6,000.

MERELY SUGGESTIONS.
The Busy House Wife May Here Find Some Labor-saving Ideas.
It is the duty of the busy housekeeper to try to arrange everything so as to save her steps. So, keep tissue and wrapping paper and string neatly folded in the dresser.

Large paper bags are nice to put scraps of paper in—torn pieces—before consigning to the trash barrel; then these scraps will not fly all over the street when the trash man carelessly empties this same barrel.

Thin Turkish towels are nice for use in bathroom, pantry and kitchen. They keep their color, and do not require the extra work of ironing.

Cotton crepe, cut into towel lengths, and hemmed after two or three washings, are fine for glass drying.

Soft old ticking cut into convenient sizes and "nicked" edges are excellent for stove and oven use, and old silk stockings legs sewed together, size about six inches square, are about the nicest lifters or holders imaginable.

Housewifely Bits.
The larger a loaf of cake, the lower the temperature of the oven should be.
Add a half package of dates, cut in small pieces, to a caramel pudding mixture.
After meals wipe butter plates with scraps of waxed paper and save for pans.

OF INTEREST TO WOMEN

Single women, as a rule, live longer than single men.

Women employed in the textile industry of Italy receive equal pay with men for equal work.

For the first time in the history of the Medical College of New York University women have been enrolled for graduation.

In Ceylon, instead of using the wedding ring, the form of marriage is by binding together the thumbs of bride and bridegroom.

In Denmark it is the rule rather than the exception for the married woman to be economically independent through her own labors.

In order to be in a better position to deal with the servant problem housewives of Asheville, N. C., have taken steps to form a union.

Among the women of Morocco birthday celebrations are unknown. A Moorish woman considers it a point of honor to be absolutely ignorant of her age.

The real name of Nance O'Neil, the well-known actress, is Gertrude Lamson. It was McKee Rankin, who chose her stage name. It is a combination of those of Nance Oldfield and Eliza O'Neil, famous eighteenth century actresses in England.

One of the most curious and lucrative trades for women in France is that of wine-taster. The most expert, those capable of detecting adulteration, recognizing blends, and declaring the age of wines with unerring accuracy, sometimes earn as for much as \$30,000 a year.

The natives of Calabar, West Africa, have a curious custom of preparing their women for marriage. When a girl reaches the age of fourteen to sixteen the parents begin their preparations. The natives' idea of beauty in their brides is stoniness—the stouter a girl is the more beautiful and charming she is in the bridegroom's eyes. Therefore for at least four months she is made to live in a small room in a mud house, and not allowed any exercise of any kind. She is fed at any and every minute of the day that she can possibly eat. The heavy, heavy-looking girl who was enclosed four months earlier emerges with difficulty at the end of the period, a huge woman, reminding one very forcibly of the fat woman in the circus.

A Hymn of Empire.

Lord, by Whose Might the Heavens stand,
The Source from Whom they came,
Who holdest nations in Thy hand,
And call'st the stars by name,
Thine ageless orders do not cease
To mould us as of yore.
The chiseling of the arts of peace,
The anvil strokes of war,
Then bind our realms in brotherhood,
Firm laws and equal rights,
Let each uphold the Empire's good
freedom that unites;
And make that speech whose thunder rolls
Down the broad stream of time,
The harbinger from pole to pole
Of love and peace sublime.
Strong are we? Make us stronger yet;
Great! Make us greater far;
Our feet antarctic oceans fret,
Our crown the polar star;
Round earth's wild coasts our batteries speak,
Our highway is the main,
We stand as guardians of the weak,
We burst the oppressor's chain.
Great God, uphold us in our task,
Keep pure and clean our rule,
Silence the honeyed words which mask
The wisdom of the fool.
The pillars of the world are Thine,
Pour down Thy bounteous grace,
And make illustrious and divine
The sceptre of our race.

Who Sneezing Was a Bad Omen.

Sneezing from remote times has been held ominous. Our forefathers while putting on their shoes, a sneeze to the right was deemed lucky; to the left of evil. To sneeze near a burial place was unlucky.
