SALADA

Club-Root of Turnips, Cabbage, Etc.

Club-root of turnips and related plants causes a considerable loss in the eastern provinces. Diseased roots are greatly swollen, distorted and sometimes rotted.

CONTROL. If the following precautions are adopted the disease can be greatly reduced if not completely controlled:—

WOOD'S PHOSPHORINE. The Great English Preparation. Tones and invigorates the whole nervous system. Used for Nervous Debility, Mental and Brain Worry, Dependancy, Loss of Energy, Palpitation of the Heart, Fading Memory.

(1) Plant only on disease free soil. A comparatively new piece of land which has never been planted with turnips, cabbage, rape, etc., and which hence may be regarded to be absolutely free from the disease is preferable.

(2) Liming is a good practice. Considerable benefit may be secured by applying three tons of air slaked lime or five tons of ground limestone any time before planting the crop; but

MURINE. A Wholesome, Cleansing, Refreshing and Healing Lotion—Murine for Redness, Soreness, Granulations, Itching and Burning of the Eyes or Eyelids.

The best results are obtained when the lime is applied immediately after the diseased crop has been harvested and a period of three or four years allowed to elapse before turnips or cabbages are again planted.

(3) Manure. Manure from stock fed on club-rooted turnips should not be used as it invariably carries the disease and infects the soil to the turnip crop only such manure as comes from stables where turnips have not been fed at all.

Rotation and Sanitation. Plant susceptible crops on the same soil not often than once in eight years. Destroy all diseased roots or boil them before feeding. Keep down all weeds of the mustard family.

FARM REPORT

The following is a summary of reports made by Agricultural Representatives to the Ontario Department of Agriculture:—

The very broken weather of the first half of April checked growth and greatly hindered field work. The warm days of the week-end have been welcomed, and seeding operations are now being hurried.

Fall wheat and clover are about "as you were," but are expected to run forward with the recent rains and warmer weather.

Hay is in demand. While a few reports state that it may be had in the barns loose at \$20 a ton, general quotations for market prices run all the way from \$25 to \$35 a ton.

Bacon hogs have been selling at from \$18.25 to \$19.50 during the week. The decrease in brood sows during the past six months is telling upon the supply of hogs being prepared for market.

The horse industry has been attracting more attention than usual.

The winter was trying to apataries. Labor is scarce. A representative states that there appears to be considerable unrest among workers, and that some men do not remain long at the job, even when they get the wages they asked for.

RHUBARB RECIPES

Rhubarb comes to us when our systems are calling for a tonic and blood purifier.

RHUBARB SHERBET

One quart rhubarb, one cup raisins, two lemons, one quart water, one cup sugar, two egg-whites, two tablespoonfuls gelatine. Place the rhubarb, cut in bits into a saucpan with the raisins well washed and a bit of the lemon-rind.

Simmer until tender, then strain off the juice and return to the saucpan; add the sugar and the gelatine softened in a little cold water, also the lemon juice.

RHUBARB-PINEAPPLE CAKE

One cup milk, two eggs, one tablespoonful butter substitute, one cup sugar, one cup flour, one teaspoonful cornstarch, three level teaspoonfuls baking powder, one cup shredded pineapple.

Stir the sugar, melted butter, egg-yolks and a little of the milk together until creamy.

Stir alternately with the milk and beat up well all the flour except one cup; then stir in the remainder of the flour to which the baking powder has been added.

Stir enough to incorporate the powder with the batter but do not beat up. Fold in the stiff, beaten egg whites and bake in three jelly cake pans.

Combine and baked rhubarb and the pineapple and thicken with the cornstarch after they have been heated in a double boiler. Spread between the cake layers when cold.

BANANAS AND RHUBARB

One quart rhubarb, one cup sugar, three bananas, one pint water, one package gelatine, one lemon. Place the rhubarb, water and the lemon juice and a bit of the rind in a saucpan and simmer for 20 minutes or more; then strain off the juice, add the sugar and if not pink enough add a small amount of red fruit-coloring.

Soften the gelatine in half a cupful of cold water and stir into the hot juice. When it begins to stiffen stir in the sliced bananas and pour into a wet mould. Chill and serve.

Minard's Liniment used by Physicians

Became a Plight of the Past.

A schooner bound from Sydney, Australia, to San Francisco, California, was becalmed in mid-ocean while the ship was lying idly upon the bosom of the unrippled water, as if posing for the picture of the original "painted ship upon a painted ocean." The captain of the vessel became agitated by the thought that he would arrive at his destination too late to take advantage of certain prices on his cargo, as these rates had been named in the charter. Then his eye wandered to the ship's launch hanging idly at its davits, whereas the quiet scene became enlivened by the happy activity of an idea. The launch was put over the side and, after some effort, overcame the inertia of the ship, carrying it forward at a three-knot rate. Five times on its trans-Pacific journey the launch overcame the calm and won a quick voyage for its ship, with the result that the owners will install small powerful launches, on their entire fleet of schooners for the purpose of meeting similar emergencies. In other words it is believed that the happy idea that the skipper found operating in that mid-Pacific calm will make it unnecessary for the modest sailing ship of the world to sit idly on their keels waiting for the wind.

Beavers Copy Tepees of Indians.

In the pond were a number of beaver houses which looked like small Indian tepees, writes Samuel Scoville, Jr., in Boys Life. Most of them were built in water several feet deep and were from three to four feet above the surface and about five feet in diameter. One, however, was a huge one, built in deep water, and fully twice as large as any other. It was made mostly of peeled cottonwood poles and stood on a firm foundation of mud and sticks built up from the bottom. The poles leaned together from the top and had been woven in and out with thick brush and plastered with mud and turf until the walls were three feet thick.

Cataract Deafness Cannot Be Cured

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Cataract Deafness, and that is by a constant internal remedy, which causes the circulation of the blood to reach the mucous surfaces of the system. CATARRH of Deafness is caused by Catarrh of the middle ear, and is a condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running, sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and the tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness caused by Catarrh, which is an inflamed condition of the mucous surfaces.

Modern Slavery.

There is no legal and formal slavery now in any Christian country. It lives in a mild form in most Mohammedan countries. The peonage system of Latin American countries is not much different from slavery, but rests upon a different theory. The peon is not supposed to be owned as property; he is supposed to be working to pay a debt which he owes the master.
