

# The BUSY STORE

## Get It At Miller's

It is our purpose to give our customers exactly what they want at prices as low as the quality of the goods will allow.

The very latest in Serges is the striped effects for natty skirts. They are very smart and suitable for any occasion.

Our stock of Dress Serges and Gaberdines (all wool, 54 in. wide), is complete. Nothing is more comfortable or will give better service.

The change in weather predicts a change in underwear. If you need any look our stock over while the sizes are complete.

Our weathercoat takes the place of the Autumn and Winter Overcoat for all purposes and in addition maintains its pre-eminence as a Raincoat unequalled for comfort or protection. It is suitable for every month of the year.

**Millinery** Chilly winds and dull Autumn days demand the donning of the Winter hats. Our stock is very complete. Black hats are still the vogue, but there is a generous sprinkling of the bright tints, bright red, burnt orange and jade, which lend the correct touch of color to the dark costume. Inspection is invited.

Mr. and Mrs. Jas. Priest and Bud spent Wednesday in Brantford, and Thursday with Mr. and Mrs. Marshall Priest in Paris.

Our S. S. has decided to hold their annual Christmas Tree on Friday evening Dec. 23rd.

#### Winter Care of Pregnant Mares.

The pregnant mare should be well fed and given regular exercise or light work. All food and water given should be of first-class quality. She should be given more grain than the non-pregnant mare, as she has the foetus to support. All possible care should be observed to avoid digestive derangements; hence, everything consumed should be of good quality, easily digested, fed in proportion to the amount of work performed and at regular intervals. In addition to hay and oats she should be given a few raw roots daily, and a feed of bran with a cupful of linseed meal at least twice weekly.

Work that requires excessive muscular or respiratory effort should be avoided, so also should plunging through deep snow, slipping, etc. All nervous excitement should be avoided; so also should sights which frighten her; also offensive odors; and operations.

The use of drugs should not be tolerated, except upon the advice of a veterinarian. If necessary to give a purgative, it is much safer to give raw linseed oil than aloes. Towards the end of pregnancy, still greater care should be observed; and, while daily exercise up to the very last is advisable, it should be given more carefully and less of it when she becomes somewhat clumsy on account of size and weight.

While it is better to allow her a box stall when in the stable at all times, it is practically necessary after about the tenth month of gestation; as the period of gestation is irregular and the foal may be born, without any well-marked premonitory symptoms, any time after ten months.

After the foal is born the mare should be given at least two weeks' idleness, and if she can be allowed to run idle until weaning time, it will be all the better for both herself and the foal.—J. H. Reed, V.S., O. A. College, Guelph.

The manufacturer's success is due largely to his ability to buy raw material at the lowest prices, to sell the finished products through an efficient distribution system, and to take advantage of more economic methods of production. He builds up a system to eliminate waste, inefficiency, and extravagance. Every farmer should do the same.

By instructions from the Natural Gas Commission, the Dominion Gas Company has cut off for heating purposes the burning of gas in all public buildings, railway premises, halls, auditoriums for public gatherings, pool and billiard rooms, and theatres. Schools are restricted to a consumption of sixty thousand cubic feet a month.

Financial Post:—Chauncey M. Depew still has two of his oldest bank accounts. One has been left intact for sixty years and the other for fifty. First \$100 he made, in savings bank for sixty years, has grown to \$300. Which reminds us that any fool can make money but it takes a wise man to save it.

Abraham Lincoln said: "I do not know much about tariff, but I do know that if I buy \$20 worth of goods in a foreign country, the foreigner will have my money and I will have the goods but if I buy \$20 worth of goods in my own country I will have the goods and the money will remain in my own country."

About this time of year comes the annual discussion as to the best means of running the furnace without burning any coal.

### Ontario Apples

Toronto, Nov. 1.—Ontario's apple exhibits at the London, Eng. Apple show, has won the \$100 challenge cup, according to announcement which has just reached the provincial department of agriculture. In addition to the premier trophy, the province also won a number of minor prizes.

In the overseas section of the London show there were 13 entries from Ontario, each comprising six boxes. With these 13 entries 10 prizes were won, comprising four firsts, five seconds and one third. The challenge cup was awarded for the greatest number of points, showing that, while other overseas provinces also won prizes, Ontario led in points.

In addition Ontario won one special \$25, one special \$20 and four special \$5 prizes, all for six-box lots; and also third prize in the British empire cooking section. Apart from the competitive exhibit there was a general exhibit put on by the province of Ontario, comprising 86 boxes of splendid apples.

The consignment for the competitive exhibit numbered 152 boxes. The whole exhibit was selected, assembled and shipped by the Ontario Fruit Growers' association in co-operation with the Ontario department of agriculture.

A great many towns are adopting the system of collecting taxes in two installments. The Orillia Packet says it has saved their town thousands of dollars in interest and has simplified the problem of financing.
