## From The Countryside

### Sandwich

Mrs. Wm. N. Swent and daughter, of Rainham Centre, spent a few days with her mother, Mrs. Thos. Westerby.

Mr. Chas. Peacock purchased a new Ford car last week.

Mr. and Mrs. James Hallam, Jr., of Hamilton, were guests of Mr. and Mrs. Bert Doughty for the week end.

Mr. and Mrs. Chas. Lindsay of Blackheath, were visitors of Mr. and Mrs. J. W. Westerby the week end.

Miss Annie Ryder, near Cayuga, is spending a few days with Miss Gertie Pardington.

Mr. and Mrs. J. W. Westerby and children and Mr. and Mrs. Bert Jonson and daughter, spent Sunday with Mr. James Munn at Port Maitland.

Mr. and Mrs. Geo. Simpson and children of Toronto are visitors of Mr. and Mrs. J. W. Westerby.

### Rockford

A Reception Service will be held at the League meeting on Wednesday night.

The first meeting of the Mission Band was held on Sunday afternoon. The attendance was large and the programme given by the boys and girls was excellent.

In spite of the rain and the bad condition of the roads the garden party was held on the beautiful lawn of Mr. Wm. Somers on Friday evening last, and considering the weather was a grand success. The entertainers arrived by motor from Hamilton and were putting on a splendid program when a heavy downpour of rain caused the audience to vacate their chairs and seek shelter under the spacious roof. The proceeds amounted to nearly \$200, which was far beyond the expectations of the most optimistic ones.

Miss McClung is visiting at the home of her friend, Mrs. Geo. Jones.

Misses Pearl and Fanny Edwards spent Sunday afternoon with Eric Gilbert.

Mrs. Deming is visiting at the home of Miss Ida and Alvy Irwin.

Some of the neighbors attended the funeral of the late Thos. Parkinson at Hagersville on Sunday afternoon.

Mrs. Finch and family, of Brantford, were visiting at Stanley Anderson's last week.

Mr. and Mrs. Martin Anderson attended a re-union and celebration at Essex last week.

Morris Cook and Bud Priest are attending the Boys' Camp at Crescent Grove this week.

Miss Charlotte Gimson of Villa Nova spent over Sunday with her sisters, Alice and Olive.

Mr. Ralph Kenney's nephew, Mr. Merchant, has just arrived here from Australia to spend the summer.

### Some Questions

Does your engine start in balking?  
When you slow down, say to walking?  
Does it seem to have a yearning  
To expire when you're turning?  
Does it kick against the timing  
Of the spark when you are climbing?  
Does the differential grumble?  
Do the gears set up a rumble?  
Do the bearings ever mutter?  
Cough and have a fit of spitting  
Just as though it felt like quitting?  
Have the tires given warning  
That their day of rest is dawning?

If these symptoms are neglected  
And the trouble not corrected  
You're apt to be dejected  
When you have your car inspected,  
And you'll find you are elected  
To pay more than you expected.  
Whereas, if you had detected  
It at first and had directed  
That repairs should be effected,  
You would not be so subjected.

Shop in Simcoe  
At OUR Expense

We Refund Car Fare from Jarvis on a purchase of \$8.00 and over, Hagersville \$10.00 and over, and from Nelles Corners on \$12.00 and over.

Each additional word, 1c.

LOST—Silver fountain pen, vicinity of post office; initials T.E.B. Reward if returned to Mrs. C. F. McKenzie.

LOST—In Jarvis, a pair of spectacles in case. Finder will kindly leave same at Record office.

## Ways in Which Productivity of Soils May Be Decreased

(Experimental Farms Note)

A soil is productive in proportion to its ability to supply to growing plants the elements required for the plants' development.

If we look upon a soil as a bank or warehouse from which something may be drawn, we will realize that the producing power is largely in proportion to what is on deposit. Every atom of phosphorus or potash that we remove from a given area of soil leaves the soil just so much poorer. So if we keep on taking the essential or crop limiting elements from the soil by means of crop removal, the producing capacity of the soil will be reduced, just the same as a cash bank deposit will be reduced if something is drawn out and no corresponding return made. Neglect to return the required elements to any soil will lead to soil poverty. The crop-yielding capacity of a soil may be greatly reduced by poor plowing, poor tillage, and neglect to practice the best methods of soil management for the district. Autumn plowing of lands that wash badly during the winter and early spring frequently causes considerable soil, or soil fertility, loss. Permitting a soil to become matted with the living roots of undesirable plants, such as cone grass, will make any soil unproductive of desirable crops. Neglect to provide proper drainage to give relief from surplus irrigation, seepage or flood waters results in considerable decrease in the productive capacity of soils. The permitting of live stock to run over pastures and tillable fields during the wet periods of the year, when the soil is water soaked, is an all too frequent means of reducing grazing and giving an undesirable puddle condition to the soil. Return phosphorus and potash in quantity equal to that removed by the crop. Practise the best cultural methods at the proper time in order that the productive capacity of your soil may not be decreased.

### D'Annunzio's Goldfish.

A whimsical, eccentric individual is Signor Gabriele d'Annunzio, the Italian filibuster poet, whose military exploits have been cut short. His poems and novels are the work of a genius, but he often descends from the sublime to the ridiculous.

He once had a goldfish as a mascot, and left it behind at an hotel. When he wired for news of his pet he was told that it was dead. He immediately wired that the fish should be given a decent burial, and gave instructions for a tablet to be erected to its memory. Unfortunately, the dead fish, had been thrown away.

Thoroughly conscientious, the hotel manager bought another goldfish, killed and buried it, and read one of the poet's verses over its grave. And when d'Annunzio returned he visited the grave and stood there with bowed head.

### Weed Seed.

Weed seed is often distributed by cultivating machinery which is hired or loaned from farm to farm. They also travel easily in nursery stock, particularly clinging to strawberry plants, and in poor quality of hay, or in hay and straw packing which is not burned, but thrown down for bedding, and later raked into the manure pile.
