

# 8,769,489 IS PRESENT POPULATION OF DOMINION OF CANADA

Census Shows 1,562,846 Increase Since 1911—Next House of Commons Will Consist of 245 Members, An Increase of Ten.

A despatch from Ottawa says—Revised figures of census returns issued on Friday night bring the total population of the Dominion to 8,769,489, as compared with 7,206,643 in 1911, an increase of 1,562,846. The revisions modify the announced totals for Nova Scotia, New Brunswick, Prince Edward Island and Ontario. The revised figures for Ontario, rather curiously, restores previous unofficial computations, the total announced being 2,929,054.

The total by provinces and territories, as compared with the 1911 census, now stands:—

Province	1921	1911
Nova Scotia	523,837	492,338
New Brunswick	387,839	351,889
Prince Edward Isl.	88,615	93,728
Quebec	2,349,067	2,003,232
Ontario	2,929,054	2,523,274
Manitoba	613,008	455,614
Saskatchewan	761,390	492,432
Alberta	581,995	374,663
British Columbia	523,358	392,490
Yukon	4,162	8,512
N. W. T.	6,684	18,481
Canadian Navy	485	.....

Totals ..... 8,769,489 7,206,643

The next House of Commons, following redistribution, will consist of 245 members, according to the census figures just issued. This will be an increase of ten members over the present representation. The figures are, however, still subject to revision, and final returns may make a change. This

applies particularly to the case of British Columbia. Representation in the next House, following a Redistribution Bill, will compare with the present House, as follows:

Province	Next House	Present House
Quebec	65	65
Nova Scotia	15	16
New Brunswick	11	11
Prince Edward Island	4	4
Ontario	81	82
Manitoba	17	15
Saskatchewan	21	16
Alberta	16	12
British Columbia	14	13
Yukon	1	1
Totals	245	235

These figures give the Maritime Provinces a decrease in representation of one member, and the Prairie Provinces an increase of eleven members.

British Columbia, under present census figures, gains one member, but there is a possibility that final figures will give the province another member. The unit of representation in the coming redistribution will be 36,100, and the representation of a province will be reached by dividing this number into its population. The Yukon may lose its representation entirely following redistribution. Its population in the last census was only 4,162, as compared with 8,512 in 1911 and 27,219 in 1901—figures which in themselves are eloquent of an ebbing tide from the gold-rush days.

## APPLY "MARY" FUND TO EDUCATE GIRLS

### Royal Bride to Utilize the Archbold Estate for the Same Purpose.

London, Feb. 26.—Princess Mary will utilize the wedding gift of the John D. Archbold estate in Hampshire, England, to found a school for Girl Guides, it was learned to-day.

In establishing this school, Princess Mary conceived an unique way of employing, to the advantage of English girls, some of her wedding presents. Every girl throughout the Kingdom bearing the name of the Princess has contributed to buy a present for their Royal favorite. From all these Marys the total donations have been in the neighborhood of \$40,000. Half of this sum will be turned over by Princess Mary as a foundation for the Girl Guides' School, the other half of the expense of conducting the school being borne by the organization itself.

By utilizing the Archbold residence and the "Mary" fund, the Royal bride plans the establishment of a practical school for poor girls, which will be self-supporting itself and will help make the girls self-supporting also. Princess Mary considers the school will be a constructive enterprise in every respect, and for that reason has formally accepted the gift of the Archbold home.

Winnipeg reports that provincial election is planned.

Gifts of jewellery presented to Princess Mary, including the famous Clamire collection given to her by Lord Lascelles, are estimated to be worth \$3,500,000.

Gen. Sir David Watson Distinguished Canadian soldier and newspaper man, who passed away on Feb. 19. He commanded the 4th Division of the Canadian Corps during the late war.

## Conference of Miners With Operators

Philadelphia, Feb. 26.—The anthracite coal operators announced here Saturday that they have agreed to meet representatives of the United Mine Workers in joint conference in New York, March 15, to negotiate a new wage agreement. It is the unanimous feeling of the operators that there must be a deflation in coal prices, and that the mine workers must share in this deflation.

## EXTRAORDINARY ADVANCE IN STERLING EXCHANGE AT WALL STREET

A despatch from New York says—Sterling exchange Thursday morning was bid up to a new high level for nearly three years when demands bills were sold for \$4.40 and cables commanded \$4.41%. Sterling at Thursday's quotations is up 20 cents since the beginning of the year, of 96 cents from the lowest level touched last year, and \$1.24 from the lowest quotation for all time, registered in 1920.

The causes of the extraordinary advance in sterling exchange are several. One is the tremendous improvement in the foreign trade position of Great Britain during the last few months. The foreign trade statement for January showed a big decrease in

the balance of trade against England. Whereas the excess of imports over exports in December was \$25,000,000 it dropped to \$13,000,000 in January.

British exports in January were larger than any month of last year with the exception of March. This shifting of foreign trade also is impressively told in the statistics of the United States foreign trade. A new low level of values of American exports was reached in January, when they reached only \$279,215,000, a drop of \$17,215,000 compared with December.

The diminished flow of exports to Europe, including England, is reflected in a marked scarcity of bills of exchange offered for sale here against shipments of goods.

A REMINISCENT PICTURE This group photograph is peculiarly appropriate in view of the marriage of Princess Mary. It shows the late Queen Victoria with Princess Mary and three of her brothers. The Princess is wearing a sailor hat. The photograph was made in 1839 on the occasion of a visit to Osborne.

## SENTIMENT IN FAVOR OF REMOVING EMBARGO GROWING IN ENGLAND

A despatch from London says—Despite the statement by Sir Arthur Griffith Boscawen, Minister of Agriculture, that the British Government would not remove the embargo on Canadian cattle, the fight is by no means over. Lord Beaverbrook, who has been the foremost in the campaign for lifting the ban, addressed five thousand members of the National Union of Farmers at Norwich on Saturday. Sir Henry Thornton and Col. Harry Mullins of Winnipeg, who spoke so strongly on the matter at the meeting of London Meat Traders last week, also spoke at the Norwich gathering.

It is noteworthy that many members of Parliament, who a few months ago opposed the removal of the embargo, have now changed their opinions and are strongly advocating this step. One candidate is now running in an English constituency with the removal of embargo as the principal plank in his platform. Equally striking has been the change of heart manifested in the part of many members in the National Farmers' Union. The Daily Express is understood to be determined to make the embargo one of the issues in the coming general election, and its views are supported by nearly the whole of the London press.

## Developing Canada's Water-Powers.

Prof. R. W. Angus, of the Faculty of Applied Science and Engineering, University of Toronto, has arranged a series of special lectures on water-power development for students and others interested. Five eminent engineers are speaking, between February 27th and March 6th, on the utilization of the vast water-powers of Canada. Lewis F. Moody of Philadelphia, Max V. Sauer and Thomas H. Hogg of the Hydro-Electric Power Commission, W. M. White of Milwaukee, and Norman R. Gibson of Toronto will each deal with the phase of the subject in which he specializes. The provincial university is giving regular courses in water-power development and conservation at the present time, and has done so for many years, numbering amongst its graduates men who have become noted in this field of engineering. The present series will, therefore, supplement the regular courses and will bring the university into closer contact with the men who are responsible for the engineering work of the greatest water-powers in America, and therefore the greatest in the world.

## Evacuation of British Troops in Ireland Resumed

Dublin, Feb. 26.—London conversations during the week-end being satisfactory, the evacuation of British troops will be resumed to-morrow, when special transports are to leave for Dublin, Waterford and Queenstown. The vacated barracks will be taken over by the Republican army, acting in conjunction with the Provisional Government. Official reports received by the Provisional Government since February 6 are forty-two killed and ninety-five wounded.

Sir Eric Geddes has resigned his seat in the British House of Commons.

## Reduction in British Army Estimates

A despatch from London says—Sir Lansing Worthington-Evans, speaking at Chelmsford on Thursday night, announced that the Government was prepared to recommend a reduction in the army estimates by £16,500,000 instead of £20,000,000, as proposed in the Geddes report. This would mean a reduction of the army by 33,000 men, and the disbanding of 24 battalions of infantry, 47 batteries of artillery, and the equivalent of five cavalry regiments, with a corresponding reduction in the higher staffs and ancillary services.

## Schools for Sons of Indian Soldiers

A despatch from London says—According to a Reuter cable from Delhi, India, King George has directed that the monies in the King-Emperor's Patriotic Fund, subscribed during the war, shall be used to build boarding schools for the sons of Indian soldiers. The schools will be called "King George's Royal Indian Military Schools." The Prince of Wales will lay the foundation stones of the first two schools on February 25 and March 1, respectively.

## Mine Idle Through Action of Boy

A despatch from Amherst, N. S., says—The mines at Joggins were idle Thursday afternoon, throwing five hundred men out of employment. A boy operating an electric motor refused to open a pump switch close by, and left his work, although this had been part of his duties for several months. The other boys in the mine, hearing of his action, also left their work, and in consequence the whole mine is tied up.

## PRINCE OF WALES' PARTY MOTORING THROUGH THE PUNJAB FIRED UPON

Congress of Non-co-operationists to be Held at Delhi May Bring Matters to a Crisis.

A despatch from London says—The firing upon several members of the Prince of Wales' party while they were motoring from Delhi to Puttiala, in the Punjab region of India, is reported by the Puttiala correspondent of the London Times. None was hit and the character of the assaults is not known. The police are investigating.

A despatch to the London Times from Delhi, dated Thursday, says reports from the Punjab indicate the continued seriousness of the agitation among the Sikhs, which is definitely assuming a political aspect, with wild talk of a revival of Sikh rule. The despatch says redoubled efforts

have been made to tamper with the troops, and that in the villages, while families are absent from their homes, the Sepoys are subjected to intimidation by members of the non-co-operationists.

Continuing, the despatch says that special interest attaches to the meeting in Delhi on Friday of the working committee of the non-co-operationist congress. Gandhi's recent suspension of activities has greatly offended the hot-headed section, including the young Hindu non-co-operationists and the extreme Khalafists, while the older men, notably Ajmal Khan, Gandhi's declared successor in the event of Gandhi's arrest, are said to be ready to drop the entire movement.

## First Group of Mennonites Leave for Mexico

A despatch from Winnipeg says—To prepare the way for all members of the old colony of Mennonites in Manitoba, an advance guard left here March 1. The party consisted of 111 persons, granted certificates to proceed through United States territory to their new home in Mexico. The first group to leave were members of the Plum Cookee colony, and it is understood that a further party from the Haskett, Man., colony will leave about March 27. They are routed by way of Minneapolis, Kansas City and El Paso, Texas, and their special train consisted of twenty-three cars, carrying all household effects and stock.

## Two More Shot in Belfast

A despatch from Belfast says—Two further shootings took place in Belfast on Friday night. An armed party entered the home of a Protestant named James Hutton and shot and killed Hutton. Later a Catholic saloon-keeper named Reilly was shadowed from his place of business to a hospital near his home and shot dead. He was a mark for about twenty bullets. In addition to these affrays, a commercial traveler named Burns was shot and killed in a shop at Milford, Donegal, when he declined an order to throw up his hands.

## Advocate Sending Woman Delegate to the League

A despatch from Ottawa says—The sending of a woman delegate to the League of Nations has evidently found favor among members of the National Council of Women Executive which has received a letter from the Council of Great Britain asking the Canadian Council to take the matter up with the Canadian Government. It was decided, after consideration of the letter, to act on the suggestion.

## Rowed 200 Miles in An Open Boat

St. John's, Nfld., Feb. 26.—The crew of the Newfoundland fishing schooner, Howard Parks, rowed 200 miles in an open boat, after their vessel had foundered and reached Barbadoes yesterday. Advices of their arrival received here to-day said the vessel had been driven far to the southward by contrary winds before she sprang a leak.

## Born in Quebec in George Third's Reign

A despatch from St. Agathe des Monts, Que., says—Madame Jean Baptiste Dufresne is dead here, at the age of 105 years, 6 months and 4 days having been born at Saint Benoit in 1816. Her husband died eight years ago at the age of 95.

## Weekly Market Report

Toronto.		Manitoba Products—Syrup, per imp. gal., \$2.50; per 5 imp. gals., \$2.35.	
Manitoba wheat—No. 1 Northern, \$1.62 1/2.	Manitoba sugar, lb., 19 to 22c.	Honey—40-50 lb. tins, 1 1/4 to 1 1/2c per lb.; 5-2 1/2 lb. tins, 17 to 18c per lb.; Ontario comb honey, per doz., \$5.50. ## WHAT DO MIRRORS

Does it Tell Blood is Thin

When a growing complains of exhaustion, headache and should know that the fancies of anaemia glance in the mirror. There is in tonic, a system but to the blood that body will share in.

A good example wise treatment is given by Mrs. C. Queensbury, N.S., who writes: 'I was not able to get on my feet for three daughters. Fena, at the age of 16, was pale, and I got the pills, and by taken them she was and is now a healthy My second daughter age of 16, was pale, in fact she delicate child, but worse. At last she stairs without having rest, and could no of light work with fatigued. Finally I gave her Pink Pills, them we found they than all the other taken, and she is now 15, became so had to stop going to taking eight boxes now a big, healthy after what Dr. W. have done in my doubt of their value. She will benefit.

You can get these dealer in medicine paid at 50 cents a box \$2.50 from the Dr. Co., Brockville, Ont.

Birds Rob
