The minister expressed the opinion that the cattle being shipped were of the first quality.

It has remained for the Canadian Pacific experimental farm at Strathmore to demonstrate beyond the posexpensive trench silo system of providing winter fodder for cattle is, under favorable conditions, quite equal to the costly structures which that the silage is in every sense ex-cellent. This was proved to the antiefaction of a large party of agricultural and business men, who mostly visited Strathmore as the mosts of the Canadian Pacific De-signment of Natural Resources in

DRURY OUTLINES PLANS.

Will Retain Office Even as Leader of Minority Group.

MILTON, Ont., April 16.—Premier Drury addressing some three hundred of his supporters in Halton County, gave the first public intimation of the policy he intends to adopt in appealing to the electors in June. Briefly, he disavowed any suggestions that he was dickering with the Liberal party. but at the same time, he indicated a wish for them to support him in a platform which would not sacrifice the principles of the Progressives. The declaration was drawn from him in response to a demand that morning in the Farmers' Sun, the official organ of the U.F.O., for a clear declaration of a non-coalition policy.

The query propounded was as folof three things will happen in the ed with a majority—in which case guaranteed Disher's appearance in his course is clear; he will have the court. largest group, but less than a major-

we are a minority group, and I find we have men in the House, who, without bribes of position, but through honesty of conviction, Liberal or Conservative—and there is one Conservative who has consistently supported us-if there are enough of such men to support us, I shall advise His Honor that we can form a Tried to Destroy Warehouse After Government, but I shall not sacrifice the principles of the Progressive. movement."

Hon. Mr. Drury made it plain that any alliance between the Farmers and the Conservative group in the Legislature is out of the question, if for no other reason, because of the entirely opposite stand the two groups take in regard to prohibition. He declared that prohibition is the leading issue in the coming contest.

Four Brown in Auto.

DETROIT, Mich., April 16 .-- Foreed off a narrow bridge that crosses a deep creek at Dearborn road and the district has immense areas of rock Pere Marquette tracks, about three bearing more or less good, and the miles from the centre of the city, an question is whether the quantity is automobile containing five persons large enough to make a real mine. Gold mining will be one of Canada's reatest industries twenty-five years from now.—"Mail & Empire."

His salary is said dominant group, what course does to have been \$2,500 a year. Disner Premier Drury's answer was: "My at 33 Rossini Boulevard, Ford. He is married and with his family lived Premier Drurys answer was: My position is that if I find—though I came here from Stratford, as also did believe we shall come back with a Colquhoun. The arrest of the men has created a sensation in social circles, where both are well and favorably known.

BURGLARS USED BOMBS.

Robbing, It.

HAMILTON, Ont., March 26,-Following a terrific explosion at the Hamilton Uniform Cap Co., King William street, fire occurred at three o'clock Sunday morning which completely destroyed contents and building at a loss estimated by the owners

Scattered about the street some distance away were several rolls of cloth. It was impossible for these to have been blown from the building in the explosion and A. Uger, president and general manager, declared that in his opinion burglars had entered the building prior to the blaze. He claims that after ransacking the place and removing all me valuable material they escaped, out lest a time bomb to wreck the building. The cloth he is satisfied was lost in the hurried escape. In connection further investigation

.s being made. Snertly after three o'clock Sunday morning, there was a report which cocked buildings in the district. desidents rushed to their windows and saw a section of the company's ouilding rased and the interior in names. In less than two minutes the dremen were playing several lines of hose into the blaze, but the place was a seething mass and attention was turned to protecting buildings in the neighborhood. Offcials of the fire department were unable to give an estimate intelligently

until further investigation is made. M: Uger stated that his stock Was worth \$100,000 and insured for \$60,000 and that the building was valued at \$25,000 and covered by \$10,000 insurance.

British Premier's Health Affect ed by Great Strain.

Enionists Are Expected to Return to Party Out of Wilderness Conference In London Complete Its Work, and Outlook for Peace With Turks Looks Very Bright.

LONDON, March 26.—There have been persistent re s in Unionist political cirles here that Premier Bonar Law is going to retire very shortly on account of ill health. It s said the strain of the international ituation has seriously affected the c'rime Minister's health. Mr. Bonar Law was forced by poor health to etire as Government leader in the House of Commons during the Lloyd icorge regime.

There will probably be a reconstruction of the Ministry to include some of the former Unionist Minsters who went "into the wilderness with Lloyd George," when that Government fell.

The Ailied conference on Turkey virtually completed its work Saturday, and it is now certain there will be another peace conference, lasting at least two months. Extensive conessions have been made Turkey on the economic clauses of the original treaty, and many Turkish demands have been conveniently passed over until the new conference meets probably at Lausanne instead of Constantinople.

The Allied experts will meet this week to decide the form of their reply to Turkey. Although the tendency has been to yield wherever possible, two important Turkish demands were rejected on Saturday. The Allies decided Angora must

pay the interest and principal of the Ottoman debt in pounds sterling instead of French francs, as the Turks wanted. The latter method woulk have reduced the debt two-thirds. It was also decided the Allies powers wil not sign the treaty with Turkey until she nas carried out all existing contracts and concessions with citizens of Allied countries. furkey's right to deal cirectly with concession-seekers will be admitted after this is done.

Another decision retains the International Council for the Ottoman debt, which Turkey wished to abolish. This council controls debt payments, etc., and although the United States is not represented on it, American finance has always taken a deep interest in the council's work.

The Swiss Government has appropriated 500,000 francs for the purpose of assisting the emigration as farmers to Canada.

Saskatchewan now stands first in the world in regard to the number of rural telephones per capita, with a telephone for every nine of the

The Canadian Pacific Railway has a survey party in the Rouyn gold-field, plotting a route in case it should be decided to push further northward the line now being built from Mattawa to Quinze.

Construction work on a 39 mile extension of the Acme-Empress line running from Drumheller to the Bull Pond will be commenced this year according to statement made by D. C. Coleman, vice-president of the Canadian Pacific Railway.

Organization of the Okanagan fruit growers into a co-operative association has now been accomplished. Among the main difficulties which faced the co-operative advocates was the raising of adequate credit to finance the whole scheme. This has been overcome

The United States bought Canadian produce during February to the value of \$26,719,205 in comparison with \$20,116,356, Canada's exports to the United States in 1922. Exports of Canadian produce to the United Kingdom were \$17,874,260 in February 1923, and \$15,316,265 in February 1922.

Canadian exports of whiskey for the year ending March 31st, 1923, amounted to 339,181 gallons valued at \$2,698,377; for the previous year the quantity exported was 192,910 gallons valued at \$882,729. Ale and beer exported during the past year amounted to 1,454,629 gallons, while for the previous twelve months the amount was only 421,-960 gallons.

Making Canada Europe's best and quickest road to the Orient means much to this country and the Canadian Pacific Railway, in rearranging its route from England or France to Japan so as to reduce the journey by four days, has made the route more than ever a serious competition of travel via the Suez Canal. About 10,000 miles in 21 days is better than even Jules Verne thought of.

A silver tag attached to the dorsal fin of a salmon before its release after the eggs have been removed at the Dominion Government hatcheries is one of the methods resorted to by the Fisheries Department for tracing the life history of the fish. A reward of \$1 is paid by the Department for the return of silver tags that are being attached to Atlantic salmon, together with scales from the side of the fish, and particulars regarding their length, weight and place of capture.

With a view to developing tourist resorts along its line in Central and Western Ontario, the Canadian Pacific Railway will erect Bungalow Camps after the style of those successfully operated in the Rockies.

The first three will be built in the Nipigon, French River and Lake of the Woods districts, and should be ready for occupation by July 1st. The low cost of construction and maintenance will make it possible to charge much lower rates than the standard hotel, and the camps will prove a boon to those of moderate means who desire to spend a week or more or less in the out-

STICK TO ONE BREED.

ss of Mind In Breeding Live

Stock is Fatal to Success. As the landscape speeds past while me travels by road or rail, it is disappointing to see a different breed or cross of cattle on practically every other farm. This practice causes more loss to the live stock industry than any other, owing to its almost universal adoption over very large

areas. Not only is it a great national loss, but it never gets the individual farmer who adopts it, anywhere near success. Neither goes it give any inspiration to his family to stay with fertility, Experiments have shown an industry that is fascinating, nealthy and promable, when undertaken where pure-bred or intelligently breu neids are kept. If a person would make up his mind as to wnat oreed of animal was desired, and then use the best sire available for that breed there would be a possibility of greatly improving the breed.

many farmers, and they tollow it by soil improvement crops whereby the another to head their nerds. They are rarely able to give a dennite reason for their separate choices, or what they expect from the operation. Many of the prevailing popular ideas exaibit a lack of knowledge as to, where the crossing of breeds will land. This lack of knowledge is all the more remarkable seeing that there are hundreds of cases in any county or section to show that it means retrogression, rather than progress.

The writer visited a tarm lately where a farmer tried the "in and out" game between the dairy and beef breeds of cattle. He had a herd of good useful grade dairy cows, and when the boom came to beef cattle, during the war, he used a Shorthorn bull on these dairy cows. Before he reached anything definite the price of beef had dropped and mila was commanding a more profitable price. He is now using a very poor specimen of a Holstein bull on the crosses the beer bull gave him, and the progeny are miserable specimens, that will produce neither milk nor beef. The results of tinkering with dif-

ferent breeds always ends in a mongred herd, neither good to look at nor profitable at the pail or feed lot. The first generation of a cross may prove satisfactory, but carried beyoud the first generation it is inevitably a failure. A farmer cannot keep two pure-breeds profitably for the purpose of crossing, when the progeny are unsuitable as breeding cattle.

If a man has a fancy for dairying, he should choose the breed which appeals to him and best fills the demands of the market he intends to supply, then always use a nerd sire of that breed, and carefully select the heifers which are to be retained in the breeding herd. It is always found to be much more promable to stay with one breed than to be continually switching.

Every stockman should aim at improving his herd or flock, and to do this it is necessary to stay with one breed, use the best herd sire of that breed available, carefully select the breeding female, and feed a ration promote thriftiness and maximum development. — Maritime

There is no soil so rich that it can stand the long continued practice of summer fallowing without decline in that when summer fallowing is practiced, five times more nitrogen is rendered soluble and available than is required for the crop. The occasional There is a fickleness of mind with vegetable matter. Cultivated and soil is kept in use have largely taken the place of the summer fallow on many of the best operated Ontario farms. Rotation of crops and afterharvest tillage well practiced eliminate to a large extent any necessity for summe: fallowing.-L. Stevenson,

Mineral Feeds Prevent Breakdown In

Swine. Through the feeding of mineral supplements to swing it has been found possible to prevent much of the loss caused by breaking down of hogs before or when they are sent to market.

Hogs that are given chimmula, tankage or leguminous pasture commonly possess strength of bone sufficient for heavy feeding. Feeding additional mineral supplements, however, increas s the strength of bone. Bonemeal flavored with about ten per cent. of tanking and fed at the rate of one pound per day for each 100 pounds of live weight fulfills the necessary mineral requirements. The need for feeding mineral supplements comes under artificial conditions, as when hogs are confined in dry lot, or where they receive but little legumunious roughage, and for

pure-bred brecaing ammula Peiniers on Cooperation. Farmers never co-operate because
