### LIVING LAMPS IN OCEAN.

Fish Live in Light Created by Themselves.

Suppose it were possible for you to descend to the bottom of the deepest sea in a diving-bell, and you forgot to provide yourself with any form of light. Would you find yourself in a vast chamber of eternal darkness? asks Tit-Bits.

Sunlight is of no use to fish inhabiting the deeper portions of the sea. In the waters off the coast of Porto Rico, where the depth is about five miles, day and night are the same, and it was originally believed that fish lived in perpetual darkness.

It has now been discovered that this is not so. Although there are certain portions of the ocean where light never penetrates (and where fish, in accordance with nature's economical rule, are provided with no eyes), the majority of deep sea inhabitants live in a blaze of phosphorescent light produced by themselves. In other words, these fish carry their own lamps.

Sometimes a fish will have only one lamp, which may be compared with an acetylene lamp on a bicycle. It throws a penetrating shaft of light through the water ahead, and the fish's path is perpetually illuminated. Others are provided with organs in which are fitted rows of lamps, which either play upon the water ahead or flash through the water on either side like the illuminated port-holes of a ship. The lamps are fitted with lenses and reflectors, and their power is accentuated by the tremendous water pressure and peculiar conditions under which they live.

At a depth of 2,500 fathoms, the pressure of water upon fish is twenty-five times greater than that required to drive a railway train. Such deep sea fish as have been brought to the surface, although retaining some of their phosphorescent properties, are assumed to have lost the greater portion of their brilliance.

One's imagination finds it difficult to grasp what the great, artificially-lit water chambers must be like. Far below the ocean liners are enormous watery domes, icy cold, soundless, yet as brilliantly illuminated as though the sun were pouring upon them.

These illuminated spheres are not stationary. They move, as the living lamps move, leaving behind them utter darkness.

One of the most remarkable of these fish is the deep-sea angler fish. Like its shallow water relative, it has an enormous mouth with ugly irregular teeth, and a pendent tenacle by which it catches its prey. But whereas the latter's tenacle is designed to resemble something edible, the former's is designed like a "Will-o'-the-Wisp" light, which teases and attracts prey into the waiting mouth. The deep-sea angler fish is found at a depth of 14,700 feet.

Most deep-sea fish bear a strong resemblance to some species of fish inhabiting the waters above them, apart from their quality of luminosity. This suggests that fish migrate from one depth to another, acquiring in the course of time the physical characteristics necessary to their new environment. The nearer the surface they get, the less they shine—an other example of nature's logic.

But these migrations must be very gradual affairs, for a sudden transition from one depth to another is as fatal to a fish as it would be, says, to a Laplander, who suddenly took up his abode on the Equator.

Buildings on the Sun. Well into last century it was believed that the sun was inhabited, not with puny beings like ourselves, but with people weighing several tons and of proportionate strength.

The sun, being a body of most tremendous size, must necessarily have inhabitants worthy of its grandeur. And, having men, women, and children, it must have buildings in which to house them and to carry on their industries.

Hence some observers, with an ingenuity which did credit to their imaginative faculties, were certain that they had discovered buildings on the dark, solid body of the sun. The buildings were not claimed to be in regular formation, such as a vast city in the sun might be supposed to contain, but were merely "traces."

That was how these observers allowed their imagination to run riot. As a fact, what they actually saw was not a dark body on the sun at all, for it possesses none, but dark openings (caused by uprushes of gas) in the sun's flaming envelope. These openings we know as sun-spots, and the differences in the shading of the spots were taken to be buildings beside which St. Paul's Cathedral would be a mere toy.

**PATENTS PROMPTLY SECURED**  
In all countries. Ask for our INVENTOR'S ADVISER, which will be sent free.

LEA MARSHALL, Manager.

### Sandwich

Mr. and Mrs. Roy Walker of Vulcan, Alberta, have been visiting relatives in this vicinity.

Miss Brown was a visitor of Mrs. Elvin S. Pond Tuesday evening.

Mrs. Lindsay, Nanitooke, spent the week end with her daughter, Mrs. Bert Ionsen.

The ones that got through the mud to the Cherry Pie Social at the home of Mr. and Mrs. Frank Pond, report a good time. Owing to the bad state of the roads there was not a large crowd. Better luck next time.

Mr. Herbert Peacock, Jarvis, was in this vicinity on Friday.

Mr. and Mrs. John W. Pond and Mr. and Mrs. J. R. Pond were guests of Mr. and Mrs. Calvin Hare on Friday evening.

Mr. and Mrs. Wm. E. Tyrrell and children also Miss Clinch were visitors of Mr. and Mrs. J. R. Pond on Sunday.

Mr. and Mrs. Chas. Peacock and son spent Sunday with Mr. and Mrs. E. Wright, Erie.

The March meeting of the Sandusky Women's Institute was held at the home of Mrs. L. Dougherty. In spite of the very muddy roads fifteen ladies were present and a very pleasant afternoon was spent. Mrs. Elvin S. Pond read an article on The "Common Fault (Carelessness)." A comic reading was given by Miss Frances Nicol which gave us all a laugh. Our meeting closed by singing "God Save Our King" after which a social hour was spent during which the hostess served lunch.

### Church Services

#### Knox Presbyterian—

REV. A. W. HARE, B. A., MINISTER  
Sunday School at 10 a.m.  
11 a.m.—"Proofs of the Resurrection."  
7 p.m.—Sermon, "Lecture on Easter as Observed in Jerusalem To-day."  
Y. P. S. on Wednesday at 8 p. m. Subject, "Our Neighbor". Leader, Miss Josie Crawford.

You are cordially invited to these services.

#### Wesley Methodist—

REV. H. L. SMITH, Pastor.  
11 a.m.—"Easter."  
7 p.m.—"Where do we go From Here?"  
Adult Bible Class at 10 a. m.  
Epworth League on Wednesday evening at 8 p. m.  
The W. M. S. meets every second Tuesday of the month.  
All are welcome.
