# A Woman puts on Spectacles

(This was written by a woman in answer to our inquiry: "Do you read newspaper advertise-

Newspaper advertisements have an irresistible fascination for me. Sometimes I know I shouldn't take the time to read them-but I always do. Of course, I don't mean that I always read them ALL, but I certainly read some every day. 1 even read the men's ads. There is a certain satisfaction in surprising one's husband with up-to-date information on things only men are supposed to be interested in.

I used to have a prejudice against Life Insurance until ! read the advertisements. I thought the premiums were too much for my husband to pay, but an advertisement I read changed my opinion about that at once. And I got my husband to make a will and appoint a Trust Company as his executor because of an advertisement I read about it, which set me thinking.

But, of course, the advertisements that interest me most are those of domestic things. Whenever I order graceries for Instance, I find myself asking for the things whose names are familiar to me through reading the advertisements in the newspapers. They may not be better than others, but as I don't know the names of others how can I tell? Goods that are attractively and regularly advertised always strike me as prosperous, and prosperous things must be good, otherwise they wouldn't be prosperous, would

And when I am buying things for my tollet I always buy the well-known things, although salesgirls try to sell me others sometimes. I never let them, though. Why buy the unknown when you can be sure of the quality of the known?

And I find my friends like to talk about the well-known things that they eat or use or wear-like foods, canned soups, cheese, washing machines, corsets; gloves and things like that. So there must be something in a name after all. The way I feel about it is that no business man would spend a lot of money to advertise a poor article; therefore, those things that are advertised must have superior qualities about them. And I have found that advertised articles, far from costing more than unadvertised goods, can very often be bought for less. At least you know what you should pay for them-the makers tell you generally in their advertisements.

As for the advertisements of the stores, some of them are not as attractive as many of the more general advertise. ments, but I just couldn't shop without them. You see, I am like many other women. I have a young family, and I cannot get out too often during the day. But I read the store advertisements regularly, and by doing so know just what is being sold, and I can always telephone my order if I can't go out conveniently that day. That, I think, is the great value of advertisements to women in the home. They do keep one well informed. Don't you think

#### "De Swanee Ribber."

An interesting story is told regarding one of the most popular songs in the world. "The Old Folks At Home." Its author was Stephen Collins Foster, who has been called "America's premier balladist." He wrote one hundred and seventy songs, including "Old Kentucky Home." "Old Black Joe," and "Old Uncle Ned."

When he had written "The Old Folks At Home," he was displeased with the name of the river given in the second verse; in the original the verse runs:

Way down upon de Pedee ribber, Far, far away.

Dere's wha my heart is turning ebber Dere's wha my brudders play. He asked his brother Morrison for a better name for the river:

"What Southern stream do you suggest instead of 'Pedee'?" Morrison offered Yazoo, which Stephen thought wouldn't do. "Well, let's consult an atlas," said Morrison. On a map of Florida they found a little river called Swanee. "That's it exactly," cried Stephen.

Although millions of copies of Foster's songs were sold, his life was a tragic one. He gave his first two songs to a friend, who made ten thousand dollars out of them. Marrying in 1850, his life was very unhappy. Eventually he went to New York. where he became a vagabond.
