ROBBERS' CAR FOUND.

First Clue Discovered in Darling Robbery Case.

TORONTO, July 30.—One definite step toward the solving of the \$32,000 bank robbery mystery, which had its inception when six desperadoes held up fourteen bank messengers at Jordan and Melinda streets, on Tuesday morning, came last night, when headquarters police recovered the big Studebaker Six car used by the gang from an isolated barn on the Dunlop Farm, about ten miles northeast of the city limits. The car was found by W. R. Sexton, 114 Grenadier road, while he and two friends were out for a stroll on Sunday evening. The Dunlop farm is situated on the Don Mills road. Examination of the car revealed two of the stolen bags, one of which was bloodstained on the inside, indicating that one of the robbers was wounded in the fight. The bags also contained a large number of bank cheques, all from the Sterling Bank and the Bank of Nova Scotia. The car, which bears the license number "38-107," is a maroon or wine color about the body, with black mudguards, which no doubt accounts for the conflicting reports regarding its color by eye-witnesses of the hold-up. On the left-hand side of the car, at the rear and a few inches above the gasoline tank is an indentation, made by a bullet, right of the glass lights in the back of the cover is gone. That the car was particularly noted on the day of the robbery is evident by the fact that it bears the several peculiarities reported to the police, on which the description, flashed broadcast, was based. It has a broken glass in the rear lamp, a strip of paint on the left-hand front door, has a torn side curtain of left-hand front side, and is missing a handle on the left-hand rear door. The interior of the car was littered with old papers and the strings and seals cut from the cotton bags in which the cash was contained. The front and rear license plates were tied in place with bits of tape, and the original number of the car at the time it left the cover of the crime was "34-334," it indicates that the plates were changed while the robbers were in flight.

MUST AVERT TIE-UP.

Americans Are Strongly Against Another Coal Strike.

WASHINGTON, July 30.—The attention of both the operators and the miners to the great responsibility involved in the precipitation of a strike in the anthracite coal industry was called Saturday by the United States Coal Commission through its chairman, John Hays Hammond. Although without authority to act in the matter, the commission has decided to exercise the right of speaking for the public in view of the impasse between the miners and operators. Members of the commission, frankly alarmed by the situation, and, in the absence of the President, have decided to marshal public opinion to force a settlement. Chairman Hammond, explaining the policy of the commission, expressed confidence that a satisfactory result will be reached. "I cannot believe," he said, "that either party to this controversy will be willing to undertake the grave responsibility to the public involved in bringing about a strike." If this optimistic viewpoint should be dispensed by events, the commission plans to write a letter to both miners and operators, making this viewpoint more pointed. The letter would voice the right of the public to be heard in the controversy and to be spared the distress involved in further stoppage of coal production. Forcible operation of the mines by the Government if another coal crisis occurs was advocated by Representative McLaughlin.

Lineman Electrocuted.

GALT, Ont., July 30.—The first fatality in connection with the local electric system since its introduction here, in 1888, occurred Saturday, when William McKeel, aged 21, a local Hydro lineman, was electrocuted on Cambridge street, while stringing new wires, receiving a shock of 13,200 volts.

Why he went to the top of the pole among the high voltage wires will never be known. His work was on a lower arm and he knew the top wires were live. He was noticed by fellow linemen on the next pole with an arm around the high voltage wire and then to fall into the wire below. The current throughout the city had to be shut off, while linemen with rope and tackle lowered the body, and while doctors and Hydro men used resuscitation methods on the body for three hours, they failed to restore life.

Deceased was an experienced lineman, having been engaged at the work for five years.

Bushels of Grain in Bins. To compute the number of bushels in bins multiply the length by width and depth, and divide the number obtained by 1 1/2. This gives the number of bushels.

If figuring on ear corn, divide by 2 1/2 instead of 1 1/2 as for small grain or shelled corn.

A common farm wagon box, 16 feet long and 3 feet wide, will hold about 3 bushels of grain for every inch in depth, that is, a box 18 inches deep will hold approximately 54 bushels.

EARL BEATTY IS ANGRY

May Resign From Post of First British Sea Lord.

He Wants Admiralty to Be Given Control of Naval Air Force—Controversy is Causing Trouble in Politics and It Has Now Spread to the War Office.

LONDON, July 30.—Further conference has failed to mollify the Sea Lords, who are demanding that the Admiralty shall be given complete control of the naval wing of the air service. Earl Beatty is leading the revolt against the decision of the Imperial Defence Board that the present system of one force shall be maintained. It is claimed that the unification of this, the youngest, force, is merely temporary and is designed only to allow of its rebuilding following the war. The Sea Lords declare that efficiency is impossible unless this branch of the force is developed through the navy, with the resulting understanding of naval strategy, tactics, customs, traditions and discipline.

The controversy has spread to the War Office, where the general staff demands control of the army branch of the force, but this position is not serious compared with that existing at the Admiralty, where it is freely stated, if opposed on this question, Lord Beatty and others will resign. It is anticipated that the Prime Minister will announce the decision of the Cabinet in the House of Commons next week, when it is probable that the recommendations of the Imperial Defence Board will be upheld.

There was acute tension in the matter during the early part of the present session of Parliament, when Bonar Law, then Premier, announced that the question would be referred to the committee on Imperial Defence, whose decision, it was understood, the Admiralty had agreed to accept.

WOULD BE ACT OF WAR.

Ottawa Officials Do Not Think Wrangal Will Be Solved.

OTTAWA, July 30.—Officials of the National Defence and Naval Departments refused to give serious consideration to a despatch from Moscow, Alaska, to the effect that the Siberian Government was fitting out an expedition at Vladivostok, to wrest Wrangal Island from the party of British explorers now in possession of it.

In the Home despatch it was stated that the Russian expedition was prepared to capture Alan Crawford, of Toronto, and his companions, who are holding the island in the name of Great Britain. This, officials of the National Defence Department claimed, would be equivalent to an act of war.

They did not believe that the Siberian Government, even if it did contemplate sending a vessel to the island would interfere with the party now in possession of it.

That a vessel might be sent to the island upon a peaceful mission by the Siberian Government, officials of the National Defence Department considered possible. But they did not believe that any arbitrary steps would be taken to enforce Russia's claims to the territory pending the outcome of the consultations between Vilhjalmur Stefansson, the explorer, and the British Government, in regard to the ownership of Wrangal.

Negro Burned at Stake.

YAZOO CITY, Miss., July 30.—While Minnifield, a negro, was burned at the stake here Sunday by a mob, which accused him of attacking a white woman twenty miles south-east of here with an axe early Saturday night, inflicting wounds, which physicians believe will prove fatal. Minnifield and another negro were captured by a posse in a swamp. According to members of the posse, the other negro, who escaped, declared that he stood outside the woman's home while Minnifield went in to attack her.

Minneapolis was taken from the posse by a mob, brought here, tied to a stake and burned to death.

A posse took up the pursuit of the negro who escaped and who is said to have made the alleged confession involving Minnifield.

Captain Fainted.

KINGSTON, July 30.—As a result of Captain Le Shay becoming ill and fainting at the wheel, the ferry steamer Missisquoi, when en route Friday from Clayton to Gananoque, went ashore with some passengers on board. The vessel ran for three miles without a guiding hand, and ran on the rocks on Granite Island. She was released by the steamer Isabella H., and will come on to a drydock here for repairs.

Troops Leave Cape Breton.

SYDNEY, N.S., July 30.—Although local authorities still profess ignorance of any general order for the military evacuation of the island, several hundreds of troops have started for the mainland in special trains during the past twenty-four hours.

Chatham War Memorial.

CHATHAM, July 30.—Construction work on the new war memorial will be commenced within the next few days and the work will be rushed to completion. It is expected the unveiling will take place on Armistice Day. The new memorial will cost \$15,000.

Man charged with robbery in Toronto hotel caught at Hamilton.

50,000 Harvesters Wanted

"Tare Going"—\$5 to WINNIPEG. "Tare Returning"—\$3 from WINNIPEG. 1/2 cent per mile Winnipeg to destination. 1/2 cent per mile starting point to Winnipeg.

BANK OF HAMILTON

JARVIS BRANCH—J. H. Brown, Manager
Nanticoke—Tuesday and Friday

AGRICULTURAL industry is perhaps the field in which the greatest amount of business has been done by the Bank of Hamilton. This experience, coupled with close relations with every other productive and distributing business in the Dominion, has placed us in a unique position to consider intelligently the legitimate requirements of all kinds of Canadian business from the St. Lawrence River to the Pacific Coast.

Canada Faces the Future With Confidence

CANADIANS have always been noted for courage, optimism and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themselves to become croakers and grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest agricultural products.

Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made a good living and brought up their families. It meant hard work, but today they are independent.

Money in Mixed Farming

In recent years, at different points on the prairies, oats fed to steers have brought from 70c to \$1.07 as against the Fort William price of 42c per bushel, while barley used for the same purpose has brought as high as 99c as against the Fort William price of 57c per bushel. Farmers marketing their coarse grains in this way lower marketing cost, have a sure market and make money on their grain, while at the same time they market their roughage, otherwise often wasted.

The cattle embargo is now off. Steers are worth more money and certain to make good money for the Canadian farmer from now on.

Money in Pigs

The Dominion Experimental Farms have proved by actual test that there is a profit in feeding pigs. Last year at the Central Farm, Ottawa, after paying for feed, labor, interest and depreciation, the net profit per pig was still \$4.63.

Profits from Sheep

As money-makers, sheep are hard to beat. In every Province from Prince Edward Island to British Columbia are found many flocks returning generous profits to their owners.

Poultry Pays

Poultry makes money for those who adopt modern methods, whether East or West. Little Prince Edward Island markets co-operatively in carlots, shipping annually upwards of one million dozen eggs. The British Columbia Co-operative Poultry Men's Exchange markets in the same way, thus saving ruinous glut in their local market.

There is a market for good Canadian horses, whether light or draught.

Grow Seed

Canada's Northern grown seed possesses extra vitality. There is a large market for it to the south. Canada exports seed potatoes, but imports other seeds. She has the opportunity to grow seeds for herself and for export.

The Future

Ten years from now the pessimists of today will have been forgotten. Britain has removed the embargo against our cattle. She wants our beef and bacon, our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this country.

Canada has the men, the climate, the land, the stock and the potential markets necessary or agricultural success. Let us farm with all the industry and science we can muster. Let's get to work and pay our debts. Canada is moving forward with confidence in its future. Let us keep going ahead.

Have Faith in Canada
