Why Is Forestry?

There is a good deal in the press these days about the necessity for forest conservation and wise utilization, and people may be led to ask: Why should Canadians bother their heads about forestry? The answer is very simple. Canada, like every other country in the world, has a large proportion of land that is not good for agriculture but which will grow timber. In some countries it is with great difficulty that these non-agricultural areas are got to grow trees, and even then the timber is of inferior quality. In Canada, on the contrary, the land, if given a chance, readily grows a new crop of trees, and when grown these trees provide the finest structural timbers in the world. How much of Canada is of this character is not yet definitely known but a conservative estimate places it at sixty per cent. of the country. The reason why Canadian statesmen and leaders in all walks of life are urging the study and practice of forestry is that if citizens sit still and allow these non-agricultural lands to be repeatedly burned over, then these immense areas will become deserts, whereas if kept growing timber they will provide a permanent and increasing revenue. This is the "Why" of forestry.

Discipline In Our Schools

Discipline in the schools is not commonly what it was a generation ago. Order has fallen away from its high standard. There are several reasons for this. One is the attitude of the children themselves. In our fathers' time free, compulsory education was a new thing and a greatly prized. The parents and the children too were continually talking about it. They had a reverence for the school. Now it is an old story, an old toy that Santa Claus brought in one of his former visits. We have set it up as a target to throw things at. In the old days also, there was no need to coax children to be good. There was rod and the broad hand to hurry the lads into righteousness, and most of them got there quick. Now any real school with lots of children in it is likely to be a distracting place. Truly we need better discipline in our schools.—Port Rowan News.

The Canadian National Railways recently issued a chart of earnings and expenses in which it was shown that earnings were increasing and expenses going down. Starting with August, which showed net profits of some \$47,000, a steady improvement has taken place. October earnings being some half million dollars greater than expenses. The greatest reduction in operating expenses occurred prior to July. This is a most important point because it shows that the reduction in expenses occurred prior to the recent reduction in wages put into effect on July 16th. This is conclusive proof that greater care and greater efficiency in management are primarily responsible for this very encouraging state of affairs.

Selkirk

The local semi-annual I.O.O.F. installation of officers took place last week, an installation team from Cayuga conducting the ceremonies. A large gathering was present.

Wm. Phillips, an old resident of Selkirk, and his brother George are visiting here. Mr. Phillips resides in Kindersley, Sask.

I. D. Hoover is under the doctor's care, threatened with pneumonia.

W. Falsom was confined to his bed last week through sickness.

Mrs. M. F. Derby is in Caledonia with her daughter, Mrs. Sidney Smythe.

When returning home late Tuesday of last week Percy Schweyer had the misfortune to be held up by two armed men. Mr. Schweyer states that when passing Decoy the two men in a buggy locked wheels with his vehicle; one held the horse, while the other demanded his money, which he was forced to relinquish. The night being dark he was unable to get a good description of the men.

Walter Wheeler and Wm. Weaver have returned from the fishermen's convention recently held in St. Thomas. Government competition in the Lake Erie fishing was discussed at some length at the convention. It is also stated the ban on catches of sturgeon will likely be raised in a few months.

The brick house on King street west Hagersville, occupied by Mr. Stevens, and owned by the Dundas Quarry Company, formerly known as D. J. Lynch's residence, was burned to the ground on Saturday morning. The cause of the fire is unknown.

ALWAYS USE GOOD SEED

Early Seed Preparation a Mark of Good Farming.

Careful Selection Advised — Poor Seed May Have Excellent Feeding Value — What Experiments With Seed Shows — Buying a Farm.

(Contributed by Ontario Department of Agriculture, Toronto.)

Farmers, like others, are prone to put off to-day what they can do to-morrow, and, as a result, often neglect to get seed grain ready for sowing until the fine days of early spring call them to the land. Much time may be saved, and the rush of spring work lightened if seed is prepared in the late months of winter for spring sowing. This early seed preparation will likely result also in the seed of different crops being sown at the right time to insure the greatest yields.

Use the Very Best Seed.

The first step in good seed selection should be the obtaining of the very best variety for sowing, a variety whose yield is high and whose quality of grain is good. Varieties of oats, such as O.A.C. No. 72, Banner, and O.A.C. No. 3; varieties of barley, such as O.A.C. No. 21; varieties of spring wheat, such as Marquis, Red Fife, and Wild Goose; varieties of spring rye, such as O.A.C. No. 61; varieties of field peas, such as Canadian Beauty, Arthur, Potter, and Golden Vine; varieties of field beans, such as the Common White Pea bean; varieties of buckwheat, such as Rye, and Silver Hull, are all well suited to Ontario conditions.

Grain May Be Poor for Seed But Good for Feed.

Small, shrunken, or broken seed has a feeding value nearly equal to that of large, plump, sound seed. Seed selection experiments conducted at the O. A. College, Guelph, have shown, however, that there is a very great difference in the value of these for seed purposes.

What Experiments Show.

Varying qualities of seed of oats, barley, spring wheat, peas and field beans were tested, and it was found that one year's seed selection of seed grain has a marked influence on the resulting crop. In every single instance, the large plump seed produced a greater yield of grain per acre than the medium sized, small, shrunken, broken, or split seed. In the average of four classes of grain, the large plump seed surpassed the small plump seed in yield of grain per acre by 28 per cent. and, in the average of three classes of grain, the plump seed gave an average yield over the shrunken, broken, or split seed of 64 per cent. In this experiment equal numbers of seeds were used in each selection. Large plump seed produced a larger, more vigorous, and more productive plant than that produced from small plump, shrunken, broken, or split seed. It should be remembered too that where only the largest and plumpest grains are used for seed, the very nature of the selection eliminates the majority of the weed seeds which may have been in the grain before selection.

When the farmer has obtained the best variety and sown only the best seed of this variety, he has placed the very safest insurance possible on the future of his crops.—W. J. Squirell, O. A. College, Guelph.

BUYING A FARM.

Some Very Practical and Timely Hints to Would-be Purchasers of Farm Property.

The most important decision that a farmer is called on to make is the selection of a farm on which to live and earn a living. The judgment used in making the selection of a farm may make or break a man, may tie him up for life to poverty or to wealth. In districts where the soil is uniformly good over a large area and where prosperity is evident on all sides the task is not so great and risky. But in districts where various types and grades of soil exist a poor farm and a good farm may lie side by side. The good farm will no doubt help to sell the poor one, which, by the way, is always for sale. See Your Prospective Farm in July.

Farm purchases are most frequently made during the winter when the opportunity for close examination is least. This should not be so. If farms were purchased on the basis of the crop showing during the month of July there would be fewer regrets. If a man contemplates purchasing a farm in a district where he has lived for a long period, he will know the soil and district conditions. Knowing conditions the purchaser will hand over his money with his eyes wide open; if he does not know conditions in the district he will be handing over his money with his eyes closed and must depend on the honesty of some one else. Purchasers of farms are advised to live and work in the district of their choice for at least a year before investing heavily.—L. Stevenson, Secretary Dept. of Agriculture, Toronto.

Fix Harvesting Machinery.

A rainy day spent in putting that mowing machine, hay loader, binder and other harvesting machinery into shape is a mighty good investment of time. This is more true this year than usual for two reasons—first, labor is much scarcer, and therefore the loss of any time wasted will be greater, and, secondly, the parts may be harder to get than usual, due to a shortage of supplies in many lines. Forethought may save some after-worries.

Millet is a splendid smother crop and weed seed destroyer, especially when cut thickly for hay and cut early.

Golden Wedding

Mr. and Mrs. W. D. Lindsay, of Hagersville, opened their home for a happy event on Tuesday, Jan. 10, in honor of the former's parents, when they celebrated their golden wedding.

Mr. and Mrs. Lindsay were married in Caledonia at the manse, by Rev. Mr. Black, in 1872.

The guests numbered about 30; their two daughters and one son, namely, Mrs. E. J. Kelly, Caledonia; Mrs. J. E. Woodwork, Binbrook, and Mr. W. D. Lindsay, of Hagersville, also sixteen grandchildren and two great grandchildren being present. The guests sat down to a sumptuous dinner, and the rest of the day was spent in music and games, and the presentation of a purse of gold to the happy couple.

Both Mr. and Mrs. Lindsay are enjoying good health.

Congratulations were received from friends in Hamilton, Brownsville, Caledonia, Middleport, N.Y., and other points.

SCHEDULE OF GAMES

In the Southern Counties Hockey League

Jan. 5—Cayuga at Waterford.
Jan. 6—Jarvis at Hagersville.
Jan. 9—Cayuga at Hagersville.
Jan. 9—Port Dover at Jarvis.
Jan. 12—Hagersville at Port Dover.
Jan. 13—Waterford at Jarvis.
Jan. 17—Hagersville at Waterford.
Jan. 18—Jarvis at Cayuga.
Jan. 20—Waterford at Hagersville.
Jan. 23—Jarvis at Port Dover.
Jan. 30—Jarvis at Waterford.
Feb. 1—Hagersville at Cayuga.
Feb. 2—Port Dover at Waterford.
Feb. 6—Cayuga at Port Dover.
Feb. 7—Hagersville at Jarvis.
Feb. 9—Cayuga at Jarvis.
Feb. 10—Port Dover at Hagersville.
Feb. 13—Waterford at Port Dover.
Feb. 16—Port Dover at Cayuga.

Noisy Muffler

"That tire bursting made a terrific explosion." "Yes; but it didn't last long enough. Tires should be made so that when they burst the noise will last long enough to drown my husband's remarks."

MAIL CONTRACT

SEALED TENDERS.—Post-master General, will be received at Ottawa until noon, on Friday, the 10th February, 1922, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 6 times per week on the route

Jarvis No. 3 Rural Route from the 1st April, 1922, next. Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Jarvis, and at the office of the Post Office Inspector, London.

D. J. McLEAN,
Post Office Inspector.

STANLEY PARK, VANCOUVER, B.C.

English Bay Road, Stanley Park.

Vancouver would be famous if it had only the attraction of "Stanley Park" was the opinion of an English tourist who had circled the globe. That peerless playground of 1,000 acres of virgin forest, with many acres of priceless waterfront and over six miles of marine promenade of park foreshore, is the greatest municipal park on the continent. It is fringed by English Bay which abounds with mirrored reflections of forest trees and birds of every shade and plumage bank on the surface. No bulwarks or ocean wall mars the beauty, no roaring billows disturb tranquility, but there is all the beauty and majesty and novelty of its placid surface with a soft calling of the waves.

The park is picturesque with its magnificent firs and cedars, and is largely in its natural state, yet with touches of the conventional in that it is encircled by a perfect motor road which affords the pleasure of enjoying the innumerable points of interest in this wonderland. The unique brilliancy of the exquisite scenery in the distance where mountains of grace and stateliness form a group of peaks, grey and green and rose-colored, call one again and again by their enchantment. Down their pine-clad slopes, spruce streamlets wind their way. A variety of enormous trees, spreading their branches on the green lawns, greet the eye, creeping ivy decorates the base of these giants of the forest. Walks through the park reveal picturesque retreats where the aroma of nature in all her bewilderment of luxuriant growth, sweetens the out-of-doors.

The "Lions", the "Sleeping Beauty", "Swash Rock", the grave of the Indian Princess Poetess, Pauline Johnson, who cast over the lovely surroundings, a gracious mantle of romance, are some of the points of interest.

The Largest Trees in North America Grow in Stanley Park.
