INCUBATION AND BROODING OF CHICKS (Experimental Farms' Note)

Which is it to be, hens or incubators? If less than 100 chicks are to be hatched it is not generally considered advisable to buy an incubator...

wanted it is almost a necessity to have an incubator. If hens are used, select only birds that appear to be determined to set and are not clumsy or nervous on the nest.

If artificial methods are used, a well ventilated cellar with a fairly even temperature makes a suitable location for the incubator.

To be successful in the brooding and rearing of chicks requires constant care and attention to details. If chicks are hatched by hens, let the hen remain quietly on the nest until the chicks get so lively that they

insist on leaving it, then remove the hen with her brood to a coop previously prepared for her. All coops should be thoroughly disinfected before use each season and also between broods.

A hen should be given no more chicks than she can keep comfortably warm. The artificial method requires a brooder so made that it will be possible to produce and hold heat enough to provide for the comfort of the chicks in any weather, easily and well ventilated. The chicks

The Use of Nitro-Cultures (Experimental Farm's Note)

In the report of the Dominion Botanist for the year ending March 31, 1915, he says: "During the last month of the year" - viz., December, 1914 - "it was deemed advisable for this division to prepare nitro-cultures of alfalfa, red clover and peas for distribution to the branch farms."

The branch farms, by their example and reports, and the ocular demonstration to visitors given in the condition of their leguminous crops, started the demand of the farming public for these cultures, which it is our endeavor to stimulate, guide aright, and to the best of our capacity satisfy.

Worth Knowing. When the drawers of a chiffonier, dresser or sideboard stick, try lubricating the parts with floor wax.

Use raw fruits as often as possible; it saves cooking. And fruit drinks, mixed with water, are much less trouble to get than tea.

Have one shelf in the cupboard of open rails, instead of solid board. Keep this for soap and candles. Upon receipt of these, unpack, place candles across rails, cut soap into convenient pieces and place in rows, with space between pieces. Dry soap lasts longer than new.

who have not yet studied this question, we propose to briefly explain the term "nitro-culture."

Since the time of the Romans it has been known that the introduction into a crop rotation of a legume - that is, one of the plants belonging to the family Leguminosae, of which the most important members from the farming view point are clovers, peas, beans, and vetches - somewhat or other, greatly benefited other subsequent crops.

the farmer's field, at, practically, no expense. Now "nitro-cultures" are simply collections of these bacteria ready bottled.

Nitro-cultures are prepared by the Division of Botany for alfalfa and sweet clover, red and alsike clovers, and peas, and are put up in bottles containing sufficient bacteria for the treatment of about a bushel (60 lbs.) of seed.

FARM CONDITIONS Much Attention to Early Potato Planting.

The following is a summary of reports made by Agricultural Representatives to the Ontario Department of Agriculture:

The latter part of April was wet and cold, and the condition of vegetation was very backward for the opening of May, some Representatives putting progress of sowing as about two weeks later than usual.

in some cases before the land was really fit for the crop. There is a shortage of good seed in many localities.

Fodder is so scant with some that live stock is being thrust on the grass before there is a really satisfying bit for them.

Most of the live stock are still being carried along on little better than a maintenance ration.

Fewer hogs are being fed, as a large number of brood sows were disposed of during the last six or eight months.

Squirrel No Weather Sign

Those who believe that the weather of a forthcoming season can be forecast with accuracy from observation of moss on trees, fur animals or the behavior of squirrels in their storing of nuts have faith in myths and mere legends.

From the scientific standpoint, Alfred H. Thiessen, director of the Baltimore weather bureau, says there is nothing in it; that there is no method fashion or way to make long-range forecasts that compilers of almanacs hedge themselves about with general terms, which make it difficult to pin them down, but when they do predict a storm on a certain date more often than not they are wrong.

Mr. Thiessen declared that long study by the weather bureau has failed to disclose any natural law governing weather which would permit it being forecast in advance for even two or three months.

law would have, how it would affect industry, agriculture and employment. "The weather bureau," he went on, "issues a weekly forecast of the weather for certain sections, but it is not so accurate as the thirty-six or forty-eight hour forecasts. Take, for instance, the value a season forecast would have in manufacture.

Then in the farming certain crops require certain weather conditions favorable to them to make them grow abundantly.

A PAINTERS' PARADISE. Capri's Quaint Inn, Where Poor Artists Can Get Free Board.

Capri, beautiful in itself, offers an irresistible invitation to artists, since it has an inn where any one, by painting a picture on the wall, can get free board.

To the lovely island of Capri, with its perennial summer, its blue grotto and its lemon groves, came some fifty years ago a ruined artist. He opened an inn and died rich. In his will, leaving the inn to his heirs, he made these conditions:

"The charge per day, two bottles of red Capri wine included, is never to be more than 6 francs.

"If any artist is too poor to pay he shall paint a picture upon some wall space, receiving all the accommodation accorded to those paying the highest price.

HOW'S YOUR BLOOD? Pimples and Eruptions Mean Bad Blood

People who have impure or impoverished blood should be careful to take only a temperance remedy made of wild roots and barks, such as Doctor Pierce's Golden Medical Discovery is and has been for nearly 50 years.

The first day you start to take this reliable medicine, impure germs in the blood and are then expelled through the eliminative organs.

In place of the impurities, the arteries and veins gradually get fresh vitalized blood and the action of this good blood on the skin means that pimples, boils, carbuncles, eczema, rash, acne and many skin blemishes will disappear.

Get Doctor Pierce's Golden Medical Discovery to-day at any medicine dealers, in tablet or liquid form, or send 10c for trial package to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., or branch Laboratory, Bridgeburg, Ont.

BRAMPTON, ONT. - "A few years ago I was in a nervous and run-down condition and felt greatly in need of a tonic. A friend who was being helped by Dr. Pierce's Golden Medical Discovery advised me to try it, too. It helped me from the very start and eventually restored me to perfect health. I feel in a position to praise the 'Golden Medical Discovery' very highly and take pleasure in recommending it to all those who are at all nervous, weak or run-down." - Mrs. ESTHER PRATZNER.
