Elizabeth, the Jealous.

A jealcus woman was Queen Elizabeth. She had many good qualities, it is true, and easily holds her place among the great sovereigns of England. Nevertheless, there was, says Mr. R. Thurston Hopkins, a certain meanness in her nature, and jealousy was a mania with her.

She thought that no young cavalier ought to marry for love, since every one was supposed to love only the queen. For that reason the Earl of Leicester had to keep his marriage with Amy Robsart secret; and when Sir Walter Raleigh dared to fall in love with Elizabeth Throgmorton, Elizabeth imprisoned him in the Tower for a brief period and expelled his fair when your head is dull or aching, or bride from the court.

The story of the queen and the take one or two Cascarets to relieve Windsor carter shows that Elizabeth constipation. No griping-nicest laxawas also a whimsical woman. The Windsor carter, who had been ordered to provide carriage for part of the royal wardrobe. once came to Windsor Castle and found that the queen had changed her date of departure: he came a second time and found that she had changed the date again. He came for the third time, and when he learned that his queen had once more changed her royal mind he clapped his thigh and exclaimed, "Now I see that the queen is a woman as well as my wife!"

Elizabeth, who was standing at an open window, heard him. "What villain is this?" she asked laughing, and directed the attendant to give him three angels "to stop his mouth."
