Sandusk

Mr. Bert Jonson spent over Sunday in Buffalo

Mr. and Mrs. J. W. Westerby and children were visitors of Mr. and Mrs. Ed. Lindsay at Selkirk on Sunday.

Miss Brown was a visitor of Miss Ina Sternaman on Sunday evening.

Mrs. Lindsay, Nanticoke, spent over Sunday with her daughter, Mrs. Bert Jonson.

Mr. Cecil Werner is improving slowly.

Mr. and Mrs. J. Kindree and daughter, Erie, Mr. and Mrs. Elvin Pond, were guests of Mr. and Mrs. Peacock on Sunday.

Mr. and Mrs. W. Swent and daughter, of Rainham Centre, spent Sunday at the home of Mr. and Mrs. Thos. Westerby.

Sandusk base ball team played a return game with Varenay 8-6.

Lamb's Corners will play ball against Varenay on Wednesday eve at 5 p.m. at Sandusk ball grounds. Sandusk team will play the winner immediately after the former game. Come out and see the game before you go to the garden party at Mr. Joseph Peacock's same night.

The Sandusk Women's Institute will meet at the home of Mrs. Byron Pond on Thursday, July 7th.

Nanticoke

An Address and Presentation to Miss Wicks, the Retiring Teacher.

On Friday afternoon, June 24, the pupils, ex-pupils and parents of S.S. No. 1, Walpole, met for a little social gathering, in honor of the principal, Miss A. Wicks, who is about to sever her connection as teacher in this community.

Master Kenneth Vokes presented Miss Wicks with a silver casserole, while Miss Field read the following address:

Dear Miss Wicks,
We, the parents, ex-pupils, and pupils of this school, have taken the opportunity of meeting here this afternoon, for the purpose of trying to express to you, the sorrow we feel in the severing of your connection with us as senior teacher, how, in your sojourn with us for the past four years, by your friendliness, patience and loving guidance, you have won your way into our hearts.

As ex-pupils and pupils we shall never forget how painstaking your efforts have been, ever ready to give of your time and yourself to aid in any way, to such an extent that the result of your labours have been highly gratifying.

Your ex-pupils, who have come to regard you as a loved comrade and friend, and present pupils, who will ever remember your bright and cheery presence in school room and play ground, more to us as an elder sister than a mere teacher, wish to show, not only in mere words, but in a more tangible way, the love and esteem we have for you.

Please accept this gift as a slight token of our regard, and with it the wish that whatever the future has in store for you, wherever your lot may be cast, you will always reserve a warm place in your heart for us, that your path may be strewn with roses and filled with life's richest blessings.

Signed on behalf of
The Ex-Pupils and Pupils of
Nanticoke School, Sr. Division,
Miss Wicks replied to the address after which lunch was served and the social gathering was dispersed.

Rockford

(Too late for last week.)
Mr. and Mrs. Fred Russel and family of Waterford spent Sunday afternoon at Mr. Geo. Cook's.

Mr. Samuel Potts, of Detroit, is visiting at Mr. Wm. Hamby's.

Mr. and Mrs. Ralph Golding and children, spent Sunday at Mr. Ray Saunders' at Boston.

Mr. and Mrs. Harry Honey and John, spent Sunday with Mr. and Mrs. John Honey, Waterford.

Miss Leila Somers spent over Sunday in Simcoe.

Miss Margaret Hutton spent Sunday in Hagersville.

Mr. Ernest Histed of Hamilton spent a few days at Mr. Wm. Richards'.

We are sorry to report that Mr. Arthur Smith suffered a stroke on Friday at the home of his son, Mr. Chas. Smith, Simcoe.

Addie Younman's of Barford spent Sunday last at Mr. Geo. Wymers'.

Ernest Jones had the misfortune to lose a valuable horse this week.

Patriotic Service At Cayuga Church

Cayuga, June 28.—Knox Church was well filled on Sunday morning when a patriotic service was conducted by the Rev. W. G. Blake, the pupils of the Sunday school taking part and the choir rendering suitable music.

The relatives of the late Sergt. James Hannab, of the 5th Battalion, Canadian Engineers, have honored his memory by a handsome solid bronze tablet, recently placed in Knox Church.

A large yield of honey is predicted in Oxford County, better than any since 1918.

For Sale—Half interest in Birdsell clover mill, Sawyer-Massey engine and tank. Also a 3-year old Clyde mare, 1300 lbs., thoroughly broken. Wm. Abraham, Jarvis.

KEEPING STREAMS PURE.

Methods Have Been Discovered for Disposing of Waste.

Proper methods for disposal of industrial wastes, which consist of liquids contaminated by the process of manufacture, are essential for prevention of stream pollution in all industrial communities.

Several general reasons may be advanced for this disregard of public rights by owners of industries and apparent lethargy on the part of Government officials—an unfortunate lack of appreciation of the damage to be caused; former ignorance as to economical and effective methods of treatment; reluctance to make expenditures, and lastly, want of uniform and definite control legislation.

Even now many of our large streams are so grossly polluted by industrial wastes that their return to a condition of reasonable cleanliness is a task of great proportions, but one which is by no means insurmountable.

The cost of treatment of industrial wastes to prevent stream pollution should undoubtedly be borne by the industries responsible for the discharge. The owners of the industries, as a rule, recognize their moral responsibility and are ready to install treatment processes when it can be shown that there is reasonable assurance of success at a not prohibitive cost.

You are doubtless familiar with the objectionable appearance and nuisance reducing wastes from tanneries. These wastes have been studied for years and the development from the first crude settling basins, installed and then promptly neglected, is interesting. In line with the principle of conservation, it has been found that the spent tan liquors discharged from the vats can be concentrated by evaporation and again used in the tanning process. Much of the hair from the hides, which was formerly wasted, is now being reclaimed by flotation combined with fine screening and finds a ready market. The waste from the lime vats is settled in properly designed and carefully operated sedimentation basins and the sludge is dried and recalcined and used as a fertilizer. The bits of flesh scraped from the inside surface of the hides are used by glue manufacturers.

The wastes from the tar separators, the ammonia, benzol and naphthalene stills of by-products coke ovens and the wastes from gas works employing the water gas method of production are of particular importance because of the disagreeable tastes which these wastes impart to the water when used for domestic purposes. The treatment of these wastes, to be effective, must be most complete. Fortunately, such method of disposal is now available and consists, simply, in excluding all such wastes from streams used as sources of public water supply.

At the coke ovens, all of the objectionable and taste-producing liquid wastes are collected and used for quenching or cooling the glowing coke drawn from the ovens, passing into steam. As an excess of the water is sprayed over the coke at a high rate a portion is not evaporated at once, but passes through the coke into sumps beneath the quenching platforms and is recirculated by pumps to be evaporated during quenching subsequent charges of coke. Incidentally the finely divided coke formerly carried into the streams and lost with the excess quenching water is now deposited in these sumps and salvaged, representing a saving which offsets the additional cost of operation of the circulating pumps.

At the gas manufacturing plants equally effective methods of disposal are in vogue. Waste waters from the gas washing chambers are freed from their burden of suspended tars and oils by passage through sedimentation and skimming tanks and the effluent water is recirculated through the process to again extract oil and tar from the gas.
